The reputation and guarantee of dependable goods made by a leading manufacturer is an invaluable asset to all jobbers and dealers—take advantage of this prestige by stocking Williams' "Vulcan" Drop-Forged Lathe Dogs. Bent and Straight Tail, 1 or 2 screws, 16 sizes, 3/8 to 6 inches maximum capacities.

There are many interesting facts in our Machinists' Tools Booklet; write for it.

All Alike

Absolute uniformity is only one of the big merits of every "W & B" Hammer in every class.

Aside from perfect drop-forging from the right grade of steel, all "W & B" Hammers are accurately balanced, finely finished and correct in every detail.

If you lose your hammer or change your shop you can get another "W & B" that will fit your hand and work just like the old one.

Machinists, Ball Pein, Straight Pein and Cross Pein Hammers in octagon pattern with selected white hickory handles are ready for immediate shipment—made in Canada.

Our hammer line is complete.

HYSLOP BICYCLES

ESTABLISHED 1889. That's a pretty safe guarantee in itself, but the prestige and standing of **HYSLOP BICYCLES** rest on more than age and long establishment. They have been kept constantly abreast of the times—if anything, a little ahead of them — and always good quality, embracing strength, ease in riding, stylish, racy frames, Dunlop tires, Gough saddles, and other high-grade equipment, have served to make them a standard, and first choice of bicycle riders. **They SELL as easily as they RIDE.** We will appreciate an opportunity to submit catalog or prices, or both.

TRADE MARK THE HYSLOP HYSLOP BROS LIMITED TORONTO REGISTERED 1896

Made in Canada **Wholesale Only**

HYSLOP BROTHERS LIMITED TORONTO

Time to Order FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible —their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They se themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

Your Jobber Can Supply

NORTH BROS. MFG. CO.

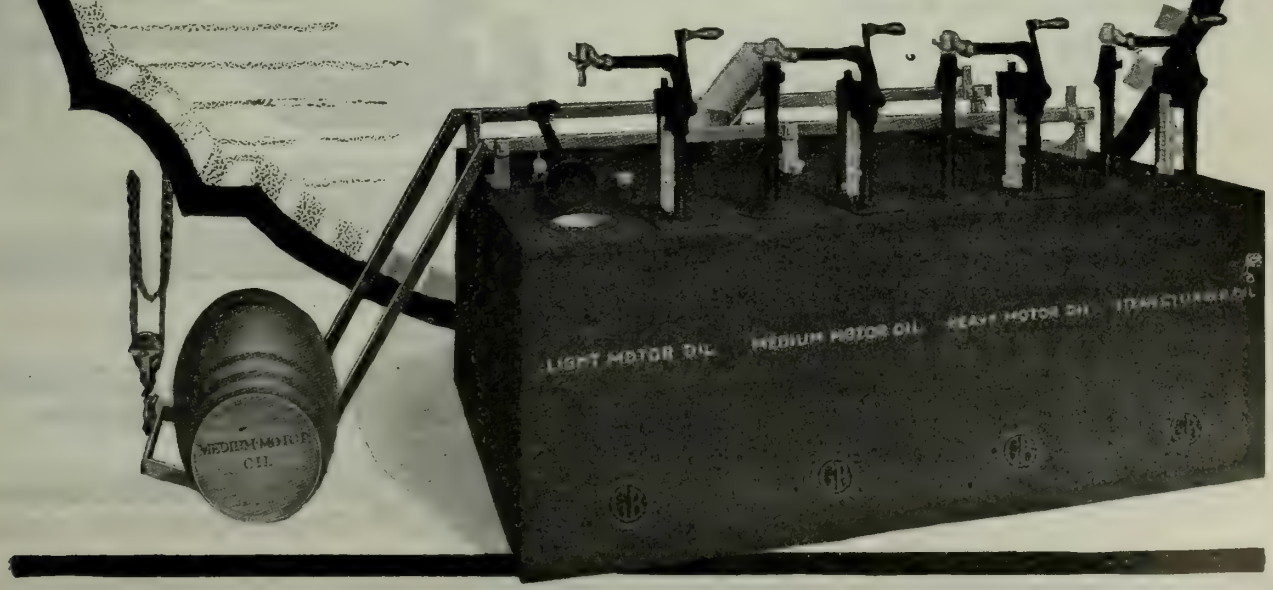
Cleaner Oil, Economically Handled
No Waste, More Profits.

This sums up the advantages of the dust and dirt-proof, leak and waste-proof battery of

GILBERT & BARKER

T-230-L Lubricating Oil Output



It replaces the fire risk, mess and waste of barrel storage, with safety, convenience and economy. The oil is kept absolutely clean and cannot evaporate. The modern hardware dealer is making additional profits catering to the automobile trade.

This outfit can be put in the rear of the store, quickly available to serve the auto trade with oil. A barrel track and chain hoist enables any man to drain a barrel with ease and despatch. It's such a good investment, making for such positive economy and additional profits from the handling of oils, that it soon pays for itself. At least this has been the experience of thousands of users.

The BACK Door should be

A "KASEMENT" DOOR!

The back door gets more hard usage than any other door. It is usually close to the kitchen where the flies are thickest. Therefore, a good, strong door is needed for the back—one that will not sag—but fit snugly at all times—and keep out the flies. Make a profit by selling "Kasement" doors for the back as well as the front.

EXTENSION BOTTOMS

Kasement Extension Bottom shown at the left, makes it possible to extend any stock Kasement door from 3 to 7 in. This is especially designed to take care of those brick houses which have the very narrow door step, about 5 or 6 inches above the floor.

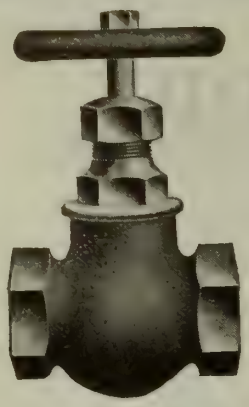
Did you get your copy of this book?

IT only takes a postcard to bring it to your counter. It is intended partly for your convenience in ordering electrotypes for your local advertising, and partly to show what we are doing to help you sell more AutoStrop Razors.



As the introduction says, "We believe it is to your interests to know what our advertising is to consist of before it is published. The advertising of a manufacturer is the maker's pledge to the consumer. In fairness to the dealer it appears to us that no prospect should be permitted to read an ad. before it shall have been read by the one whom the prospect shall interview---the salesman---therefore, it is of vital importance that your selling staff be as, if not more, familiar with the points expressed in the campaign than the prospect will be."

If you have not already received a copy of this book, send for yours, read it, have your clerks read it, and then take advantage of our publicity plans in this and other ways which will naturally suggest themselves to you.

A Plan For Selling *more* Polarine Motor Oil And Increasing Your Profits

Become the Oil authority in your locality

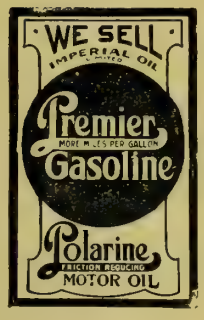
Read our Booklet—"Polarine for Automobile Lubrication," and thoroughly inform yourself on the importance to the engine of the right lubricating oil. Know accurately the correct grade of oil for every use.

Correct lubrication of engine parts is essential to the life and satisfaction of every motor car.

Let your knowledge be known

Help every customer in selecting the correct grade of Polarine for his car. Display the Red Ball Sign prominently. Be headquarters for Imperial Polarine supplies and lubricating information.

Motorists appreciate the thoughtful interest and attention of dealers who endeavor to save them money.



Polarine
FRICTION REDUCING MOTOR OIL
"Makes a good car better"

Carry the complete Imperial Polarine Line

Do not content yourself with having a mere assortment of the various size packages, have plenty of each size so that an unexpected rush of business will not find you understocked. Have the size package the customer wants in the grade he needs.

Customers who have used Polarine have received satisfaction—no trouble. They want the same grade again—nothing less will satisfy them.

Point out to customers who have a private garage the economy and convenience of the 12½-gallon steel keg. If there is a body of water near you, motor boat enthusiasts will appreciate information on the larger size. It's often a ***hard*** road to the dock.

Display the Red Ball Sign Prominently.

It attracts trade.

Increased sales increase Percentage of Profit

When you have developed this larger business you will turn your stock more often and buy in larger quantities, thus taking fuller advantage of quantity discounts.

Imperial Polarine comes in three grades for cylinder lubrication—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A. There are also Imperial Polarine Oils and Greases for effective transmission and differential lubrication. Put up in attractive, lithographed, sealed cans — half-gallon, gallon and four-gallon. Larger quantities in 12½ gallon kegs, half-barrels and barrels.

Write for Polarine Booklet on Automobile Lubrication. Address us at 56 Church Street, Toronto, and get our dealer proposition.

Sask. R.M.A. Convention Great Success

Enthusiastic Gathering Starts Convention Off With Enthusiasm. Very Satisfactory Conditions Represented by Financial Statement. Money and Membership Both Increasing. Some Interesting and Important Discussions

By Special Representative of Hardware and Metal.

EARLY Tuesday morning of convention week the delegates to the Saskatchewan convention of the Retail Merchants' Association began to arrive, and the convention hall presented a busy scene, marked by enthusiasm and high spirits, that promised well for the success of the gathering.

Early in the session some interesting questions were considered, and a brisk discussion, tinged with flashes of humor, was the order of the day.

Among the points discussed was the suggestion to hold the next convention at the Coast, a suggestion that was received with a good deal of favor on the part of many of the delegates, though the final decision was left to a lates session of the convention.

The prevalence of guessing contests in the West in connection with the retail store aroused a good deal of interest, and the methods of a firm located in Regina, which stages a gigantic guessing contest, was gone into in detail. It was shown that for the sum of $50 the merchant would be supplied with guessing coupons on a bowl of beans, either in Saskatchewan or Regina, depending on whether he was in the northern or southern portion of Saskatchewan. Although one large firm in Regina received their contract gratis in order to act as a bait to the rest, it is estimated that at least 500 dealers fell for the scheme to the tune of $50 apiece. If this estimate were correct it would appear that with the $25,000 realized Chevrolet cars could very well have been afforded, one for the south and one for the north. The infinitesimal chance of any one of the customers of drawing that car may be imagined. The convention recommended most strongly that the Government take whatever means necessary to make any kind of a straight guessing or gambling scheme in connection with business illegal.

The mail order houses were touched on when deprecating the fact that some manufacturers, though they depend on the legitimate retail trade for the major portion of their distribution, will still put the mail order houses on their jobbers' list, and thus assist in unfair competition with them.

Favor Credit Business Rather Than Cash

Considerable discussion was given to the problem of conducting retail business on a strictly cash basis. It seemed to be the consensus of opinion that this was strictly a matter for each merchant's individual decision. One speaker stated that while indiscriminate credit was, of course, absolutely ruinous, that a legitimate credit business can be done by those who keep closely in touch with all accounts, and that a pointblank refusal on the part of retailers generally to extend this accommodation to those of their customers who were good risks would simply be playing into the hands of the mail order houses. This was specially true as regards rural communities, in that farmers especially would find it very inconvenient to pay for each item as they received it; in fact, if they were required to do so, they would be more likely to use the catalog.

MAYOR BLACK

of Regina, who welcomed the visiting delegates on behalf of the city.

Loss on Gasoline

The hardware merchants and those of the grocers who operate gasoline stations complain that they have had great difficulty and considerable loss owing to the present system by which they buy their gasoline by weight and dispense it by the gallon. One retailer stated that the last filling of his five barrel tank, even though sold carefully, for checking purposes, showed him a loss of 15 gallons. One of the gasoline companies explained that the average merchant did not realize what a volatile substance petroleum product was. A change of 20 degrees F. in temperature resulted in a 1% diference in volume above or below 60 degrees F., at which temperature presumably the barrels were filled. The association would recommend as a remedy to this that the gasoline be sold by gallons, as the specific gravity explanations seemed to always break the wrong way for the retailer.

The members of the association apparently view with concern the number of bank mergers which have been effected in recent months, and seriously deprecate the concentration of capital and credit in the hands of a few.

To Make Weekly Half Holiday Provincial Enactment

It was also decided that the Government be approached with a view to making the weekly half holiday a Provincial enactment instead of, as at present, a local matter, the decision as to the most suitable day on which to close being, of course, left for settlement by local option.

H. D. McPHERSON

Retiring President of the Saskatchewan Retail Merchants' Association, who presided at the Convention in session at Regina last week.

The Address of Welcome

His Worship Mayor Black, in welcoming the delegates, stated that it had been his pleasure to welcome the citizens of the other prairie cities and municipalities on many previous occasions, and under the auspices of many different organizations. These "get together" movements, which had become so popular with all different trades and associations, were having no small effect in cementing all communities into a fellowship of good will and mutual understanding.

He stated that he felt sure that though the general public were greatly exercised concerning the high cost of living, and would eliminate all other persons except the consumer and the manufacturer, whom they generalized under the all-embracing title of "the middlemen," this convention, among other results, would tend to educate the public as to the valuable and very necessary service which the retailer, in every line of merchandising, gave for value received.

That day has passed in which anyone with the necessary capital can launch out into the retail business, be it grocer, hardware, dry goods, men's wear or any other line, and conduct it profitably and satisfactorily without practical experience. Each retail trade has become a science, and the successful merchant has learned that conventions such as this, and his trade papers, are the secrets of keeping up with the march of progress.

"You have much, gentlemen, to discuss. I am sure that we consumers demand much more service than we understand. We demand elaborate deliveries. We demand plate glass windows and expensive fittings. We demand our food put up in very artistic and very expensive manners. To give us what we want, and at the same time attempt to reach our ideas of what we should pay for it, is your very difficult problem. I am sure that these and many more problems will be nearer solution when this body have subjected them to their discussion."

The President's Address

H. D. McPherson, the president, in his opening remarks, expressed regret that the illness of A. A. Evans, honorary president, had made it necessary for him to discontinue his former business activities, and to seek a less rigorous climate.

After touching on the progress made in membership, Mr. McPherson continued: "One pleasing feature in this connection is the increased interest taken in our work by our members in general. They are more and more coming to look upon the association as a clearing house for all their troubles, as is evidenced by the ever-increasing amount of correspondence covering a great variety of subjects, some of which tax the ability of those of us expected to deal with them, to the limit. In order to meet this situation it has been necessary to increase the staff in the provincial office from time to time, until now eleven people, including the secretary, are employed and their time is fully taken up day in and day out. We also found it necessary last fall to engage the services of another organizer, whose full time is devoted to the Province of Alberta, thus giving our two men in Saskatchewan more time to talk over matters in general with our members in this Province. This makes a total of fourteen persons in the employ of the association, which fact in itself is some indication of the growth of the organization since the start of our work in 1913, at which time the secretary, with one stenographer, and an organizer, constituted the entire staff. In spite of these increases in staff and also slight increases in salaries, and although our membership fee has remained the same since 1915, when it was raised from ten to twelve dollars, we are still able to show a balance on the right side of the ledger.

"At our last convention the formation of District Advisory Committees was suggested, it being left with your executive to put the arrangement into effect, which was done. The Province was divided into four districts, and a chairman appointed in each district, with whom it was left to select his own committee, with the exception that a retail implement dealer was named in each case to act on the committee at the request of the executive of the Implement Dealers' Trade Section.

Better Organization Needed

"We feel, however," he continued, "that the time has come for a more complete system of organization, which involves the formation of district branches with a permanent paid secretary in charge of each branch, who will give his entire time and attention to the work of the association in his particular district. While this may mean an increase in the provincial membership fee, your executive is of the opinion that the returns from the improved service that will be available to the merchants individually and collectively, will far more than offset any additional cash outlay that may be necessary. An additional advantage will be that we will be able to get a better expression of opinion on any matter of importance with which we have to deal. The full details of this plan will be placed before you for your consideration during the course of this convention.

"At a meeting closely following our last convention, James Clinkskill and George Hazen, of Saskatoon, and R. A. Magee, of Wolseley, were named to act with your executive in making representations to the University of Saskatchewan regarding the establishment of a course in Commercial Education. At a meeting held in August, between this committee and Dr. Murray, president of the university, the matter was thoroughly discussed with the result that Dr. Murray agreed to recommend to the University Senate that the course be established, and we are, during this convention, to be favored with a series of lectures by Mr. Frank Stockdale, retail commercialist of Chicago, who has been engaged by the university for the purpose. It is the intention of the university to instal a regular course in Commercial Education as soon as a suitable man can be found to conduct it. In the meantime an effort will be made to secure the services of some person qualified to fill the position, to travel through the Province on behalf of the university, for the purpose of addressing the merchants locally and giving what asistance may be possible in the interests of better business. Our thanks are due to the university authorities for their action in this respect and it is to be hoped the business interests generally will co-operate with them in making the undertaking a success. In this connection I would like to mention that I think we should have a committee on Commercial Education representing all branches of commercial undertaking instead of the committee being confined to retail merchants alone. This, it seems to me, will have the effect of making the courses more far-reaching in their effect, to the ultimate advantage of all concerned.

"In December last a general meeting of the retail implement dealers of the Province was held at Regina, at which many of the grievances peculiar to that business were thoroughly discussed and ways and means devised by which they might be overcome. Part of the day was devoted to a meeting with representative wholesale implement dealers from Regina and Saskatoon, before whom many of the injustices with which the retailer has to contend were placed. Facts and figures showing an intolerable state of affairs as regards the margin of profit allowed on the sale of agricultural implements and repairs had been prepared, and were placed before the meeting at this time. The wholesalers admitted the unfairness of existing conditions, but were not prepared to offer any solution. They asked for a copy of the resolutions that had been placed before the meeting and suggested that another meeting be called after they had been given a chance to consider them. In the meantime, and up to the present, our provincial office has been giving a great deal of attention to this matter with

J. L. S. HUTCHISON,

Who presented the very satisfactory Treasurer's report of the Saskatchewan Retail Merchants' Association in Convention at Regina this week.

a view to meeting the wholesalers again at an early date.

"Our success in bringing this or any other matter affecting any other line of trade, to a successful conclusion, lies to a very large extent in point of numbers. If we have the merchants back of any such undertaking, not only as members of the association, but with their moral support as well, we can accomplish almost anything we set out to do. This is a fact that does not seem to be appreciated as much as it should be, and merchants generally are too often satisfied to "let the other fellow" fight their battles, when as a matter of good business, they should look upon any effort to improve conditions as a personal affair, requiring personal attention, —which means that if a general meeting of the merchants engaged in any particular line of business is called, each one should make a point of attending even at some sacrifice if necessary, so that those with whom we have to deal may see that we mean business.

"Just previous to the last session of the Provincial Legislature your executive met the Government ministers and laid before them our requests for legislation we were anxious to have passed at the forthcoming session of the House.

"These included an amendment to the Village Act regarding assessments. Previous to the second session of 1917 it was left optional with a village council as to what form of taxation they adopted, that is, whether a single or a general tax, but at the session it was made compulsory for them to adopt a general tax on lands, (100 per cent.), buildings and improvements, (60 per cent.), personal property (100 per cent.), and income. According to information received by the association this worked an undue hardship on many merchants, increasing the amount of their taxes by several hundred per cent. We requested that the amendment be repealed and it again left optional with the village as to what they do in this respect. We were not successful in having the amendment repealed, but an additional amendment was passed exempting personal property including stock in trade, and fixtures in connection with the business in cases where a merchant is paying a license fee in respect to his business. This is of no advantage, however, as the Village Act does not contain authority for the council to license retail businesses. This matter will receive further attention.

To Regulate Hours of Trading

"We also requested that the Village Act be amended, giving the council authority to pass a by-law regulating the hours of trading including provision for a weekly half holiday. We are pleased to say that this amendment was passed, and the village council may now put such a by-law into force upon receipt of a petition signed by 75 per cent. in number of the occupiers of shops in the village.

"One other item of legislation in which a great many of you will doubtless be interested," Mr. McPherson continued, "and one which has received a considerable amount of our attention during the past three years, is that of an amendment to the Chattel Mortgage Act regarding the status of chattel mortgage on the growing crop, or a crop to be grown, covering the purchase price, meat, groceries, flour, clothing and binder twine. We understood at the time this legislation was passed in 1916 that this mortgage would take precedence over any other claim, except seed grain liens, and were so sure of our ground that we entered an appeal against a decision that was given in one of our district courts contrary to our understanding of this matter. We lost out in our appeal and consequently approached the Government again requesting that a crop mortgage be made a prior claim, second only to seed grain liens, and you will be pleased to know that this is now the case—that is to say, one of these mortgages now takes preference over any other claim except seed grain liens and seed grain advances under the seed grain advances passed at the last session, whereby any mortgagee of land in Saskatchewan may make advances to the owner of the mortgaged land to enable him to purchase seed grain for use in sowing the land for the crop of 1919,—the advance is not to exceed $250 on any one quarter section, and where the

F. E. RAYMOND,

The energetic Secretary of the Saskatchewan Association, who has been largely responsible for making the Convention such an unqualified success.

mortgagee makes such an advance he may add the amount to the mortgage. In view of the extensive use being made of these crop mortgages we are sure that the fact that they now rank as a preferential claim will be appreciated.

"During the past number of years, since the beginning of our work as an association, we have been holding annual general conventions which have been appreciated more or less by those who have attended them, but at the same time at a convention of this nature there are bound to be subjects up for discussion, which while they may be vital to the interests of some one or perhaps two sections of trade, are of no interest whatever to the others,—consequently they do not become interested or do not feel that they have any part in the discussion. In order to overcome this and to make our conventions more interesting, it has been proposed that we hold trade section conventions,—for instance a convention of hardware dealers; a convention of jewelers, etc., etc., at different intervals throughout the year, which perhaps need not take up more than a day or two days at the outside. It is felt that this method will not only prove more interesting but that it will be much more beneficial to all concerned. I am merely mentioning this now. You will see by your programme that this matter and that of the formation of district branches will be up for discussion on Wednesday morning."

In conclusion, Mr. McPherson said: "I just wish to say that while we consider that we have made fairly satisfactory progress during the past year, we believe that the programme we have mapped out for the future will, if adopted, be the means of not only creating greater interest in our work, but it will enable the association to render a more efficient service in every way to its members, and not only this, but we feel that our service will then be such that no retail merchant would think of remaining on the outside.

Increases in Money and Membership

J. L. S. Hutchison, in presenting the financial report of the association, stated that the association had ground for satisfaction in the very satisfactory showing that it had been possible to make during the past year. So satisfactory had conditions been that the financial year closing December 31, 1918, showed a surplus of $3,211.63. Not only had the association prospered in a monetary sense, but it had also shown a very encouraging growth in membership, and in the interest taken in its various activities. At the end of 1917 the total enrollment showed a membership of 1,590, while the present membership was well over 2,100, a significant indication of the way the association was finding favor with the retailer. The comparative statement of the past two years also indicated a very satisfactory growth.

December 31, 1917—		
Assets	$4,615.84	
Liabilities	1,190.79	
Balance		$3,425.05
December 31, 1918—		
Assets	$8,328.74	
Liabilities	1,692.06	
Balance		$6,636.68

The Financial Statement

The current financial statement which was then presented more than anything else went to show the very substantial position which the Saskatoon branch of the association now enjoyed.

The report is as follows:

INCOME

Dues,		
Saskatchewan	$20,624.75	
Alberta	4,586.00	
		$25,210.75
Commissions on collections		856.51
Commission on freight claims		211.00
Convention advertisements	$ 792.50	
Less convention expenses	641.00	151.50
Sundry receipts		54.78
"Retailer," advertising	$ 2,936.28	
Subscriptions	652.50	
	$ 3,588.78	
	2,655.02	933.76
		$27,418.30

EXPENDITURE

Office salaries		$ 7,599.78
Organizers' salaries and expenses		
Saskatchewan	$ 6,149.93	
Alberta	1,645.68	7,795.61
Executive meeting expenses		273.16
Dominion association for dues		2,090.00
Stationery, printing and office supplies		1,633.80
Traveling expenses		587.90
Office rent		685.00
Legal expenses		177.00
Interest and exchange		34.81
Alberta R.M.A. accounts	$ 1,152.69	
Grant to Edmonton local	225.00	1,377.69
Grants to Regina and Saskatoon locals		583.50
Sundry expenses		1,611.03
Depreciation written off furniture and fixtures	$ 173.00	
Automobiles	184.30	357.30
		$24,206.67
Balance, income exceeds expenditures by		3,211.63
		$27,418.30

R.M.A. Fire Insurance Report

Mr. Hutchison, of Saskatoon, gave the financial statement of the Retail Merchants' Mutual Fire Insurance Co. A few of the outstanding features of this report follow:

Net Ins. carried to Dec. 31, 1918	$882,200
Net Ins. carried to Dec. 31, 1917	554,935
Showing an increase of	$327,265
Assets to end of Dec. 31, 1917	$ 30,637
Liabilities to end of Dec. 1, 1917	19,737
Balance, 1917	$ 10,900
Assets to end of Dec. 31, 1918	$ 48,064
Liabilities to end of Dec. 31, 1918	29,032
Balance, 1918	$ 19,031

A substantial increase.

Also another interesting analysis was submitted:

Savings	25.00%
Expense (a low expense)	23.15%
Losses	22.25%
Surplus	29.60%
	100.00%

In any other company than a co-operative, only this 25 per cent. savings would be included as surplus. This arrangement shows that the company is operating on a 75 per cent. basis altogether. In concluding the report of the fours years' operations, Mr. Hutchison expressed confidence in the coming year even exceeding the past records, which had been good.

The Secretary's Report

One of the matters that F. E. Raymond, the secretary, brought up for discussion, at the convention, concerned the joint liability of the husband and wife for bills contracted for the necessities of life. It has occasionally happened that the husband has contracted bills for food, hardware, clothing, etc., even to the extent of several hundred or a thousand dollars, and when approached for payment has frankly stated that he has no money, and, upon investigation it has been disclosed that everything had been made over in his wife's name. The Government will probably be asked for legislation making this particular class of evasion impossible by making both parties individually responsible for such accounts.

Another matter that the secretary brought up for discussion was in connection with the Small Debts Act, the fact of the matter being this, the reading of the Act, "The summons shall be returned not less than six days, nor more than twenty days from date of issue," which simply means that at present a debtor, after being handed the summons, if he is so disposed, can continue to sell his available assets and probably have them all sold before his time limit for making appearance before the J.P. The Legislature will be asked to make some provision, so that in a matter of this kind, pending appearance after the issue of a subpoena, any sales that will affect the collectibility of an account will be illegal.

"Another matter," he continued, "which received our attention was relative to the village assessments. Previous to the second session in 1917, it was optional to each village council which method they employed in collecting their taxes; whether on the single tax basis or on a general taxing scheme. Now, however, it has been rendered compulsory for them to tax lands, improvements, personal property and incomes. The effect, as found among the retail trade, has been this, in the few cases mentioned:

1917 tax, $96, same property 1918, $278;
1917 tax, $76, same property 1918, $279;
1917 tax, $27, same property 1918, $503;
1917 tax, $71, same property 1918, $408;

but possibly the most notable one to show the difference when the rates of taxation on a man's personal property or stock-in-trade was assessed was this: in 1917 $24, 1918 $688. Of the assessed amount $300 was the value put on his lot, $6 000 on his building and fixtures, and $25,000 on that retailing stock.

"Recommendations were made, when the effect of this action became evident, that the Government revert to status quo in this matter. However, the Government could not see their way clear to do this, and asked your association to consider the matter further and submit further schemes. The association at that time asked them then to eliminate stock in trade, which the Government did in this matter.

"An Act to Amend the Village Act:

"14. (s) subsection (3) of the said section 198 is amended by adding thereto the words 'and no person who pays a license fee in respect of a business shall be assessed upon the stock in trade or personal property used in the business."

"They also raised the permissible rate of taxation to 15 mills on the dollar, whereas it had been ten. It will readily be seen that this amendment was a joker, from the fact that the Government does not permit villages to levy a business license. Therefore at present none of the sufferers received that exemption of taxation on their stock in trade. Your association will, however, endeavor to have the Legislature grant the villages this authority when this amendment will become effective. And furthermore, in many cases, the villages realized less than in previous years because the assessed value of unimproved lots was decreased too much."

Mr. Raymond continued: "Another very important matter that is receiving considerable attention is the establishment of regular courses in retail merchandising in the Universities of Saskatchewan and Alberta. The scheme which Manitoba adopted, and which is in its second year, is not considered by the members as suitable for these provinces at present, as it is felt that it would be almost impossible for the various merchants in the outlying communities to spend an entire week away from their businesses. As for a permanent course being established in these Universities, it is considered impossible at present, owing to the faculty not being procurable to conduct such courses. In three or four years there will be graduated from Harvard experts along each line of merchandising, as the result of the courses being conducted there, and the University authorities hope to be able to procure the necessary teachers from that class. In the meantime, it is recommended that the lectures which will be conducted by Frank Stockdale, of Chicago, in the various centres of Alberta and Saskatchewan, following this convention, be well attended by the merchants in those districts, as they will be the nearest approach to the short course in up-to-the-minute merchandising that will be available to them at present.

"Your association has a tariff department at your disposal, where your freight bills, etc., are carefully checked, overcharges located, and damage claims, etc., carried through to completion.

"Your insurance department also is ready at all times to check your policies, and to make sure for you that wordings mean what you understand them to mean.

"Your mutual fire insurance company has made great progress in the last three years, and has given you good protection at 25 per cent. less than board rate.

"We are in hopes at an early date of having this entire territory sub-divided into units of 250 to 300 members, with a paid secretary in charge of your interests in each one. He will, of course, be in intimate touch with all matters pertaining to your business, will have the accurate credit reading reports of all your customers, and this service will untimately almost dispense with the need of a collection system. Our collection system has collected many thousands of dollars for you simply with our first letters to delinquents, which are supplied by the association at a free service to members. Failing any results from this source, the accounts are handed to the association collection department, to be followed up on a commission basis, and even those accounts, which have been considered hopeless, have been made to yield you over $6,000 in the past year.

"We propose also to hold separate trade conventions at different times of the year, at which we propose to have, for instance, hardware experts for the hardware man, matters of concern to jewelers for jewelers' conventions, etc., considering that each trade can go into their various problems more thoroughly when they feel that they are not boring fellow members, who have absolutely different interests.

"I am also of the opinion," said Mr. Raymond, "that merchants in all lines of business do well to read their respective trade papers. The very latest thoughts of the best experts are to be found there.

J. J. Polson Tells of Dominion Convention

J. J. Polson of Regina, the delegate to the Dominion convention, said that while leaving a general survey of the convention to J. A. Banfield, of Winnipeg, the Dominion president, there were a few points which he would take up.

Group of Delegates to the Saskatchewan Retail Merchants' Association, held in Regina, Sask., on May 13, 14 and 15, 1919.

"A new plan of organization was discussed at your last Dominion convention. This matter, he said, has been a matter of discussion and experiment for the last three years. Your executive was asked to submit to you a scheme of dividing the Dominion association into two halves. The Western half would comprise the four Western Provinces, and the Eastern half would, of course, comprise the balance of the Dominion. As far as we in the West are concerned, there are many things coming up for settlement from time to time which we would, of course, consider with more understanding of our own conditions and with much greater expedition. There are, on the other hand, different conditions in the East which would tend to make our Western system of organization too unwieldy to be feasible there. For a time, our Western half here was growing the faster, but now I am pleased to say that the Eastern Provinces are making wonderful progress in organization, and, at the present time, are approaching a membership much more in proportion to their population. In the Western half we would propose to hold quarterly conventions, and hold one, once each year in each of the Western Provinces. This would be of great assistance to your Provincial secretaries, permitting them to sit in at the Western executive sessions, at least, once a year; broadening their views of association work and unifying provincial efforts generally. Another advantage of the conventions being held in turn in the various provinces," continued Mr. Polson, "would be that the merchants in these various centres while not, of course, having a vote, would be able to sit in at these executive meetings and familiarize themselves with what was being done, at first hand."

A very spirited discussion took place regarding this change but, of course as this was a departure that has been worked for several years, no opposition developed and the convention will, no doubt, see this on the way towards consummation.

"There is another fact," continued Mr. Polson, "that should in itself be particularly gratifying to you and no small credit to your Retail Merchants' Mutual Fire Ins. Co., and the executives responsible for its success, in that the Dominion executive were instructed by the Dominion convention to devise plans for the operation of a Retail Merchants' Fire Insurance Company, Dominion wide. It would seem that the East is seeing eye to eye with us in this one question and we have no doubt that some such scheme will shortly be operated."

AN EXCURSION

The Dominion executive also expects to engineer an excursion this year from Halifax to Vancouver. The idea being to have a few hours en route at the various centres to meet the local merchants; to be joined all along the way by as many of the merchants as can arrange to do so and that after arriving at Vancouver, a huge get together convention will be enjoyed for about three days. "In my opinion," said Mr. Polson, "this is a gigantic step in the right direction. The effect of being thrown together in each other's company and conversation for a few days cannot but have a most gratifying effect on us all. At the close of such a convention our Western members and our Eastern members cannot fail to have a greater sympathy and understanding for each other's problems than ever before. Most of the difficulties in organization or co-operation in any line of endeavor are born of ignorance and misunderstanding.

Further reports of the convention proceedings appear on pages 59 to 66. Read what Stockdale, the noted merchandising expert, has to say.

Current Events in Photograph

IS IT ANY WONDER THE HUN IS HATED

We have read a lot one time and another about the robbery and pillage in Belgium, but words do not always give an adequate idea of what has happened. Many farmers had their horses and cattle taken by the Boches, their homes wrecked and so on. Here is a farmer who has to pull his own harrow because the Huns took his cattle.

Large Stores Have Showcard System

Smaller Cards Used for Higher Grade Merchandise — Each Store Should Use Cards Best Suited to Class of Merchandise Carried.

One of a Series by R. T. D. EDWARDS

LARGE American stores have gone into the question of showcarding their stores very thoroughly. They have made a thorough study of it to find out the best kind of show cards they should use, and the way they should be used to be in keeping with the class of trade to which they cater.

As you make a study of each store in the large centres in the United States, you will find that each city and each merchant in each city has worked out their own showcard system.

Large city merchants such as those in New York and Chicago, where a great transient business is transacted, can afford to be more exclusive and use showcards very sparingly; while the smaller city merchant uses showcards more after the order that the Canadian city merchants use.

But all have their own system of showcards, varying more or less. Each of these systems are the result of many years of study in which the showcard writer figures largely. He being the man on the job has been able to make a close study of what his particular store really requires, in order that the best results may be obtained from them. He has had the opportunity of trying out various ideas, both in system and cards, until he has found out what was the best for that particular store for which he worked.

The result has been small, neatly-lettered cards as being the best for the high and medium class store. They leave the large, highly colored, heavily lettered showcard to lower class stores.

You can find some stores using a dark card with white letters, or grey cards with black letters with printed border and white underlining the letters. But white cards are more prevalent, owing to their being cleaner and brighter looking, but, of course, they must be changed oftener in order to keep them clean.

This is the condition that prevails at the present in New York City, and we Canadians can glean many helpful points from our American friends. The main lesson that we can obtain is not so much a copy of their particular style of showcards, or a copy of their particular showcard system, but a copy of their system of finding out what is best for our stores. We should study the conditions in our stores and in our towns and the lines along which the masses of our customers' minds run. With these settled up, work up showcards that will attract and appeal to them. We think that if you work in a store in a small town and you find the brighter cards are best, why, by all means, use them, but do so intelligently. Use the color on the card sparingly and in an artistic manner.

The two samples of showcards illustrated here are not meant to illustrate that which is used in New York, because they are not. They are of a simple style of showcard that is quite effective in our Canadian towns. The lettering and designs, as you will note, are all done on dark surfaces, with various pastel colors. Combinations of blue-grey and cream, salmon pink and white, pale blue, pea green, are only a few that can be worked over these dark colored cards to good effect.

The card with the light, broad border has a cut-out centre, and the dark centre is mounted on the back of it.

The other card has a smooth black surface. This variety also comes in maroon, dark green, both of which can be used to make splendid showcards. On this latter card use a heavy opaque color, so as to ensure the ground not showing through.

SUGGESTIONS FOR SEASONABLE SHOW CARDS

Brushes For All Purposes.

Beat The High Cost Of Living By Having Your Own Garden.

No Fuss, No Muss, No Back Breaking By Using Our Washers.

We Have Everything You Need For House Cleaning.

We Carry A Complete Line Of Auto Accessories.

A Refrigerator Like This Will Be Appreciated By Your Whole Family.

Things You Will Need For Your Garden.

Do It Electrically And Save Time And Money.

When You Clean Up—Paint Up.

Screen Doors And Windows, All Sizes.

Making Your Paint Window Pull

ON every side, one sees the paint brush being wielded and to mighty good effect too. What are the elements which have contributed to this large use of the brush—is it just because people have felt down in their hearts they wanted to get the exercise or give employment or have there been conditions which have influenced this move?

Windows Being Used

One really only needs to walk down the street of his own town or city to get some idea as to how even the casual passer-by is being solicited. The method is the store window and the hardware merchants have been consistently hammering at their customers and prospective customers for the past month or six weeks to good effect.

There is no getting away from the fact that when a merchant uses newspaper space well, he creates interest and business for the lines advertised. The same is true of the merchant who gets the customer in the store and buttonholes him about brightening up the verandah or decorating the interior of the house or whatever it may be—he secures results.

Where Advantage Lies

But there is another contributing element that actually brings in big results if used to advantage. That is the store window. More and more are merchants everywhere realizing the importance of this means of advertising and the attention paid to the attractive arrangement of merchandise is evidence in itself of what those merchants employing the windows think of this means of reaching the public.

For you do reach the public this way. More than being able to tell a story of the goods and quote a price as is possible in the newspaper copy—in the window you are able to show the actual goods themselves. You are able to show samples of the work that can be done—you are in the case of paints able to show the colors and illustrate how large a pint or quart can really is. There are many people who do not know or realize just what may be expected from a pint of paint. That may seem absurd, but when you question your customers on the work to be done and tell them it will take so much, haven't you noted their surprise that it takes so little paint or varnish to attain certain results?

Range of Paint Lines Extensive

And there are so many paint lines to be shown—inside and outside house paint, floor paint, porch, furniture paint, enamels, varnish stains, automobile paints—these can all be shown in the window. Samples of the work that can be done—the colors in which the various finishes can be supplied—the sizes of the containers—the prices at which the different lines are sold—is there any single outside medium which can do so much to direct the customer into the store as the window display?

Shown herewith, is a window display recently put in by the Boniface Hardware of Hamilton, which embodies many good features. It is not a hard window to duplicate—in fact it is not a difficult task to dress a window with paints and varnishes. The cans of paint carry an attractive label—the color cards are bright and lend a cheerful appearance and most manufacturers have additional cut-outs that they will be glad to supply.

The window is a medium for advertising that should not be overlooked. Most merchants use their windows to advantage and the opinions they hold on this means of getting the eye of the public are decidedly favorable. Displays of seasonable merchandise win the attention of the public and the merchant who thus directs people into the store can usually be depended upon to complete the sale when the customer crosses the threshold.

Window display recently put in by the Boniface Hardware of Hamilton. The results obtained have been very gratifying, it is reported.

EVENTS IN THE TRADE

Business Changes

Waldheim, Sask.—J. J. Friesen succeeds S. Peters, hardware.

Aberdeen, Sask.—C. C. Ferguson has purchased the hardware business from the estate of Frank Epp.

Lougheed, Alta. — The partnership existing between Harry Moss and Edgar N. Bullock, doing business under the name of the Lougheed Hardware Co., at Lougheed, has been dissolved by mutual consent. The business is continued by L. O. Shouse and Fred Newberry.

Sault Ste. Marie, Ont.—E. L. Bedford, who has been connected with Cochrane Hardware, Ltd., for the past seven years, has purchased the plumbing business formerly owned by W. B. McKague, and has added a stock of hardware. The firm name will be known as E. L. Bedford & Co., hardware, plumbing and heating. P. L. Walsworth is associated with Mr. Bedford and will look after the plumbing and heating end of the business.

Fire Losses

A disastrous fire occurred in Cobalt, Ont., on Friday last, when a complete block was wiped out. One of the chief sufferers was the Northern Canada Supply Co., whose loss, it is stated, was fully covered by insurance.

Obituary

The death occurred at Fort Coulonge, Quebec, of J. W. Hennessy, of the Coulonge Hardware Co., and the Coulonge Supply Co.

Personal

Joseph Giroux, formerly with the town electrical department, has joined the staff of the Cochrane Hardware, Ltd., Sault Ste. Marie, Ont.

W. S. McLennan of Montreal, general sales manager of the Brandram-Henderson Paint Co., spent Thursday and Friday in Toronto.

George Senior, formerly employed with the Fowler Hardware Co., at Sudbury, Ont., has gone to Capreol, Ont., where he will be on the sales staff of W. Hawkins, who is opening a new store there.

W. F. Hill, who has just completed a trip for the Kasement Skrene Door Co.; Toronto, in the northern parts of Ontario, has returned and states that business is good and the trade is very optimistic in all parts of Northern Ontario.

John Brennan recently returned to his home in Tweed, Ont., and has been engaged to take charge of the tinsmithing department of the Tweed Hardware. Mr. Brennan has spent the past seven years in Saskatchewan.

At the annual meeting of the Toronto branch of the Canadian Manufacturers' Association, W. C. Coulter, of the Booth-Coulter Copper & Brass Association, was elected chairman. E. H. Gurney, of the Gurney Foundry Co., was elected vice-chairman.

Lieut. C. A. Kemp, recently returned from France, has been appointed Ontario sales manager of the Sheet Metal Products of Canada, Ltd. Mr. Kemp is a son of the late W. A. Kemp, one of the founders of the business, and before going overseas had some experience with the company, first in the warehouse and office, and later as a salesman.

The many friends of A. E. Henry, who for many years has represented the Sheet Metal Products Co., of Canada, Ltd., in different parts of Ontario, will be pleased to hear of his promotion to the position of assistant general sales manager of the above company with headquarters in Toronto. Mr. Henry, as a salesman and as a practical tinsmith, will be missed on his old ground, but he is assuring his friends that he will continue to work for them inside.

Trade Notes

John Cleverly, Earl Grey, Sask., hardware and implements, has sold out.

The Altona Machinery Co., of Altona, Man., hardware and implements, are discontinuing business.

Shoal Lake, Man.—A by-law has been passed providing for the closing of all retail stores at 6 o'clock in the evening of every day except Saturday and the day preceding a statutory holiday.

The Imperial Oil Co. has purchased property fronting on the canal at Welland, Ont., and plan to erect new buildings to cost $40,000.

The Fowler Hardware, Ltd., Sudbury, Ont., have added to their other lines an up-to-date auto accessories department. The firm is also taking on electric washers.

According to press reports negotiations are under way for the location at Goderich, Ont., of a company to be known as the Lake Huron Steel Co. It is stated that a plant costing $15,000,000 will be equipped.

J. G. Steele, of the Steele Hardware Co., London, Ont., who has been forced to vacate his present premises owing to a new theatre being built, has purchased a store in one of the best locations in the business district.

Montreal News

Cecil E. Short and Co., wholesale metals, ingots, etc., are removing their warehouse and offices from Craig Street West to the corner of St. Peter and Youville Square. They will have enlarged premises in their new location.

A. Ramsay and Son have just completed alterations to their plant opposite Haymarket Square, Montreal.

John Irwin, general manager of McArthur, Irwin, Ltd., Montreal, returned to his desk this week after confinement to the hospital. Mr. Irwin spent a short time recuperating after leaving the hospital, and is reported to have returned with some excellent fish stories of a new sort.

A. W. Poole, of McArthur, Irwin, Ltd., Montreal, was in Toronto this week.

A number of Montreal hardware men, who have been overseas with the King's forces, are now back again and are taking up their old work, in many cases, immediately after securing their discharge.

Incorporations

Oil Engine Works of Canada Ltd., capital $30,000, head office Montreal, plans to carry on the manufacture of oil, gas, gasoline and steam engines.

Globe Automatic Sprinkler Company, capital $45,000, head office Toronto, plans to manufacture and deal in automatic sprinklers, fire extinguishers, steel pipe, valves and fittings.

W. J. Chalk, Ltd., capital $40,000, head office Clarksburg, Ont., plans to carry on a general retail and wholesale business in hardware, manufactured goods, photographic supplies, etc.

Mohawk Petroleum Co., capital $150,000, head office Petrolia, Ont., plans to pipe, refine and deal in petroleum and its products.

Old English Cleanser Manufacturing Co., Ltd., capital $40,000, head office Toronto, plans to manufacture and deal in cleansing compounds.

H. A. Wood Manufacturing Co., Ltd., capital $1,000,000, head office Toronto, ulans to manufacture and sell valves and all kinds of auto accessories and supplies.

Ajax Wire Wheel Corporation of America, capital $40,000, head office Toronto, plans to manufacture wire wheels for all kinds of vehicles.

DOREMUS GOES TO CHINA

E. I. du Pont de Nemours & Co., Wilmington, Del., announce that T. E. Doremus has been transferred to the E. I. du Pont de Nemours Export Company as general Eastern manager, with headquarters in Shanghai, China. E. R. Galvin has been appointed manager of the sporting powder division to succeed Mr. Doremus. Teddy Doremus is well known to many in the hardware trade in Canada, having for several years been associated with Dominion Cartridge Co., Montreal.

TO BUILD IN OSHAWA

The Ontario Steel Products Co., who have been located at Gananoque, have, it is understood, been negotiating with town officials in Oshawa, with a view to locating a factory there. The company's operations will include the manufacture of motor car springs and axles. Efforts are being exerted to complete arrangements, so that building operations will start by July 1 and production thus be possible by September.

RAZOR COMPANY HOLDS DANCE

Under the auspices of its Social Club, the Gillette Safety Razor Company's employees at Montreal held a successful Victory dance at Stanley Hall last week. Some five hundred were present.

A. A. Bittues, managing-director of the company, attended, and other officers and members of the staff in attendance were N. P. Peterson, the general superintendent, and Mrs. Peterson; P. T. Flanagan, asst. sec., and Mrs. Flanagan; J. A. Barry, assistant sales manager, and Mrs. Barry; Miss K. J. Flanagan, office supervisor; G. P. Shortrede, manager traffic-service department, and Mrs. Shortrede; W. Gosling, supervisor mechanical department, and Mrs. Gosling; Mr. and Mrs. W. F. Shaver, Mr. and Mrs. H. Giles, and many others. J. McDowell officiated as M.C. Vocal selections were given by Miss Irene Dawson, whose contributions were greatly appreciated and she was presented with a large bouquet of American Beauty roses.

The club's next entertainment will be their annual boat picnic, which will probably take place some time in July.

CONSIDERING SHORTER HOURS

The Retail Merchants' Association at Kingston, Ont., is considering a proposal to have all stores open at eight in the morning and close at five, five days in a week, the year round. Clerks may be given an eight hour day, with the exception of Saturday, when the proposal is that they work until nine in the evening.

OPENING FOR HARDWARE GOODS

According to reports received from the Canadian Trade Commission there are promising markets in Norway, Sweden, Denmark and Holland for Canadian produces, including agricultural and metal working machinery, paints and colors, wire and wire rope, automobiles and bicycles, binder twine, asbestos and lead.

DOMINION BATTERY COMPANY

The Dominion Battery Co., of Toronto, has issued a folder in colors, illustrating its complete line of "Reliable" products, flashlights, searchlights and batteries. The folders are printed in both English and French. Copies may be obtained by readers of HARDWARE AND METAL who are interested.

HYSLOP BROS., LTD.

A 208-page catalogue issued by Hyslop Bros., Ltd., Shuter and Victoria streets, Toronto, lists the lines of automotive equipment, garage supplies, accessories, and tires handled by the firm. The catalog is attractively printed and profusely illustrated. A special section is devoted to listing equipment for Ford cars. This occupies the space from pages 137 to 202 and for the convenience of buyers there is a special index for these listings as well as an index for the general section. Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

SAMUEL TREES & CO., LTD.

Net price list No. 2 to catalogue No. 2, issued by Samuel Trees & Co., Ltd., Toronto, Ont., contains twenty-four pages in which are listed the saddlery and harness goods, leather and clothing manufactured by the firm with complete net prices and cash discounts. Copies of the list will be supplied to readers of HARDWARE AND METAL upon request.

CLEVELAND MILLING MACHINE COMPANY

The Cleveland Milling Machine Co., of Cleveland, Ohio, has issued an eight page, illustrated circular, with specification sheets, on the subject of the plain and universal milling machines it manufactures, also regarding the dividing head attachment. Full details are given regarding lubrication, power transmission and other essentials. Readers of HARDWARE AND METAL may obtain copies of the circular upon request.

CHICAGO SPRING BUTT COMPANY

Catalogue No. 36, issued by the Chicago Spring Butt Co., of Chicago, is profusely illustrated, and contains forty-six pages, in which are listed single and double-acting spring butt hinges, pivot hinges, lavatory spring and lavatory spring pivot hinges, door latches, bolts, indicators and door stops, gate spring pivot hinges, screen door spring hinges, door springs and parts. Copies of the catalogue may be obtained by readers of HARDWARE AND METAL upon request.

EASY WASHER CO.

The Easy Washer Co., 4 Clinton Place, Toronto, has issued a folder illustrating the Easy Electric Washer. Several models are listed and details given regarding the principles of operation. Copies of the folder will be forwarded to readers of HARDWARE AND METAL upon request.

WHITES LIMITED

A forty-eight page catalogue of auto accessories has just been issued by Whites Ltd., of Collingwood, Ont. This is very attractively gotten up and profusely illustrated with various lines, carrying good descriptive matter and list prices, to which a uniform discount applies. A complete index is appended. The firm states that in compiling their catalogue the idea was not to reach the consumer or the garage dealer with his stock other than the merchandise end of the business, so much as to reach the retail trade and the business done over the counter. Their whole idea, they state, is to reach the merchants. Readers of HARDWARE AND METAL may obtain copies upon request.

Makers of Urns

Cowans, Brantford, Ont. — Will you kindly advise us if you know of any makers of urns for cemeteries?

You might try John Davis & Son, 601 Merton Street, Toronto; Foster Pottery Co., Hamilton; R. Campbell's Sons, Hamilton; John Cranston & Son, Hamilton.—Ed.

Peter Wright Anvils

Jas. Cowan & Co., London, Ont.—Can you tell us who are Canadian selling agents for Peter Wright anvils?

These are sold throughout Canada by Watson, Jack & Co., Power Building, Montreal.—Ed.

Rawhide Mallets

Hardware Co., of Toronto.—Can you tell us who manufacture rawhide mallets?

These are made by Constantin & O'Brien, Montreal; Hamilton Facing Mill Co., Hamilton; Kieffer Bros., Montreal. —Ed.

Tack Machinery

J. T. Jacques, Ste. Marie, Beauce, Que. —Kindly let me know where I can secure tack making machinery.

Firms from whom you can secure this are: F. B. Shuster Co., New Haven, Conn.; H. J. Miller's Sons, Bridgewater, Mass.; Henry Perkins Co., Bridgewater, Mass.; Kimball Bros. & Sprague, Brockton, Mass.; Sleeper & Hartley Inc., 68 Prescott St., Worcester, Mass. This last named turn out machinery for making double pointed tacks.—Ed.

EDITORIAL COMMENT

A REMEDY IS NEEDED

THE city of Winnipeg is paralyzed by the most far-reaching sympathy strike that has probably ever faced any Canadian city.

The strikers have gone about their work in the most thorough-going way. The city has been cut off from all communication with the outside world. Its newspaper plants have been shut down, so that the citizens may read of the strike only through the favorable eyes of official labor organs. Restaurants have been closed, and baking and milk plant operations suspended, or permitted at the will of the strikers. Citizens are inconvenienced in obtaining food. Stores are being closed at the orders of the strikers, and banks have closed as a wise measure of precaution. A city of roughly two hundred thousand people is facing danger, and inconvenience, and want, and is being brought face to face with conditions of anarchy, because of a difference of opinion between a few men. It is not our intention to disparage the claims of either party. We are not versed in the merits of the case, but it seems clear that matters should never have been permitted to come to this pass. This dispute will have to be settled sooner or later and there will be no change of essential conditions in the meanwhile, so the settlement might just as well have been reached without all the loss, the suffering and annoyance that this strike has entailed.

There are Governmental departments that are entrusted with the administration of matters pertaining to labor. Is it too much to expect that such a department should be capable of meeting such situations before they had come to the present pass? It should be possible for the Government to assure justice to both parties without having a city of 200,000 souls, very few of whom are directly interested in the questions involved, placed on the rack.

SHUT OUT BOLSHEVISM

ONE of the most striking features in connection with the investigations beng conducted throughout the Dominion by the Industrial Relations Commission is the diametrically opposite views expressed by capital and labor. The testimony of the representatives of the working men and working women who have been heard is almost entirely along the line that conditions are bad and that they are becoming more or less impossible without increased wages. Much of their argument is based on the higher prices of necessities and of house rents. In strong contrast to the pessimistic views of the workers is the testimony of employers. They declare that the worst is over, that conditions are becoming settled rapidly and that business will soon be going along on practically a normal basis. During the war period, they point out, the labor situation was abnormal. Thousands of workers gave up their positions to make higher wages in the munitions factories. As a result of this condition and also enlistments help in many lines became very scarce. High wages considerably altered living conditions. This worked both ways. In some cases it made for better conditions. In other cases it made for extravagance. Employers are inclined to the belief that as far as the employment question is concerned the pre-war days are returning in that there will be plenty of steady employment at good wages for all who want it, without the abnormal shifting that occurred during the past four years. In the majority of instances they are willing to pay higher wages than before the war and they are willing also that labor shall have a greater voice in regard to the regulation of working hours and conditions. They take the view that the cost of living will gradually but steadily come down because now there will be a chance to accumulate some reserve stocks of commodities. In short, they are looking for better times and see every reason for faith in a great future for Canada. The general impression gained from the investigaton so far seems to be that if capital and labor are each willing to give and take, co-operate in every way possible and close the door tightly against such forces as Bolshevism all will be well and that business will steadily expand.

TALKING BACK TO THE CATALOGUE

THERE is a hardware store in Sprucedale, Ont., that advertises in the local paper as follows:—

"Take any Iron Bedstead in Eaton's Catalogue and we will supply you with the same identical Bedstead at 50c below their price for the better ones, and 25c below for the cheaper ones."

Whether the mail order house is worth all this attention from the merchant or not we cannot say. But certainly there is more to be said for this argument that bases a claim on actual values offered than

can be said for those arguments that are based on local loyalty alone.

It is more hopeful copy to read. It is fighting copy. The mail order house is a fighting proposition, but it fights in the open. While its enormous resources give it certain advantages, these advantages are not as numerous as many merchants believe. It is quite possible to meet its competition, as the advertisement of the Dixon Hardware Company shows. If we are going to worry at all about the mail order house it is certainly better to worry about how we can make it hot for them than about how they are making it hot for us. The one spells progress, the other retrogression. The retailer has still very many useful and beneficial lessons to learn from the mail order house.

MERCHANTS MUST CO-OPERATE

ONE of the important things that came out of the meeting of the Retail Merchants of Saskatchewan at Regina, was the statement of one of the speakers that to-day's retail competition is not between neighboring merchants or classes of stores, but between the home merchants and the mail order houses. Mail order competition, he declared, is exaggerated. There is little doubt of this. The mail order house gains a hold in a community usually because the home merchant does not carry the stock his community requires or does not advertise and go after business aggressively. The moment the home merchant becomes a real merchant and goes after business aggressively he reduces mail order competition to a factor that is negligible. The home merchant has everything on his side in the fight. He is on the ground, he knows most of the buyers personally and they know him. He can show them the goods and talk to the prospective buyers about their good points, and what is more important his store is there and stands behind all the goods that leave it with a guarantee. The mail order house on the contrary may be a thousand miles away. It depends upon cleverly worded and attractive advertising and catalogues for its sales results. A very, very small percentage of its patrons ever see either the proprietor or his store. They pay cash to the outsider because he won't sell their goods unless they do. The mail order firms in the past four years have been very much up against the problem of securing shipments of goods. They have also been up against the problem of being unable to make deliveries. This situation has shown many retailers what they should have already known that in the home field they are more than a match for the outsider if they only have the confidence and courage necessary to go after business. Except for a few leaders the mail order firms, quality considered, do not sell goods cheaply. Many of their lines are dearer than the goods stocked by the home merchant and they have all the disadvantages of being at a distance and having to depend upon "black faced salesmen" in the shape of printed matter. They base their whole selling campaign upon advertising and it certainly has produced results. The speaker at the Regina meeting made another good point when he declared that merchants to-day must organize, that they must work together and instead of going along in their own small way with no thought for the other fellow must find time for finding out what others are doing. This is always true and never more so than right now when conditions make it imperative that co-operation be practised. All classes of merchants have their problems and all have problems in common. By working together they can solve them. By not working together they get nowhere.

U.S. STEEL MERGER RUMORS

RUMORS are again in circulation, states the *American Metal Market,* that an important merger of independent steel producers is being considered. It is difficult to recall when such rumors first began to circulate, but the time was certainly many years ago, and at recurrent intervals the rumors have come again.

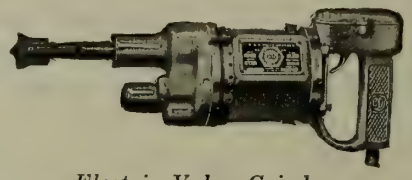
Whether to give such rumors fresh interest or because there really has been a change of attitude on the part of independent steel producers with respect to the matter, it is now asserted that the advance in freight rates during the war makes a merger of independent steel producers a very interesting proposition. The well-known advantage of the United States Steel Corporation is pointed out, the Steel Corporation having plants widely scattered geographically so that it can save much freight by filling orders at the mill nearest the point of delivery. With the large increase in freight rates this advantage is, of course, correspondingly increased. As Chairman Gary stated at the annual meeting of Steel Corporation stockholders last April, the Steel Corporation has never complained of freight rate advances.

The merger rumor mentions such interests as the Inland Steel Company of Chicago and the Lackawanna Steel Company of Buffalo, representing the two geographic extremes, perhaps with Midvale to the southeast, and with other and intermediate concerns thrown in. Particularly with the two concerns first named, much of the steel must be shipped against the freight. With a combination of various independents it would be possible to sell steel with an average haul much shorter than that which now obtains, with the independents selling individually.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

"GASTINE" GASOLINE SAVER



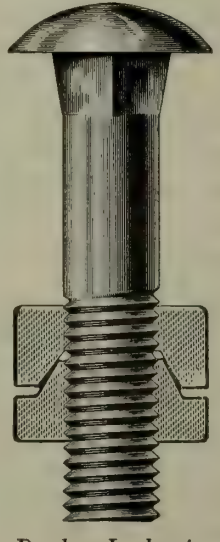
"Gastine" is the name of a soluble tablet which is being offered to the automobile owner as a gasoline saver, also with the object of increasing its efficiency. It is claimed by the manufacturers to give the user from twenty-five to thirty per cent. more mileage, and this is said to be possible through the use of the concentrated oils used. They state that one of these small tablets to the gallon placed in the gasoline tank will quickly dissolve, and that no clogging of the feed pipe or carburetor is possible, also that they have no injurious effects on any part of the motor. Another claim is that at an additional cost of one and a quarter cents per gallon the motorist can obtain an average of from four to six additional miles to every gallon of gasoline used. "Gastine" is manufactured by the Gastine Co. of Bridgeton, N.J., and is distributed in Canada by their Canadian agents, Messrs. Evans & Co., Ltd., Coristine Building, Montreal.

STEEL FLEXIBLE TUBING

Edward G. Gooderham, 24 King St. West, Toronto, has been appointed Canadian selling agent for galvanized flexible steel tubing manufactured by the Excello Mfg. Co., of Providence, R.I. This tubing, it is stated, is largely used for gas lamps, stoves, irons, hot plates, radiator and automobiles, and it is claimed that for this work it has many times the life of rubber hose. It is made, it is stated, from the finest grade of steel strip with rubber or asbestos packing.

ELECTRIC VALVE GRINDER

This is a new tool made by the Black & Decker Mfg. Co., Baltimore, Md., which is of rather unusual design and construction. It is an electric motor driven device, with an oscillating spindle and supplants the old laborious method of grinding valves by hand. The spindle, it is stated, oscillates with a long, steady sweep, similar to the movement obtained in grinding by hand, but many times more rapidly. The patented Black & Decker "Pistol Grip and Trigger Switch" is embodied, making it possible, it is claimed, to operate and control this grinder, in an unusually convenient manner. A 1-6 h.p. motor is used, which is

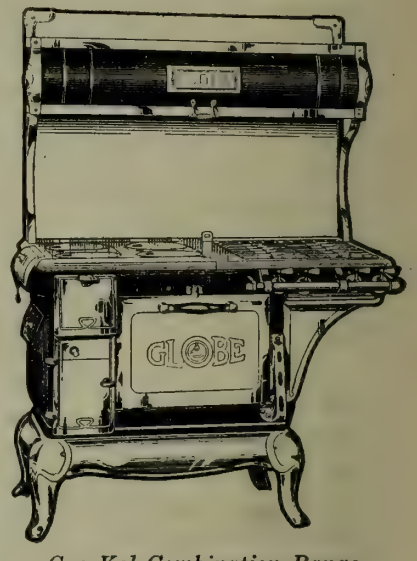


Electric Valve Grinder

air cooled. It operates on standard power circuits, either alternating or direct current, with range 25 to 60 cycles or direct current being made for circuits of 110 volts, 220 volts and 32 volts.

The motor and gearing, with reciprocating mechanism, it is stated, are completely enclosed in an aluminium housing, the gearing and oscillating movement being separated from the motor compartment and packed in grease. The grinding spindle, it is stated, runs in a ball thrust bearing, the armature shaft on Norma ball bearings, and the gears are mounted on shafts ground to size, supported at both ends in long phosphor bronze bushings. Bits are provided to make the tool adaptable to various types of valves.

DUPLEX LOCK NUT



John W. McDonald, of North Bay, Ont., has patented and is putting on the market, a duplex lock nut, which, it is claimed, cannot work loose. The action is such that, it is stated, any motion which would ordinarily tend to make a nut loosen, actually tightens it in the case of the duplex. It will be manufactured, it is stated, in all standard sizes. Extreme simplicity in operation and attachment is claimed for the duplex lock nut.

Duplex Locknut

COMBINATION RANGE

The Gas-Kol Globe combination range, manufactured by the Globe Stove and Range Co., of Kokomo, Ind., is made, it is stated, with white porcelain warming oven, smoke pipe concealed, polished mirror top and has full silver nickel trimmings. Other features, it is stated, are interchangeable fire box linings, large square oven with a solid plate bottom, no dampers, no draft slides, no wells in or through the oven bottom, white enamelled sanitary high closet, full length of the stove, and oven thermometer. The same oven, it is stated, can be used for both coal and gas.

Gas Kol Combination Range

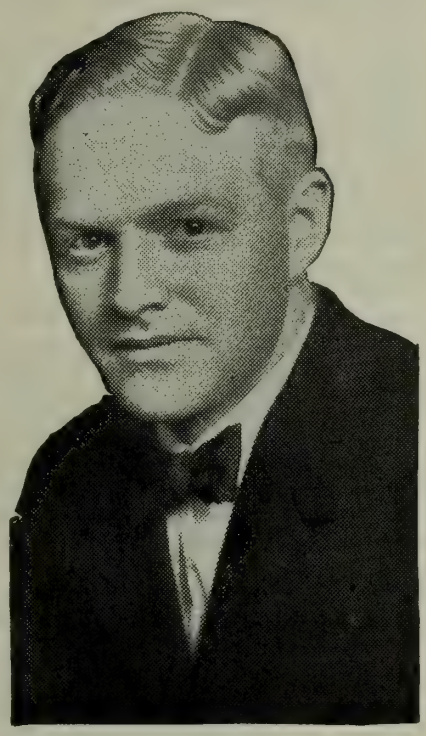
AUTOMOBILE CLOCK

Robert McKnight, jeweller of Sarnia, Ont., has invented and secured a patent on an automobile clock. With this clock, it is stated, it is possible for the car owner to set the clock for a certain time and the lights will automatically be switched on or off as desired. It is also, it is stated, provided with push buttons, so that the lights may be turned off or on at the owner's will.

After-the-War Problems

One of the Important Addresses Delivered at the Recent Saskatchewan Convention of the R.M.A. by Frank Stockdale, the Noted Advertising Expert

"ALL the problems of retail merchandising are soon to be after-the-war problems, but these do not commence yet. These problems are going to come about when reconstruction comes, but they are going to begin.



"Back in your home town there are a number of retailers who have an idea that the only way to learn this business is through experience. In an Ontario town someone handed me an enquiry along this line: 'Which is more important in business, theory or experience?'

"I ask you, which is more important, the blackboard or the chalk? We have to have some theorists. Theory has a different meaning for each individual. To lots of people anything they have not used in their business is theory. A lot of retail merchants shut themselves in or they try to shut the other fellow out, but they are imprisoned to that extent. Some think they can shut competition out, but when you do this you may as well call in the gravedigger All we want is fair treatment. When a man asks for more than that you have to grant it to the other fellow as well. There are two types of merchants. One throws open the door and goes out after things. Japan went to all the countries of the world and investigated, and adopted the best ideas and methods which she could find. To-day Japan is a first-rate power, while China is a third-rate power. Japan has profited by the experience of others.

"The science of arithmetic has come up through the ages of experience, yet while many public accountants do not know much about the important question of percentages, many retailers will dive nito this involved matter without forethought. There is much truth in the saying, "Fools rush in where angels fear to tread."

"These conventions are great idea markets. The trouble is that we take only the ideas that we recognize as our own. You have a hazy idea about a lot of things but not a definite one. You have a lot of wobbly ideas and you are not really sure of them. When you have them strengthened you feel like building on them and putting a real roof on the construction. You come to conventions to get your wires connected Many merchants have their wires crossed.

"After-the-war prices may be one of the after-the-war problems. This phase of the matter has been in our minds for some time, owing to a changing market, but I will not say what prices are going to be. The opinion of some long-headed merchants is that now the armistice has been signed, the war is over, and yet we find prices in some lines icreasing. There is apt to be a sense of false security. For a while

FRANK STOCKDALE,
The noted merchandizing expert whose addresses were among the feature events of the Regina Convention.

the tendency was to hold back for a decline in price. Other merchants think that as prices have not dropped since the armistice was signed that prices are not going to drop. There are not many people who think that prices are going back to 1914 standards. There are at least two big reasons for this. One is that the price tendency for years has been upward. The reason for this tendency is still at work and the last five years would represent a substantial increase. If wages stay up, prices must stay up. Labor says wages will stay up. But the retail merchant who gives too much attention to prices now is going to be left. The decline from present levels will be very gradual.

"We have had some fictitious values in merchandising, and this is going to be squeezed out for a while. Retailers are responsible in some part for the high prices. An actual shortage combined with the fact that stockrooms have been stored with goods, creates an artificial price.

"Stores show the things the retailer is most proud of. I saw the stockroom of a certain store recently. The retailer pointed to certain goods selling now at $1, which he bought early and could sell profitably at 50c. There retailers proudly point out their "good buys," but it is a fact that the poorest buyers have won the biggest stakes under recent conditions. On an up market the retailer makes most who sells out before the market drops. Inefficiency has been patting itself on the back, and if some of you have been doing this you should do something radical."

Mr. Stockdale at this point referred to a recent visit to another store wherein he found the stock to be very low, and ragged. The merchant had been buying bankrupt stocks.

"There are not many bankruptcies lately," said Mr. Stockdale. "This merchant was placing his bet that the bankruptcies were only postponed. There are lots of bankruptcies in this country which have been postponed. As soon as the market begins to level off there will be a great many changes in business. People are looking for a world readjustment. As long as the market was creeping up there was coming in an extra profit to take care of any possible loss, and a lot of merchants have eaten up that profit. An increase in dollars of sales is no good, but an increase in volume of business transacted is required.

"If 90 per cent. to 95 per cent. of the merchandise is bought at a certain price and then the price jumps and only about 5 per cent. of the merchandise changes hands in a season at that price, I claim it is more or less of a fictitious price."

At this point Mr. Stockdale spoke of another retailer who had increased his sales recently from $60,000 to $80,000 per year. He had been making a net profit of about $3,000 recently while in 1917 he made a net profit of $8,000. He had recently been selling close to the real market and not a fictitious market.

"The extra $5,000 which this merchant made in net profit in 1917 is a fund he holds in trust owing to a changing market. He will lose when the market declines and it may take $500 one year and $1,000 another year to balance things up. Merchants should keep money from such a source as this to take care of down market losses.

"Many men who can run a retail store well, do not know how to look after money when they get it. If a merchant has a particularly good season he should put the extra money into a reserve fund. At all times if you have not money for a reserve fund there has been something wrong with your business and you should straighten it out."

Hereupon a problem of buying, for wartime and after, was outlined by Mr. Stockdale.

He cited two cases. In one the average stock on one annual turnover was $400, whereas in the other store with a turnover four times a year, the average stock at each turn was $100 during the year. Sales amounted to $600 with a profit margin of 33 1-3 per cent.

Mr. Stockdale explained that margin

was an opportunity for profit and also an opportunity for loss.

"The sales in the foregoing case were $600, but the sales at stock were $400 in the case of the single turnover. In the second instance the sales were $600, but sales were $400 at cost where there are four turnovers to the year.

"The quintessence of merchandising is to carry as many of the $100 lines as possible, and to be careful on the other lines which run a high average stock, and only turn once or so in the year."

Speaking further regarding this illustration Mr. Stockdale pointed out that if prices dropped 10 per cent. the first merchant would lose $40 by carrying an average stock of $400 on one turnover during the year, while the second merchant would lose only $10 because he carries lines which turn four times a year at an average value of $100.

"Carry more lines in quick turning merchandise. The losses will be on the slow turning lines," said Mr. Stockdale.

In regard to the matter of deciding which are slow turning lines, Mr. Stockdale stated that the man who knows how to buy goods for quick turnover will win, and that the best way to tell is to have records. Each merchant should have a good stock-taking system.

"Merchants spend their money taking care of their money, but they do not give the same attention to their merchandise which represents the investment of their money. It is much more important to look out for the cash in your merchandise, and sooner or later I hope we will all have stock records in our stores for this purpose.

"One merchant says he buys goods for 60 cents and sells for $1, and thinks he is getting a long profit. The successful retailer is one who gets the best profits, not the best margin. The jeweler gets a long margin on goods sold, but his turnover is very small. Margin does not tell what profits you have. You must know the cost of carrying and selling an article before you know what your profit is. It costs a lot to handle and sell long margin goods."

At this point Mr. Stockdale quoted the following definition for turnover: "Turnover answers the question, 'How long does the merchandise stay?'"

A rule for figuring turnover was outlined as follows: "Divide the sales by the average stock carried at the selling price."

A question as to whether margin should be figured on the sales price or on the cost price, and why, was answered by Mr. Stockdale as follows:

"It should be figured on the selling price because it takes an expert to do it any other way. The average retailer cannot do this because in getting his cost of doing business—say 25 per cent. —he gets the figures by dividing his sales into his own expenses. Therefore having got the percentage you say the cost of doing business is 25 per cent. of the sales. Then add 10 per cent. for profit and figure on cost price and you haven't anything.

"The percentage of an apple cannot be compared with the percentage of an egg. Twenty-five per cent. of a big apple is not equal to 25 per cent. of a small apple.

"What does more harm than anything is the manufacturer who tells you you are making 25 per cent. on his goods, whereas you are only making 20 per cent."

A rule for figuring margin was as follows: "Subtract margin from 100 per cent. and then divide it by the cost."

This point was illustrated as follows: $2.40 is the cost of certain merchandise. It was required to mark the goods to give a margin of 27 per cent. Subtracting 27 per cent. from 100 per cent. it leaves 73 per cent. to be divided into $2.40, giving $3.28 as selling price.

Question: Is it proper to keep stock at the selling price or at the cost price?

Answer: Ninety-five per cent. of retailers keep it at the cost price, but the department stores are keeping stock at the selling price. It is easier to take stock at the selling price and it works all right as far as turnover is concerned. It is best to keep stock at the selling price, but unless the margin is uniform you cannot keep your stock at selling price and get back to cost when necessary.

Question: Would it not be necessary to keep stock records of each department in order to keep stock at selling price?

Answer: For the purposes of merchandising the department store says that stock at selling price is best. For purposes of financial statements of the business and for insurance you could not have stock at selling price. The department stores have this because they merchandise, and the average retailer doesn't know what that means.

Question: A merchant gets an invoice of mixed goods. Freight and handling expenses amount to a certain sum. In figuring profits he has to start with the laid-down cost in the store.

Mr. Stockdale figured out a test case as follows in establishing the laid-down cost of the various articles in a mixed consignment as outlined. The invoice of goods was for $200; cartage and other expenses were $20; laid-down cost was $220 for the shipment of various articles. Taking among the consignment to be 10 bags of rolled oats at $10, the cost of which is $100, the cost of cartage, etc., of $10 was added, making a total of $110. The cost of doing business in the previous year was 25 per cent.; adding 10 per cent. to cover profit, making a total of 35 per cent., this was subtracted from 100 per cent., leaving 65 per cent. to be divided into the laid-down cost of $110, giving selling price of $170 in this case.

Question: How much should a retailer make on groceries at present?

Answer: If he makes 3 per cent. net on groceries he is receiving a good return if his stock is turning an average of 10 to 12 times a year.

CONVENTION BRIEFS

It did not take long for J. J. Polson, late first vice-president of the Saskatchewan R.M.A., to show his musical capabilities, and, in company with the late president, H. D. MacPherson, prove their ability to stir up enthusiasm by drawing forth song from the assembled delegates.

"How I hate to get up in the morning," was the title of the introductory song of the convention, and it was noted that J. A. Banfield, the Dominion president, led J. J. Polson a close run for the honors of greatest volume.

H. D. MacPherson proved he could do something else besides run a men's furnishing business and a retail merchants' meeting, when he assumed the role of musical and athletic director.

Judging by the groans made by the delegates when called upon to go through a few simple exercises after sitting for an hour in session, the hotel must have sounded like a zoological garden in the early hours. No wonder they all joined heartily in the singing of the song,"How I hate to get up, etc."

Every prosperous looking retailer in the audience raised his hand when Mr. Stockdale called for a showing of retailers who were regular readers of a trade paper.

Are YOU a reader of a trade paper?

One retailer asked Mr. Stockdale what the margin of net profit should be on groceries. "As much as you can get under present conditions," was the reply.

Mr. Stockdale says the merchants who come to conventions are the progressive ones, and those who want to know more about their business. These are the kind who also read trade papers.

Do you go to conventions?

A by-law is being prepared by Regina providing for the compulsory closing of stores at 6.30 p.m. all the year. This is to take effect on June 1. Regina claims to be the first city in Canada to have such a law.

As usual the convention went on record in opposition to the liquor traffic. It has not made much difference in the past year or two, but this legislation is of more importance when the present ray of hope is coming over the horizon.

Professor W. W. Swanson, Professor of Economics in Saskatchewan University, delivered a very able address on "Thrift."

"Buying from a Hebrew and selling to a Scotchman" is Mr. Stockdale's opinion of efficiency in retail merchandising.

"Buy in cold blood and sell with enthusiasm," is a splendid maxim.

A delegate visiting the convention declared that he personally himself, single-handed, swallowed three-fourths of the townsite of Saskatoon. The wind was blowing.

Much to the disgust of S. McMicken, the delegates were called upon two or three times a day to stretch their legs and incidentally shake the dust from their brains.

"Smugosity" is a new one on us. Mr. Stockdale coined it to represent the attitude of the average community.

Will Appoint Western Board

Saskatchewan Convention Accepts New Basis of Constitution—Four Provinces Represented by Western Board—Ottawa Office Unsatisfactory—Favor Half Holiday—Oppose Bank Mergers

REGINA, Sask.—One of the most important resolutions adopted in the early sessions of the sixth annual convention of the Saskatchewan Retail Merchants' Association, was that providing for the acceptance of the basis of the constitution as it now exists, it having been altered by the Dominion Executive at Ottawa to provide for the compulsory appointment of a Western board representative of the four Western provinces, and the optional appointment of an Eastern board comprising the Eastern provinces. Settlement will be made by the new executive for the per capita tax which the association has been holding back for the past year, pending a settlement of this difficulty. A Dominion Secretary will be elected by the Western board and will have no vote.

The passing of this resoultion followed an exhaustive report by J. J. Polson, on the recent Dominion convention. The change in the constitution further provides that the Western board will be responsible for half the expenses of the Ottawa office and that Western members will pay their fees to the Western board, but until this board is formed fees will be paid to Ottawa.

While in Ottawa, Mr. Polson informed the Dominion board that there was a strong feeling that the Dominion office had been very unsatisfactory for some time, and that if the trouble could not be traced to situations in the East which hindered the secretary, then that official should resign his office. Mr. Polson pointed out that the East had fought the change because the West would have charge of its own affairs, and because they did not want a board representative of all the Eastern provinces owing to the likelihood of encouraging friction.

NEXT CONVENTION AT MOOSE JAW IN JUNE, 1920

A motion was adopted by the Convention establishing June as the month for the next convention, instead of in May. It was decided to accept the invitation of the City of Moose Jaw to hold the next annual convention in that city.

In the discussion following this report it was contended that as Saskatchewan was one of the strongest supporters of the Dominion organization, that it should therefore receive good service from Ottawa. Mr. Polson stated that the feeling between the East and West was becoming more harmonious and that representatives of the West can get from the Dominion executive anything which is reasonable.

"Eastern merchants are reasonable, and we have a chance to cement the retail trade of the whole country in a live, harmonious organization."

The Ottawa office had promised this year to hold the annual meeting in Vancouver, to assist the growing organization in that district. As it was impossible to arrange this matter at the last minute an alternative has been suggested, namely, to run a retail merchants' train from Halifax to Vancouver for a three-day conference. This is planned for August of this year.

J. A. Banfield of Winnipeg, president

A scene on Scarth Street, one of the main thoroughfares of the Convention City of Regina.

of the Dominion Retail Merchants' Association, confirmed the fact that Eastern Canada is now desiring to work in closer co-operation with the West.

"As a unit we will do something, but disintegration will get us nowhere," added Mr. Banfield.

W. C. Paynter, Tantallon, supported the motion, stating that unity of action cannot be secured unless the West is joined with the Dominion organization.

Favor Half Holiday

A great deal of discussion centered around a resolution empowering the new executive to secure legislation for a universal Wednesday half holiday throughout the year. The convention was in favor of this legislation and action will be taken to have Wednesday afternoon observed where it is the practice to observe a half holiday. The general acceptance of a half holiday is, however, optional. Moose Jaw delegates favored a half holiday throughout the year.

H. E. Sample, Kerrobert, suggested that the Government be asked to name a day to be universally observed in Saskatchewan. Another delegate thought it would be difficult to establish a certain day in a small town where the farmers have the habit of coming in whenever they take the notion. Other country merchants thought the matter should be left to the municipalities to set a day for the holiday.

G. W. Stockton, Carlyle, stated that in the country no one observes a holiday as is done in the city. He contended that the country customers must be accommodated and offered the suggestion of alternating the clerks on duty in the store in order to give them needed recreation. He added that the Grain Growers has passed a resolution asking country dealers to remain open to accommodate the farmer owing to a scarcity of farm help.

Price Hughes, Regina, pointed out that unless the association took action, a similar situation will arise here as in England, where inspectors have to be employed at big expense, to enforce the law.

W. C. Paynter amended the resolution, making the observance of the half holiday optional, but declaring Wednesday to be the day for the half holiday where a holiday is allowed by the Village Act. S. McMicken, Moose Jaw, thought the association should not seek Government action, intimating that this might cause trouble between the East and the West.

A straw vote of delegates present indicated that a compulsory half holiday in the summer was favored.

The association went on record as protesting against further bank mergers being permitted. It was pointed out that bank mergers were fairly numerous recently, resulting in credit passing into the hands of a few. A clause providing for the appointment of a special commission to investigate the whole financial situation of Canada was voted down. J. J. Polson was emphatically against the appointment of commissions to investigate anything under the blue sky.

Mr. Banfield followed in an address dealing with the problems affecting retail merchants. A vigorous attack was made upon the operations of the Canada Food Board, figures being quoted to show the enormous expense and burden that the board had been to the country and to the merchants, inasmuch as the license fees paid by the merchants financed the board. Mr. Banfield quoted the following figures from the report of the board: Total revenue in fees amounted to about $491,000. Of this amount $202,847 was spent in salaries; $52,000 in travelling expenses, $90,833 in printed matter and advertising, and $29,790 for office expenses.

Mr. Banfield declared that it took much of the time of the staff of the association at Ottawa to watch Director Thomson of the Canada Food Board, and his staff.

"A list of fifty-seven subjects is now before the Government for action," stated Mr. Banfield, adding that one of the important ones provided that the Garnishee Act. should apply to civil employees in future. This action was thought necessary to protect retailers, especially in view of the taking over by the Government of additional railway lines.

One Insurance Policy—One Business

Executive of R.M. Mutual Fire Ins. Co. Will Settle This Problem —Membership Necessary for Each Store to Get Protection at Present—No Increase in Risk Allowed

THE Wednesday afternoon session of the convention was devoted to the Retail Merchants' Mutual Fire Insurance Company, reports being given and officers elected. The financial statement showed the net insurance carried by the company to be $882,200;; expenditure, $17,850.87; assets, $48,064.13; liabilities, $48,064.13. The total amount of insurance written during 1918 was $991,900,00 and policies in force, December 31, 1917, $554,935,70.

The election of directors resulted in J. C. Nichol, Radisson; and E. Wright, Kerrobert, being elected for a three year term and W. P. Ball of Assiniboia for a one year term.

A. E. Fisher, superintendent of insurance for Saskatchewan, gave a brief address on fire insurance, congratulating the R. M. Company on the low expense ratio and the low loss ratio shown. He emphasized the need of every merchant scrutinizing his policy carefully to eliminate any difficulty in making settlement. He stated that during the past year there had been a fire loss of $2,250,000 this being a per capita loss of over $3.

The question of whether merchants should be given protection on more than one store in return for the payment of insurance fees on a single membership in the association was discussed. At the present time a merchant must have a membership for each store in order to have each store covered by insurance in the Mutual company.

S. McMicken, Moose Jaw, opined that that the R. M. A. was not so much for the individual but to help the store situation. He favored one policy—one business.

On the motion of S. T. Brown, Simpson, the matter was left with the executive committee to deal with.

OFFICERS FOR 1919

Following officers were elected for the following year:—

Honorary President—H. D. MacPherson, (men's furnishings), Regina.

President—S. McMicken, (grocer), Moose Jaw.

1st Vice-president—W. P. Ball, (general), Assiniboia.

2nd Vice-president—J. C. Nichol, (general), Radisson.

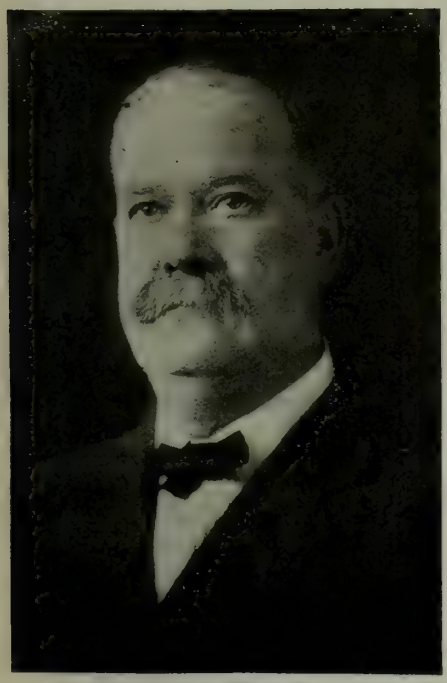
Treasurer—S. E. Fawcett, (hardware), Saskatoon.

Hon. Secretary—J. W. Creswell, (men's furnishings), Regina.

Constitution provides the Acting Secretary will be appointed by the Executive Committee.

J. J. Polson, 1st Vice-president of the Association last year, declined the office of President this year owing to the fact that his business is developing a wholesale department and he did not feel justified in standing for the office in a retail organization.

W. P. Ball was elected to represent the Saskatchewan Association on the Western Board, with the remainder of the Executive as substitutes.



GOT THE CONTRACT

That the hardware man who goes after business can usually get it was shown in St. Thomas, when new tenders were called for 5,000 feet of gas pipe. The new tenders were called following the cancellation of a previous contract given to the H. Mueller Co., of Sarnia, Ont., for 5,000 feet of steel pipe, at 72c a foot. The St. Thomas dealers complained that they had not had a chance of tendering and at a meeting of the committee their claim was upheld and the Sarnia contract cancelled. The tender of Ingram & Davey, hardware, for 5,000 feet of four-inch wrought iron pipe at 81½c a foot was accepted. The firm offered a two per cent. discount off this price for cash in 30 days. The Geo. A. McMurtry Co.'s tender figured out to 80 3-10c per foot net. The H. Mueller Co., of Sarnia, offer was 82c per foot, less two per cent. cash discount.

Favor Trade Sections in Convention

First Two Days of Future Conventions Devoted to Trades—Third Day for General Convention—Will Try Out Division of Province Into Sections With Paid Secretary

THE proposed holding of trade section conventions, and the division of the province into district branches, were important matters which brought forth much discussion in the Wednesday morning session. After consideration it was decided that the

S. D. McMICKEN,
Moose Jaw, Sask., elected President of the Saskatchewan R.M.A.

first two days of future conventions will be set aside to the trade sections, the general convention being held on the third day. An amendment to exempt trades not included in general stores and hold their conventions at some other time of year was voted down.

W. L. McQuarrie, Saskatoon, supported this division into trade sections, stating that during the first two days the sections could decide on important matters to be considered and there would then be something to work on in the general convention.

S. McMicken saw difficulties ahead, and issued a grave warning. "We have got the Retail Merchants' Association into one association. We have been fighting for twenty years to keep away from individual associations of the various trades. This convention is held for the good of all. There should not be sectional meetings. Do not get the conventions separated, for as soon as you do you are going to have fifty-five conventions held separately and the Retail Merchants' Association will go out of business."

In speaking to the amendment another delegate contended that the general merchants would thereby be given preference in being allowed to attend the general as well as the sessional convention, whereas trades not represented in the general store would be restricted.

A motion to direct the executive to pick out a certain district in the Province of Saskatchewan in which to try out for the period of one year the plan of appointing a local paid secretary responsible to the provincial association, was adopted. In this connection it was decided to give returned soldiers preference in appointments to the position of secretary in such districts. The secretary will make a report at the next convention on his work in the trial district, which will include 200 to 300 members of the R.M.A. The work of the secretary of the proposed sections was outlined by F. E. Raymond as follows:

Insofar as a credit rating system is concerned, it will be possible for such secretary to make a credit report on everyone in the district. A credit rating card will be provided for each merchant and a complete summary covering the district supplied to all members of the provincial association. This system is designed to prevent dealers who have exhausted credit in one district to move on to another and secure credit facilities. An interchange of summaries will cover the entire province.

In regard to collections, the credit system would lessen the need for collecting. The secretary could give personal solicitation and the fact of his being a member of the R.M.A. would carry weight in such matters. The usual rates for collections would be charged, so that the system would not be taken advantage of and the secretary deluged with unnecessary work.

Another phase of work for a secretary would be the encouragement of the community idea. It is felt that a man in such a position could do much to better the feeling between towns and cities.

The district secretaries would be employed by the provincial association, care being exercised to choose men who can win and hold confidence.

The plan will necessarily involve increased expenditure and it was suggested that a fee of $25 to $30 per year might be necessary. It is planned to have men selected for these positions spend a month in the Saskatoon office to get in closer touch with the work of the association.

Delegate Moulton, Kelliher, suggested that the province be divided as the Grain Growers' Association into thirty-six sections, allowing each section to pick their own secretary and pay him according to the amount of work involved.

G. W. Stockton, Carlyle, stated that the plan would involve a great expense. "I believe it is necessary to do something along this line, but it is questionable if we should stand the expense of a secretary paid by the association in each district at the outset."

C. Williams, Moose Jaw, suggested that the sum of $50 be paid to some responsible merchant in each district to handle the secretary's work.

Another delegate stated that the work done by the provincial association is not sufficiently close to the country merchant. The city dealers had their own secretary giving personal attention, and the country dealers would appreciate the association more if they had an equal service.

J. J. Polson stated that in the Regina R.M.A. there was no organization under the plan where the secretary devoted only a part of his time, and that it was necessary to open an office and devote a man's whole time to secure any beneficial results.

Suggestions by other delegates were that the plan was all right for large cities, but that country merchants could figure up their customers themselves. In another large district there were very few members of the R.M.A., and a secretary's traveling expenses would be heavy in proportion to the amount of work which could be done.

H. D. MacPherson, Regina, stated that the association had come to the limit of what it could do under prevailing circumstances. It was in response to his request for a trial in one district that the motion was adopted. The provincial association will bear the expense of the trial in one district, and it will be necessary to use some of the funds at present on hand for this purpose.

J. C. NICOL
Radisson, Sask., appointed Second Vice-President of the Saskatchewan R.M.A.

Grain Growers and R.M.A. to Co-Operate

Closing at 6 P.M. Proposed—Oppose Premium Contests—Coast to Coast Excursion Supported—Wholesalers in Retail Business—Object to Cartage and Packing Charges—Oppose Liquor Traffic

RESOLUTIONS of considerable importance occupied the attention of the merchants in convention at the Thursday morning session. The necessity for clearing up misunderstandings between the R.M.A. and the Grain Growers, and for encouraging co-operation between these two bodies was emphaszied in the discussion centering around the following resolution:

Whereas there still seems to be a misunderstanding between some farmers and some retail merchants in Saskatchewan; and

Whereas the executive of the Retail Merchants' Association have endeavored for a number of years to get together with the farmers' organizations, in order that these understandings may be cleared up if possible;

It is resolved that we, in convention here assembled to-day, go on record as being in favor of such a meeting being brought about if possible, and that the accredited representative of the Saskatchewan Grain Growers' Association be notified accordingly, and that a copy of this resolution be forwarded to the secretary of the said association.

This resolution was moved by G. W. Stockton, Carlyle, who stated that it was necessary for the modern merchant to give such a service to the community that it is unable to get along without him. "If one merchant in a town gives a raw deal it reflects on all the dealers, because the customer will send his order away to another city afterwards."

W. C. Paynter, Tantallon, speaking to the motion, stated that the co-operative movement is responsible for the progress being made by certain institutions. "I have watched the co-operative movement," added Mr. Paynter. "In the next town to mine a merchant buys in smaller quantities and cannot give a service equal to mine. But I must support that merchant because if he fails the co-operative movement will get him or the mail order house will come in on the territory."

"The Grain Growers' of Manitoba co-operate with the R.M.A. of that province, but not in Saskatchewan. We must not antagonize the Grain Growers, for they already think the retailers are obstructing their tactics. The retailer has the advantage over the big department store and the mail order houses of being on the ground, and the retailer should be an expert at handling his customers. If the farmers can formulate a scheme whereby they will be better served than by the retailers I will step down.

"We must co-operate with our customers and with the farmers' organizations. I believe the Grain Growers and the retailers should put up a fund to jointly purchase goods in cars from manufacturers. This would be a joint purchasing commission in each province, and prices would be set."

J. J. Polson agreed as to the desirability of reaching an understanding between the R.M.A. and the Grain Growers.

At this stage H. D. MacPherson stated that he had seen the president of the Grain Growers, in regard to a conference of the two organizations. The matter was left with the Grain Growers, and no further action has been taken.

It was the unanimous opinion of the delegates that where a farmer operates a store, if he gives a good service, he should have the privileges of a store, but where the store does not give service, whether it be owned by a farmer or a retailer, it should not have the privileges of a store. No objection could be taken to their going into the same market to buy their goods, but objection was taken to the granting of privileges to the man who tries to run a store "from a box car."

Fixed Closing Hour

The following resolution was introduced by Delegate Kindred:

"That this convention requests the incoming executive to use their endeavors to have legislation passed making it compulsory for all storekeepers in Saskatchewan to close every day, except Saturday and days preceding holidays, not later than 6 o'clock."

Speaking of this resolution one country member stated that while this might apply all right in towns and cities, he thought the country stores in the country and villages should remain open during seeding and harvesting time.

J. J. Polson opined that the association would not be getting very far in passing such a resolution as the provincial authorities would be inclined to leave the matter entirely in the hands of local authorities. To get such a measure through it would be necessary to have the full co-operation of the various organizations affected, such as farmers, labor and municipal.

An amendment was introduced that the convention place itself on record as favoring a 6 o'clock closing except on Saturday nights and nights preceding holidays.

Oppose Premium Contests

The following resolution was passed with little or no opposition, having been introduced by W. P. Ball, Assiniboia, and seconded by S. McMicken, Moose Jaw:

"That this convention is strongly of the opinion that all premium contests are absolutely against the principles of the Retail Merchants' Association and food merchandising and should be strictly avoided by all retail merchants.

Further that the Dominion executive should be urged to continue their efforts in favoring the passing of legislation making such contests a criminal offence."

Other resolutions passed include the following:

Bonds Produced by Produce Dealers, Collectors

Moved by S. McMicken, Moose Jaw, and seconded by W. C. Paynter, Tantallon;

"That this convention request the incoming executive to continue its efforts towards obtaining legislation requiring produce dealers and collection agencies to enter into a bond with the Government as a condition before entering business."

Re Proposed Excursion

Moved by H. E. Semple, Kerrobert, seconded by S. McMicken;

"That this convention express its hearty approval of the proposed R.M.A coast to coast excursion."

Encourage Thrift

Moved by S. McMicken, seconded by S. T. Brown, Simpson;

"The Retail Merchants hereby support the movement for the encouragement of thrift and recommend to the province the giving of such support to local thrift associations as lies within their power."

S. McMicken, speaking to this motion, stated that the wage earner who is encouraged to buy thrift stamps will have something to fall back on, and this would eliminate in many cases necessity of giving credit.

Affiliate With Social Service Council

Moved that: "This convention is in favor of affiliating with the Social Service Council of Saskatchewan."

This resolution was carried. It is proposed to have up to ten representatives on the Social Service Council, to meet annually and consider problems affecting retail merchants, etc.

Speaking to this motion, one delegate stated that in the past retailers have not taken much interest in the social welfare of towns, and that they have not realized the importance of this matter.

Oppose Liquor Traffic

The convention was placed on record as being opposed to the liquor traffic, and in sympathy with the Government's measures regarding prohibition, in a resolution introduced by G. W. Stockton, Carlyle.

Assist Commercial Education

A resolution introduced by W. C. Paynter, Tantallon, and seconded by H. E. Semple, Kerrobert, provided for the appointment of a committee representing the commercial interests, to work in co-operation with the University of Saskatchewan, in connection with a course in commercial education.

J. J. Polson proposed an amendment asking the executive to select for this year a committee to act on behalf of the R.M.A., and to ask other interests to select representatives to act in co-operation with this committee.

"Add education to what we have got without it, and we can swamp everything," said S. McMicken. The matter was left with the executive committee.

Cartage and Packing Charges

A motion was carried as follows:

"The executive committee is to be instructed to advise all wholesalers in Saskatchewan that the facts of the trade show that charges for packing and cartage are not a universal habit, and it would seem that some wholesalers in this province are wanting to get a higher charge for their goods than should be paid. This association has agreed to bring all possible pressure to bear against the following of this practice."

In moving this resolution, G. W. Stockton stated that he had written to wholesalers about this practice in his own case, and that they had replied in his favor, stating that they would "make an exception" in his case.

Wholesalers in Retail Trade

Moved by W. C. Paynter, seconded by H. A. Semple:

"As this association has been asked to express an opinion as to whether the wholesale merchant should engage in a retail business, be it resolved that the legitimacy of either a retail or wholesale business should not be judged from the standpoint of ownership of the business, but simply on the policy it follows and the service it renders."

Speaking to the motion, S. McMicken stated that if a man does a legitimate business "we do not care who the owner is."

Co-operate With Soldiers

Moved that: "This convention adopt all possible means to bring about closer co-operation between our organization and returned soldiers, and other organizations which have for their object the improvement of trade and commerce in Canada."—Carried.

HON. W. E. KNOWLES ADMITS HE IS ONLY A LAWYER

An enthusiastic address of welcome was given by Hon. W. E. Knowles, Provincial Secretary of Saskatchewan, representing Premier W. M. Martin, at the annual banquet on Wednesday evening, in the Auditorium rink. J. W. Creswell, president of the Regina R.M.A., was chairman of the evening.

Hon. W. E. Knowles, author of the famous Knowles Bill, introduced at Ottawa some time ago, admitted that the attention which he had given to the retail trade had been only as a lawyer and not as a retailer, but that he did not find this out until after he had introduced the bill to the House of Commons. He frankly admitted that one Moose Jaw merchant wired him at Ottawa that he must either stop being a fool or come home. He began to think after that that people would have to pay what they liked for things.

"It is a big concern to the people of the country that they have good shopping facilities. We are constantly dependent upon the retailers. It is unfortunate that in Canada we do not take the pride in our businesses that the English merchant does, in which cases one finds the business passing from generation to generation, with a singular pride attached to the success achieved in each case," said Mr. Knowles in conclusion.

An address was given by Mr. Frank Stockdale on the subject, "Sales People of To-day and To-morrow."

DISCREPANCY IN SALES OF GASOLINE

J. J. Polson made a report to the Saskatchewan convention concerning the action taken by the Dominion Association in regard to alleged discrepancy arising in the handling of gasoline by retail merchants. This discrepancy is indicated by the purchase of gasoline by weight and its sale by measure.

"When you get gasoline in your store in drums it comes by weight," said Mr. Polson. "In drawing it off you run short on a drum. Every complaint coming arose from dealers who shipped in under the weight system. No complaints came from dealers who bought by measure."

Mr. Polson added that the troubles along this line in Eastern Canada are now over, the matter having been taken up with the head of one of the large oil companies. To eliminate any such difficulty in Western Canada, delegates were urged to appraise the association of any similar shortage in gasoline.

SHOULD CLERK GET GOODS AT COST

The following question was asked by a delegate at the Saskatchewan convention:

"I have a staff of seven clerks, and pay the highest salaries. I allow each employee all the goods he needs at laid down cost. Is this coming to the employee?"

In reply, N. L. Green, Regina, stated that the matter should be left with the individual merchant. "Some dealers wish to do all they possibly can for the men who work with them. We recently made a rule that the men get everything they wish at one-half the retail cost."

S. McMicken responded that it was up to the merchant to run his business in fairness to his clerks and they would then be fair with their merchant.

GET-TOGETHER BANQUET TO CELEBRATE OPENING NEW WAREHOUSE

A novel and interesting banquet was recently given by the Wilson Auto Specialties Co., of Hamilton, when they invited all of their local dealers to celebrate with them the opening of their new and commodious warehouse, 19 East Jackson Street, which is one of the largest exclusive wholesale auto accessory supply houses in Canada. This banquet was held in the large showroom of the new warehouse.

The new warehouse is located in the heart of Hamilton's business section, and, including the upper floors, contains over 16,000 square feet of floor space. In addition to the new warehouse this firm has recently opened a retail store at 284 King Street East, between Ferguson Avenue and Wellington Street.

Scenes in Regina where the recent Convention of the Saskatchewan Branch of the R.M.A. was held.

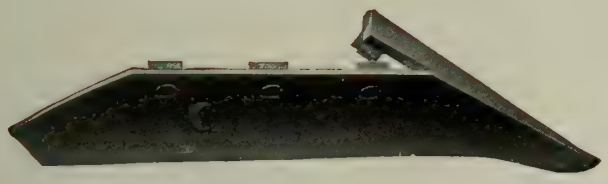
LESSONS FROM THE WEST

AT the present time the eyes of the Retail Merchants of Canada are turned toward the West. Out in that country west of the Great Lakes the organized retail merchants are becoming a strong factor. The convention that has recently closed at Regina, at which were represented the merchants from all parts of Saskatchewan and outside points as well, is but an indication of what may be expected at the Manitoba Convention to be held in Brandon within less than a month's time. The merchants of all those provinces, clear through to the Pacific, are exerting themselves to become better merchants, to keep pace in every way with the marvelous developments of that great country.

At the present time the West is faced with serious problems. There are strikes and rumors of strikes in the air. Serious as these conditions may be, they are still indicative of real growth, a growth into a larger viewpoint that must ultimately come to Capital and Labor alike.

But these are only passing phases that will be forgotten before long. All the time the country is prospering.

Her fabulous wealth, as represented by her endless wheat fields, not only means money for the conduct of industry, but means food for a hungry world. Her mines and forests and fisheries are hardly surpassed throughout the world. It is a big country with big ideas and ideals, and its merchants are measuring up to their opportunities. Their activities are well worth watching.



AUTOMOBILE ACCESSORIES

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

MORE interest centres around ingot metals this week perhaps than any other single item in the markets. A general reaction to higher levels has occurred, tin, lead, spelter and antimony all being affected. The advance on tin approximates 2c per pound, on lead and antimony ½c, and on spelter ¼c.

This follows on the heels of a resumption of buying, and the fact that buyers, besides specifying for spot deliveries, are in some metals placing orders for future shipment, would indicate that manufacturers' stocks are by no means large. Locally stocks are considered very good and the feeling prevails that slightly higher prices may be realized during the next sixty days.

A revision downward in skate screws packed in cartons has been made this week, this decline following on the heels of two other similar moves. The present basis seems to be pretty well established and orders are being accepted for next fall delivery at present levels.

Higher prices are again in evidence on linseed oil this week, following the movement of flax seed to a higher range of quotations. There is little or no Argentine seed reaching United States markets and the demand at the present time is large. Crushers report business good and the same story is told by paint manufacturers and jobbers. The advance this week amounts to five cents per gallon in linseed oil and even higher levels are looked for.

Turpentine reveals increasing strength at primary points and this is reflected here in an advance of 3c per gallon. Foreign buyers are invading Southern markets and with better shipping opportunities the market is maintaining a very strong position with no immediate prospect of relief in lower prices. The situation in regard to supplies shows little improvement as yet.

A decline of 25c per 100 pounds in blue annealed black sheets, 16 gauge and heavier, has been made this week. No revision on other gauges is reported and galvanized sheets have been maintained on a very steady basis. Jobbers report sales as very good with the outlook promising for a much increased turnover.

Shellac shows an advance of from 75c to 90c per gallon and supplies are reported as being very scarce.

MONTREAL MARKETS

MONTREAL, May 22—Hardware markets have not undergone a great deal of revision this week, changes being fewer in number and also in importance. Tap soles are moved up slightly in price, and there is an advance also on one line of wrenches and vises. Ingot metals are much firmer, and there is a higher price basis for nearly every line, copper and lead, and also antimony being particularly high. Old material has been somewhat weaker on iron and steel. Solder is up 2½c per pound. Canada plate prices have been revised downward in one quarter to $7 and $7.10 per box, while coke tin plates are also down $1 per box. Trading is good in a general sense, although this statement applies more to the daily orders that are received, and not to placing business, which might show much improvement.

Leather Soles Are Moved Higher

Montreal

LEATHER SOLES.—Prices are slightly advanced on leather soles. These are some of the new prices: No. 10 men's tap soles, per dozen, $6.90; No. 11, $5.70; No. 14, $3.75; No. 15, $3.15; No. 121, $4.20 and No. 123., $3.80. Women's style, No. 36 are quoted at $4.20; No. 37, $3.90, and No. 37½, $2.35 per dozen. Men's heels, No. 50 are $1.45; No. 141, $1.20, and women's, No. 181, $1.10.

Wrenches and Vises Make an Advance

Montreal.

WRENCHES, TONGS. — Increased prices are in effect for Vulcan wrenches. No. 31 are now priced at $4.20 each; No. 32, $6; No. 33, $8.50; No. 33½, $10.80; No. 34, $13.20. Vulcan pipe vises are also higher, No. 1 V being quoted at $4.20 each and No. 2 V at $9. Some jobbers are quoting Stillson wrenches at 50 and 5 per cent., others at 55 per cent. from the list.

Selling of Rope on a Held Basis

Montreal

ROPE AND CORDAGE.—There has been a fair, but only a fair sale for rope. Supplies are available in quantity if wanted, but buying still is done on a careful basis by the trade, both jobbers and retailers alike. Prices have steadily held as follows: Pure manila 34c per pound base; British manila 30c; sisal 27½c.

Nails Have Held And Sales Made

Montreal

NAILS AND WIRE.—Features in this market are not marked, and there have been no changes. Orders have come to hand steadily for wire nails which are selling on the held basis of $4.75 per keg, and at which price cut nails are also selling. $5 per 100 pounds is the basis for smooth steel wire, and there is a seasonable sale for various kinds of wire, both fencing and plain wires.

Now Some Selling Of Ranges; Stoves

Montreal

STOVES AND WARES.—There is a better movement of stoves and ranges.

Not only this, but the dealers seem to be realizing that prices are not going to tumble, and some fall business is already looking up. The undertone is steadily firm on these, as it also is on some other lines of summer stoves. Wares are selling well, and there is no change in the discounts.

Oil Goes Forward; Basis is Steady

Montreal

COAL OIL AND GASOLINE.—There is a seasonably good demand for coal oil although warmer weather of the more definite sort would increase selling much. Prices are unchanged at 20 to 23 cents per gallon. Gasoline is steadily he'd at 34 cents per gallon, and the sales made are quite heavy. No changes have been made in lubricating oils.

Bar Movement On An Active Basis

Montreal.

STEEL AND IRON.—Sales are very good on steel and iron. It is now possible to secure stocks in favorable volume and delays are less frequent than they were in delivery. Prices have continued unchanged and the outlook is for a steady business on a frequent buying basis.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Sheet Orders Are Rather Limited

Montreal.

SHEETS AND PLATES.—Orders are none too plentiful for sheets. There is some business all the time, but big orders usually placed at this season of the year are fewer than in normal times. Prices have continued rather nominal in this market, price-cutting being reported.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35

20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made

Solder is Higher; Lead Lines Firm

Montreal

LEAD PRODUCTS.—The price of solder has again advanced. This is due to the firmer position attained by lead. All grades of solder used by the trade are up 2½ cents per pound excepting wire solder, this not having changed at all. Lead wool, pipe, etc., have not changed in any way. In the matter of sales there has been an improvement.

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	15%
Lead wool, lb.	0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10½

45-55	0 36¾
50-50	0 39¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Pipe Scrap Down; Melting Steel, Too

Montreal

OLD MATERIAL.—Expectations were that old metals would be more active, but as yet there is no improvement. Tendencies are quite unchanged in all lines excepting pipe scrap and heavy melting steel, the former declining $2 per ton and the latter $1. There may be further revisions during the week. If trading improves it is possible that the market may be a better one, with prices moved up somewhat.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00

Wrought iron, No. 1, per gr. ton	....	11 00
No. 1 machinery cast	....	18 00
Heavy melting steel	....	9 00

Ingots Have Firmed; Some Higher Prices

Montreal.

INGOT METALS.—The markets have generally become firmer during the past week. Nearly all items in the list have advanced, and those which have no are not showing declines or lowering tendencies. The movement is toward a higher price basis.

COPPER.—Advances have been made in all markets for this metal, and the prospects are that increases still will be made. The basis here is 19c per pound.

TIN.—Prices in the London market have been firming, and there is an increased enquiry for the metal. Prices here have been advanced to 58c, this being an increase of 2c per pound.

LEAD.—Advances of 25c per 100 pounds were made by the trust in the States, and this means that the New York basis at this writing is $5.25. Naturally the local market has strengthened, and the basis here this week is 8c per pound, a considerable advance.

ANTIMONY.—Following the firming of the silver market, antimony is much in the limelight. There is likely to be a firming of this market still, and quotations for the week are up to 9¼c per pound, three-quarters of a cent above the basis of last week.

SPELTER.—Steadily firm and ½c higher at 9c per pound.

PIG IRON.—No change has been made on this. The tendencies are rather to higher levels than downward. Price still $45.

TORONTO MARKETS

TORONTO, May 22—A decline of 25c per 100 pounds has been made in blue annealed black sheets, 16 gauge and heavier, in some quarters. Skate screws in cartons are easier. Ingot metals are gaining strength and tin, lead, antimony and spelter show a movement towards higher levels.

Business here is good and jobbers are well satisfied with orders coming to hand although some difficulty in filling orders is being experienced in some lines. However, deliveries from manufacturers are better and apart from present labor outlook which is somewhat unsettled, the situation generally is very good.

Skate Screws in Cartons Decline

Toronto.

SKATE SCREWS.—There has been a revision this week in the price of skate screws packed in cartons. In each carton there are 12 packages, each package containing 8 large screws for the heels and 16 smaller size for the soles. The price which has been adopted on these is 42c per carton. This replaces the price named on April 17, of 50c, which in itself was a reduction from a previous figure of 55c. It is expected that the present level will be maintained for some little time. Orders are now being booked at the present basis for Fall delivery.

Higher Prices On Tap Soles And Lifts

Toronto.

TAP SOLES, LIFTS.—Higher prices have been named on tap soles and lifts, the new quotations applying particularly to the better grades. On the XXX and XX grades an advance of 20 per cent. is shown on the X grade, an advance of 5 per cent. has been made, with the cheaper lines undergoing no revision. A new list was not available at time of going to press.

Stove Situation Unchanged; Wares Hold

Toronto.

STOVES, WARES.—The situation in

regard to sales of oil, gas and electric stoves is considered very satisfactory. Manufacturers and jobbers report sales very active and the volume of orders coming through is looked upon as good. The market has held very steadily and there is no indication of any immediate price change.

There have been no new developments reported in regard to enamelware, tinware or kindred lines. Prices seem to be very well maintained and the volume of business coming to hand is considered quite satisfactory.

Cordage Dull; Cotton Twine Firm

Toronto.

CORDAGE, TWINE.—Business as yet in rope is still along rather narrow lines. However, this is not a discouraging feature by any means, as manufacturers more or less expect this condition at this season of the year. Quotations for the week remain unchanged, pure manila being quoted at 34c per lb., base; British manila 30c; New Zealand hemp at 30c sisal 27½c, and sisal lath yarn at 27½c.

The strength of the cotton market during the past two or three weeks has provided a very firm undertone to the situation in cotton rope and cotton twine. As a matter of fact some manufacturers in the U. S. have advanced their prices on cotton wrapping twine and this may be the forerunner of a similar movement here. At any rate the outlook is one of firmness.

Big Movement Oils, Gasoline Noted

Toronto.

OILS, GASOLINE.—Apart from the fact that increased activity in sales is apparent, there is little news to report in the situation on lubricating oils, coal oil, or gasoline. The warm weather is influencing the sale of oil stoves and this in turn reflects similarly upon sales of coal oil. Prices have held without change at from 19½c to 22½c per gal. according to grade. There is no indication of any shortage of supplies. Lubricating oil sales and gasoline sales are a reflection of the greater use of motor cars and gasoline driven machinery of various kinds, and the outlook in these lines is considered very satisfactory. Gasoline is ruling at the unchanged figure of 33c per gal., with delivery being made on a satisfactory basis.

Better Feeling in Iron and Steel

Toronto.

IRON AND STEEL.—Trade continues to show some improvement and jobbers as a whole are well satisfied with the business which is being done. Stocks are ample and there is no indication of any immediate revision in prices. Quotations which are generally in effect today are as follows:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Heavy Black Sheets Down 25 Cents

Toronto.

SHEETS, PLATES.—Lower prices have been established in some quarters on blue annealed black sheets, 16 gauge and heavier, the decline amounting to 25c per 100 lbs. The present range of quotations is shown below.

Jobbers report a very good volume of business on all lines of sheets being done and indications are that this will continue and even increase if present enquiries develop into orders.

Sheet copper is being quoted for delivery from the mills at 24½c and from stock here at 27c per lb.

BLACK SHEETS.	Per 100 lbs.	
10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.		
10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Fair Business in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—Manufacturers report a very fair business being done in corrugated sheets and kindred lines, and outlook is considered quite satisfactory for business on the way. Prices have held without change at the following levels:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

No Change in Wrought Pipe, Tube

Toronto.

WROUGHT PIPE, BOILER TUBES.—There has been no marked change in the situation as it affects wrought pipe. There is some business being done and prices have held without change at figures shown in current market quotations.

Business in boiler tubes has fallen away somewhat from volume being done a few weeks ago. The market seems firm and quite steady, quotations herewith holding without change.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	....
1½ inch	28 00	....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder Holds at Advance; Very Firm

Toronto.

LEAD AND ZINC PRODUCTS.—The prices on solder have held firm at the advance recorded last week, and there is no indication of any recession from present schedule of prices as shown below. Even higher prices may be named.

The undertone to the market on manufactured lead products is strong in line with advances on the metal. Prices are given herewith:

Lead pipe, lb.	....	$0 11½
Lead waste pipe, lb.	....	0 12½
Lead traps and bends	....	15%
Lead wool, lb.	....	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½

Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.

Solder, guaranteed, lb	0 35	0 39
Solder, strictly, lb.	0 33	0 35
Solder, commercial, lb.	0 30	0 33
Solder, wiping, lb.	0 29½	0 32
Solder, wire, lb.	0 36	0 42
Zinc sheets, per lb.	....	0 17

Some Prices Go Higher; Better Feeling

Toronto.

OLD MATERIALS.—There is a better feeling in metals which has been reflected here and a somewhat optimistic note is sounded by the dealers, though this is not very pronounced as yet. There have been some slight advances made in buying prices on brass, which will be shown in figures below. There seems to be a little business doing but as yet this is rather restricted. Range of quotations for the week are:

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00
Yellow Brass	....	0 07
Red Brass	....	0 10
Light Brass	....	0 05½
Scrap zinc	....	0 04½
Heavy copper	....	0 15
Wrought iron, No. 1, per gr. ton	....	15 00
No. 1 machinery cast	....	14 00
Heavy melting steel	....	9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04

Fair Activity in Nails; Wire

Toronto.

NAILS, WIRE.—There is an improvement in building to be noted, and as a result the trade reports better sales of nails. The outlook is considered quite bright, and whereas buyers are not placing orders for requirements more than

two or three weeks ahead, the fact remains that the orders are coming to hand. Quotations remain unchanged for the week, wire nails selling at a base of $4.70 per 100 lbs., and cut nails being quoted at $4.75.

The smooth steel wire base is holding at $5 for 100 lbs., which is an unchanged figure, and indications are that there is little new in the wire outlook to report.

Waste Holds Steadily; Oakum Too

Toronto.

WASTE, OAKUM.—The reaction in the market on cotton to higher levels is providing the waste market with a very strong undertone. This has not been reflected as yet in any price change upwards, and manufacturers as a whole are hopeful that it will not be necessary to revise quotations to a higher level again. However, indications are that present values are good in view of the situation in the cotton market, and whereas buying as yet is along rather restricted lines, there seems to be a somewhat better feeling in the placing of orders.

There have been no new developments in regard to oakum, and trade as yet is along rather narrow lines.

Ingot Metals Showing Strength

Toronto.

INGOT METALS. — Practically all along the line advances have been recorded, tin, lead, spelter and antimony recording slight advances. This is generally considered the result of a buying movement in progress, and not due to any depletion of stocks, which seem to be ample. Business in all metals seems much improved.

COPPER. — Primary points record some further slight advances as a result of an improved demand. This has not yet affected the situation locally, but a slight reaction to higher levels may develop. Quotations here are still being made at 18c per pound.

TIN.—A further advance has occurred locally, quotations ranging from 60c to 62c per pound. Stocks here are very good, but reports from United States points indicate that supplies there seem to be much smaller than anticipated, and this may mean still higher prices during the next sixty days.

SPELTER—.There is still only a fair demand for this metal, but a better feeling prevails as a result of the movement in the other lines. Prices locally show a range of from 8¼ to 8½c per pound, an advance of ¼c per pound.

LEAD.—At United States points an advance of $5.00 per ton has been recorded within a week, and this movement upward is stimulated by the action of buyers coming into the market for fair spot quantities and specifying for even later delivery. This would indicate that stocks in manufacturers' hands are by no means heavy, though there is lots of lead available. Prices here are now ranging from 6½ to 7c per pound.

ANTIMONY.—A reaction upward is noted in this metal also this week, quotations now ranging from 8½c to 9c per pound. There is a better demand, and this is being met from ample stocks, though supplies here are not considered heavy.

ALUMINUM.—There are some grades of aluminum that are reported scarce at primary points, and it has taken very little of a buying movement to make this fact apparent. There is only a nominal interest being shown as yet in this metal locally with quotations ranging around 40c per pound.

LONDON MARKETS

LONDON, ONT., May 22—Prices continue firm with advances noted in some lines. Turpentine has advanced a cent a gallon and linseed oil five cents. In spite of the continued wet weather, which has been responsible for delayed sales in some of the summer lines, business has been very good. Orders have been coming in steadily from all parts of the district. Sales of paint, oil, lead and varnishes have been very brisk and many repeat orders have been coming in.

New Prices on D Top Fork Handles

London, Ont.

FORK HANDLES.—New and higher quotations are now being made on D top manure fork handles. The new figure is $7.35 per doz.

Prices on Rifles, Ammunition Adjusted

London, Ont.

RIFLES.—Revised prices have been generally adopted on Winchester rifles and American ammunition. On the basis now established Winchester rifles are quoted at 10 per cent. advance on list. American metallic ammunition is quoted at an advance of 15 per cent. on list. Percussion caps and primers are quoted at list plus 15 per cent. Gun wads, list plus 15 per cent. and empty and loaded paper shot shells, list plus 22½ per cent.

Net Prices Named For Stove Pipes

London, Ont.

STOVE PIPES.—Following the recent changes made in discounts on stove pipes net quotations based on the revision are now available and range as follows: Made up stove pipes, 6 in., bright, $19.90 per 100 lengths; 7 in., bright, $21.03; 6 in. common, $15.93; 7 in., common, $17.63; patent stove pipe, easy lock, 6 in., $16.97; 7 in., $18.19.

Higher Prices Named For Bread Mixers

London, Ont.

BREAD MIXERS.—Higher prices are now in effect for universal bread mixers. The new quotations are: 4 loaf, $38.08 doz.; 8 loaf, $46.40 doz.

Washing Machines in Good Demand

London, Ont.

WASHING MACHINES. — Washing machines and wash benches are still selling briskly. No change has been made in prices, the discount remaining at 30 and 10 per cent. off list.

Step Ladder Prices Show No Changes

London, Ont.

STEP LADDERS.—Good sales of step ladders are being made. Quotations are unchanged and are for the shelf lock, 22c per ft., and the Ontario, 27c per foot.

Nails and Rope Are Holding Firm

London, Ont.

NAILS, ROPE.—Nails have been in fair demand. Quotations show no change and are as follows: wire, $4.70 per 100 lbs., base; cut, $4.75.

Rope quotations are without any change. The demand is light. Prices to-day are: pure manila, 34c per lb., base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Wall Finishes Briskly Moving

London, Ont.

WALL FINISHES.—There has been a good demand for Alabastine. The quotations show no change from 40 per cent. off list.

Good Demand For Putty Reported

London, Ont.

PUTTY.—No changes have been made in prices of putty. There is a good demand at present at the following figures: Standard, 100 lb. drums, $6.75 per 100 lbs.; standard 25 lb. drums, $7; pure, 100 lb. drums, $8.75; pure 25 lb., $9.

Prices of Glass Remain Unchanged

London, Ont.

GLASS.—Following steady increases in building activity there has been a fair demand for glass, with many inquiries, which indicate future business. Quotations show no change and are as follows:

Window glass—net prices per case:—

	Single Disc.	Double Disc.
Up to 25"	$12 60	$17 15
26 to 34"	13 20	18 64

35	to	40″	13 76	19 80
41	to	50″	17 63	22 50
51	to	60″	18 45	23 10
61	to	70″	19 87	24 52
71	to	80″	.....	26 55
81	to	84″	.....	34 09
85	to	90″	.....	36 64
91	to	94″	.....	37 55
95	to	100″	.....	43 91

Linseed Oil Up; Turpentine Higher

London, Ont.

LINSEED OIL, TURPENTINE. — Linseed oil has made an advance of five cents and the market is very firm at present levels. New quotations appear below. Turpentine shipments are now coming in better. Prices show an increase of three cents per gallon. The quotations are shown herewith.

Linseed oil:—

	Raw per gal.	Boiled per gal.
1 to 2 bbls.	$2 05	$2 08
3 to 5 bbls.	2 04	2 07
6 to 9 bbls.	2 02	2 05

Turpentine:—

	Per Imp.
1 bbl. lots	$1 20
2 to 4 bbls.	1 19
5 gal.	1 30

No Changes Shown in White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—While the market is firm and a fair volume of business is being handled no change has been made in quotations, which are as follows: pure, in ton lots, $16.30 per 100 lbs.; less than tons, $16.65.

WINNIPEG MARKETS

WINNIPEG, May 19—For the first time in four years prices for the week do not show a single change on any of the standard shelf goods or heavy hardware and markets in general are settling down to a firmer basis.

The strike which was called on Thursday last and which affects practically every trade in the city, is still in progress and has paralyzed all lines of business. The unions which walked out include Firemen, Street Railway Men, Carters, Express Men, Machinists, Cooks, Waiters, Bakers and Milkmen. In addition all the shippers and other warehouse help of the wholesale hardware trade are out and as a result business is suspended for the time being, pending a settlement. This may be some time in coming as the demands, while just in many cases, are exorbitant in others. It is understood the "closed shop clause" will also be fought against. All newspapers in the city have closed down on account of the pressmen's strike, but labor leaders are operating one plant to print the labor paper.

Firmness Shown in Solder Prices

Winnipeg.

SOLDER.—Prices on solder, which have been declining steadily for some time, seem to have strengthened owing to a recent advance in the tin market of 4c per lb., and prices are reported very firm. No advance is recorded as yet, but higher prices would not be surprising. To-day's ruling prices are confirmed herewith: solder, half-and-half, case lots, 34c per lb.; less than case lots, 35c per lb.

Iron and Steel Holding Steadily

Winnipeg.

IRON AND STEEL.—Sales are reported as having been very good on all lines of bar iron and steel, prices of which are holding very firm, with no indication of any immediate revisions. Stocks are also reported in good shape, and sufficient for all requirements. To-day's markets on the various lines are given herewith: bar iron, $5.25, base, per 100 lbs.; Swedish iron, $5.25, base; sleigh shoe steel, $5.50, base; plow steel, common, $6.50 per 100 lbs.; plow steel, crucible, $7.50 per 100 lbs.; angle steel, $5.35; harrow tooth steel, $5.75, base; cast octagon tool steel, $7.50 per 100 lbs.; square tool steel, 20c per lb.; spring steel, $7.50 per 100 lbs.; machinery steel, $8, base; fire steel, $5.90; mild steel, 3-16, ¼, 5-16, $7.75, base; other sizes $5.50, base; band steel, $5.50, base.

Sales White Lead in Oil Have Been Good

Winnipeg.

WHITE LEAD IN OIL.—White lead in oil prices still hold firm at former quotations, with the usual spring demand reported. No immediate change is looked for. Prices ruling are given herewith: Decorators', pure, ton lots, $16.90 per 100 lbs.; less than ton lots, $17.25 per 100 lbs.; decorators' special, ton lots. $15.90 per 100 lbs.; less than ton lots, $16.25 per 100 lbs.

Rope Holds; Sales Have Been Good

Winnipeg.

CORDAGE.—Prices on all lines of rope, which have been very erratic during the last few months, seem to have steadied down to a fairly firm basis, and no immediate revisions are in view. Sales have been very good and stocks appear to be very well assorted in all sizes. To-day's prices are given herewith: pure manila rope, 35¼c, base, per lb.; sisal, 28¼c; British manila, 31¼c; sisal lath yarn, 28¼c; African hemp, 31¼c; cotton rope, ¼ in. and over, 66c lb.

Turpentine Market Reveals Strength

Winnipeg.

TURPENTINE. — Turpentine prices seem to have settled down to a firm basis after the recent advance, and no change is recorded during the week. Sales in this commodity are reported as being very heavy during the last week in anticipation of the usual spring paint-up campaign. To-day's market prices are confirmed as follows: barrel lots, $1.35 gal.; ¼ barrel lots, $1.38 gal.; 5 gal. lots, $1.40 gal.; 1 gal lots, $1.40 gal., plus the usual extras for containers.

Linseed Oil Maintains Firmness

Winnipeg.

LINSEED OIL.—Good sales are reported during the last ten days on linseed oil, which has been influenced by spring painting. Prices are still holding firm and no immediate change is anticipated, as flax seed prices continue very firm. Prices ruling to-day are quoted as follows: raw linseed oil, $1.93 gal.; boiled linseed oil, $1.96 gal., in single barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., May 22.—The steel market continues to drag. There may be a slight improvement in spots, but it would require a very large improvement in buying to do any good, when even the present 55 per cent. operation of steel mills is based chiefly upon old orders, current orders accounting for only between one-third and one-half of the production.

Pig Iron

More than half the merchant furnaces in Western Pennsylvania, the Mahoning valley and the lake front district of Ohio are idle. The furnaces have been blowing out steadily, one after another, and the end is not yet. This makes it that the few furnaces remaining in blast have a good demand for their iron. The buying is all in small lots, usually single carloads, as buyers will not take any chances with prices. This, however, makes the business easier for the furnaces since the price is not much of an issue. When a consumer wants only a carload he does not haggle over the price. The furnaces are not piling iron, at least to any extent, and the situation in this respect is illustrated by the case of one merchant furnace interest which has a stack making a well-known brand

of foundry iron, and desires to blow the stack out for relining, but must first accumulate a stock to take care of trade meanwhile. The furnace would work better with its new lining than it is working now.

Pig iron consumers likewise are not accumulating iron, but rather have been drawing upon stocks, chiefly iron they had to take on contracts. Sales of foundry coke indicate that the melt of iron is greater than a month or two months ago.

There are various rumors of price concessions on pig iron, but nothing definite is established as to prices below those that became effective March 21. As to the local Pittsburgh market, however, there is a slightly easier position, in that some furnaces that have lower freight to Pittsburgh than the rate from the valleys to Pittsburgh will give away their freight advantage, something they will not do when there is a strong market. Thus the regular valley market on foundry iron is $26.75, furnace, which with $1.40 freight to Pittsburgh, would make the Pittsburgh price $28.15, but there is a furnace interest with $1.10 freight to Pittsburgh, which will sell at $26.75 furnace, making the cost delivered Pittsburgh $27.85. Other valley prices are: Bessemer, $27.95; basic, $25.75; malleable, $26.25; forge, $25.75. If there were inquiry for any sizable tonnage these prices would probably be cut.

Steel

There is hardly any new inquiry in the market for either billets or sheet bars. There are rumors that sheet bars have sold at $2 to $3 under the recognized quotations, but these rumors cannot be confirmed. Most mills will allow a brokerage to middlemen, but the amount is not large enough to justify the middleman splitting the commission with the consumer. Specifications on long term billet contracts are very light, and on sheet bar contracts they are quite moderate, representing 50 to 60 per cent. of normal. Regular quotations remain at $38.50 for billets, $42 for sheet bars and 2-inch billets, and $41 for slabs, f.o.b. mill, Pittsburgh or Youngstown.

Finished Steel

Regular prices are: bars, 2.35c; shapes, 2.45c; plates, 2.65c; blue annealed sheets, 10-gauge, 3.55c; black sheets, 28-gauge, 4.35c; galvanized sheets, 28-gauge, 5.70c; plain wire, 3c; wire nails, $3.25 per keg, base; merchant steel pipe, basing discount 57½ per cent. In general these prices seem to be well maintained, but there are rumors of considerable shading in wire, and of some shading in sheets.

Buyers' Attitude

There is little opportunity to determine the attitude of buyers as to prices. Nearly all the time there is a controlled market in steel, as there is at present, and buyers are trained to pay the price or do nothing. The buyer probably feels he has only two alternatives, to pay present prices or wait until lower prices develop. Jobbers and manufacturing consumers are buying sparingly, taking only the material they must have. As to steel for construction purposes, which is usually the heavy end of the steel demand, there is practically none in the market. A large amount of work has been figured on by the engineering and construction firms, but there is no disposition on the part of the investor to go ahead with the projects. Many jobs have had all the engineering work done and are in shape for quick action whenever favorable conditions arrive. One of these, of course, is an open market for steel, a market that would give the buyer confidence, but there are other influences holding back the investor, particularly the fact that the peace settlements have not been made.

Producers' Attitude

The view of steel producers is that they would lose by throwing the market open, that there would be a decline in prices more than sufficient to balance such increased business as would result. They hold that the time is not yet ripe for a general buying movement. No steel producer is willing to predict that the time will be ripe before summer, which means that next fall is the earliest time, and many predict that there will not be really good business until next year. That means, of course, that the producers are willing to peg along with such orders as have to be placed, plus such old orders as remain on books. There was an average of 77 cent. operation in March, and 65 per cent. in April, while the present rate seems to be about 55 per cent., and June may show an average of 45 per cent., with still lower operations in July and August. With such light operations production costs are, of course, exceptionally high, but if prices were lower and there were only a slightly greater demand the mills would be worse off, in point of total earnings, than at present.

For weeks past the steel producers have insisted that there is "an open market" for steel products. On April 1 the Attorney-General rendered an opinion that the Industrial Board plan of "price stabilization" was illegal, but the opinion was not given to the public until after the resignations of the members of the Industrial Board were accepted, on May 9. Undoubtedly the steel producers had prompt knowledge of the Attorney-General's opinion and, in the circumstances, would be prompt to disclaim any allegiance to the Industrial Board plan. This left it, however, that

A timely display for the present season is shown herewith. Electric lamps, toasters, grills, irons and kindred lines are now in active demand. An improvement in building will stimulate sales of mechanics' tools also.

while, technically, there is an open market, since there is no authority for anyone to dictate prices, there is practically a controlled market through the steel producers individually adhering to the recognized quotations, just as they have done in past years in more or less similar circumstances. The producers claim this is not illegal, the substance of the argument being that the producers do not agree to maintain prices, they merely do maintain prices.

World-Wide Interest in Winnipeg Strike

LATEST advices received from Winnipeg, which has been in the throes of a general strike for more than a week now, seem to indicate that the settlement of existing differences is somewhat nearer completion. The situation is still serious, and in view of the present labor unrest which is general throughout Canada, the outcome has more than local interest.

From 30,000 to 35,000 employees are out on strike and are submitting to the dictatorship of half a dozen men whose avowed intention seems to be the establishment of a Soviet Government. That such a government will be permitted in any part of Canada is impossible—opposition in the form of a Citizens' Committee is already gaining marked strength, and it is doubtful if the mass of the better type of union men will desire to back such a radical move as their leaders propose.

Winnipeg labor carries a preponderance of the foreign element, probably more so than any other city in Canada, and that the radical element to be found in their ranks will maintain the ascendency for long is improbable. The democracy which they claim in their talk is contradicted by their avowed intention of class rule.

A representative of HARDWARE AND METAL who has just returned from Winnipeg speaks in the highest terms of the work of the Citizens' Committee. This consists not only of employers whose men are on strike, but professional men and citizens whose chief aim is maintenance of law and order and the operation of the public utilities. The business and professional men of Winnipeg have responded admirably and the fire halls are manned by lawyers, brokers, etc.; a large number of citizens have also gone into barracks so as to be available immediately in case of riot. This attitude on the part of thousands of business and professional men has been a big factor in maintaining law and order and thus protecting not only the lives and property of citizens, but also the good name of Winnipeg. Efforts are now being directed to a resumption of at least some lines of business along lines more nearly approaching normal. Business in all its branches with outside points has been at a standstill, and a continuation of this condition for a much longer period must result in actual want.

So far as HARDWARE AND METAL'S representative could learn, there was, up till a couple of days ago, no shortage of food threatened. Milk and bread deliveries were interfered with for the first two days of the strike, and this must of course entail hardship, but they are now greatly improved. To those people able to go to the stores, food has been available.

However, the time may not be so far distant when lack of money may result in some families suffering from want of food, and therein lies the danger. Even those union men on strike will want a settlement before they are compelled to go hungry, for the hungry man is going to create trouble.

Reports have been issued that the war veterans are in sympathy with the strikers. The latest news, however, is, that owing to the large foreign element to be found in the ranks of the strikers sentiment is changing, and any effort to actually establish a Soviet Government may easily be the move that will turn the returned soldiers to the ranks of the Citizens' Committee.

Trade unionism has done much to improve the conditions under which labor is employed, and manufacturers as a whole recognize the principle of the unions. It is by co-operation between capital and labor that most idealistic relations for all concerned can be secured. Are the teachings of the war which did so much to break down class traditions to be soon forgotten? The red flag element in labor exists no less than the Prussian element in capital. Both should be suppressed and the better elements get together and work out a solution which will bring harmony out of the present discordant notes.

SAYS BIG INCREASE IN MAIL ORDERS

John A. Frazer, sales manager of Lewis Bros., Ltd., Montreal, stated that the volume of mail order business coming to hand shows remarkable increase. "This is just what I expected at the beginning of the year, and the number of express shipments made these days is remarkably large. In some cases, out of 100 orders, as many as 60 of these have been requested by express," said Mr. Frazer.

Mr. Frazer stated that the present volume of business called for a great deal of detail work, and that staffs were busy on special orders sent in, particularly at the end of the week, after hours. It denoted that the dealers were needing supplies urgently for immediate orders, and that these they required with a minimum of delay. Express routing was specified, not only in orders received by mail, but as well in telegraphic orders, which were greatly increasing.

Asked as to whether he expected this business to be continued, Mr. Frazer said that he believed it would. In his opinion he believed that there would be a great deal of this hurry-up business for a long time to come. Retailers were required to give good service, and the nature of doing business was, in many ways, changing entirely. There was no evidence of the increased mail and telegraphic business becoming less, Mr. Frazer said.

"Will this increase of special order business apply to lines in general?" HARDWARE AND METAL asked.

"A great deal of it is for automobile accessories, but there are many items in the regular hardware stock that are ordered this way, and we look for it to continue," concluded Mr. Frazer.

The Tariff is only one of the many questions for the returned soldier to turn his attention to, the "world" thinks.

Where Free Sample Work May Help

Most Remunerative Advertising That Which Costs Public Something to Acquire—Uses and Abuses of the Free Sample—Getting the Customers' Interest—The Children's Place

NEVER had much faith in out-and-out free samples. So far as paints and varnishes are concerned, they either have to be too small to be of any use, or too large, and then they possibly spoil an otherwise legitimate sale.

Besides, something for nothing accomplishes little. The receiver seldom appreciates nor shows any great interest in something which costs nothing.

As an old missionary once stated, if you give a Bible away to a heathen, he either loses or forgets it. Charge him only a fraction of its cost, and he takes it home, reads it, and develops an interest in its message.

The Best Paying Advertisement

The most remunerative advertising is that which costs the public something to acquire because it involves a pecuniary interest, and the recipient is going to look into and become interested in what has cost him real money.

If all the souvenir baubles that came from Niagara Falls had been given away, Niagara Falls would be less advertised than it has in the past. Because the souvenir cost about ten prices above its actual value it was carted home, given the place of honor beside the family Bible, and Niagara and its wonders exploited in thousands of homes throughout the country.

How Free Sample May Work

The best lesson of how and why a dealer should not victimize himself too freely with the free sample habit was witnessed by the writer in a grocery store not long ago. A young and not overly experienced clerk conceived the bright idea of placing a small safe in the store window. A placard in front of it announced that in the safe was something for everybody who came into the store after 6 o'clock on Saturday night. And there was—samples collected from every source he could gather them. But there wasn't any room for business that night. The place was so full of youngsters from six o'clock to ten that the usual run of Saturday night customers went on to the next grocer for their week-end supplies.

Uses and Abuses

Samples have their uses and abuses. How to tame this method of advertising to serve profitable ends might be suggested from the following incident:

Ben Lennox was a retail salesman of the type which likes to demonstrate his goods in the most practicable method possible. He knew the evils of the sample habit from bitter experience. But he appreciates the sales benefit of getting the trade interested through methods that were unusual or out of the ordinary. His store was big enough to allow him some swing, both in the matter of window displays and inside demonstrations.

Paint and varnish demonstrations were not new to his store either. How to promote one on novel and profitable lines, was, however, another question. Ben scratched his head some days over the question till he devised a solution.

Previous demonstrations had been cut and dried affairs, on small sample boards or on the store furniture. These interested customers, and increased sales. But Ben sought to develop deeper personal interest through some tangible sample that the customers could carry home with him or her. Yet he avoided giving away sample cans that might or might not be used to good purpose.

Getting a New Angle

He prepared his demonstration booth in the usual manner and coached a demonstrator for the occasion. His announcements differed little from previous ones except in the fact that he offered to varnish, stain or enamel any small domestic article that a customer cared to bring to the store. Only one article to a customer, and its size to be limited by the judgment of the demonstrator or Ben himself. He suggested picture frames, wicker baskets, small flower stands, piano stools, children's chairs, jardiniere stands, etc. The customer was obliged to bring such articles to the store personally, and to take them away again; no deliveries, either coming or going.

By limiting the colors he used to the best sellers in his line, he avoided giving away a lot of materials uselessly. What he did give away was applied to an article that had value and interest to the customer, and stood out as a lasting "ad" of what his goods could do and would look like.

When an article was brought in, the demonstrator showed the lines and colors he was using, and allowed the customer to make his own choice. This gave an opportunity to discuss the merits and uses of different lines, permitted throwing out many suggestions which a customer is bound to lead up to when interested in this way. If time permitted, the demonstrator would apply the line selected before the customer's eyes, which had an educational effect as to how such household lines should be used. After the article was finished, the customer was told to call again the next day, when it would be dry and ready to take home.

(Continued on page 84)

Tile-Like Finish

The persistent demand for an ideal Finish is satisfactorily met by *Tile-Like*. For use on hard or soft wood floors, old furniture, wicker furniture, porch chairs, linoleum or oil cloth, etc.

Tile-Like is the greatest renovator of old furniture, you can sell in your store. Makes everything look like new. Spring time is the logical time to sell it.

For beautiful effects and great durable wearing qualities recommend *Tile-Like*. It's sold at a reasonable price and there are splendid profits in it for the dealer.

Write to-day for our agency proposition. It will put you in touch with a line of Paint and Varnish products that are being recognized by the public as the **"best money value"** on the Canadian market to-day.

The Brush Department

Sells Householder Expensive Brushes

Montreal Retailer Says Many Customers Prefer the Better Brush —Kalsomine Brushes Sold at Four and Five Dollars— Food for Reflection in This Idea

LATOUR, LIMITED, Mount Royal Avenue, Montreal, sell many householders the better grade of brushes. "Sometimes the man who owns his own house will buy a kalsomine brush at $4 or even $5. He realizes that he will get better satisfaction while using the brush and that this brush will last much longer —in fact, that he can use it again next year," said Mr. Latour to a representative of HARDWARE AND METAL.

The question arises: What is an expensive brush? It would seem to suggest its own answer, for, while there are many uses to which a brush is put which are obviously of such a nature as to suggest a low-cost brush, a job of any size should be undertaken with the better grade. The point which the writer was interested in, was that of the average householder learning to place value on a brush where value belongs.

Wall Brushes Sellers

The Latour brush stock is large and well-assorted. It is kept in drawers which are close at hand and within easy reach of the salesman, right back of the serving counter. The explanation given for this method of stocking the brushes is that this keeps them free from dust and sunlight. As Mr. Latour pointed out: "Few men like to buy a brush that is filled with dust when they come to look at it and examine it. When a cloud of dust comes from it it is difficult to complete the sale so readily."

Wall brushes, particularly the wider varieties of kalsomining kinds, are carried in profusion. These are sold to the painters and decorators, the plasterers and paper-hangers, but a goodly number go to the "man of the house," who enjoys doing some of his own work.

There is a big opportunity ahead of the dealer who goes after the brush business. It is one of his most profitable lines, or may be made profitable.

Here's a Suggestion

Take a sheet of wall board, scribe a circle the whole width of the sheet with the use of a pencil and two feet of string. Employing a heavy pair of shears or a compass saw, cut out this circle and then brace it as the back with some light wood strips; this provides rigidity and still overcomes possibility of too much weight. Now secure some crepe paper of grass green, purple, yellow or lemon shade, all are suitable. This can be tacked to the face of the wall board with glue, dotted here and there, although this will show somewhat; to overcome this the paper can be turned over the edges and secured at the back of the wall board by small tacks, one ounce cut tacks will do.

This makes an excellent background and the brushes may now be placed in suitable semi-circular arrangement at the extreme edge of the large "plaque." This could be made 2 or 3 feet in diameter if preferred to the 4 feet width.

To secure the brushes where you have placed them, lay the wall board down on a table or the floor; use snare wire, and by first making holes with a brad-awl the brushes are easily secured. Many attractive designs and arrangements may be carried out to suit merchant's ideas. Once this is completed, all lines of brushes being used, it will make an excellent showing either in the brush department or in the show window. Used in the latter, the scheme will form the central background, and the merchant will be gratified to note what a help it is in "bringing out" one of the best windows he has yet dressed. Try it.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

The Editor,
Hardware and Metal,
Toronto, Ont.
Dear Sir:—

Have read two letters in HARDWARE AND METAL recently taking up matter of manufacturers selling to mail order houses and farmers' organizations direct. I believe the retailers have cause for taking up this grievance which will be felt more and more. My experience shows that we felt the M.O.H. competition far less the last three years than before on account of the farmers generally being very prosperous and the goods often hard to buy at any price. But with the return of normal profits and supplies I believe this competition will again be a bad factor.

Would like to see you take this matter up in your valuable paper. Would like to hear your personal views and have you invite the manufacturers with whom we find fault to give their side of the case. (Can supply you with a list of some of them if you desire.) I find that if I ask the manufacturer or his broker for prices he will generally reply that he only sells through the jobbers or else quote me jobber to retailer prices. But on the other hand, the same manufacturer solicits the M.O.H. business at the same or even lower prices than he sells jobbers. I can go through the M.O.H. catalogues and in about 75 per cent. of the hardware items find the M.O.H. are selling to the public at jobber's prices or not over 10 per cent. above to us. If our customer talks mail order prices of course we immediately talk quality, and when we complain to the jobbers about their prices they hand out the same line of talk, but we know that the M.O.H. goods generally compare very favorably with our own stock, in a good many cases being the same brand as we sell. For instance, when we sell a tub or a box of hay rack clamps or some other article at station bearing the same brand as those in our own stock and made by some well known manufacturer in Canada, there is no use talking quality. It is immaterial whether the manufacturer sells direct or through a broker, the fact remains he wants the M.O.H. business and caters to it. May I venture the prophecy that the same manufacturer who refuses to sell the retailer at same price he sells the M.O.H. will be bidding very strong for the organized buying of the farmers' co-operative stores which are springing up so rapidly over the West.

Do not get the impression that I am against the jobbing houses, for I believe they are an economic necessity to the retailer. But with their ironclad association I think they hold the prices too high and they have too heavy an overhead with so many travellers. I do believe they could make better use of their price-fixing association if they would pull together and refuse to buy from any manufacturer who sells the M.O.H. either directly or indirectly under his own brand or the M.O.H. brand.

If we get fair competition, Mr. Editor, we retailers can meet it, but we cannot but play a losing game with the unfair competition we now have. We can offer our customers a service which the M.O.H. cannot, but the handicap of prices is so great that they partly annul this service.

Mr. Editor, I would again ask you to take this matter up in your valuable paper for the good of the trade and make a live issue of it. Publicity will often cure.

Yours truly,

Another Alberta Retailer.

TO HER WHEN I'M AWAY

To the dearest, the fairest and the truest,
My Wife.

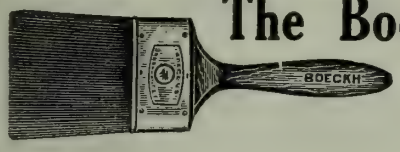
My work is pleasure, my thoughts are only good,
How can I go wrong?
I must attain success, for my wife says so,
My Wife.

Oh, the morning is bright and clear
And the Sun is shining brightly,
I wonder what she is doing,
My Wife.

The days are so short I can hardly get thro'
to get home to-morrow night,
But I know who knows too, if I don't get thro',
My Wife,

So travellers, if things go wrong
and you can't get thro'
Remember
Your Wife.

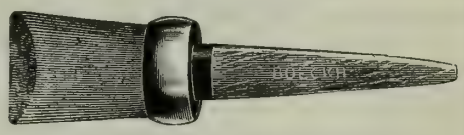
—A Traveller.



Boeckh's Brushes Create Goodwill

It makes no difference what style of Boeckh's Brush you sell, the result is always the same—thoroughly satisfied customers, who appreciate value received in quality of material and workmanship.

Boeckh's Rubber-Set Brushes



are the brushes particularly adapted for any special requirements, and are the outcome of sixty years' experience in the manufacture of quality brushes. It is practically impossible for the bristles in a Boeckh Rubber Set Brush to work loose and come out—they are there to stay.

WHERE FREE SAMPLE WORK MAY HELP

Continued from page 80

This interval permitted opportunity to think over what had been seen and discussed, and when the second visit was made, the customer was usually in a still more receptive mood for other suggestions. At the same time, the painting and brightening-up idea had developed towards sales of larger proportions than if he or she had been left to their own incentives.

What Merchant Learned

Governing his sampling methods under his own control taught Ben that far more profitable results could be obtained than by allowing the individual to follow his or her own sweet will with any sample can they might be permitted to carry home.

Preparations of the surface, and the application of the varnish or enamel were carried out on his own possession in such a way that interest was not only obtained but developed, and was led along other lines than merely pertained to the object in hand.

Another secret of the success of this demonstration was the fact that Ben linked up his own line of goods with articles that the customer possessed, in such a way that they were afterwards inseparable. Once his stain or enamel was on the article, it went back home as a constant advertisement that the possessor faced every day. The woman of the house never approached it, moved or dusted it without it being a reminder of what Ben's store and his goods had done for her.

Ben's lines of paints and varnishes and the service they could render were constantly reminding her of the sampling he had done in this manner.

She hadn't exactly received something for nothing. She had to take the article to the store, and bring it back again, though perhaps it wasn't realized that this was the price she had to pay. Ben wasn't demonstrating something for nothing either. He put the customer under the obligation of taking an interest in what he had to sell. With this interest, held by the fact that she had a possession of her own at stake, led to a buying incentive that was to Ben's own benefit. She was having a small service rendered for what appeared to be free of charge, but, like the heathen charged at less than cost for his Bible, she had to put at stake something that was valuable, and it tied her interest to the gratuity that sooner or later loosened up the purse strings.

Common Meeting Ground

A gratuitous commercial offer that is proclaimed with absolutely no strings to it, incites largely curiosity or a desire to look for the nigger in the fence. Neither motive is conducive to much business getting. Get the customer to stake something that is of value to himself against something that is of value to you, and you learn to meet on a common ground that will be of mutual business value to both.

There are, however, good uses as well as abuses in the out and out free sampling methods of many manufacturers and retail merchants. True, it invites the solely curious prospect, who may or may not be induced to buy. The "May-not" individual is the one to eliminate. A suggestion such as the above will assist in lowering his percentage. Only the other day the writer listened to a man relating his experience in a store where he had bought a couple of dollars' worth of small articles that he had no intention of buying when he went in, because the merchant had displayed them prominently on the counter.

Samples undoubtedly will interest a large number of people in whose mind there perhaps lurked not the slightest notion of buying until the article was brought to their attention.

The suggestion offered is for the purpose of clinching business from the greatest possible number of people who either through curiosity or downright interest, take advantage of the offer made through such a demonstration.

The Children's Place

Such a method also offers a means of getting rid of the idle solicitation of children; but it is not always wise to overlook the children, their buying power and their future buying power. Many little girls give "Dad" no peace or rest till he enamels their miniature household toys, very much as mother does on the domestic articles of everyday use. The writer was recently much amused at a small boy friend asking advice on the finishing of his toy model aeroplane and an enamel for his express cart. The little chap was as much in earnest about materials and methods as many of his elders. In fact, he was a greater sticker for detail than most of them. Realizing the educational value of such an opportunity, he spent a good hour in discussing the matter, a great deal longer than the average adult would have spent, and with an earnestness in the interview that would have done credit to his father.

So, when you invite the grown-ups to such a demonstration, contrive, in some way, to get a goodly number of the children. Already there is evidence that manufacturers have not overlooked the future advantage of children being interested in their products, for they have arranged part of their advertising material, especially for distribution amongst them.

While sampling has oftentimes been used by both manufacturers and merchants, and the privileges abused by the public, it has its advertising values and virtues. Distributing samples, so that the abuses are minimized, and the maximum results obtained, is not only probable, but possible. Further, it is sensible advertising, and permits one to see that a return is obtained for less expenditure and trouble. The suggestion in this article may not be used by everyone, but the point is that some method may be devised that will bring larger returns than by merely throwing samples away promiscuously.

Jobber Sees Prosperity for the Retailer

GEORGE Caverhill, of Caverhill, Learmont and Company, Ltd., wholesale hardware jobbers, Montreal, is very confident of the future, as it relates to the retailing of hardware in Canada.

Asked by HARDWARE AND METAL as to the change in the retailers' buying plans and methods, and which some have reported to be changed permanently, Mr. Caverhill said: "As far as we are concerned, we do not find that a permanent change has been made. The retailer will come back again and buy goods as he formerly did, even though there is a certain amount of caution in buying now. So soon as the sun begins to shine, the farmer will feel better, and there will be a general return to the usual policy of buying."

Mr. Caverhill placed much confidence in the spirit of representatives who are out on the road. "Our men are enthusiastic," he said, and this is one of the qualities that Mr. Caverhill aims to develop in his men. It is very important that the traveller carry with him, and convey to the dealer, a good, sensible and progressive spirit.

All Tradesmen Careful

Mr. Caverhill stated that, in common with all others, there was a general spirit of sensible caution being exercised in the matter of stocking up at this time. He believes that it is better to operate under a policy of wise buying, than to buy beyond one's reasonable needs. Confidence was not lacking, and it would be a comparatively short time, Mr. Caverhill indicated, before business would be active and very satisfactory. The need of the hour was optimism and enthusiasm.

There are points in the country where conditions have remained quite normal, and where world events have not disturbed the equilibrium of the trade to any extent. This has been borne out more than once, and with a solid, prosperous, and progressive rural community, Canada should face a future that will discount anything history has given her in the past.

SAYS THAT AMERICA IS FACING A TIN SHORTAGE

Richards & Co., of Boston, have issued a summary of the tin situation, in which they point out the scarcity which they claim will confront the American consumers with the exhaustion of the Government-owned stocks, and urging buyers to make provision for at least one-half of their requirements for the next 90 days from Government spot docks and the balance from import.

The Average Varnish Buyer

With the exception of the painter, comparatively few people know enough in a practical way about varnish to qualify them to choose it intelligently. Such buyers depend upon the word of the dealer and the label of the manufacturer.

This is why Berry Brothers' Varnishes, Enamels and Stains are so safe to recommend and easy to sell. Even occasional buyers among the smallest consumers have learned the necessity for discrimination, and the "Berry" label is recognized as a positive guarantee of quality.

For sixty-one years Berry Brothers' label has protected the buyer against inferior finishing products.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 22.—Features of the week include a further advance for linseed oil and advances for turpentine. The oil market is steadily firmer, and with uncertain delivery promising, there is some question as to whether delivery of oil can be maintained. Two dollar oil is probable, even before the week-end, for seed at Winnipeg has reached $4.11 per bushel. Turpentine is somewhat more available, but the price basis has advanced. Shellacs, both white and orange, are up 75c per gallon.

Oil is Higher; May Pass $2.00

Montreal

LINSEED OIL.—An advance is again made in the linseed oil price basis, three to seven and a half cents being asked above the quotations of a week ago. The situation is not encouraging. This has been made the more serious owing to the Western strike in Winnipeg, and crushers cannot get quotations on seed, nor any satisfaction as to new supplies. With the rapid approach of the active season, the prospect is not encouraging for large supplies of oil, but orders are being filled still in a satisfactory manner. At this writing the latest available seed price is $4.11, Winnipeg. This means higher prices, and if it holds oil prices will probably pass the $2 mark here.

Raw—		Imp. Gal.
1 to 4 barrels	$1 87	$1 92 $1 95
5 to 9 barrels	1 86	1 92 1 94
10 to 25 barrels	1 85	1 92 1 93
Boiled—		**Imp. Gal.**
1 to 4 barrels	$1 89½	$1 94½ $1 98
5 to 9 barrels	1 88½	1 94½ 1 97
10 to 25 barrels	1 87½	1 94½ 1 96

More Turpentine But Price Is Up

Montreal

TURPENTINE.—Prices have firmed on turpentine, although supplies expected have already arrived. None seem to have heavy supplies, however, and this means that while some have stocks, others are short. Prices have advanced during the week, and some are asking even more than the quotations given herewith.

Turpentine—	Imp.	Gal.
1 to 4 barrels	$1 15	$1 18
Small lots	1 17	1 28
(Packages extra.)		

Putty is Firm With Active Sales

Toronto.

PUTTY.—Sales of putty are excellent and there is naturally firmness to the market with linseed oil ruling high. Prices are likely to be fully maintained, or if oil keeps soaring there might be revision upward in the basis.

Standard Putty -	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

More Firmness To White Lead in Oil

Montreal

WHITE LEAD IN OIL—With lead and oil on higher levels, there is a stronger tendency to white lead in oil than has obtained for some time and no declines are suggested. There is a seasonably large movement. Prices are as follows: Five ton lots, per 100 lbs., $15.50; ton lots, $16; and smaller quantities, $16.35.

Mixed Paints Firm; Shellac Advanced

Montreal.

MIXED PAINT, SHELLAC.—An active market obtains in mixed paints and there is every indication of this continuing. Prices are very steady on a firm basis.

Shellacs have advanced 75c per gallon, and there is a change in the differentials on the less than gallon quantities. Prices are as follows: Orange shellac in gallon jugs, $4.65; half gallons, $4.85; and quarts, $5.05 per gallon. White shellac prices, respectively, are $5.15, $5.35 and $5.55. Bottled shellacs are up in proportion.

TORONTO

TORONTO, May 22.—Advances all along the line with shortage of supplies reported at many points and prospects of still further advances are features of the linseed oil and turpentine markets this week. During the week flaxseed prices advanced eleven cents. An increase of five cents in linseed oil has been made with prospects of higher quotations at any time. Turpentine prices are up three cents and all reports indicate a strong and very firm market for the next three weeks. An advance of 75 cents a gallon has been made in both white and orange shellac with supplies reported scarce. Prices of bluestone have been revised downward.

Linseed Oil Prices Advance Five Cents

Toronto.

LINSEED OIL.—A 5c advance which has been made in linseed oil is regarded by many dealers as merely the start in upward quotations. Further advances, they declare, are almost certain to be made very shortly. Business in all parts of the country in oil is reported as excellent. Up to the present the strike in Winnipeg has not affected orders, but some difficulty has been experienced in keeping track of the market conditions, and as Winnipeg is an important centre for flaxseed supplies the situation has caused many dealers not a little annoyance and trouble. Supplies of seed from the Argentine are coming in too slowly to meet requirements and the general conditions in the trade are such that dealers predict a very strong market with rising prices. Quotations are as follows:

Linseed Oil—		Raw
1 to 2 barrels, gal.	$1 95	$2 05
3 to 5 barrels, gal.	1 94	2 04
10 barrels and over	1 92	2 02
		Boiled
1 to 2 barrels, gal.	$1 97½	$2 08
3 to 5 barrels, gal.	1 96½	2 07
10 bbls. and over	1 94½	2 05

Prices shown are those ruling on Thursday of current week and subject to daily fluctuations of the market.

Higher Quotations Made On Turpentine

Toronto.

TURPENTINE.—Three to five cent advance in turpentine with indications that another increase may be made features the turpentine situation as its stands today. With a large volume of business offering, shipments have been very slow and importers have been advised that it is impossible for them to obtain further supplies at the quotations obtained on former purchases. Reports from the South indicate that stocks are being drawn on rapidly. It is indicated that supplies are unequal to the demands in the Southern markets, and in addition to a heavy movement to meet the home requirements many thousands of barrels have been sent out to fill overseas or-

ANOTHER OF THE SERIES OF CONSUMERS ADS. THAT ARE TO-DAY BRINGING CUSTOMERS TO MARTIN-SENOUR DEALER-AGENTS' STORES AND HELPING THEM SELL MORE PAINTS AND VARNISHES

MARTIN-SENOUR
100% PURE PAINT & VARNISHES

Takes Less for the Job—and wears Longest on the Job

A Paint, to be 100% efficient, must be 100% pure. Only an absolutely pure paint can cover completely, spread easily and protect the surface of wood and metal against the destructive action of wear and weather for years.

MARTIN-SENOUR "100% PURE" PAINT

costs less than any other on your house, because it covers most, spreads easiest and lasts longest.

It is true economy to keep your house well painted; it saves repairs and deterioration.

It is the truest economy to use "100% Pure" Paint.

"Save the surface and you save all" *Paint & Varnish*

Our books—"Town and Country Homes" and "Harmony in Neu-Tone" mailed free on request.

138

Guarantee

WE GUARANTEE THE MARTIN-SENOUR 100% PURE PAINT (except inside White and a few dark shades that cannot be prepared from lead and zinc), to be made from pure white lead, pure oxide of zinc, with coloring matter in proportionate quantities necessary to make their respective shades and tints, with pure linseed oil and turpentine dryer, and to be entirely FREE from water, benzine, whiting and other adulterations, and SOLD SUBJECT TO CHEMICAL ANALYSIS.

The **Martin-Senour** *Co.*
LIMITED

Dealer-Agent's Name Here

ders. The New York market, it is stated, is practically bare, and inquiries have been received by wire by Toronto firms in an effort to pick up any carlots that might be on the way. In many parts of the country dealers' stocks are practically depleted. The movement in turpentine has resulted in some weakening in rosin prices as holders are apparently satisfied to turn over turpentine at the higher figures and take a little less for their rosin. Quotations for the week are:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1 19 $1 20
2 to 4 barrels (barrel included)	1 18 1 19
5 gallon lots	1 29 1 30

Big Jump Made in Prices of Shellac

Toronto.

SHELLAC.—Prices of shellac are soaring and latest quotations are from 75 to 90 cents above former figures. The advance is caused, it is stated, by the scarcity of gum, which comes from the East Indies. Higher prices for containers and for labor have also been a factor. Supplies are very scarce and many dealers fear that there will not be enough to go around.

Paint Manufacturers Are Working Overtime

Toronto.

MIXED PAINTS.—An excellent volume of business is reported in mixed paints, and many firms have had their staffs working nights to keep up with the orders that are coming in. "We are looking for the business to remain good," said one manufacturer. "There is every indication that it is going to last." Higher prices now in effect for linseed oil, turpentine and other commodities required in paint making mean the manufacturers state, that there can be no reductions made in paint prices. No changes have been made in prices.

Prices Unchanged For White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Business is reported as very good and there is every indication, manufacturers say, that it will remain so. Quotations are as follows: 5-ton lots, $15.80 per hundred pounds; 1-ton lots, $16.30; in smaller quantities, $16.65.

No Changes Made in Glass or Putty

Toronto.

GLASS, PUTTY.—As building activity increases the demands for glass show a corresponding growth. With the exception of the province of Manitoba, building is going forward nicely throughout the Dominion. In Manitoba and in the vicinity of Winnipeg especially, building is, on account of conditions, held up indefinitely. No changes have been made in glass prices. Putty sales have been good and a brisk demand is expected as many inquiries are coming in steadily. Quotations are unchanged.

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above

The Value of Price Tickets

They Will Save Time For Your Sales Force and Increase Business by Answering the Question Every Prospective Customer Wants to Know, "How Much"?

HOW many articles that are on display in your store or in your windows answer the universal question: "How much?" If you have any doubt about this being a universal question, take a few minutes off and stand outside a window in which there are no price tickets. If you have the time and want to convince yourself further, make a little tour through any district you can find where the windows contain nothing to indicate how much the goods shown in them cost. Keep your ears open and you will hear the question: "I wonder how much that is," in some form or other a good many hundred times a day. Unless you are using price tickets it will surprise you how many times that question is asked in your own store.

Found Out Its Value

One never hears that question asked in a first class five and ten cent store. Millions of pieces of merchandise are turned over in these stores annually, and it is very seldom indeed that a prospective buyer has to inquire, "How much is this?" These stores, as well as many of the largest and most progressive establishments in the country learned long ago the value of making it unnecessary for people to ask by giving them full information. Price ticketing is one of those little things which mean so much in merchandising. They are one of the greatest helps in producing sales that have yet been discovered, and it is surprising the number of firms who have not yet learned their value.

Every display you have, whether it is in your window, on top of your counters, in a show case, should bear a ticket showing the price.

On the Job Always

Long after you have locked up our store and gone home, these little price tickets in your window will be working for you and answering the question prospective customers always want to know. Before you get down to the store in the morning they are doing the same thing. They are among the best salesmen you have, and they work for practically nothing.

Always use nice clean price tickets on your goods. They will not prove expensive and will pay for themselves many times over. Don't try the plan of pasting figures from old cards onto other cards, or of trying to draft out something with a red or blue pencil, or both on a piece of cardboard that may have been white once. Keep your little cards just as attractive as possible. This is not hard to do.

By using price tickets you will find that it will help many customers to almost wait on themselves and save you a lot of time answering questions that you can turn to good purpose.

Keep Same Color

Many dealers believe that it is a good plan to keep all the price cards of one color. Black figures and lettering on a white card seems one of the most popular arrangements. Sometimes in the case of a big special sale red cards are used. Red is one of the strongest colors there is and can be seen at a longer distance than others.

"We do not waste it though," said one dealer to HARDWARE AND METAL. "We keep red for the big things, special sales and so on. The neat little black and white cards always look very attractive, and we find they bring results. We do not believe that it is a good plan to put two prices on a card. Some firms do this, but our experience is that the prospective buyer becomes confused and has to ask questions, and that is one of the big objects in having the price ticket, as it makes asking questions unnecessary and saves a lot of time. Why make a high priced salesman do the work that a small card can do as well?"

Dislike to Ask

Aside from this there are always a large percentage of people who dislike to ask for information about prices evidently because they fear they may be forced into taking something they do not think is worth the price asked. Many people who might gladly buy from window displays if they knew the price of the articles shown will pass along to some other store rather than go in and inquire and risk being "brow beaten," as some of them term it. It is a peculiar fact, but most people will have the idea when no price is marked on an article that it is likely to cost them more.

Bicycles that Bring Goodwill

ALMOST any make of bicycle may be sold at a profit, if you try hard enough. But does it bring goodwill and prestige to your store? Is it worth while handling any machine which will not do that?

C·C·M· Bicycles

have been building up goodwill for the most successful Canadian dealers these many years. They will do it for you, and bring a good profit as well.

Why spend your efforts pushing an ordinary bicycle when you might secure a C.C.M. agency?

Drop a line to Head Office or nearest Branch for full particulars.

The Principal C.C.M. nameplates are:

Massey
Gendron
Columbia
Ivanhoe
Perfect
Cleveland
Brantford

Make the Autoist Your Friend

WITH

BOWSER Gasoline and Oil Pumps

ESTABLISHED 1885

Bowser Pumps in front of your store will bring the autoist to you for gasoline and lubricating oils.

This gives you your opportunity to cultivate the autoists desires for accessories, hardware, paint, oils and other lines you handle.

Our literature tells how other merchants have increased their business and profits by use of Bowser Storage Systems.

Ask us to send it to you. No obligations.

S. F. BOWSER & CO., Inc., 66-68 Frazer Avenue TORONTO, ONT.

UNIVERNISH

The ONE VARNISH for all kinds of jobs

You can't hope to build up your business on "sell at sight" lines only. It's the repeaters that really count.

Efficient salesmanship will sell most anything the first time, but, it's another thing altogether to get the customer to come back and ask for that line HIMSELF

UNIVERNISH does repeat. It's so easy to use and so satisfactory in results that all it needs is an introduction.

As its name implies UNIVERNISH is useful for all purposes. Inside, outside, for floors, for furniture, even for boats UNIVERNISH is the tried and proved varnish.

UNIVERNISH is not affected by salt or fresh water. Nothing turns it white.

Most good Paint Departments carry UNIVERNISH, because UNIVERNISH is a good line to carry.

Window trim, store display cards, etc., furnished on request.

"Save the surface and you save all" *Paint & Varnish*

Lowe Brothers Paints

The "Big Four" of the High Quality Line

High Standard Liquid Paint

For outside and inside work

THE brand of paint that has created more genuine goodwill for the dealer than any other. In the end it pays the merhant to sell the high quality line and a steadily increasing paint trade is his reward.

Mellotone Flat Wall Paint

"Soft as the rainbow tints"

The finest of all flat wall paints whose beautiful colors are copied from the wildflowers. This is the paint that has proved a revelation to the home decorator and has done more to turn the casual paint buyer into a steady and enthusiastic customer than any other brand of paint on the market.

Vernicol Stains

For old floors, woodwork, Furniture

Rich, lustrous, non-fading varnish stains, unequalled for refinishing chairs, tables, refrigerators and all household furniture; also for floors and woodwork, new or old. Sunfast and light-fast. A great favorite with women who like to do the work themselves.

Hard Drying Floor Paint

The paint that will bring you the floor paint trade of your neighborhood. Of heavy body and great hiding power. Dries quickly with a fine, hard gloss. Will stand more than ordinary wear and tear.

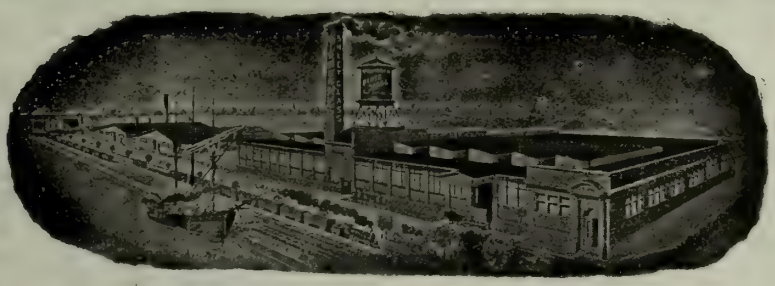
Talk Number Two Hundred and Nine



We told you two months back that when the sun got in it's good work there would be plenty of call for the tinsmith and sheet-metal man—Judging from the rush orders now they are busy bees.

TINKER TOM.

For Householder and Master Painter alike -

"Save the surface and you save all" *Paint & Varnish*

In Endless Sales Since 1858— JAMIESON

The Jamieson line has stood the test — has proved its selling power—in every pinch since 1858.

Uniform quality and dependability have kept it a leader in the field. Mr. Dealer, this is Paint time. This is the season when busy householders have time and inclination to do a little painting both in and outside the house. Are you ready?

Jamieson's Pure Paints and Varnishes will keep sales moving faster because of their wide reputation for giving permanent satisfaction.

Write now for the Jamieson plan to keep you "on top" in your locality.

You Need Ample Stock of

CANADA PAINT

There is going to be more painting done this year than last year, and the Canada Paint line is going to get a big share of the business.

So prepare! See that you have an ample stock of Canada Paint on hand.

Canada Paint goods are moving off the shelves briskly. Old customers are calling for Canada Paint, and they expect you to have it on hand. New customers are hard to secure if you haven't a full range in colors and sizes, and plenty in stock for immediate delivery.

NOW IS THE TIME! Grasp the Opportunity!

Get in front of the enormous impulse given to painting and varnishing this year, by the advertising bearing the slogan

"Save the surface and you save all" *Paint & Varnish*

Take a look at your shelves—and send a sorting order to-day if best selling colors are short. It will receive immediate attention.

Barrett Everlastic Roofings

When you sell a roll of roofing—

You want to be able to *forget* that roll of roofing. You want to know that the person who buys it will be more than satisfied with the service it gives him, not only tomorrow, but *years from now.*

For it is satisfaction that keeps your customers thinking favorably of your establishment and causes them to come back year after year for more of the kind of merchandise you sell.

Therefore, you know it is to your own interest, as well as to the interest of your customers to, recommend high-grade roofings like Everlastic "Rubber" Roofing and Everlastic Slate-Surfaced Roofing.

Both of these roofings are made by The Barrett Company, with more than 60 years successful experience in roofing. You can depend upon them because they are made with the same care, and go through the same rigid inspection, as do the materials going into the famous Barrett Specification Roofs, which cover more permanent flat-roofed buildings than any other type of roof.

Everlastic "Rubber" Roofing

This is one of our most popular roofings. Thousands upon thousands of buildings are protected from wind and weather by Everlastic "Rubber" Roofing. It is tough, pliable, elastic and very durable, and can be sold at a moderate price. It is made of high-grade waterproof materials, and is a roofing you can sell with perfect confidence that it will give satisfaction to your customers.

Made in 1, 2, and 3-ply weights, each roll containing enough to cover 100 square feet of roofing surface. Complete with nails and cement for laps will weigh about as follows: Light (1-ply) 35 lbs.; Medium (2-ply) 45 lbs.; Heavy (3-ply) 55 lbs. per roll.

Everlastic Slate-Surface Roofing

The most beautiful and durable roll roofing made. Surfaced with real crushed slate in soft shades of red or green. The slate not only makes a very handsome roof, but one that is fire—and weather—resisting and very durable.

Remind your customers that this roofing requires no painting as the colors are fast. Comes in rolls 32 inches wide, weighing about 80 lbs. Nails and cement are included in each roll.

Write nearest office for prices and further details.

Friend Wheatley is RIGHT!

Progressive dealers will be interested in the following letter from a North American dealer, H. D. Wheatley, of the H. D. Wheatley Company, at Dayton, Ohio. It shows in a straightforward, convincing way, why the Sharples contract is so highly valued and so eagerly sought after by live dealers. Read it carefully.

"We read each issue of the Sharples News with both interest and profit. We were especially impressed with the cartoon on the front page of the last issue, showing why some dealers don't sell Sharples Cream Separators. Of all the things you have in your place of business, the cream separator must have a prominent place, kept clean and free of litter to make it appeal to the farmer's wife. Her impression of its merits will be just in proportion to the estimate of the value the dealer puts on it as evidenced by the place given it in his store and the condition of his sample machine.

"With this letter we are sending an inside picture of our dairy supply house, showing the place we have given our sample Sharples Suction-feed machines. We find that Sharples Separators are best sold by offering the wife of your prospective buyer a chair in front of the Suction-feed Separator and then 'get them to see' what a wonderful machine it is as compared to anything else on earth. At the present time, there is absolutely nothing made that compares with the Sharples Suction-feed Cream Separator.

"To the prospective purchaser of a cream separator, you can say of the Sharples Suction-feed that it is the 'world's wonder in cream separators.' It prevents the waste of cream in the first skimmed milk that comes from the machine and all waste of cream from irregular turning. On present prices of cream and butter, this means a saving of $5 or $10 per cow each year over all other makes of cream separators. Then, think of the many improvements over the old Tubular: Still lower supply can, no feed tube, no feed tube rubber, no drip pan, no nozzle to screw together or screw into bottom of machine and impossible to have a milk slop from choking down. With these new improvements over the old Tubular, we still have the advantage of almost nothing to wash—no discs. Self-oiling, with no bearings down in grit at bottom of gear case. Hanging self-centering bowl, doing away with all too heavy wabbling. No outside gears to catch clothing or children's fingers. And, with all, wonderful durability and easy turning.

"We are just local dairy supply people here at Dayton, but we have sold over 2,000 Sharples Separators. Allow us to suggest that the dealer always allow a little for his customer's old cream separator and haul it to the junk pile. This puts the old machine out of existence, prevents some other party using it as a cream separator, makes a place to sell another Suction-feed. We have traded in over fifteen ton of old cream separators on the Suction-feed.

"Give sample machines a prominent place in the store, free of litter and desirable looking. Right now is the time to boost the sale of the Sharples Suction-feed. There is nothing else on the market that customers will care to consider if you 'get them to see' the wonderful advantage of the Sharples Suction-feed Cream Separators. And don't forget to tell your customer that the price on the Sharples is reasonable—only 50 per cent. advance over before-war prices, while all other implements have more than doubled in price. We boost the Sharples line because it is worthy of our effort and the consideration of our customers."

There is only a limited territory still open for Sharples representation — and dealers who hesitate are handicapping themselves. However, only progressive, responsible dealers need apply. Write to nearest branch.

PAINTS · VARNISHES
WINDSOR QUALITY
ENAMELS · DRY COLORS

Windsor Solvent Stain meets the Hardware Dealers' need of a popular-priced, fast-selling line. The fact that it does more than any other stain has made it the general favorite with customers everywhere.

Windsor Solvent Stain is both a flat stain and a wood dye combined. May be applied over any finish without losing the attractiveness of the finish. Easy to apply—dries hard in two hours and dust-proof in fifteen minutes.

May we explain the money-making value of this stain. Write us to-day for our splendid proposition.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TENTS — CANOES — PADDLES — PACK SACKS — CUSHIONS

These lines find ready sale through the hardware trade. Your stock need not be large—just a few standard size tents—as we carry a large, well assorted stock for prompt shipment. Canoes and paddles of all kinds can be supplied, but should be ordered as far ahead as possible to ensure delivery when required. Various kinds of canoe cushions as well as launch cushions made to order. Can be supplied on short notice. Pack Sacks of every kind and style. Send for catalogue.

TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.
118 Howard Street, Glasgow, Scotland

MAKING BAR IRON

Wrought Iron is Worked Iron, therefore the more the Iron is worked, the better the quality.

LONDON BAR IRON

is worked thoroughly with **one object** in view

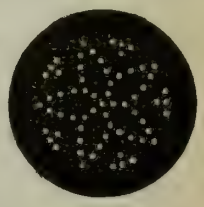
PEERLESS PERFECTION POULTRY FENCING



The first cost of a good fence is but little more than a cheap or poor one—no more work and lots more satisfaction. **A REAL FENCE—NOT NETTING**

Strongly made and closely spaced—making it a complete barrier against large animals as well as small poultry. Top and bottom wires No. 9—intermediates No. 13 wire—made by the Open Hearth process which time and other tests have proven to be the best. Ask about our farm and ornamental fencing. Write today for catalog. Do it now. It is sent free on request.

Build your store on this firm foundation. Brandram's Genuine B.B. White Lead is nearly two centuries old—it has a long and honorable history behind it. In the world competition of all these years Brandram's process is the only survivor of all the Patented White Lead processes which were in use at the time it came into being.

This is the white lead which is used in B-H "English" Paint.

Your guarantee and your customer's satisfaction lie in that two centuries of history.

Write us for particulars of our agency proposition.

Good Looks Backed By Genuine Quality

What is **in** a paint or varnish can matters a great deal more than what is **on** it.

But there is no denying the business-pulling power of bright, attractive labels. They help your store to look its best—they make it worth your while to keep your paint department right at the front of the store.

So, we have designed new labels for many B-H products and you'll agree that they are both beautiful and dignified. The cans illustrated here are handsomely lithographed in four to six colors. How attractive your paint shelves would look, with a stock of these B-H products.

And **you know** that the quality is there, behind the label. The firm that makes Brandram's Genuine B.B. White Lead (the world's standard for 200 years) puts the same degree of superiority into all its other products.

B-H LABELS HELP YOU TO GET THE BUSINESS and B-H QUALITY HELPS YOU TO KEEP IT

Write for our tempting Agency Proposition.

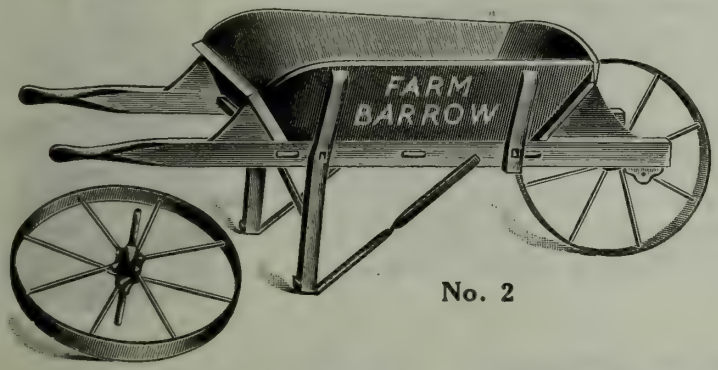
Steam Shovels will never replace the "old-standby" Wheelbarrow

T90

BATEMAN TUBULAR
No. T90



Contractors' barrow, size of tray 29 in. x 36 in. Approximate capacity 4½ cubic feet, weight 85 lbs. Painted blue with black wheels.

No. 1

NO. 1 FARM AND GARDEN

A strongly built Bateman barrow for farm and garden use, removable 10-inch sides, well braced, weight 66 lbs., capacity 3 cubic feet.

No. 2

NO. 2 FARM AND GARDEN

A Bateman barrow with closed end, 10-inch sides, capacity 3 cubic feet, weight 68 lbs. **No. 3** has 12-inch sides, 4½ cubic feet, weight 73 lbs.

THE CITY GARDEN BARROW

This is a barrow made narrow, especially for city use where narrow entrances are in evidence. It is a Bateman barrow similar in construction to No. 1, but with special wood wheels. This should be a big selling line this season. Order stock early.

KILBORN AND JACOBS BARROWS

We carry three sizes of K & J contractors' barrows—tubular frame, steel tray. No. 4, capacity 3 cubic ft., weight 70 lbs.; No. 5, 4 cubic ft., weight 78 lbs.; No. 10, 6 cubic ft., weight 109 lbs.

UNIVERSAL
Electric
IRON

Take the Work Out of Ironing Day

A sturdy, dependable Electric Iron built of the finest materials and designed to stand up under hardest service.

Terminal troubles are practically eliminated by our patented seven point connecting sleeves.

An unusual heat storage capacity is provided by our extra heavy sole plate and large heating unit, making it necessary for the user to "wait for the Iron to heat up."

Full nickel finish, reversible heat proof stand equipped with 6 foot heater cord and attachment plug. UNIVERSAL Irons give quick turnovers and good profits to the dealer.

No. 946

UNIVERSAL ELECTRIC HOME NEEDS

SAVE TIME : SAVE WORK : SAVE FUEL

UNIVERSAL Electric Home Needs comprise a wide variety of electrical cooking and heating appliances, each one of which has been designed to fill a distinct need in the home.

Each UNIVERSAL Coffee Urn, Percolator, Chafer or other liquid heater is equipped with our patented safety Fuse Plug (as simple in operation as the fuse which protects the lighting circuit in your home) preventing injury to the vessel should the contents boil dry with the current on.

The Test That Tells

Directions For Making 2 lbs. of Merged Butter From 1 lb. of Butter and 1 Pint of Milk.

1st. Pour the milk into the glass jar of the merger, then add one teaspoonful of fine salt (more or less to suit the taste).

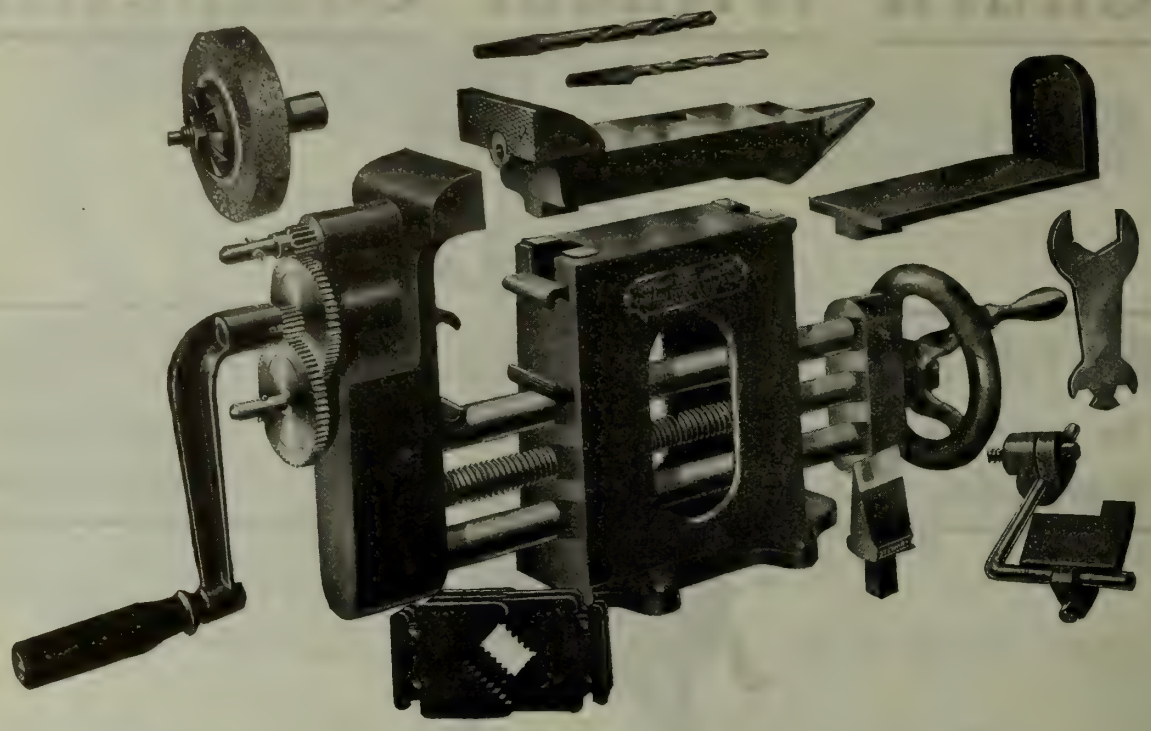
2nd. Cut the butter into thin slices and put in jar with milk.

3rd. Set the jar with its contents into a pan of as hot water as you can bear your hand in with comfort, and allow to remain until the butter softens, but not long enough to melt. This can best be determined by feeling the butter with a spoon.

4th. As soon as the butter is soft enough, remove jar from water, screw on top, and turn handle fast until all butter and milk is thoroughly mixed. Now remove the top and empty the butter into a bowl (do not work it), then set in a cool place to harden.

You will now have two pounds of merged butter; sweet, wholesome and nutritious, and preferred by many to creamery butter.

Should the yellow color of creamery butter be desired, add to the milk before churning, ten to fifteen drops of Dandelion Vegetable Butter Coloring Extract; for sale by most grocery and drug stores.



We now have a well assorted stock of all numbers and can make prompt shipments.

It takes mighty little effort to sell

Dazey Churns

LEWIS BROS., LIMITED, MONTREAL

WHOLESALE DISTRIBUTORS

Most Everybody Needs the STEWART HANDY-WORKER

The public garage, the small machine shop, the farm repair shop and the basement or garage, "tinkery" of the motor-owning citizen—all need, and will buy, this sturdy, wonder-working little helper.

It consists of—

1. A strong, powerful VISE, with 4½ inch jaw, opening 4½ inches.
2. A very practical two-speed DRILL PRESS.
3. An all round GRINDING OUTFIT covering the whole range, from scythes or axes to pocket knives.
4. A powerful PIPE VISE, useful in coupling, uncoupling, cutting, threading, etc., pipe up to 1½ inch diameter.
5. A CUTTING HARDIE, for cutting all sorts of metal.
6. A sturdy ANVIL useful in a thousand ways.

Every "Handy-Worker" you sell will sell more; for it has no real competitor, and not even a fairly-decent imitator; and its price is within everybody's reach.

Weight, 90 lbs. boxed.

List price, complete with all tools and attachments shown f.o.b. Chicago $20.00. Substantial discount to dealers. Ask your jobber or order direct from us.

Ask us for newspaper Electrotypes and mailing folders, to help you make a profitable "drive" on this popular seller.

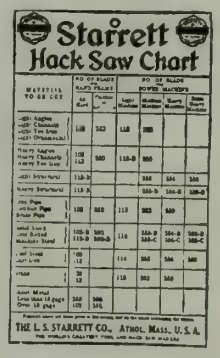
WHY THE BIG SHOP PREFERS



Starrett Hack Saws

Economy is the big factor in the selection of hack saw blades. Not the cost per blade, but the cost per cut. The Starrett principle of selecting the blade according to the class of material has repeatedly been proven correct in theory and economical in practice.

Structural iron and round machine steel **can** be cut by the same blade, but repeated tests have proven that where there is any quantity of each to be cut, it is cheaper to change the blade than to take the extra time and power required if the coarse blade used on the round stock is put to cutting I Beams.

Machinists know and foremen know that they reduce cutting costs by following the Starrett Hack Saw Chart MA.

If your supply of charts is low, write us—there's a new edition just out.

Starrett Hack Saws

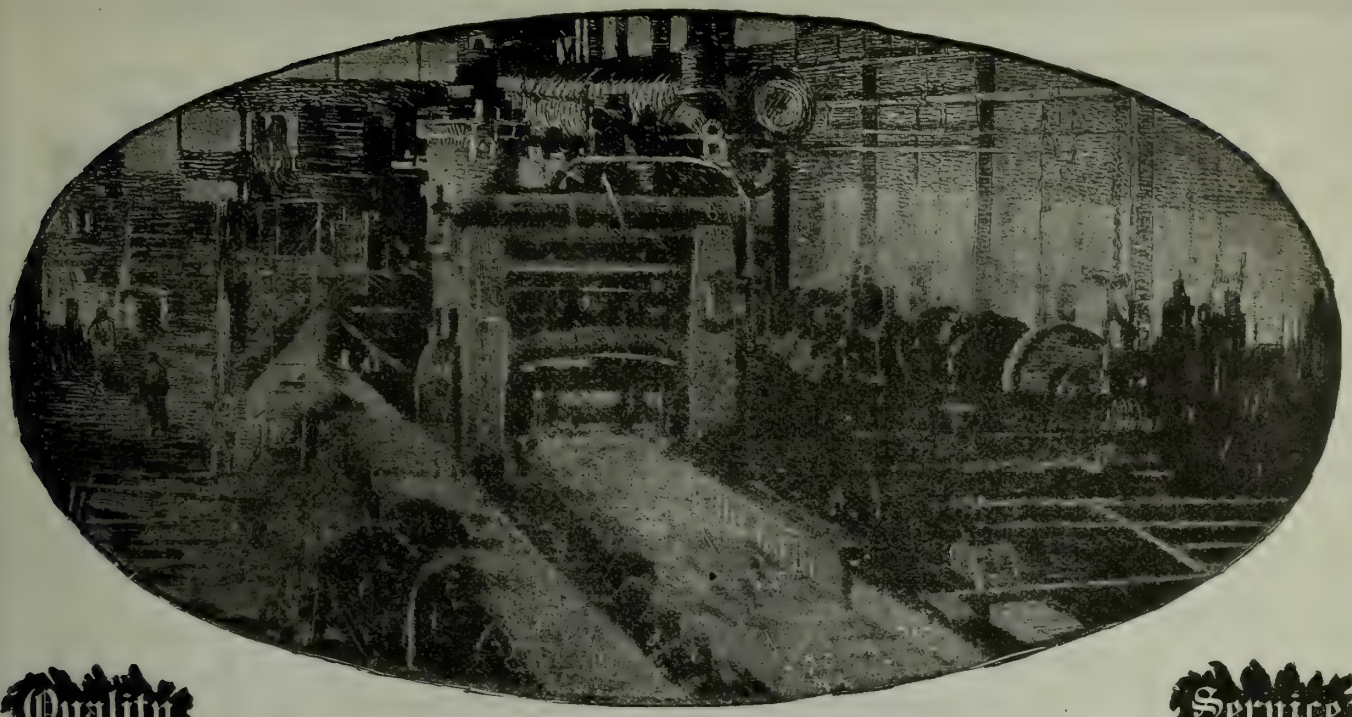
NUMBER TWO

JOHN P. HOLLAND

ON August 12, 1914, two weeks after the outbreak of the European War, John P. Holland, inventor of the submarine, died at his home in Newark, N. J. Holland was born in Ireland in 1842—and at the age of 20 he commenced to concentrate on the submarine idea. He came to America in 1864; and in 1898 completed his first successful submarine at Elizabeth, N. J.

Holland's entire life was dramatic and in a sense, tragic. As a result of his great genius, he will become immortal as the inventor of the most terrible war-machine the world has ever known.

The dominant trait in this wonderful man's character was



CONCENTRATION

As Holland's invention has gained the approval of practically every nation, so has the Victor Hack Saw Blade won the admiration and confidence of mechanics and technicians all over America—and all over the world.

Like Holland, we have concentrated on one thing. For over twelve years we have been experimenting, testing, improving. In practical tests, the Victor Hack Saw has seldom been equalled—and never excelled. It is the result of a large organization of technicians and skilled mechanics concentrating on one idea—which is—to make the most honest and efficient hack saw blade in the world. We do not scatter our energies. We make hack saws for every metal-cutting purpose.

Don't Delay Longer!

The spring selling season for oil stoves is at hand. If you are going to get your share of sales you should handle a good oil stove.

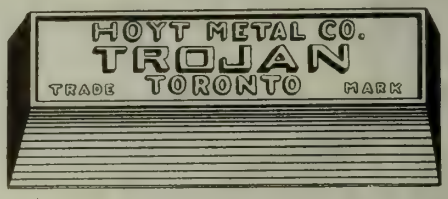
Detroit Vapor Oil Stoves are well and favorably known by housewives the country over. And remember that the Detroit Vapor Stove Company offers opportunity for an exclusive agency.

Oil Stove users everywhere are keenly appreciative of the sturdy gas stove construction of Detroit Vapor Stoves, for they are built on gas stove lines and operate similarly.

Detroit Vapor Oil Stoves

No Wicks--Light Instantly--Work Like Gas

Detroit Vapor Stoves have no wicks or wick substitutes. Durable 8½-pound iron burners vaporize the oil so that they burn a gas instead of a liquid. The kettles go on as soon as the match is struck. Detroit Vapor Stoves operate at a lower cost than either gas, coal or wood stoves. They are complete in themselves and can be placed anywhere.



If you have not yet been visited by the Detroit Vapor Stove representative in your territory, you should write us for our exclusive agency proposition. We have been making stoves for 25 years—stoves that the best dealers are proud to handle. Write us regarding an exclusive agency in your territory.

A Cooking Combination for Successful Canning

THE live dealer is stocking up and displaying his summer lines.

Here is a line that will go good this season. There is going to be a good trade in cooking and canning appliances because the womenfolk have been encouraged to do more domestic cooking and canning. But they will want to work under better conditions than heretofore.

The Florence Automatic Oil Cook Stove will do more towards eliminating their troubles and solving their difficulties than any other cooking appliance, for these reasons:

If they can in comfort, the job loses all its terrors. The latest improvements attached to a Florence Automatic Oil Cook Stove provide the necessary heat for proper canning, yet so concentrates the heat on the boiler that the kitchen is kept cool.

A special jacket attached to the burner confines the heat to the bottom of the utensil, the result is the kitchen keeps cool and the cook will be happy and comfortable during the muggy heat of the canning days.

This is an important selling point because superheated kitchens are the bane of all housewives and cooks.

For drying fruits the McClary Success Oven is unsurpassed. Attached to a Florence Automatic Oil Cook Stove, it does its job to perfection, without overheating the kitchen.

This combination makes an unsurpassed cooking equipment for any kitchen the year around. Displayed in your store, they will attract trade.

Write our nearest branch for further details of all our attractive lines

Gives Accessories Best Store Space

Brantford Merchant Keeps One Window for Auto Accessory Display—Silent Salesmen Moved Up to Front of Store—Advertising Copy Carefully Prepared—Stove Department Shows Big Sales

"IT is one of the fastest growing and most promising departments in the whole store," said G. A. Elliott, of Elliott's Hardware, Brantford, Ont., to HARDWARE AND METAL in connection with his auto accessory business. Mr. Elliott has been selling accessories for one year now and says there has been a steady development in the business, and that he looks for it to be maintained.

"Auto accessories are a legitimate part of the hardware business," he said. "To go into this line, though, I think a man should study very carefully in autos and the supplies required. There is, perhaps, no department in the store which needs such careful attention in buying and sorting and keeping the stock in shape. I have a separate price book for all my accessories. That is the only way I can figure out to keep track of them."

Elliott's hardware has two display windows on the main floor and one on the second. Throughout the season one of the windows is devoted entirely to showing auto accessories. The displays are carefully arranged and are changed weekly. As a general rule price tickets are used, depending on the lines shown.

Mr. Elliott has two silent salesmen filled with auto accessories right up at the front of this store. They make an attractive showing and he says are a splendid selling force. As shown in the illustration of his auto accessory section he has arranged a most attractive wall display behind his silent salesmen. The combination of wall display and silent salesmen is responsible, he says, for many sales.

"Store display when it is neat, attractive, and well arranged," he said, "is a big factor in selling at any time. We get splendid results from our windows, from our silent salesmen, and from the wall display of accessories."

Herewith is the attractive store front of G. A. Elliott's hardware store in Brantford, Ont. It will be noted that window to right of entrance is devoted to auto accessories, that to the left to garden tools. Above a display of paints appears. At the extreme right is shown a self-measuring gasoline pump.

Regular Advertiser

Mr. Elliott is a thorough believer in newspaper advertising. Every Friday he uses three full columns of space and his copy is attractively and profusely illustrated.

"It takes work to prepare the copy," he said, "but it is worth it. We get direct results. I believe thoroughly in well-directed advertising and I am satisfied that newspaper advertisements are the cream of all mediums. Newspapers and billboards, to my mind, are the two best means of reaching the public. I have studied and compared results carefully, and I am convinced that my present method of using a big display once a week produces far more business than using a small advertisement every day. The small daily ad. will produce some results, but the big display every Friday with lots of illustrations and a good line of sales talk brings far more business."

Discussing the advertising matter sent out by many manufacturers to

Besides the two show cases displaying auto accessories, G. A. Elliott, Brantford, Ont., devotes a section of his wall space to a showing of this class of goods. A neat arrangement of merchanics' tools is also apparent and a fine finish to the store is given by the use of metallic ceilings. A display stand of lawn mowers appears at the end of the silent salesmen.

hardware men and the matter mailed by paint firms to special lists of people, Mr. Elliott gave it as his opinion that thousands of dollars are wasted yearly.

"I wish they would give us some of that money to use with our own advertising," he said. "Large sums are absolutely wasted by many firms by their present plans."

Instead of following the plan used by many hardware dealers of running a paint ad. supplied by the firm in a separate space with his name under it, Mr. Elliott uses a different method. He uses the paint firm's copy and illustrations and has an arrangement with them by which their advertisement is used in his own space. In this way the paint and the paint firm become identified with Elliott's store, instead of the paint firm getting all the advertising and Mr. Elliott only a line or two at the bottom. In a three column ad. the paint section makes a nice display, but Elliott's store is featured and is emphasized all the way through, and is not overshadowed by the paint copy.

Value of Display

The value of attractive store and window display is thoroughly appreciated by Mr. Elliott. His two windows on the street are kept looking their best, are changed regularly, and contain seasonable lines at all times. He has adopted a simple plan of making them look different and of always keeping the sides and back looking clean and bright. This is to paint them often, and each time change the color. For a couple of weeks the color may be an attractive shade of green; then suddenly overnight the window becomes white; a couple of weeks later it is some other shade. White makes a most attractive showing, but is harder to keep clean.

On the second storey Mr. Elliott formerly had his glass and paint store room in the front of the building. Realizing the value of this space for display purposes, however, he fitted up a large plate glass front, which extends clear across the store. This space is used for two lines only, paints and stoves. Throughout the spring and summer this large space is filled with a most attractive showing of paints. A great deal of care is shown in the arrangement, as it is not changed. In the fall and winter the paints are taken out and stoves and heaters are on display. Careful attention has been given to the lighting arrangements in all three display windows and at night for hours after the doors have been locked and the store closed they are "pulling" business. "They certainly produce results," says Mr. Elliott.

Not a Banker

Ninety per cent. of the business done over the counter is cash. Brantford is essentially a factory city, and as Mr. Elliott has his share of this trade and also does considerable furnace and heating business, there are cases where statements have to be sent out and time allowed for payment. Mr. Elliott, however, takes no chances on people he does not know all about.

"I have not had any trouble with collections," he said. "I am running a hardware business, not a banking business. There are no accounts so hard or so costly to collect as a lot of little small charge accounts. I don't take any chances and would say that of the entire volume of business done, sixty per cent. is cash and forty credit."

Mr. Elliott is strongly in favor of early closing. Hardware dealers and other retailers, he says, spend altogether too much time in their stores.

"More business can be done in less time," he said, "if we will only do it. The dealers are to blame, not the people. The buying public will quickly adapt itself to buying in certain hours if hardware dealers and other firms do not keep open after a specified time. People soon learn if a store is going to close at six to buy anything they need before that hour. They are glad to co-operate with merchants in closing early as a general rule and appreciate that it is not fair to

keep a merchant around the store all night.

Changes It Around

In Mr. Elliott's store the stock is changed around often and special care is always shown to keep all seasonable lines to the fore. Just as much care is taken to keep everything neat and clean and looking its best. People like to shop in a store where the stock is inviting and the premises in keeping with this. A battery of silent salesmen filled with an attractive showing of cutlery, silverware, auto accessories and other lines, display stands, wall displays, combined with showings of seasonable goods, contain enough to maintain the interest of most shoppers. Mr. Elliott has them all.

An arrangement of brushes in connection with the paint department is a feature worth mentioning. The brushes are arranged as shown in the accompanying photo. Each has its own section and at the head of each section is a card bearing the price and the firm's name. Every time a sale of paint is made care is taken to ascertain all about the work to be done. Not only are instructions given as to preparing the work, the best paint to use for whatever is planned, but the buyer is advised as to the best brush required.

Sells Good Goods

The firm's aim is to sell only paints, brushes or other goods that will give satisfaction. Satisfied customers, whether they are buyers of paints, brushes, stoves, or any other line, are one of the best advertisements a store can have. They not only come back themselves,

View of the housefurnishing department of G. A. Elliot's hardware store, Brantford, Ont. It will be seen that one range is connected up for demonstration purposes and showing of other lines good. To the left of the photograph will be seen a rack holding screen wire cloth in an accessible manner; in the immediate foreground is the brush display.

A neat paint arrangement always attracts and this is the case with the showing of G. A. Elliott, Brantford, Ont. In the immediate foreground is shown an attractive layout of paint and whitewash brushes which can be easily duplicated by other merchants. To the left of the cut is shown a small section of the housefurnishings display.

Here is shown a sample of the newspaper advertising being done by G. A. Elliott, Brantford, Ont. It is an attractive layout, brightened up with cuts and explicit in the matter of price. Results are secured, according to Mr. Elliott, from the space being used. This ad measured 11 x 16½ inches.

but they keep telling their friends and their friends tell others, and so the buying circle continually widens. This is always kept in mind in Mr. Elliott's store. As a result, he says, his paint sales are steadily increasing and each year sees more brushes sold than formerly.

While stoves are shown on the main floor, there is a special stove department on the second floor. Mr. Elliott believes in letting people see what the stoves will do, and one, a combination stove, which will burn either coal or natural gas, is in operation all the time, using natural gas as fuel.

Goes After Business

While many stove prospects come as a direct result of newspaper advertising and window displays, very often sales are made in other ways. For instance, Mr. Elliott's clerks hear of prospects and at once follow them up. It is often found that when a sale is made in this way that the prospect knows of one or two other persons who are thinking of buying stoves. These are at once called upon and are followed up. Very often one satisfied stove customer sends another.

A number of summer stoves are also sold. These are shown by being placed during the proper season at points of vantage in the store. Frequently they are placed in the windows and very often they are lighted and put in some conspicuous place. It has been found that sales often result from this.

Use Display Cards

Display cards bearing such inscriptions as "Quality First" and similar wordings are placed about the store at points where everyone can see them. Window cards are also very often used

PAPER AND ROOFINGS VERY ACTIVE

"It is just rather difficult to keep pace with orders these days. We are very busy, and May will be the biggest month yet."

In these words D. P. Hitch, sales manager of the Barrett Co., Montreal, referred to the present condition of business as obtaining for roofings and papers. It bears out the prediction made by Mr. Hatch a few weeks ago when he expressed his belief that May would be a big buying month.

The weather conditions have been somewhat backward, and this has unquestionably been a factor in deferring buying. In addition to this, there has been a great deal of care exercised with respect to buying. Apparently realizing more or less definitely that there will be no precipitate declines, dealers have been providing themselves of late with goods, and these are going into use. It should be the hardware dealer's time to cash in on big sales. Through his advertising, etc., he can secure his good share of the profitable business that may be developed in the summer season.

MONTREAL C.M.A. ELECT OFFICERS

Elections were held last week for the offices of the Montreal section of the Canadian Manufacturers' Association and resulted in the following members of the metal and paint trades being chosen: John Irwin, managing director McArthur, Irwin, Ltd.; George Henderson, president Brandram-Henderson, Ltd.; A. A. Bittues, managing director Gillette Safety Razor Co. of Canada, Ltd.; Julian C. Smith, Canada Carbide Co.; James L. Waldie, Canadian Tube and Iron Co., and Fred R. Whittall, managing director A. R. Whittall Can Co., Ltd.

At the meeting held, several interesting addresses were delivered, one on co-operation, one on production methods and cost control, and another on the labor situation. That on co-operation was delivered by the general manager of the C.M.A., J. E. Walsh, and the others by outside visitors.

FOUNDER OF TRADE POOLS IS DEAD

Edwin E. Jackson, Jr., who was well known some years ago as an organizer of business combinations and trade agreements and pools, died this week at his home in Brooklyn at the age of 52. Mr. Jackson, while a member of the law firm of Noble, Jackson & Hubbard, put through a pool agreement to control both the output and price of wire, but in 1911 all the members of the association were found guilty of violating the Sherman Anti-Trust Law and were forced to dissolve the pool and, in addition, had to pay heavy fines to the Government. In this case, Mr. Jackson was fined $5,000 on each of nine counts, or a total of $45,000.

Mr. Jackson also organized the so-called "Bath Tub Trust" and the "Electrical Trust," which were also forced to dissolve in 1911 as a result of the suits which were brought by Attorney-General Wickersham under the Sherman Act. It is said that at one time Mr. Jackson and his associates managed no less than 50 different trade pools which in the main were designed to create monopolies and do away with all outside competition, but owing to the firm stand taken by the Government, they were all abandoned.

The Waterbury copper average is one of the few trade innovations introduced by Mr. Jackson, which has survived, but this is still issued each month and continues to be used quite extensively as a settling basis on copper products.

Exactly what methods are employed in compiling the Waterbury average is not known to the public, but it presumes to represent the average value of Lake copper for each month.

Where and When Stores Are Closing

A List of Early Closings in Towns and Cities Throughout Canada Prepared From Information Supplied by Merchants——The Growing Prevalence of the Weekly Half Holiday Demonstrated

IN accordance with the usual custom, HARDWARE AND METAL *is preparing half-holiday list of towns and cities throughout Canada. Merchants are asked to send through information at once if their own town is not included in the list herewith. For the convenience of travellers and business houses, this list will be published in booklet form. A card addressed to the editor will insure those desirous of getting same being on the list to secure these as soon as completed.*—EDITOR'S NOTE.

BRITISH COLUMBIA

A British Columbia law compels the observance of a weekly half holiday.

ARMSTRONG store close Thursday at 12.30 the year round, and nightly, except Saturday, at 6 p.m.

CHILLIWACK. — All stores close Thursday at noon the entire year, except drug stores, which close from noon to 6 p.m. Stores close at 6 p.m. week days, Saturdays 10 p.m., except drug stores, which are open every evening until 10 p.m.

CRANBROOK.—Stores close Wednesday noon all year according to British Columbia Government regulation, and nightly, except Saturday, at 6 p.m.

FERNIE.—Stores close Wednesday 1 p.m. and every evening, except Saturday.

GRAND FORKS.—Stores close Wednesray noon the year round, and nightly except Saturday at 5 p.m.

KAMLOOPS.—Stores close Wednesday at 1 p.m. the year round, and daily except Saturday at 6 p.m.

KELOWNA.—Stores close Thursday noon and nightly except Saturday at 6 p.m.

NELSON.—Stores close Wednesday noon the year round and nightly except Saturday at 6 p.m.

NORTH VANCOUVER.—Stores close Wednesday at 1 p.m. the year round, and every evening except Saturday at 6 p.m.

PENTICTON stores close Thursday noon the year round, and nightly, except Saturday, at 6 p.m.

REVELSTOKE.—Stores close Wednesday at 1 p.m. the year round, and daily except Saturday at 6 p.m.

TRAIL.—Stores close Wednesday noon the year round, and nightly except Saturday at 6 p.m.

VANCOUVER.—Stores close Wednesday at 1 p.m. the year round, and nightly except Wednesday and Saturday at 6 p.m.

VERNON. — Stores close Thursday noon the year round, and nightly except Saturday at 6 p.m.

VICTORIA.—Stores close Wednesday at 1 p.m. the year round, and nightly except Saturday at 6 p.m.

ALBERTA

BLAIRMORE.—Stores close Wednesday at 1 p.m., nightly except Saturday at 5 p.m.

CALGARY.—Stores close Wednesday 1 p.m. the year round, and nightly except Saturday at 6 p.m.

CASTOR.—No half holiday. Stores close nightly except Saturday at 6 p.m.

EDMONTON.—All stores except grocers and butchers close Saturday at 1 p.m. General closing nightly except Saturday at 6 p.m.

LETHBRIDGE.—Stores close Wednesday at 1 p.m., May to September inclusive, and every evening except Saturday at 6 p.m.

MEDICINE HAT.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 6 p.m.

NANTON.—No half holiday. Stores close nightly except Saturday at 6 p.m.

PINCHER CREEK. — Stores close Wednesday at 1 p.m., May 1 to Nov. 1, and nightly except Saturday at 6 p.m.

VERMILION.—Stores close Thursday at 1 p.m., June, July and August, and nightly except Saturday at 6 p.m.

WAINWRIGHT. — No half holiday. Stores close nightly except Saturday at 6 p.m.

WETASKIWIN.—Stores close Wednecday noon, May, 28 to Sept. 18 inclusive, and nightly except Saturday at 6 p.m.

SASKATCHEWAN

BATTLEFORD.—Stores close Wednesday at 12.30, May to Sept. inclusive, and nightly except Saturday at 6 p.m.

CRAIK.—No half holiday. Stores close nightly except Saturday at 6 p.m.

DAVIDSON.—Stores close every night except Saturday at 6 p.m.

MAPLE CREEK.—Half holiday question undecided. Stores close 6 p.m. except Saturday.

MEDICINE HAT.—Stores close Wednesday noon, May 15 to Sept. 15, and nightly except Saturday at 6 p.m.

RADISSON.—No half holiday. Stores nightly except Saturday at 6 p.m.

REGINA.—Stores close Wednesday 1 p.m., May to Sept. inclusive, and every evening except Saturday at 6 p.m.

SASKATOON.—Stores close Wednesday noon. No regulation re evening closing, but stores are generally closed except on Saturday.

SWIFT CURRENT.—Stores close on Wednesday at noon, and nightly except Saturday at 6 p.m., June, July and August.

ASSINIBOIA.—No half holiday. Stores close nightly except Saturday at 6 p.m.

OXBOW.—No half holiday. Stores close nightly except Saturday at 6 p.m.

PRINCE ALBERT.—Stores close Wednesday noon, June 15 to Sept. 15, and nightly except Saturday at 6 p.m.

WILKIE.—Some stores closing Wednesday noon, May 17 to August 31, but not general. Close nightly except Saturday at 6.30 p.m.

MANITOBA

BOISSEVAIN.—Stores close Wednesday at 1 p.m. during July and August, and nightly except Saturday at 6 p.m.

CARMAN.—Stores close Thursday at 12.30, May 1 to August 14, and nightly except Saturday at 6 p.m.

DELORAINE.—Stores close Friday noon, May 16 to Aug. 15, and nightly except Saturday at 6 p.m.

ELKHORN.—Stores close Thursday 12.30, May 29 to August 24, and nightly except Saturday at 6 p.m.

PORTAGE LA PRAIRIE. — Stores close Wednesday noon, June, July and August, and every evening except Saturday at 6 p.m.

RUSSELL.—Stores close Wednesday noon, May 1 to Aug. 31, and nightly except Saturday at 7 p.m.

SOURIS.—Stores close Thursday noon, June, July and August, and nightly except Saturday at 6 p.m.

ONTARIO

ALEXANDRIA. — No half holiday. Stores close 6.30 Tuesday, Wednesday, Friday during July and August.

ARNPRIOR.—Stores close Wednesday at 12.30 during July and August, and evenings except Tuesday and Saturday at 6 p.m.

AURORA.—Stores close Wednesday noon year round except hardware stores.

AYLMER.—Stores close Wednesday noon, June, July and August, and on Wednesdays and Fridays at 6.30 p.m., other nights 9 p.m.

BALA.—No half holiday. Stores close Wednesday at 7.30 and Saturday 9 p.m. Other evenings 7 p.m.

BARRIE.—Stores close Wednesday noon, June, July and August, and every evening except Saturday at 6 p.m.

BELLEVILLE.—Stores close Wednesday noon, June, July and August, and every evening except Saturday at 6 p.m.

BOLTON.—Stores close Thursday noon June 1 to Sept. inclusive, and nightly at 6 p.m. except Wednesday and Saturday, when they close at 10 p.m.

BOTHWELL.—Stores close Wednesday noon May to September inclusive, and evenings except Friday and Saturday.

BOWMANVILLE.—Stores close Wednesday 12.30 and nightly except Saturday at 6.30.

BRANTFORD.—Stores close Wednesday 1 p.m. all year except three weeks preceding Christmas, and every evening except Saturday at 6.15 p.m.

BRACEBRIDGE.—Stores close Thursday 1 p.m., June, July and August, and nightly except Saturday at 6 p.m.

BROCKVILLE.—Stores close Wednesday 12.30 p.m., June, July, August, and every evening except Saturday at 6 p.m.

BLIND RIVER.—Stores close Thursday 12.30 and nightly except Wednesday and Saturday at 6 p.m.

BLENHEIM.—Stores close Wednesday noon, starting April 23, and nightly except Tuesday and Saturday.

BURLINGTON.—Stores close Wednesday noon, May to November.

BURKS FALLS.—Stores close Thursday noon (standard time), May 29 to Sept. 17, and every evening except Saturday at 6 p.m.

CAMPBELLFORD.—Stores close Friday at 12.30, June, July and August, and nightly except Wednesday and Saturday nights at 6 p.m.

CHAPLEAU.—Stores close Wednesday 1 p.m., May to September inclusive, and nightly except Saturday at 6 p.m.

CHATHAM.—Stores close Thursday, June 15 to Aug. 31, and nightly except Saturday at 6 p.m.

COPPER CLIFF.—Stores close Wednesday at 1 p.m., June, July and August, and every evening except Saturday at 6 p.m.

CORNWALL.—No half holiday. Stores close during June and July except Saturday at 6 p.m. During balance of year Monday, Wednesday and Friday at 6 p.m., Tuesday, Thursday 9 p.m., Saturday 10 p.m.

COCHRANE.—No half holiday. Stores close nightly except Saturday at 6 p.m.

CREEMORE. — No half holiday. Stores close every evening but Saturday at 6 p.m.

DRAYTON.—Stores close Thursday May 15 to Sept. 15, and every evening except Wednesday and Saturday at 6 p.m.

DRESDEN.—No half holiday. Stores close Monday, Wednesday and Friday evenings.

DUNNVILLE.—Stores close Wednesdays at 2.30, and nightly except Saturday at 6 p.m.

DUTTON.—Stores close Wednesday noon June, July and August and every evening except Saturday at 6 p.m.

ELMIRA.—No half holiday. Stores close every evening except Saturday at 6.15 p.m.

ELORA. — Stores close Wednesday noon, May to Oct 1, and every evening except Saturday at 6 p.m.

EMBRUM.—No closing either afternoon or evening.

EXETER.—Stores close Wednesday at 12.30, June, July and August, and every evening except Saturday at 6 p.m.

FENELON FALLS. — Stores close Wednesday noon (Government time) May 1 to Oct. 1, and nightly except Saturday at 7 p.m.

FINCH.—No half holiday. Stores close Monday, Wednesday and Friday at 7 p.m.

GALT.—Stores close Wednesday, 1 p.m., June to September inclusive, and evenings except Saturday at 7 p.m.

GANANOQUE.—Stores close Wednesday noon, June 11 to Sept. 15, and nightly except Saturday at 6 p.m.

GEORGETOWN.—Stores close Thursday 12.30, May to August inclusive, and every evening except Wednesday and Saturday at 6 p.m.

GRIMSBY.—Stores close Wednesday 12.30, June to Sept. inclusive, and nightly except Saturday at 6 p.m.

GUELPH.—Stores close Wednesday at 12.30 except in month of December, and nightly except Saturday at 6.30.

HAMILTON.—Stores close Wednesday May to August inclusive, and nightly except Saturday at 6.30.

HAWKESBURY. — No half holiday. Stores close at 7 p.m. except on Wednesday and Saturday.

HAILEYBURY.—Holiday question yet undecided. Stores close nightly except Saturday at 6 p.m.

HESPELER.—Stores close Wednesday 1 p.m., May to October, and every evening except Friday and Saturday at 7 p.m.

HIGHGATE.—Stores close Wednesday noon, May to September, and Monday, Wednesday and Friday at 6 p.m.

HUNTSVILLE.—Stores close Thursday 1 p.m., June, July and August, and every evening except Saturday at 6 p.m.

INGERSOLL.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 6 p.m.

KEENE.—No half holiday. Stores close at 6 p.m. except on Wednesdays and Saturdays.

KEEWATIN.—Stores close Wednesday 1 p.m., and nightly except Saturday at 6 p.m.

KENORA.—Stores close Wednesday 1 p.m., June, July and August, and nightly except Saturday at 6 p.m.

KINCARDINE.—Stores close Thursday 12.30 p.m., May to September inclusive, and evenings except Saturday at 7 p.m.

KINGSTON.—No half holiday. Stores close every evening except Saturday at 6 p.m.

KINMOUNT.—No half holiday. Stores close every day except Saturday at 6 p.m. (daylight saving).

KITCHENER.—Stores close Wednesday, 1 p.m., June to September, inclusive, and nightly except Saturday at 6 p.m.

LANSDOWNE.—Holiday not decided. Stores close Monday, Wednesday and Friday at 6 p.m.

LEAMINGTON.—Stores close Friday noon, and Monday and Wednesday evening at 6 p.m.

LISTOWEL.—Holiday question undecided. Stores close every evening except Saturday at 6.30 p.m.

LONDON.—Stores close Wednesday, 1 p.m. May.

LUCAN.—No half holiday. Stores close at 6 o'clock except Saturdays.

MARKHAM.—Stores close Wednesday, 12 30, May to September inclusive, and are open every evening except Wednesday.

MARMORA.—Stores close Wednesday 12.30, July and August, and Mondays, Wednesdays and Fridays at 6 p.m.

MEAFORD.—Stores close Thursdays, 12.30, May to September inclusive, and every evening except Saturday at 6 p.m.

MIDLAND.—Holiday still undecided; probably Wednesday, June, July, and August. Stores close nightly except Saturday, at 6 p.m.

MILDMAY.—No half holiday. General stores close nightly except Saturday at 6.30 p.m. Grocery stores have ice cream parlor in connection and consequently remain open.

MORRISBURG.—No half holidays Most stores close 6 o'clock Mondays, Wednesdays and Fridays.

NAPANEE.—Stores close Wednesday at 12.30 July and August and every evening except Saturday at 6 p.m.

NEW LISKEARD.—Holiday not decided. Stores close every evening except Saturday at 6 p.m.

NEWMARKET.—Stores close Wednesday noon May to September inclusive, and nightly except Saturday at 6 p.m.

NIAGARA FALLS.—Stores close Wednesday noon, May to August, and nightly except Saturday at 6 p.m.

NORTH BAY.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 7 p.m.

NORWICH.—Stores close Wednesday noon, June to September inclusive, and nightly except Saturday at 6 p.m.

OAKVILLE.—Stores close Wednesday 1 p.m. April to September inclusive, and nightly except Saturday at 7 p.m.

ORILLIA.—Stores close Wednesday noon May 14 to September 17, and every evening except Saturday at 6 p.m.

ORANGEVILLE.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 6 p.m.

OSHAWA.—Stores close Wednesday, 1 p.m., May to October inclusive, and every evening except Saturday at 7 p.m.

OWEN SOUND.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 6 p.m.

PARIS.—Stores close Wednesday 6.30, except in December, and nightly except Friday and Saturday at 5.30 p.m.

PALMERSTON.—Stores close Thursday, 1 p.m., May to September inclusive, and nightly except Saturday at 6 p.m.

PARRY SOUND.—No holiday. Stores close every evening except Saturday at 7 p.m.

PEMBROKE.—No half holiday. Stores close nightly except Saturday at 6 p.m.

PENETANGUISHENE. — No half holiday. Stores close nightly except Saturday at 6 p.m.

PETROLIA.—Stores close Wednesday noon June, July and August, and nightly except Saturday at 6 p.m.

PORT ARTHUR.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 6 p.m.

PORT COLBORNE. — Stores close Wednesday, 1 p.m., June, July and August.

PORT ELGIN.—Stores close Thursday, 12.30, and nightly except Wednesday and Saturday at 6 p.m.

PORT HOPE.—Stores close Wednesday noon May to September inclusive, and nightly except Saturday at 6 p.m.

Current Events in Photograph

NEW WELLAND CANAL

This shows the latest stage of the huge undertaking and also gives an idea of the magnitude of the work yet to be done. The view is taken looking from the head of the lock toward Lake Ontario. There is a stretch of the canal bed about 170 feet in width to be cut out of the solid rock.

QUEBEC

ABERCORN.—Stores close at 6 p.m. Tuesday and Thursday.

AYERS CLIFF.—Stores close at 6 p.m. Monday, Tuesday, Thursday and Friday.

ACTONVALE.—Stores close at 6 p.m. Tuesday and Thursday.

ASBESTOS.—

BEDFORD.—Stores close at 6 p.m. Tuesday and Thursday.

BROMPTONVILLE.—Stores close at 6 p.m. Tuesday and Thursday.

BUCKINGHAM.—Stores close at 6 p.m. Monday, Wednesday and Friday.

BURY.—Stores close at 6 p.m. Tuesday and Thursday.

BEAUHARNOIS.—Stores close at 6 p.m. Tuesday and Thursday.

COATICOOK.—Stores close at 6 p.m. Tuesday, Wednesday and Friday.

COMPTON.—Stores close at 6 p.m. Tuesday and Friday.

COOKSHIRE.—Stores close at 6 p.m. Tuesday, Thursday and Friday.

COWANSVILLE.—Stores close at 6 p.m. Tuesday, Wednesday and Thursday.

DANVILLE.—Stores close at 6 p.m. Monday, Wednesday and Friday.

DUNHAM.—Stores close at 6 p.m. Tuesday and Thursday.

DRUMMONDVILLE.—Stores close at 6 p.m. Tuesday and Thursday.

EASTMAN.—Stores close at 6 p.m. Tuesday and Thursday.

EAST ANGUS.—Stores close at 6 p.m. Tuesday and Wednesday.

FARNHAM.—Stores close at 6 p.m. Tuesday and Friday.

FRELIGHSBURG.—

GRANBY.—Stores close at 6 p.m. Tuesday, Wednesday and Thursday.

HATLEY EAST.—Stores close at 6 p.m. Tuesday, Wednesday and Thursday.

HATLEY NORTH.—Stores close at 6 p.m. Monday, Tuesday, Thursday and Friday.

HOWICK.—Stores close at 6 p.m. Tuesday and Thursday.

HUNTINGDON.—Stores close at 6 p.m. Tuesday and Thursday.

HEMMINGFORD.—Stores close at 6 p.m. Tuesday and Thursday.

KNOWLTON.—Stores close at 6 p.m. Tuesday and Thursday.

LENNOXVILLE.—Stores close at 6 p.m. Monday, Tuesday, Wednesday, Thursday and Friday.

MAGOG.—Stores close at 6 p.m. Tuesday, Wednesday and Thursday.

MEGANTIC.—Stores close at 6 p.m. Tuesday and Thursday.

MANSONVILLE.—

MARYVILLE.—Stores close at 6 p.m. Tuesday and Thursday.

ORMSTOWN.—Stores close at 6 p.m. Tuesday and Thursday.

PLESSISVILLE.—Stores close at 6 p.m. Tuesday and Thursday.

QUEBEC.—Stores close at 6 p.m. nightly except Saturday.

ROCK ISLAND.—Stores close at 6 p.m. Monday, Tuesday, Wednesday and Friday.

RICHMOND.—Stores close at 6 p.m. Monday, Wednesday, and Thursday.

SAWYERVILLE.—Stores close at 6 p.m. Tuesday and Thursday.

SHERBROOKE.—Stores close at 6 p.m. Monday, Tuesday, Wednesday and Thursday.

SOREL.—Stores close at 6 p.m. Tuesday and Thursday.

SUTTON.—Stores close at 6 p.m. Tuesday, Wednesday and Friday.

SCOTSTOWN.—Stores close at 6 p.m. Wednesday and Friday.

STANFOLD.—

SOUTH DURHAM.—Stores close at 6 p.m. Tuesday and Thursday.

ST. JOHNS.—Stores close at 6 p.m. Tuesday and Thursday.

ST. HYACINTHE.—Stores close at 6 p.m. Tuesday, Wednesday and Thursday.

ST. REMI.—Stores close Tuesday and Thursday.

ST. CHRYSOSTOME.—Stores close at 6 p.m. Tuesday and Thursday.

VICTORIAVILLE.—Stores close at 6 p.m. Monday, Tuesday, Thursday and Friday.

VALLEYFIELD.—Stores close at 6 p.m. Tuesday and Thursday.

WATERVILLE.—Stores close at 6 p.m. Wednesday and Thursday.

WATERLOO.—Stores close at 6 p.m. Tuesday, Thursday and Friday.

WARWICK.—Stores close at 6 p.m. Tuesday and Thursday.

WEST SHEFFORD.—Stores close at 6 p.m. Tuesday and Thursday.

WINDSOR MILLS.—Stores close at 6 p.m. Tuesday, Thursday and Friday.

NEW BRUNSWICK

CAMPBELLTON.—No half holiday. Stores close Monday, Wednesday and Friday at 6 p.m.

FREDERICTON.—Stores close Thursday, 1 p.m., July and August, and every evening except Saturday at 6 p.m.

NEWCASTLE.—Stores close Wednesday, 1 p.m., June, July and August.

ST. JOHN.—Some stores close noon on Saturday, and evenings except Saturday.

NOVA SCOTIA

CANSO.—No half holidays. Stores close Tuesday and Friday at 6 p.m.

SYDNEY.—Stores close Wednesday 1 p.m., June, July and August. Hardware stores close nightly except Saturday.

ANTIGONISH. — Holiday undecided, probably Thursday, June, July and August. Stores close Monday, Tuesday, Thursday and Friday at 6 o'clock.

BRIDGEWATER.—No half holiday. Stores close nightly except Saturday at 6 p.m.

OXFORD.—Stores close Wednesday noon, June, July, August and September, and at 6 p.m. Monday, Wednesday, Thursday and Friday.

ANNAPOLIS ROYAL.—All stores except grocers close Wednesday, 1 p.m., June, July and August, and nightly except Saturday at 6 p.m.

Additions will be made next week

Big Developments in Cutlery Trade

Quantity Production a New Feature—Revolutionizing the Trade—Abnormal Conditions Explained—Canadian Outlook and High Prices—Latest About Stainless Steel—Germans Have Stocks Ready

Written by CAPT. A. R. THACKRAH, Resident Representative Hardware and Metal, London, Eng.

THE report of H. M. Trade Commissioner in Canada to the Board of Trade in London, laying stress upon the great and increasing demand for Sheffield cutlery arrived at an opportune moment. Only this week one of the most important developments which have taken place in the trade since it commenced to shake off the shackles of war materialized at the Sheffield University when the Joint Research Association, only recently formed, set up the machinery for investigating the question of the reduction and standardization of patterns and decided to report the progress to a public meeting at an early date.

Science to Assist Production

Doctor W. Ripper, the famous industrial chemist, who is the director of the department of Applied Science at the Sheffierd University, gave to a representative of HARDWARE AND METAL an outline of reconstruction which has been definitely decided upon. The principal sections of the trade have each formed a technical society for that particular trade to determine the organization not only of the productive side, but to institute a thorough system of scientific research. A Joint Research Association will be formed from all the trades to be financed on the basis of pound for pound by the Government and the trades concerned. If the number of operations in cutlery manufacture and the multiplicity of patterns are to be practically dealt with there must be sound machinery methods plus the strict limitation of standardized patterns. Doctor Ripper addressing various branches of the cutlery industry on this subject quoted instances to prove that standardization on such lines was an absolutely profitable proposition, just as its neglect would mean the further impoverishment of the industry. The cutlery trade must be considered as a whole and not from the individual standpoint. The members of it would rise or fall together, therefore they must be out for the industry and sink personal interest. The Government, too, was ready to help, and whatever fears there might be regarding State interference it would be foolish to turn the Government down. The adoption of standardization was now the only effective means of securing a greatly increased output of cheap and good productions.

Quantity Production in U.S.A.

Walter Tyzack of the firm of Needham, Veall and Tyzack expressed his views at the same meeting. He said that there was no fear for those cutlery workers who were real artists in the business. Their services would always be required whatever was done in the way of quantity production, but the reduction of the number of patterns and standardization were imperative. By such a policy American cutlery manufacturers had been able to vastly expand their output in a very short time. In Sheffield the old system of orders for a gross of this pattern or a few dozen of that one was still tolerated.

Reduction From 15,000 to 30 Patterns

Other manufacturers cited instances of the lengths to which variations of patterns and bolsters had been carried. Twenty-five years ago one firm had 15,000 different patterns on their books. A few years later this firm reduced them to 2,000, and last year this number was reduced to only thirty. Whether it was coincidence or not the fact remains that last January's business done by this firm proved to be the best for forty years.

New Methods Will Revolutionize Trade

The foregoing may be taken as the keynote to the general opinion held among the manufacturers in Sheffield today who having passed successfully through the furnace of Armageddon have emerged with the scales melted from their eyes and purged of the poisonous old prejudices which were doing far more harm to their trade than the whole legion of bogeys invoked by foreign competition. They are going forward as a body confident that the newly adopted principles strengthened by the virtues of co-operation learnt in the rough school of war will revolutionize the trade and lay the firm and lasting foundations of a new era for British cutlery. So much for the theory, but what of the practice?

Gradual Return to Normal Conditions

The industry is at present in the transition period. Factories are still occupied to a large extent on the completion of Government contracts, and the decontrol of materials for ordinary commercial use is a slow process. The home market has been starved, and an increasing demand at prices varying between 200 and 500 per cent. above prewar is experienced from unsatisfied buyers in the United Kingdom whose stocks are down to zero. Labor, the unknown factor in the question, is a veritable quicksand of uncertainty, and until the human equation can be satisfied prices will remain high. The return, therefore, to conditions approaching the normal must be gradual.

The Canadian Trade

And what about the Canadian trade?" asked the representative of HARDWARE AND METAL of the managing director of a leading firm who did a fine trade in Canada.

"Canada is going to have our first consideration," he replied, "but she will have to be patient. I am almost frightened to ask them current prices, although they state that they will pay anything for whatever we can send them. Meanwhile, we know for a fact that Germany has accumulated large stocks with which to flood our markets as soon as she can get the stuff clear of her own frontiers. We have a hard task in front of us, but we are determined to set our house in order and overcome these difficulties as rapidly as possible."

Latest Die Stamping Machinery

As a set off to the enormous cost of increased wages in our trade we are introducing the latest machinery for eliminating many of the intermediate processes, and in this manner will produce a limited number of patterns of the highest quality of steer in large quantities. The outstanding feature of the new methods of manufacture will be the entire replacement of the old system of forging the blanks by that of accurate die stamping. This is the method that the Germans adopted with such singular success, and would no doubt have found favor in this country had we been able to obtain the right kind of dies to produce really accurate work and overcome the opposition raised by the men's trade unions to any form of labor-saving machinery. We cannot expect to get things going much before the fall, and then the first thing we shall do is to get back to the Canadian market. In the meantime all we can do is to ask our friends to be patient."

German Hollow-Ground Razor Myth

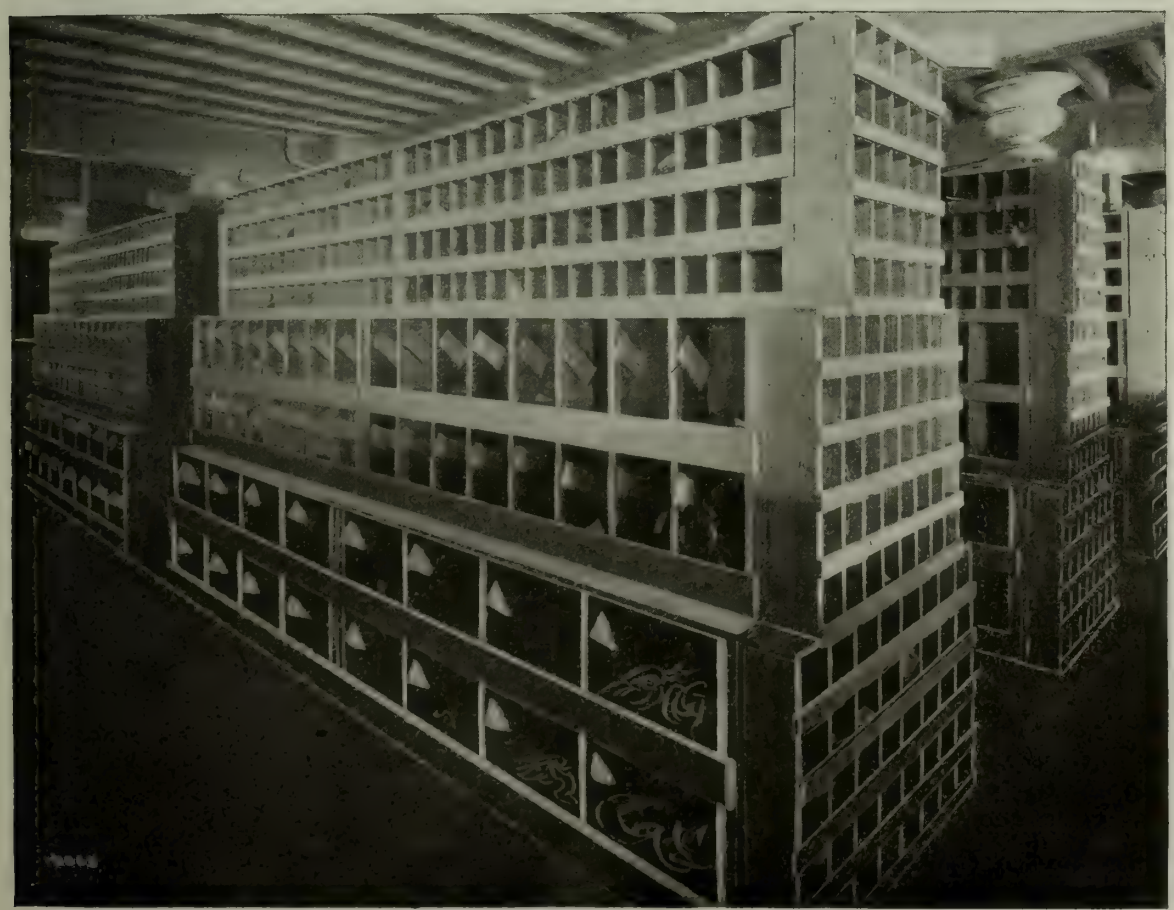
It is not many years since that any infant in the razor trade would have told you that the finest razor grinders in the world were located in Hamburg. That was undoubtedly the truth, but it is far from accurate to-day. German craftsmen were imported into Sheffield together with their machinery and the art of hollow grinding was rapidly acquired by the British trade. Sheffield now possesses the most perfect machinery for forging and grinding razors, superior to any in the world.

Stainless Steel

What is perhaps the most important discovery in the cutlery trade for more than a century past is the invention of stain-

less steel by Mr. Harry Brearley, of the firm of John Brown and Co., Ltd., which happened about five years ago. Like many other wonderful discoveries which have startled the world, it was accidentally revealed in the course of some experiments in the erosion of rifle barrels. Arising out of this a number of non-erodible alloys were prepared, one of which was the now redoubtable stainless steel. It was found to be impervious to the attacks of nitric acid, did not tarnish when exposed to the impurities of the atmosphere, and, when subjected to high temperature, did not scale. The commercial value which the singular properties of this alloy presented were not long in being recognized, and a syndicate known as the Firth-Brearly Stainless Steel Syndicate was formed which acquired the patent rights for America and a number of European countries. During the war the supplies of this steel have been under the control of the Ministry of Munitions and have been turned to many useful purposes in the manufacture of engines of war. Now that it has been decontrolled it will make its appearance in all branches of the steel industry.

The Edge Difficulty Overcome



Everybody knows that stainless steel was quickly recognized by the cutlers as a new force in their trade, and but for one obstacle its application to the cutlery trade generally was an instantaneous success. The obstacle referred to was due to the fact that certain makers received complaints that the stainless steel knives which they supplied only retained their edge for a very limited period as compared with the ordinary kind. The matter was investigated, and it was discovered that by using special means of tempering particularly suited to the metal, the lasting qualities of the edge were in every way equally as good as plain steel, and in most instances superior owing to the blade possessing an additional protection against erosion. The blade of the stainless steel knife is best kept in perfect condition by sharpening it on a steel and not in a knife sharpener, the cutlers' bugbear.

Sheffield Company of Cutlers

Interwoven into the life history of the Sheffield cutlers is that singular institution, the Company of Cutlers. It is the link which binds the fighting spirit of antiquity to the scientific genius of modernity. No reference to the conditions of to-day could be quite complete without the inclusion of the body which has watched over the destinies of the craft for nearly three hundred years. According to records the Sheffield Company of Cutlers was born in the year 1624 towards the close of the reign of James I, and it was due to the early activities of this Guild that the centre of the trade was transferred from London to Sheffield. From that time onwards the town gave its name to all that was best and finest connected with the handicraft. It is therefore the accumulated experience of years which has given Sheffield the birthright of perfection and has carried her name to the utmost corners of the earth.

Silver and Electro-Plated Goods

The prospect of an early resumption of the normal export trade in this class of manufactures is looked upon as most uncertain. Firms who produced the best class of stuff for the Canadian market have, during the period of the war, been occupied with Government work to the detriment of even the home trade. The ruling factor in the trade at present would appear to be the great scarcity of skilled labor. Unlike its sister industry, the cutlery trade, the question of machinery has little bearing upon the situation. The plating industry is a handicraft demanding the highest class of skilled manual labor throughout its processes, and until this is forthcoming in more generous quantities production must be limited. True, in certain lines, such as spoons, female workers may be employed with advantage, but until the unemployment benefit comes to an end there seems little disposition amongst the women to resume work while a goodly number of shillings a week is forthcoming from the State.

The importance of the auto accessory department, not only in the retail merchant's mind, but in the mind of the wholesaler, gives rise to what may be considered a satisfactory method of carrying the many lines of fittings and repairs that comprise a complete stock. This photograph shows tiers of stock bins which house auto parts used for repairs and may offer a suggestion to some dealer on just what method could be employed successfully in the quarters he is now in. It will be noted that the bins are deep, and even the ends of each row are divided off, thus utilizing space which is often neglected and which may be just the amount necessary to prevent crowding. This method of carrying stock might be employed with other goods such as pipe fittings, valves, steam cocks and kindred lines.

EDITORIAL COMMENT

WHAT IS BELOW SURFACE?

ARE the demands being put forth by labor to-day engineered by those who realize that their interests are linked up with the industrial welfare of the country as a whole or is it just a concerted move on the part of extremists to fight constituted authority? The better elements of labor are expressing themselves as satisfied with conditions generally prevailing and capital is very largely endeavoring to inaugurate reforms which will eliminate the evils prevalent not so many years ago.

Where then is all the present unrest originating? Who is responsible for the general strikes in Western cities which threaten to extend to Eastern points as well? Is the move for forty-four hour week and increased pay just a blind to cover up some more insidious move? How is the employer to be assured that in granting these shorter hours and increased pay he can go ahead and make his plans accordingly?

In Winnipeg, union after union have utterly disregarded their agreements, have thrown them aside as mere "scraps of paper." The question is then, how to guarantee against a recurrence of such an attitude in respect to any new agreements. Surely the man employing labor, who has the pay roll to meet, should be given some consideration. It is not our contention that all employers of labor are ideal bosses, that they have the interest of their employees at heart, but then again the extremists in labor are no better in the radical views they hold.

It is generally admitted that trade unionism has done much to improve the conditions under which labor has been employed and manufacturers as a whole recognize the principles of the unions. It is by co-operation between capital and labor that most idealistic relations for all concerned can be secured. There is admittedly a red flag element in labor no less than a Prussian element in capital. The two should be suppressed and the better elements get together to work out a solution which will prove fair to all concerned.

WHY NOT GET TOGETHER?

DISCUSSING with HARDWARE AND METAL conditions in the trade a manufacturer declared that because retailers and manufacturers are not working together as closely as they might, they are not getting the results they should. "We do not take each other into confidence enough," he said. "We do not get together enough and talk the situation over and see what each can do to help the other. If every one of the retailers handling our paints could tell us his needs it would help us and help them. It would help the consumer too, and that is the ideal triangle of co-operation, manufacturer, retailer and consumer, all working together. That is one way in which prices could be brought down as we would have no contingencies to provide for. Too many manufacturers want to make all the profits they can and do not care about the retailers' interests. Too many retailers are working along with their own ends in view and not considering the manufacturer or the consumer. This is not the way to get the best results. More co-operation will make for better results all round. Business has been good and the outlook is that it is going to continue good, but to get what we all should out of it we must co-operate more closely."

CHEAPENING THE HOUSING SCHEME

WHILE it has been a long time developing, the plan of the Ontario Housing Commission to relieve the shortage of dwellings is beginning to materialize. Tenders are now being called in several places for dwellings in considerable numbers. Other tenders will be called very shortly and indications are that before the summer is very far advanced there will be a lot of building under way. As pointed out in former issues of HARDWARE AND METAL there is a splendid opportunity here for the hardware dealers not only to round up a lot of good business but to render real service to their community in making suggestions that will prevent the erection of homes that will not be satisfactory. In some places there has been a tendency to cut things rather too fine. For instance, in one municipality the type of bath tub that has been selected has caused criticism in some quarters for the reason that no matter how attractive the bathroom may be made by design and finishing the bath tub will always look cheap because it is cheap. For a very little more, it is stated, by those who object to the tub specified, a tub that would have been much more attractive is obtainable. There is perhaps a lot in this argument and its full force will become apparent after the house has been in use for some time and the house begins to need repairs or the owner begins to

compare the equipment in his dwelling with that in some other. Economy of this kind is often very dear in the long run. The same applies to cheap plumbing goods, hardware, cheap paints, in fact cheap anything. Eventually, they make for dissatisfaction because they not only look badly but do not give the service expected. Now is the time, while the plans are being talked over or prepared, to make suggestions that will save trouble and dissatisfaction later.

ONE OF THE BIGGEST BUYERS

THERE is every indication that from a purchasing standpoint the farmers of Canada this year will break all records. With the markets that have been open to them for some time and the prices that have prevailed and are still effective the agriculturists are now to be reckoned in the very best class of buyers in the Dominion. They were always one of the largest buyers, but now they are one of the best. They have the money and they want the goods. Dealer after dealer has commented to HARDWARE AND METAL upon the insistence shown by the farmers in demanding the best there is, regardless of price. There are some big opportunities open to the hardware men as a result of this situation and many of them are making the most of their chances to sell big bills of goods to the farmers. Anything that will make the home better or more comfortable, or that will make his work easier or more quickly performed is of special interest to the man on the farm. In no class of business are so many lines carried that meet these demands as readily as can be found in the hardware trade. No class of merchants come into such direct personal contact with the farmer as the hardware dealers. The question of getting the big business that is offering centres around the ability of the merchant to lay in a stock that is going to be needed by his trade and then of letting the trade know that he has it. Merchants should always bear in mind that the auto has in a great many sections of the country eliminated distance and that if a farmer finds he cannot get what he would like at the town store he will think nothing of motoring fifty or more miles to some other store where he can get such a selection of goods as he desires. On trips of this kind he usually takes his wife and family along also, and they have needs also that offer prospects for much good trade. Trips of this kind are unnecessary if the farmer and his family know that the home dealer has the goods and that he is prepared to give them service.

TO PROTECT ADVERTISING

THE Associated Advertising Clubs of the World are taking a new step in the campaign they have been waging to ban misleading publicity. A fund of approximately half a million dollars, to which some of the biggest advertisers in the country are contributors, is being raised to enforce the stand that public confidence in business claims must not be shaken by untrue statements. In connection with the work to be done there is to be established a special corps of investigators working out of the head office of the Association. Intensive work for the establishment of additional local vigilance committees is being undertaken. A third and most important step is the establishment of a bureau to do in foreign markets what has been done for the protection of the trade at home. A fourth step planned is co-operation with various trade associations, representing various important lines of business. The aim here will be to establish on a still broader basis the "Standards of Practise" referred to in a recent issue of HARDWARE AND METAL. It is a noteworthy fact that among the subscribers to the new fund, and pledged to large yearly subscriptions, are a dozen of the largest rubber and rubber tire firms in the country. Perhaps in no branch of industry, it is stated, have there been more doubtful claims made regarding goods than by some of the firms handling these lines. If the plans for the Associated Advertising Clubs of the World are carried out as planned those making doubtful claims will either have to make good or cease advertising. When it is realized what an enormous expenditure there is annually in goods of this kind some idea may be gained of the huge losses that may occur if the goods fail to do the work expected or claimed for them. It is not only in rubber goods, but in all lines that the clubs claim to protect both business and the public.

THE HOLIDAY LIST

ON another page of this issue appears a list of towns with the times and dates of holidays and early closings. This is information that is of considerable value to a large army of travellers and others, and for that reason it is our endeavor to make this record as complete and correct as it is possible to be. It may be that mistakes have crept in, and we are conscious that through the inability to get definite information, many important towns and cities are omitted. We ask your assistance in making this record complete and authoritative. Will you go over this list, and note any mistake in regard to your town, or, if your town has been omitted from the list, will you supply us promptly with the necessary information to correct the error, or to enlarge the scope of the list? By so doing you will help the business of your town, and consequently of yourself, and will be of great service to us.

THERE is a certain grim humor in the Toronto *Globe's* remark that "the cash-and-carry system is being given a thorough trial in Winnipeg."

EVENTS IN THE TRADE

Business Changes

Quebec, Que.—S. J. Shaw & Co., hardware, have dissolved.

Melbourne, Ont.—Pettit Bros. have purchased the hardware business of Frederick Brown.

Paisley, Ontario.—M. S. Dawson has purchased the hardware business of W. H. Davison.

Campbellford, Ont.—The hardware and plumbing business, formerly conducted under the style of Morton & Owen, is now conducted by E. T. Morton.

Ville Marie, Quebec.—L. P. Cloutier & Co., have purchased the hardware business formerly conducted by A. Joliceur and would be glad to receive catalogues and price lists from manufacturers and jobbers.

Obituaries

The death occurred in Toronto following a short illness of W. D. Matthews, aged 70. He was head of W. D. Matthews and Company, grain dealers, vice-president of the Canadian General Electric Company, president of the Consolidated Mining and Smelting Company of Canada, Ltd., president of the Canada Foundry Company, a director of the Steel Company of Canada, of the Hamilton Steel and Iron Company, and of the C. P. R.

Personals

W. Chapman, of Teeswater, has been appointed manager of the hardware section of the store of Bonthron & Drysdale at Hensall, Ont.

Sgt. Leon Sanderson, of St. Thomas, Ont., who went overseas in 1914 with the Dental section of the Army Medical Corps, has returned. Prior to enlisting he was in the store of the Ellis Hardware Co. at Port Stanley.

E. R. Fenwick, of St. John, N.B., who is leaving to take over the management of the Montreal branch of the Dunlop Tire and Rubber Goods Co., was the guest of honor at a dinner given by members of the Union Club, and was presented with a handsome travelling bag.

Trade Notes

The Crescent Tool Company has been registered at Montreal by Michel Thivierge.

The Automatic Gas Regulator Co., Ltd., of Vancouver, B.C., has obtained a Dominion charter.

In a real estate deal involving $35,000, the Chinic Hardware Co., of Quebec, has acquired the property at 59 to 65 St. Peter St., and plans when the lease expires to connect the entire building with their main building.

Rapid progress is being made at Sarnia, Ont., on the new plant being erected by the Holmes Foundry Co. for the manufacture of automobile castings.

Metal Studios, Ltd., of Hamilton, Ont., manufacturers of lighting fixtures, have secured new premises at 21 Walnut St. North.

Work on the large new distributing station which is being erected in Halifax for the Imperial Oil Co., is nearing completion. All pumping will be done electrically.

A. P. Reuber has removed the stock he recently purchased at Walkerton to his store at Cargill, Ont., and will conduct only one store.

O. B. Henry, of Drayton, Ont., has given up his garage business, and has converted the premises into a harness shop where repair work is also done.

Montreal News

L. Fischler, of the Chicago Spring Butt Co., Ltd., was in Montreal this week.

W. M. Rea, with the A. W. Chesterton Co., Boston, Mass., was in Montreal during the week.

Mr. Giroux, of Cote-Boivin Co., Chicoutimi, Quebec, spent some time in Montreal last week.

A. T. McIntyre, of McIntyre and Taylor, Ltd., Toronto, visited Montreal on Monday of this week.

M. J. McKendrick, formerly of Montreal, and now with Atlas Metal Co., spent a few days in Montreal.

H. M. Bolger, sales manager of the McClary Mfg. Co., Ltd., Montreal, has been out of the city for a few days.

F. G. Moon, representing the Detroit Torch Mfg. Co., Limited, was a welcome visitor at the Montreal office of HARDWARE AND METAL this week.

The Winchester Repeating Arms Co., New Haven, Conn., were represented in Montreal this week by their traveler, J. H. Cameron.

D. A. MacNab, hardware merchant of Brockville, Ont., was in Montreal this week. Mr. MacNab is seemingly pleased with this section of the country in which he has recently made his home.

F. I. Spielman, of Spielman Agencies Reg'd, Montreal, and who represents Griffiths Bros. and Co., London; British Ever Ready Co. and British Aluminum Co., is leaving shortly for England on a business trip.

Winnipeg News

The Wakyte Mfg. Co., Ltd., Winnipeg, have been appointed distributors in the Canadian Northwest for Viking spark plugs, made by the Viking Corporation of Canada, Ltd., Toronto.

E. Grobb, of the Dominion Chain Co., Niagara Falls, who has been calling on the jobbers as far West as Calgary, returned to the city on Friday and left the same evening for the East.

T. Mortimer, manufacturers' agent, was in the city during the week calling on the jobbing trade, leaving Saturday for Port Arthur and Fort William.

W. A. Brady, hardware merchant of Reston, Man., is spending a few days in the city on business and reports conditions in his district as very favorable for a good crop, and everyone is looking forward to a good year's business.

St. John, N.B., News

George McAvity, of T. McAvity & Sons, Ltd., has returned from Charleston, S. C.

William Robertson, head of the hardware firm of William Robertson & Son, Halifax, died recently in his eighty-first year. He established the business in 1871.

Major T. Escott Ryder, M.C., who was manager for the Fairbanks-Morse Co. in St. John before going overseas, has returned with the battery which he commanded. He plans to go into business in Montreal.

The Gosselin Air Motor Company, Ltd., has been incorporated with capital stock of $49.000 and head office in Edmundston, N.B., and with authority to carry on a general foundry and machine shop business, and also to manufacture and deal in motors and engines.

A special children's day was observed by the retail merchants of St. John on Thursday and Friday, when everything pertaining to children and calculated to interest either the kiddies or their parents was given special prominence.

The announcement that plans are being made for co-operation between the C.P.R. and Furness, Withy & Company, to establish a fortnightly steamer service between St. John and Antwerp, is of interest to those engaged in both import and export trades. Before the war nail rods and glass were among the chief items in the cargoes from Antwerp.

E. S. Stephenson & Co., Ltd., have been incorporated under provincial char-

ter to carry on business as electricians, machinists, founders, etc., with capital stock of $18,000 and head office in St. John. They have taken over the business formerly carried on by Edward S. Stephenson. The directors are E. S. Stephenson, Herbert A. Stephenson and Ralph S. Stephenson.

INCORPORATIONS

Panels, Limited, capital $20,000, head office Toronto, plans to manufacture and deal in veneer and similar products.

Peerless Divanettes, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in furniture and fittings.

S A T Canadian, Limited, capital $2,000,000, head office Toronto, plans to manufacture automatic tractors and accessories.

Smith & Stone, Limited, capital $100,000, head office Toronto, plan to manufacture and deal in rubber, glass, metal, porcelain and electrical goods.

Standard Auto Service, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in autos, accessories and garages.

The Toronto Sewer Pipe Company, Limited, capital $100,000, head office Toronto, plans to manufacture and deal in sewer pipe and similar products.

Ingram and Davey, Limited, St. Thomas, Ont., hardware, are given permission to increase their capital stock from $100,000 to $200,000.

Ericson Aircraft, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in aeroplanes and hydroplanes.

Gidley Boat Company, capital $100,000, head office Toronto, plans to build sail boats, motor boats, row boats and canoes.

London Shipping Containers, Limited, capital $50.000, head office London, Ont., plans to manufacture and deal in metal, cardboard, wooden and paper containers.

The Messenger Wire Wheel Company, Limited, capital $40,000, head office Windsor, Ont., plans to manufacture and deal in steel and wire wheels for autos and other vehicles.

Motor Sundries, Limited, capital $40,000, head office Toronto, plans to manufacture and deal in autos, bicycles, motor cycles and accessories.

Hamilton Lamp Company, head office, Hamilton, Ont., capital, $300,000, plans to manufacture and deal in electric lamps and fixtures of all kinds.

Canadian Snyderfibra Container Co., Ltd., capital $100,000, head office Montreal, plans to manufacture and deal in paper and paper substitutes.

Crandall, Carpenter and Read, Ltd., head office Vancouver, capital $25,000, plan to carry on the general business of manufacturers and selling agents for hardware, machinery and implements.

Canadian Tank and Pump Company, Limited, capital $50,000, head office Toronto, Ont., plans to manufacture and deal in self-measuring oil pumps, tanks and storage systems.

Says Foreign Element is Behind Plan to Cause Dominion-Wide Strike

"IN my opinion there is a foreign element behind the Winnipeg strike and the Winnipeg disturbance is simply part of a concerted move that is being made from coast to coast. The parties behind all this are simply using the unions and the working men as tools and are keeping in the background themselves."

This is the view of J. O. Thorn, manager of the Metallic Roofing Company of Canada, Ltd., who recently returned after spending nearly three months in Winnipeg.

"The men behind the strike in Winnipeg," said Mr. Thorn, "are actuated by only one idea. They want to overthrow the Government, tear down our national institutions and disregard law and order. They have no consideration for the rights of others."

Won't Satisfy Them

"More money will not satisfy these men. An increase in wages is not what they are after. They want to take charge of everything and run the country along somewhat similar lines, it appears to me, to those in Russia. Their demands are one sided. They do not for one moment consider the manufacturers' viewpoint. Their demands must be met whether it leaves the manufacturers in a position where they cannot carry on or not. Thousands of the men who went out on strike in sympathy with the original strikers had no grievance whatever against their employers. They will admit that. They do not, however, consider the immense loss they cause by taking this action. They are out of work themselves and also prevent the firms employing them from going ahead. This is no time for actions of this kind. Everyone should be pulling together during the reconstruction period.

Should Be Adjusted

"I do not say that there are not workingmen who have real grievances," Mr. Thorn continued. "These are mainly traceable, I believe, to the high cost of food and the difficulties of obtaining reasonable housing conditions at fair prices. In my opinion the Government should take over every cold storage and packing plant in the Dominion and eliminate the United States Fish Trust.

"Suppose men are given an increase in wages. That simply means that the manufacturers have to charge more for their finished products. That hits the farmer as well as everyone else. If the farmer has to pay more for his goods he is going to keep his prices up, and as we depend upon the farmers for food production, food prices will not come down. High prices undoubtedly restrict the demand in general for products and that makes less business all round. That is an undesirable condition.

Must Save Time

"One of the things the Winnipeg strike has demonstrated is that we need some method of preventing such serious losses of time. Business has been at a complete standstill in Winnipeg. Thousands of men have lost their pay and their employers have lost heavily by not being able to proceed with their work. We should be able to devise some plan by which any troubles that come up could be decided without either the men or the firms being idle. I think this can be done if any effort to co-operate is made. What we need is for the employers to understand the men's viewpoint and difficulties, and for the men to see something of the employers' side of the case. But," stated Mr. Thorn "there should be no compromise with revolution, and no sympathetic strikes by policemen, postmen, firemen, and others in the public service."

Returned Soldiers Launch Cordage Company

VANCOUVER.—With a capitalization of $300,000, a group of returned soldiers in Vancouver has been formed under the name of the Canadian Western Cordage Company for the manufacture of rope and twine of all kinds. Until the permanent officers of the company are elected the following veterans have been named to act as trustees: E. A. Paige, president; G. H. Bray, sec.-treas.; Major J. C. Thorn, Lieut. R. P. Foster and Capt. F. C. Brown. A site has been selected on the Fraser River adjacent to New Westminster, upon which a plant and machinery will be installed at a value of $250,000 There will be no promotion fees, the whole work of promotion being undertaken by soldiers without commission. The scheme is a co-operative one.

Under the plan of organization 150 men will be secured as shareholders, each of whom will put $400 into the company, representing four shares. Of the total of $60,000, a sum of $20,000 has already been subscribed for. The remaining $240,000 will be sought from the Provincial Government through the Industrial Fund which was created at the last session of the House. The promoters will point out that the sum they are asking amounts to only $16,000 per man, as against $8,000 which is offered to veterans who wish to take up farming.

Sixty men and twenty girls will be employed at the outset, and for the purpose of their training twenty per cent. of the required expert labor will be brought in from outside the province, providing permission from the Government Labor Department can be obtained.

MAKE SOME STAFF CHANGES

George W. Scott has been appointed district manager for the Chicago territory of the Stark Rolling Mill Co., Canton, Ohio. Mr. Scott was formerly Chicago representative for the Pittsburgh Steel Co., and, it is indicated, has already had quite a wide experience in sheets and fabricated products. His headquarters will be at 1119 Marquette Building.

Another appointment announced by the Stark Rolling Mill Co. is that of Thomas F. Murphy to the position of district manager for Canton territory. The company state that Mr. Murphy has also had a wide range of experience, and for a number of years was connected with the American Sheet and Tin Plate Co.

LIEUT. CAVERHILL RETURNS

Lieut. G. R. Caverhill, son of George Caverhill, of Caverhill, Learmont & Co., Montreal, has returned from overseas to his home city, after an absence of nearly four years.

Lieut. Caverhill enlisted in June, 1915. as orderly room sergeant in the O.T.C. He was subsequently stationed at Barrie, Niagara, and Borden Camps, respectively, and later in that same year went with the Army Service Corps to France.

During his stay in France, Lieut. Caverhill was confined for several weeks to the Military hospital with knee trouble, but after careful treatment he recovered and returned to England. Here he served with his corps in various camps for two years and returned about two weeks ago in good health and spirits. Lieut. Caverhill is a third year McGill man.

REQUIRE LICENSES

The Safety and Health Committee of the council at Edmonton, Alta., has recommended the passing of a by-law compelling all persons who do electric work to take out a license. The matter was taken up with the committee by a delegation of electrical contractors. Some objection is being taken to the by-law on the ground that it is too arbitrary.

Camp Eeh-nis-kim Opens

Camp Eeh-nis-kim, the delightful playground conducted each year on the banks of the Niagara River by the Carborundum Co., will open for its season on June 28. The camp is now well known to hardware jobbers, dealers and their salesmen.

Every facility for healthful recreation, for out of doors sports, and for good, wholesome rest is offered to the visitor. He can play tennis, volley ball, baseball, hand ball or basket ball. He can enjoy himself at the camp swimming hole, where he will find a big swimming raft anchored out in the clean, green waters of Niagara. He can go boating or fishing, or he can get just plumb lazy and not do a blessed thing but loaf in the sun if he cares to.

On the camp grounds are two big frame buildings, one of which houses the camp office and recreation room where the boys gather to have a bit of music and to play cards during the evening. The other building contains the big kitchen and mess hall, presided over by the two camp cooks and staff of waiters. Every visitor is provided with sleeping accommodation in a clean, airy tent. Each tent has a platform and is covered with an extra fly to keep things cool and dry. In every tent will be found clean, comfortable cots, snow white sheets, snug blankets, all of which are furnished without expense to the visitor. In fact the only things that cost a cent at the camp are the three daily meals, but even these are served at cost, the Carborundum Co. paying for service and all other camp comforts. Meals will cost but one dollar and twenty cents per day.

The camp will be open all during the months of July and August. Hardware men are invited to come and spend their vacation there. They are even permitted to bring along a friend who is not in the hardware business. It must be remembered, however, that women are not permitted to stay at the camp. The women are invited only on the special "ladies' day," when they come up for the camp dances.

Hardware men who are desirous of spending their vacation time at the camp should write to the Great Sachem, Camp Eeh-nis-kim, care of the Carborundum Co., Niagara Falls, N.Y., and tent reservations will be made for them.

BRITISH HOUSING SCHEME

LONDON, Eng.—It is stated that to date more than a thousand housing schemes have been submitted to the Local Government Board, covering 14,000 acres of land, and representing 140,000 dwellings.

WELSH TIN PLATE TROUBLES

LONDON, ENG.—Owing to labor troubles at Swansea Docks, and the closing down of seventy-eight mills, all shipments are held up. The number of workers out now is between four and five thousand. This hold-up has considerably weakened the market and there is a consequent drop in export prices.

SPELTER TRADE

LONDON, ENG.—It is stated that to ing Company in Wales has had to close down owing to increased freight charges, great cost of coal and the advances in wages. There is also a large surplus of war spelter which complicates the situation. The market price of spelter is about £38, but the production cost in England is £52 10s. per ton.

BIRMINGHAM SMALL ARMS MAKERS' COMBINATION

LONDON, ENG.—At the annual meeting of the members of the Birmingham gun trade, it was announced that in the opinion of the committee the small arms industry could not thrive unless new methods were adopted in the near future. To satisfy the great demand for sporting guns and rifles all over the world, it has been decided to form a combination of firms under the title of "Birmingham Registered Gunmakers, Ltd." One of the speakers said that it would take the industry six months to resettle itself, and that it would be a great injustice if the prohibition on imports was removed.

BRITISH INDUSTRIES FAIR

Canadian manufacturers who wish to have exhibits at the British Industries Fair in 1920 are being advised that the arrangements so far completed make it probable that there will be sufficient space for them to be included. The fair will be held in the Crystal Palace, the largest exhibition building in the world, and will be open to firms whose principal works and head offices are situated within the British Empire and are not controlled by foreign interests. In order to assist manufacturers who have no British representatives to arrange for the erection of their stands, the Department of Overseas Trade will undertake the work on their behalf, but it will be necessary for firms who have no representatives to pay in advance not only two shillings, in the case of the fairs held in London and Glasgow, and 3/6 in Birmingham, per square foot of floor space applied for, but in addition 3/ per square foot for the erection of their stands. The department reserves to itself the right to allot space in any position and also the right to allot less space than applicants ask if necessary. Applications for space by Ontario manufacturers should be made through the British Trade Commissioner's office at Toronto. F. W. Field, the commissioner, advises that application should be made promptly as they must be sent to London in the near future.

BUFFALO FORGE COMPANY

Section No.400, listing fans, blowers and exhausters, has been issued by the Buffalo Forge Company of Buffalo, N.Y. It contains thirty-nine pages attractively printed and illustrated, showing steel pressure blowers, experimental blowers and exhausters, together with complete tables of capacities with speed and horsepower requirements. Countershafts are listed, also dust and refuse collectors, blast gates, conoidal fans, electric and pulley disc fans and propeller fans.

JOHNSTON BROKERAGE COMPANY

The Johnston Brokerage Company, First National Bank Building, Pittsburgh, Pa., is issuing to those in the trade who have been on active service or who have had sons or daughters or relatives in the service a most attractively printed service record entitled: "My Days in the Service." There are thirty-two pages, including special pages for records and reminiscences.

The Vickers Combination

LONDON, ENG.—At the 52nd annual meeting of Vickers Ltd., the chairman referred to an arrangement which was pending with the Metropolitan Carriage Co., and also to the acquisition by the company of the controlling interests in the British Westinghouse Electrical Manufacturing Company. It was also stated that Messrs. Vickers had made another arrangement with the firm of W. & T. Glover on terms which were equitable to both parties, and would bring about the combination of the Westinghouse which the shareholders would in future own together with their own business.

It has since transpired that Vickers, Ltd., are also interested in a match trade combine which has been formed by the amalgamation of the following firms; Maguire, Miller & Co., Liverpool, Ltd.; Macguire, Miller & Co., Leeds, Ltd.; Paterson & Co., Ltd., of Dublin, and J. Palmer & Son, of London. Vickers have opened a new department at their Erith works for the manufacture of match making machinery. A site of forty-five acres has been acquired for the erection of a new factory by the amalgamated company at Liverpool. It is intended to meet the post war demands for matches in the home markets and throughout the world.

According to the Financial News, of London, the reasons given for the amalgamation are because it has been deemed necessary on account of the new developments in all British industries which must follow the war. The inclusion of Vickers Ltd. in the company means the placing at its disposal the finest machinery in the world, and the entering into competition with Germany in a field which, up to the present, has been practically monopolized by German manufacturers.

BRITISH CONCRETE BRICK INVENTION

LONDON, ENG.—It is reported that a super-concrete brick has been invented which is thoroughly damp proof. The brick is described as being hard as blue bath stone, and very difficult to cut after it has been in the walls for a few weeks. Its cost is about a third of that of the ordinary brick, and it can be marketed at ten dollars per thousand. A machine has been designed for which it is claimed that it will turn out nine-inch concrete bricks at the rate of from eight thousand to ten thousand per day. They can be used in constructional work the day after they have been made.

LUXEMBURG AND LORRAINE STEEL

LONDON, ENG.—It is stated that the Luxemburg and Lorraine factories now under French administration have already entered the export market, and are soliciting orders for rolled material in Great Britain. No orders appear to have been recorded so far, but in view of enhanced British prices there may be interesting developments.

MANITOBA CONVENTION PROMISES WELL

Splendid Array of Speakers Who Will Deliver Addresses on Vital Merchandising Questions

The fifth annual convention of the Retail Merchants' Association of Manitoba, will probably compare favorably with the convention of the Saskatchewan branch, that was recently held at Regina.

The Manitoba executive has spared no effort to make this convention a success. —It is a "business building" program from start to finish, and when it convenes at Brandon, June 17, it is expected that a very large number of delegates will be in attendance.

The complete program is as follows:

Tuesday Morning, June 17th

10.00 a.m. to 12.00 noon.—Registration and reception of delegates and visitors. All persons attending the convention will please go to the city hall for the purpose of registering and receiving a button.

Tuesday Afternoon

2.00 p. m.—Convention opened by President Geo. W. Markle. Addresses of welcome by: His Worship the Mayor, Mr. McDiarmid; Mr. Rankin, president of the Board of Trade; President Kiwanis Club; E. Bolton, president, Brandon branch R.M.A.; Replies; Visit merchandise display.

3.00 p. m.—Reports of Manitoba provincial officers; president's address; treasurer's report; secretary's report; resolutions committee announced, and question box introduced.

4.00 p. m.—Reports of delegates to Dominion Convention, 15 minutes each, Messrs. Chevrier, Rannard, and Devlin. Address by J. A. Banfield, president of Dominion Board; Visit merchandise display.

Tuesday Evening

8.00 p. m.—Address by H. E. Hart, of Long Prairie, Minn. Subject, "Retail Store Co-operation." This address is especially adapted for a joint meeting of merchants and clerks.

9.00 p. m.—Address by F. P. Mann of Devils Lake, N. D. Subject, "Increasing Your Business Through Community Co-operation."

Wednesday Morning, June 18th

9.30 a. m.—Resolutions committee will make its first report; Consideration of resolutions.

10.30 a.m.—Retail Merchants' Mutual Fire Insurance Co.; C. F. Rannard.

11.00 a. m.—Taxation, by Wm. Iverach, of Isabella, Man.

Wednesday Afternoon

2.00 p. m.—Address by F. P. Mann, president. North Dakota R.M.A. Subject, "Looking Ahead in the Retail Business."

3.00 p. m.—Address by H. E. Hart, Long Prairie, Minn. Subject, "Ideas That Have Increased Our Business."

Wednesday Afternoon

4.00 p. m.—Address by A. W. Gibb, C.A., assistant inspector of taxation, Dominion Taxation Office. Subject, "How to Make out an Income Tax Return," illustrated by chart; Questions; discussion.

Wednesday Evening

8.00 p. m.—Special program at theatre; Feature films, music, songs. Address by F. C. Middleton, secretary of community organization department of the Social Service Council of Manitoba. Subject, "Farmers and Merchants—Community Team-mates"; View windows in window dressing contest.

8.00 p. m.—Note: If the committee considers that the occasion demands it, a special address could be put on at the City Hall for clerks, by H. E. Hart. Subject, "Our Store Club—How Clerks Can Help a Store."

Thursday Morning, June 19th

9.30 a. m.—Resolutions; Nomination of provincial officers.

10.30 a. m.—Questions, new business.

Thursday Afternoon

2.00 p. m.—Address by W. J. Keyes, of the Kelvin Technical High School and Extension Department, of University of Manitoba. Subject, "Practical Retail Advertising," fully illustrated.

3.00 p. m.—Address by Mr. Edwin Loftus, K. C., lecturer, Manitoba Law School, prominent Winnipeg barrister. Subject, "Commercial Law as Related to the Retailer." Election of provincial officers.

5.00 p.m.—Motor drive to places of interest in the city.

Thursday Evening

7.10 p. m.—Banquet tendered to visitors attending the convention by the Brandon branch of the Retail Merchants' Association of Canada, the Board of Trade, the Kiwanis Club, the Commercial Travelers' Association and the Retail Clerks. Special addresses by Dr. J. A. MacLean, president of the University of Manitoba, and the convention speakers' entertainment.

Special feature during the convention —The big merchandise display at the City Hall. The window dressing contest. Special entertainment for the ladies attending the convention.

SERIOUS FIRE IN COLLINGWOOD

The Imperial Steel & Wire Co., Collingwood, Ont., suffered severe loss on Sunday last, fire totally destroying building, plant and stock. The fire appeared to start in the centre of the main building, and spread with great rapidity, first to the warehouse across a railroad siding, then to the keg mill a short distance east. The plant was in steady operation throughout the war, and had but recently closed down for overhauling. Several cars of raw material were received this week, and it was expected that operations would have been resumed on Tuesday. The loss will probably be $200,000, on which there is some insurance. Col. J. A. Currie, M.P., of Toronto, is president, and Dr. D. McKay, of Collingwood, secretary-treasurer.

THE CLERKS DEPARTMENT

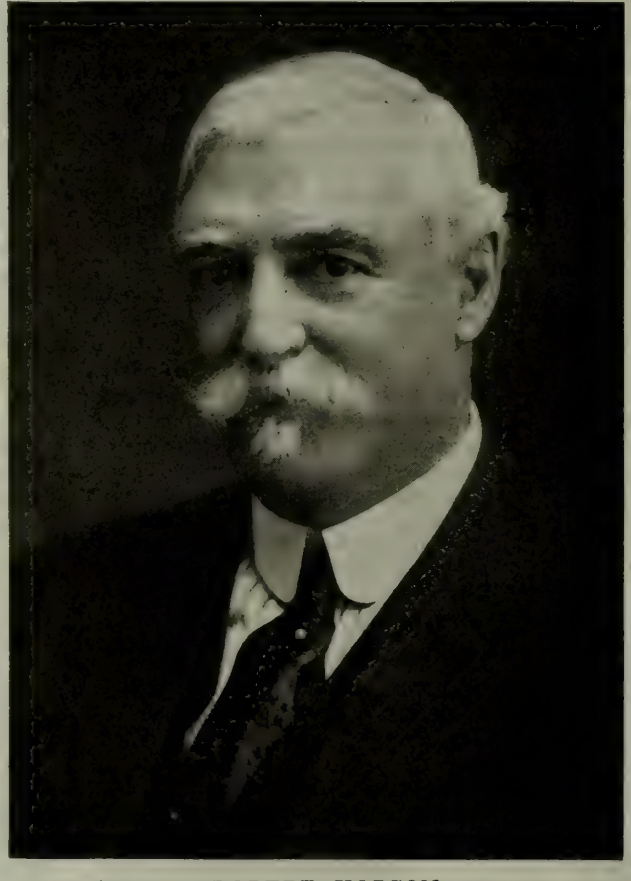
HOBSON'S HARD START

How the Hamilton Steel Master Made His Debut

By

WILLIAM BYRON

In MacLeans Magazine for June



THE time has long passed when business was thought devoid of romance. It is seen now that the amazing kaleidoscope of modern business offers more intense drama and more picturesque phases than can be found in any other direction. Any man who has won his way to the top rung of the industrial ladder—no matter how hard-headed and prosaic he may appear—must have lived through experiences that, for sheer interest, exceed anything in fiction. Most of our industrial captains would probably deny this, but catch any one of them in a reminiscent mood and the stories that drop forth will be sufficient proof.

Take, for instance, the story of how Robert Hobson came to go into the iron business and the struggle he had to establish himself there. Mr. Hobson is to-day the president of the Steel Company of Canada, and easily figures among the first half dozen industrial magnates of the Dominion. A little over twenty years ago he knew practically nothing about iron and steel and had absolutely no intention of ever engaging in any business outside of railroading. The story of his jump and of the fight he found himself engaged in is one of intense interest, even when sketched in bare outlines. Perhaps some day Mr. Hobson will be induced to tell it himself. In the meantime, let us present the story as far as it has been possible to trace it.

First Engaged in Railroading

Robert Hobson was the son of Joseph Hobson, the famous railroad engineer who left the St. Clair tunnel as a monument to his skill. It was natural that the son should choose to follow in the footsteps of the father, and for twenty years Robert Hobson was employed in the engineering department, first of the Great North Western, and later of the Grand Trunk. When Charles M. Hays became president of the latter road, he placed Mr. Hobson, senior, in charge of the engineering department. This necessitated a move to Montreal for both. Robert Hobson had been in Montreal a few days only when he received an urgent message from his father-in-law, Hon. A. T. Wood, of Hamilton, to return to that city as secretary-treasurer of a new company which had been formed, the Hamilton Iron and Steel Co.

He was not anxious to make the change, in fact he was very loath to undertake the new proposition. He liked railroading; and he didn't know anything about iron; he perhaps distrusted his ability to make a success in that line. Nevertheless, after due reflection, he decided to try it, and so returned to Hamilton after a stay of only fifteen days in Montreal.

ROBERT HOBSON,
President Steel Co. of Canada.

The Company Was Shaky

This was in January, 1896, and the business world after emerging half-heartedly from the black depression of 1893 was slipping downhill again toward the depression of '07. It was a bad time for business generally; and most particularly bad for the Hamilton Iron and Steel Company. The new secretary-treasurer soon found himself in rather a sorry plight.

It wasn't so much that he knew nothing about iron. The worst feature of it was that the company was in badly involved condition, and the plant required a complete reorganization. The formation of the concern dates so far back that it can be stated now without hurting anybody's feelings that the promotion had been loosely carried out. A group of Americans had come and promoted the proposition, interesting Hamilton capital for the most part. After putting up a plant along the Bay—on the site of the present enormous steel plant—they had drawn out themselves and left the local men holding the bag. It was a rather forlorn proposition all around.

Mr. Hobson had not been on the ground long before he found out a number of things about the concern. He went to the local men who were most heavily interested.

"We're practically insolvent," he told them. "There will have to be a reorganization of the company and new capital. That's your problem. So far we haven't produced pig iron of a quantity that can be sold, so we'll have to completely reorganize our production plans. That's my problem."

The fact of the matter was that the promoters had not attempted to put the concern on a going basis. They had drawn in local capital on the plea that

the ore to be smelted would be drawn from the Hamilton mountain. Much of the ore being used when the new secretary-treasurer took charge was drawn from the mountain and the rest came from Eastern Ontario. These ores were not sufficient by themselves to produce a satisfactory pig iron, being either sulphurous or magnetic.

Mr. Hobson's first step was to go to Cleveland, where he called upon Colonel Pickands, the president of Pickands, Mather & Co., the greatest ore-producing concern in the world. He found the colonel a very courteous old gentleman who had fought with distinction for the North through the civil war, and who carried into business the most highly chivalrous principles. His reception was most cordial.

"Colonel," he said, "I have just been put in charge of an iron plant that's in pretty bad shape. I don't know the first thing about iron and, so far as I know yet, I'm not a business man. So I've come to you."

"In that case," said Colonel Pickands, with a twinkle in his eye, "it looks as though we would have to look after you. Just what can we do?"

"All I want is some information," said Hobson. "I want to find out how to make pig iron."

Colonel Pickands called in his experts and, when they had found out the kind of pig iron to be produced, they told the visitor what ores to use, where to buy them, and how to combine them to get the desired result. He relied so implicitly on the information thus secured that he proceeded to place orders for the required ores before proceeding back to Canada.

Although there have been close relations between the two concerns ever since, Mr. Hobson never saw Colonel Pickands again. The fine old soldier died shortly after.

Finding a Market Difficult

So the future steel president returned to Hamilton with the first of his difficulties solved. He had found out the right kind of ore to use and he had contracts in his pockets for adequate supplies. The next step was to produce the pig iron. The head furnace man who had been placed in charge by the promoters was a good-natured Southerner and the plant was not well organized or efficiently run. He had to be replaced. In fact several changes had to be made; and finally the staff was organized on a basis that made satisfactory production possible. The pay roll at this time numbered 112 in all.

Having at last an article that could be offered for sale the next problem was to find a market. The office staff numbered three—Mr. Hobson, a book-keeper and an office boy; nevertheless the hard-working secretary-treasurer decided to constitute himself a sales force as well. His first serious effort to secure business took the form of a trip to Montreal. He called first on the head buyer of one of the manufacturing plants. The man looked at him in amazement when he learned his errand.

"Good Gad, man," he exclaimed, people come to Montreal to buy iron, not to sell it."

This, of course, was a fair statement of fact. Most of the pig iron used in Canada at that time came from the Maritimes and from England and Scotland. It came in to Montreal, which thus served as a distributing point for all of Canada.

"I know," returned the man from Hamilton, "but I am in a position to sell, even to Montreal."

He was. The plant was now producing a grade of ore that could be marketed at a price that made it worth while, even in the centre of the iron industry. Mr. Hobson returned with orders in his pocket and the first glimmerings of hope in his mind.

In the meantime the company had been reorganized and the name changed to the Hamilton Blast Furnace Co. The difficulties which threatened to swamp the venture at the start had thus been overcome one by one. They were not entirely out of the woods, of course, for times were very bad indeed, and business hard to get. The work that fell on the shoulders of the secretary-treasurer was enormous, but his capacity was equal to the strain. He was, and still is, a hard worker.

The company paid four per cent. dividends the first two years that he handled it. In 1899, when business conditions had become extremely bright again, the dividend was increased to eight per cent.

The Beginning of Amalgamations

That year saw the first of the amalgamations which resulted finally in the present industrial Colossus known as the Steel Company of Canada. The Hamilton Blast Furnace Co. joined hands with the Ontario Rolling Mills Co. and the united concern took the name of the Hamilton Steel & Iron Co. Mr. Hobson was made secretary and assistant general manager, the general manager being C. S. Wilcox, who had been in charge of the Rolling Mills. The new company began to make steel, two 15-ton furnaces being erected for the purpose. The company has to-day, by the way, no fewer than 11 furnaces, some of which have a capacity of 70 tons.

Under the new arrangement Mr. Hobson's interest ran most directly to the sales end of the business. Competition was very keen. The Pittsburgh concerns had pretty well monopolized the market, except for the business that went down East to the Nova Scotia Iron and Steel Co. It was not, therefore, easy work for the new firm to break in.

Bringing Home The Bacon

There is at no time a wide spread in the prices of steel. Quotations from various firms can be depended upon to run very closely together and, where there is competition for a big order, the element of personality comes strongly into play. The new steel firm got its first big impetus through a large order secured from the C.P.R. in 1901. Mr. Hobson put the deal through personally.

It was known that the C.P.R. would place an order for a year's supply of angle bars. This was a big order; big enough to get the firm away to a prosperous and busy year. The first step was to make a number of angle bars to the specifications and figure on the production cost. It was found that an attractive price could be quoted so Mr. Hobson boarded the train for Montreal without a day's delay. The next day he saw Alex. Henry, who was handling that branch of the purchasing for the C.P.R., and he took the return train for Hamilton that night with the order in his pocket.

There was jubilation on his return, for Hamilton had been put on the steel map!

The story of the building of the Steel Company of Canada is not the story of Robert Hobson, for a number of men figured in this enterprise as prominently as he did. It is interesting to trace his part, however. The amalgamation was effected in 1910 and he became general manager and vice-president, Mr. Wilcox being president. In 1916 the latter was made chairman of the board, and Mr. Hobson was promoted to the presidency. Under the leadership, the concern is showing rapid strides, and a future that may be described as boundless lies before. An important development has just been completed in the purchase of 1,600 acres in the coal fields of Pennsylvania to control and safeguard the fuel supply of the company.

Landing the Record Order

Every executive has an especial fondness for some one branch of the business and, as stated before, Mr. Hobson's hobby is the sales department. He has always been a believer in the gospel of "getting out" for everyone from the president down, and whenever a real opportunity for business arrives, he has always been only too glad to clear off his desk and strike out on the trail.

It was decided in 1915 to negotiate for an order of mammoth proportions with the Munitions Board. By building a new open hearth plant it was reckoned that the company could produce 8.2 and 9.2 shells for the war office in large quantities. Mr. Hobson went down to Ottawa and proposed a contract for eight and one-half millions.

In doing this he recognized that he was taking a tremendous chance. The successful carrying out of this huge contract would depend on the speedy building of the new open-hearth plant and the successful operation of it after it was built. In order to make sure that the plant could be built and equipped on time he had secured options in machinery and supplies in advance. These cost money, and had the deal fallen through a heavy loss would have resulted. The greatest danger lay, however, in the element of doubt which necessarily existed as to the possibility of producing on time and profitably. Mr. Hobson

Continued on page 61

NEW HARDWARE GOODS

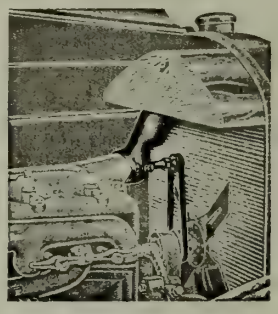
OFFERED TO CANADIAN HARDWAREMEN

DAYTON AIRLESS TIRE

The Dayton Airless Tire is being placed on the Canadian market by the Dayton Airless Tire Co. of Canada, 346 Yonge Street, Toronto. Points which the manufacturers enumerate in favor of this line are: It is an automobile tire made of a very high-grade rubber and fabric. It is not a solid tire, nor is it a pneumatic tire, for it contains no compressed air, nor is it a tire "filler."

It is constructed on the same engineering principle as a bridge, there being piers of rubber and an annular rib or beam of straight cut fabric and rubber of great strength corresponding to the beams in a bridge.

When on the wheel it looks exactly like and is the same size as a pneumatic.

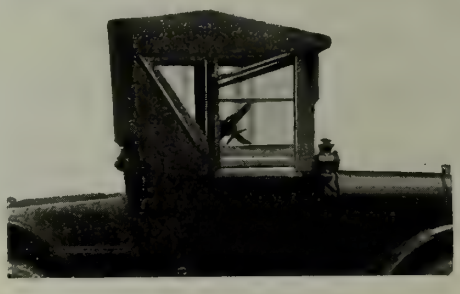


Dayton Airless Tire

The difference between the two makes of tires, the manufacturers state, is the interior supporting member. The pneumatic tire contains a rubber tube filled with compressed air, while the Dayton Airless contains piers or columns of new elastic rubber and an annular rib (similar to a bridge construction), so constructed as to give sufficient strength to support any given weight of car, and yet deflect or "squeeze down" so as to absorb obstructions in the same manner as an air tube in a properly inflated pneumatic. The Airless Tire is said to be very easy riding, the open spaces existing in the tire absorbing obstructions with the minimum jar or jolt.

WATER CIRCULATOR

The Star Ford water circulator is an accessory for Ford cars, being placed on the market by the Star Specialty Manufacturing Co., 227-233 West Erie Street, Chicago, Ill. This water circulator, which, the manufacturers state, is made in sizes to fit all Ford models, forces water from engine to radiator and back to engine, keeping the water in venting engine from heating. Other



Star Ford Circulator

points enumerated in its favor by the manufacturers are that it saves lubricating oil; saves gasoline, and saves bearings. It is stated further that it can be attached by any owner in a few minutes.

THE USTUS LIMOUSETTE

The Ustus Limousette is a new addition to equipment for the Ford car, being placed on the market by the Dafoe-Eustice Company, 1164 Jefferson Ave., Detroit, Mich. This affords protection against wind, rain, dust and the winter elements, and according to the manufacturers, adds much to the appearance of the car. Its construction, it is indicated, permits an instant transformation of the limousine appearance and protection into an open car without removing any part; in attaching the limousette there is no mutilating or altering of the regular top necessary. Different from the ordinary side curtain, the Limousette way provides for rolling the side pieces up at a touch, out of sight, and returning them to the closed position as quickly; these rolling side members can be operated from the inside or outside of the car. The composition of these comprise heavy rubber fabric and Dupont Pyralin windows, the latter being so designed as to give a clean-sweep view on all sides. The use of the Limousette with the regular Ford top transforms the car into a limousine, which can easily be converted again to the open car.

The Ustus Limousette

STEEL FENCE POSTS

The Metal Shingle and Siding Co., Ltd., Preston, Ont., are putting a new line on the market in the shape of their steel fence posts. Features which the manufacturers enumerate in connection with this line are that they are easy to drive, which means a great saving in cost of installation; they never rot, break, burn, or buckle, which means they are economical as to cost of upkeep. Another claim made for these is that they are lightning proof because the steel "grounds" the wire, which means a measure of safety for stock; they are neat in appearance.

Steel Fence Post

TEMPORARY USE OF ARMY HUTS

LONDON, ENG. — The Government has decided to dispose of the surplus hutments till lately used for the accommodation of the army at home. It is thought that the immediate sale of these erections at reasonable prices may have the effect of temporarily relieving the shortage. The scheme apparently is not to sell the huts separately to individuals, but to dispose of them in lots to any of the local authorities applying for them. It is estimated that there are in England alone about half a million of these huts.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ONE of the most important changes that has occurred in some time is that which deals with the position of stoves and ranges, both cast and steel, this week. Due, it is indicated, to the increased wage scale and shorter hours, manufacturers are forced to shove prices up and a scale of quotations showing about a 5% advance has occurred. The advance affects the higher grade ranges particularly.

Another move upward has been recorded this week in linseed oil and the outlook in regard to supplies presents no especially bright side. The Winnipeg strike is interfering with deliveries and some crushers have withdrawn from the market altogether. Flax seed has reached higher price levels and this is largely responsible for the kindred move in linseed oil. The revision upward in linseed oil amounts to 10c per gallon with every indication of a further advance apparent.

Turpentine is also soaring, the heavy export movement from the South failing to ease away any and accordingly keeping the prices on the upward move. The situation in the South has been reflected locally with prices ranging from 9c to 10c per gallon higher. Supplies are not coming through any too plentifully to meet the demands of the trade, though there is no real acute shortage manifest as yet.

Brooms are under revision downward and indications are that new levels are down to rock-bottom until new crop broom corn is again available. Pine pitch shows a sharp advance of 20 per cent. in quotations issued this week.

Many miscellaneous shelf goods have been revised this week, one line of horse clippers showing a 7½ per cent. advance and declines being recorded in hack saw blades, compression bibbs and sad irons. Business shows a decided improvement in most lines and trade is quite optimistic over the outlook.

MONTREAL MARKETS

MONTREAL, May 29—Important changes have been made on several lines. One make of hack saw blades has been reduced in one quarter 33 1-3%, and compression bibbs are reduced approximately 20%. Sad irons of Mrs. Potts' make are reduced in price, and lower prices are made effective for oilcloth binding. Pine pitch has, on the other hand, been advanced, the quotation being now $10 per barrel. Prices have been withdrawn by some makers of cotton twines, and there may be advances on both twines and cotton rope. An important change is made relative to steel and cast stoves and ranges, the advances just made effective being five per cent. Electric ranges are also advanced. Solder is firm, but unchanged. Ingot copper and lead are somewhat easier and slightly reduced, while antimony is firmer. Other lines are unchanged in the ingot list, but once peace is signed there will be advances, it is anticipated.

There is much activity, city and country trade being quite active, and many lines sharing in this better movement.

Sad Irons Down; Pitch is Higher

Montreal.

PITCH, SAD IRONS, DEE TOPS.—Advances have been made in pure pine pitch, the base being now put at $10 per barrel. Mrs. Potts' sad irons are also changed, but this is a decline, and the new prices are: No. 50, $1.90 and $1.95; No. 55, $1.85 per set. Dee handle tops are now on a revised list of $4 per dozen, with 17½ per cent. the discount.

Oil Cloth Binding Has Been Reduced

Montreal

OIL CLOTH BINDING.—Reductions have been made in oil cloth binding of both brass and zinc material. Prices on the brass are now given as follows: 4 x 4, per dozen sets, $2.20; 6 x 4, $3.60; 50 yard boxes, No. 18, $3; No. 16, $3.85. Prices for zinc binding, 4 x 4, $1.20; 6 x 4, $1.80; 8 x 4, $2.40, and in 50 yd. boxes, No. 18, $2.20.

Hack Saw Blades; Bibbs Go Lower

Montreal

BLADES, BIBBS.—A decline of about 33 1-3 per cent. is announced by a leading jobber on one line of hack saw blades. It is considered probable that other lines will also be reduced. A reduction of approximately 20 per cent. has also been effected on compression bibbs, both finished and nickelled.

Big Nail Sales; Wire Goes, Also

Montreal.

NAILS AND WIRE.—Selling of wire nails is active, indicating the resumption of work. This is true of both the city and country, and jobbers have been disposing of considerable quantities. The basis remains at $4.75 per keg for both cut and wire nails. The base of $5 for smooth steel wire also obtains still, and there is a good sale these days for lawn and other fence, though in a more limited way than would result under normal conditions.

Rope Still Steady; Cotton To Advance

Montreal

ROPE AND CORDAGE.—It is stated that there is likely to be an advance for cotton twines, the market being much stronger and some manufacturers al-

ready having withdrawn quotations. There is much activity, and renewed buying has been a firming factor. It is almost certain that twine prices will be firmer, and cotton ropes would probably follow.

There has been no change in regular rope and cordage this week, and prices are as follows: Pure manila, base, 34c per pound; British manila, 30c; sisal, 27½c. There has been quite a little trade from shipping interests.

Big Selling Of Gasoline; Oil Held

Montreal.

OIL AND GASOLINE.—Movement of oil is very good in the city, oil stoves consuming a great deal of this. The prices remain still at 20c to 23c per gallon, according to quality. Gasoline is very much in demand, and there is no change in the price which holds at 34c per gallon.

Stoves and Ranges Advance 5 Per Cent.

Montreal

STOVES, RANGES, WARES.—Advances have been made in the prices of cast and steel ranges, the increase being five per cent. This is in definite accord with recent predictions made by HARDWARE AND METAL, and even with this advance, the undertone is continuing firm. Electric ranges are also firmer in price. Heaters have not been revised as yet, but advances are indicated in the market conditions obtaining here, labor cost being the biggest factor.

There is a good demand for pails and enamelled ware, and changes are absent on all of these lines.

Still Held Basis For Iron; Steel

Montreal.

IRON AND STEEL.—Much business has been carried out for these lines, and the weekly tonnage is considerable. Country points are sending in very good orders, and the amount of jobbing within the city calls for a lot of stock. The basis is steady and unchanged, and stocks good.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75
Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Nominal Market Obtains On Sheets

Montreal.

A nominal basis still obtains for sheets. There is, as a matter of fact, not a great deal of business, and there is a strong bid for what there is, with a consequent tendency to cut where any considerable order is anticipated. Supplies are quite ample for the requirements of the trade.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00
GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made

Old Metals Wait On Peace Signing

Montreal

OLD MATERIAL.—There is still a waiting attitude on the old metal market, due to the uncertain attitude of the manufacturer who does not want to stock up with raw material unduly. Very little change has been effected, and there is no price change in the list, whatever.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00
Old rubbers, boots and shoes	0 06½	0 07
Overshoes, lumbermen's rubber boots	....	0 03½
Bicycle tires	....	0 03
Automobile tires	....	0 03
Yellow brass	....	0 06
Red brass	....	0 08½
Light brass	....	0 05
Scrap zinc	....	0 05
Heavy copper	0 13	0 13½
Wrought iron, No. 1, per gr. ton	....	11 00

CAST AND STEEL RANGES ADVANCE

"While there has been no advance made now for heaters, all tendencies point to a higher price for these," said Edward Goodwill, manager of the Thos. Davidson Co., Ltd., Montreal, in speaking with HARDWARE AND METAL. "Labor is one of the biggest factors in the advance of 5 per cent. we have just made for stoves and ranges, and there may be further advances named."

Mr. Goodwill firmly believes that there will be higher prices for heaters. Labor is at the bottom of the manufacturers' costs these days, and until there is a decreased scale in wages paid them there can be no recession, he says, from the present basis.

HARDWARE AND METAL has pointed out the strong firming tendencies of this market for a long while past. The makers of stoves and ranges claim that advances made from time to time have been barely sufficient to take care of their higher production costs, and that dealers gain nothing by deferring their buying.. The new basis that has been reached will continue to obtain, they assert.

COTTON TWINES TO COST MORE

"Several of the manufacturers have withdrawn prices on cotton twines, and these lines may advance," said H. Stewart, Montreal, manager of the Gourock Ropework Export Co., Ltd., to HARDWARE AND METAL. "There has been a heavy demand of late for these goods," continued Mr. Stewart, "and raw material is costing more."

This points the way to a change from a lowering tendency which obtained for some weeks. It is quite probable that there will be a firming of the cotton goods prices all around, particularly on twines and cordage. The demand has been much heavier.

Solder Quite Firm; No Lead Changes

Montreal

LEAD PRODUCTS.—With the exception of solder, which carries a stronger tone, there is little interest in lead products this week. Plumbers are fairly busy in their jobbing contracts, and are buying in a limited way such as they require.

Lead pipe	....	0 11½
Lead waste	....	0 12½
Lead traps and bends	....	15%
Lead wool, lb.	....	0 14
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	....	0 10½
Lead sheets, 4 to 8 lbs, sq. ft.	....	0 09½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c. lb. extra.		
Solder, guaranteed, lb.	....	0 35½
Solder, strictly, lb.	....	0 31
Solder, commercial, lb.	....	0 29
Solder, wiping, lb.	....	0 27
Solder wire (8 gauge)—		
40-60	....	0 34
45-55	....	0 35¾
50-50	....	0 39¼
Zinc sheets, casks	....	0 17
Do., broken lots	....	0 18

Copper and Lead Less; Antimony Firmer

Montreal

INGOT METALS.—While the markets were firmer last week, there has been an easier tendency since then. This was occasioned more by the somewhat uncertain position regarding the signing of peace soon. Just as soon as this condition is cleared and peace signed, there is a feeling that quotations will again advance.

COPPER.—A slight change of price has been made from last week, 18½c being quoted. There is not much movement.

TIN.—No change has been made in the price basis, which remains at 58c per pound. Actual business transacted is on the light side.

LEAD.—A decline of ¼c per pound to 7¾c is the feature of the week. When conditions are a bit more settled there is likely to be a reaction to higher levels.

ANTIMONY.—This is the one metal that shows strength this week, and the price is advanced to 9½c per pound.

ALUMINUM.—Very limited trading is being done in this, and the basis still remains at 38c per pound.

PIG IRON.—There is no price change and little trading. The present quotation of $45 is likely to be advanced in the near future, it is stated here.

TORONTO MARKETS

TORONTO, May 29—A lower schedule of prices has been named this week by some manufacturers of brooms. An advance in new market clippers and some alarm clocks has been made. Generally speaking, there seems to be a much firmer undertone to the market on steel goods, though there has been no change reported in sheets or plates, boiler tubes and kindred lines. Paraffine oil is down 1c per gallon and a slight reduction is noted in bright wire goods, such as screw hooks, cornice hooks, screw eyes and hooks and eyes. Stoves and ranges are under revision toward slightly higher levels.

Bright Wire Goods Decline

Toronto.

BRIGHT WIRE GOODS.—A decline has been recorded this week in the price of bright wire goods by a revision in the discount from 82% to 85% from list. The lines affected by this are screw hooks, cornice hooks, screw eyes, stove pipe eyes, and gate hooks and eyes.

Higher Prices on Horse Clippers

Toronto.

HORSE CLIPPERS.—Immediately effective, an advance has been made on new market horse clippers, due, it is said, to a rise in production costs. The present price being quoted by jobbers is $2.90 per pair. Plates have also gone higher in price, the top plates being quoted at $1 each, and the bottom plates at $1.50 each.

Some Alarm Clocks Go Higher

Toronto.

ALARM CLOCKS.—There has been an advance in some quarters this week on some lines of alarm clocks, this being a result of increased duty charged on tax now levied by the U. S. Government. Big Ben alarm clocks are being quoted at $3 each and the Baby Ben at $3 each also. No change in other lines has been noted.

Paraffine Oil Declines 1C

Toronto.

OILS, GASOLINE.—A decline of 1c per gal. has been shown in prices of paraffine oil this week, which is now being quoted at 22½c per gal., less 15%. Other lines record no change with indications quite steady.

Coal oil is in active demand and there has been no indication of any change in price, 19½c to 22½c per gal. being quotations still prevailing. Gasoline is firmly held at 33c per gallon, and is in very active demand.

Stoves to Move Upward; Wares

Toronto.

STOVES, WARES.—As outlined in these columns some weeks ago indications point to at least maintained prices and possibly advanced quotations being recorded on stoves and ranges. This week advices are general that revisions towards slightly higher levels, affecting particularly the higher grade lines in both cast and steel ranges, are now being determined upon. This is a result of the demands of labor, and there seems no prospect that prices of materials will go any lower, in fact the tendency now seems upward again. Coal oil, gasoline, electric and gas stoves are moving freely at steadily maintained prices.

There has been nothing new to report in the situation on wares, business showing some improvement and summer lines being particularly active.

Broom Prices Revised Downward

Toronto.

BROOMS.—A general revision downward is shown in the scale of prices issued by some manufacturers of brooms. This is attributed in some measure to competition, with other views expressed that it is the furtherance of a desire to bring values down as soon as possible from high levels that have been ruling. Manufacturers intimate that indications point to present levels being held until new crop corn is available. Declines approximate 15% to 20% as will be shown by some lines which have dropped from $14 to $11.50; from $13 to $11; from $16.80 to $14; from $8.30 to $7.10.

Cordage Holds at Unchanged Levels

Toronto.

CORDAGE. — Manufacturers report the situation on cordage as showing little change. Business is still along rather narrow channels, and prices are firmly maintained at the following levels: pure manila, 34c lb., base; British manila, 30c; New Zealand hemp at 30c; sisal at 27½c and sisal lath yarn at 27½c.

The twine situation is steady, though cotton twine shows a strong undertone. Binder twine is without any special features of interest this week.

Iron and Steel Holding Firm

Toronto.

IRON AND STEEL.—The market is well maintained and there seems no immediate prospect of any lowering values. In fact if news from producers can be taken as authoritative, the tendencies are upward rather than downward on many lines. There is a fair sale of bars in progress and prices are steady.

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Sheets Show Firm Undertone

Toronto.

SHEETS, PLATES.—Tendencies seem to be somewhat bullish in the markets on all iron and steel products, and sheets are no exception to this attitude. There has been no quotable change as a result but the feeling prevails that higher prices are probable before lower ones can be brought about. Quotations now in effect here are given as below.

Canada plate, 52 sheet, have been further reduced, and is quoted at $7.35 per box.

10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Wrought Pipe, Boiler Tubes Hold

Toronto.

WROUGHT PIPE, BOILER TUBES. —There is no material change in the situation as it affects wrought pipe. Sales are being made though not in large volume as yet, but the goods are moving. Prices show no change from figures shown in current market quotations.

Boiler tubes are quiet and the market prices hold without change as follows:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Corrugated Sheets Hold Their Own

Toronto.

CORRUGATED SHEETS.—The market has held without any change this

week. Business is shaping up fairly well and outlook seems to be quite satisfactory apart from labor unrest. Prices are steady and rule with a firm undertone at following levels:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Solder Holds; Lead Products Too

Toronto.

LEAD AND ZINC PRODUCTS.—There have been no changes this week in any portion of the list, prices being very well maintained and a fair amount of business being transacted. Manufacturers intimate that with present labor troubles adjusted the orders should come tumbling in in great style. Quotations ruling are:

Lead pipe, lb.		$0 11½
Lead waste pipe, lb.		0 12½
Lead traps and bends		15%
Lead wool, lb.		0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb	0 35	0 39
Solder, strictly, lb.	0 33	0 35
Solder, commercial, lb.	0 30	0 33
Solder, wiping, lb.	0 29½	0 32
Solder, wire, lb.	0 36	0 42
Zinc sheets, per lb.		0 17

Little Interest in Old Materials

Toronto.

OLD MATERIALS.—There is little interest apparent as yet in old materials. A brighter feeling was apparent last week, but the situation does not yet lend itself to extreme optimism over immediate prospects for business.

Dealers' Buying Prices—		
Tea lead		0 03
Heavy lead pipe		0 04
Pipe scrap		8 00
Stove plate, per ton		10 00
No. 2 busheling		8 00
Yellow Brass		0 07
Red Brass		0 10
Light Brass		0 05½
Scrap zinc		0 04½
Heavy copper		0 15
Wrought iron, No. 1, per gr. ton		15 00
No. 1 machinery cast		14 00
Heavy melting steel		9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots		0 04½
Bicycle tires		0 04½
Automobile tires	0 03½	0 04

Nails Show Little Change; Wire

Toronto.

NAILS, WIRE.—There is little change in the position of nails from that prevailing during the past couple of weeks. Some price-cutting is again reported but no record of same is available, with figures generally ruling at $4.70 per 100 lbs. for the wire nails and $4.75 for the cut.

An unchanged figure of $5 per 100 lbs. base continues to rule on smooth steel wire; business is only fair.

Improvement in Waste Movement

Toronto.

WASTE, OAKUM.—Dealers report an improvement in the movement of waste and outlook now seems much better than it has been for some time past. Prices are well maintained at figures shown in current market quotations, with no indication of any immediate recession in values.

Oakum is without any particular feature of interest to the trade.

Ingot Metals Showing Fluctuation

Toronto.

INGOT METALS.—The markets at primary points show almost daily fluctuations, but locally there has been little material change in the situation from that outlined last week. Business is very fair and a clearing of the atmosphere of labor trouble would tend towards a better use of all lines.

COPPER.—An easing away in the buying movement tended to ease off prices slightly at primary points but locally the price holds at around 18c per pound, an unchanged figure.

TIN.—There seems to be a heavy stock of tin in Government hands in the U. S. to be disposed of and this will probably have a tendency to check any upward movement, though prices are expected to show little recession from their present levels at once. Prices here range from 60c to 62c per pound.

SPELTER.—A greater use of this metal seems the outlook, and whereas stocks are ample, the bigger buying looked for will tend to maintain present scale of quotations and possibly stiffen them slightly. The prices to-day are 8¼c to 8½c per pound.

LEAD.—New developments are lacking in the situation here. There is a very fair movement in progress and a fairly steady tone to the market is apparent. Quotations range from 6½c to 7c per pound.

ANTIMONY.—The demand continues to improve in antimony and prices rule with a firm undertone. There is no report of excessive stocks in any quarter and indications point to a well-maintained basis of prices. These locally range from 8½c to 9c per pound.

ALUMINUM.—The situation here is without features of material interest. There seems to be some little inquiry but this is still rather restricted. Price ranges around 40c per pound.

LONDON MARKETS

LONDON, May 29—Changes have been made in toilet clippers, solder and shellac, all of which are higher in price. Brooms are lower. Business here continues splendid. All the hardware stores in London and surrounding district are very busy. The sale for lead, oil and paints is increasing considerably with the more favorable weather. Collections are very good.

Solder is Higher and Selling Well

London, Ont.

SOLDER.—Following the recent advances in lead and tin higher prices are effective on solder. There has been a good demand. Half and half is now quoted at 33c per lb.

Higher Prices For Toilet Clippers

London, Ont.

TOILET CLIPPERS.—Supplies in this line have been somewhat limited lately, but new stocks are arriving and all quotations are on a higher basis as follows:

Speed, $2.10; Columbia, $2.75; Express, $3.15; shaver 2-0, $3.35; Brown and Sharpe (Bressant) $4.15.

Slight Reductions in Some Corn Brooms

London, Ont.

CORN HOUSE BROOMS.—New and lower prices are effective in some lines of corn house brooms. The quotations are:

No. 8, hardwood handle	$11.00 doz.
No. 7, hardwood handle	9.50 doz.
Parlor, hardwood handle	8.25 doz.
Four string, hardwood handle	7.00 doz.
No. XX, hardwood handle	6.25 doz
Factory or mill	8.50 doz.

Higher Prices For Expansion Bits

London, Ont.

EXPANSION BITS.—New quotations at higher figures are being made on expansion bits. The new prices are:

No. 50, small, $20 per doz.; No. 100, large, $2.75 doz.

Excellent Sales For Lawn Mowers

London, Ont.

LAWN MOWERS. — An excellent business is being done in lawn mowers.

EXPECTS FIRM PRICES

"In view of the present conditions there is not the slightest chance of prices in our lines coming down," said J. O. Thorn, manager of the Metallic Roofing Co. of Canada, Ltd., to HARDWARE AND METAL. "We are entirely dependent upon the American mills for our supplies. Before the war we could buy from England, but, owing to conditions both at home and in regard to shipping the British firms are not likely to be able to handle any export business for a while."

Prices show no change and are as below:

Grass catchers are also quoted at unchanged figures as shown below:

Daisy:—12 inch, $5.37 each; 14 inch, $5.85 each; 16 inch, $6.30 each.

Star:—14 inch, $6.96 each; 16 inch, $7.41 each.

Woodyatt:—14 inch, $7.67 each; 16 inch, $8.13 each; 18 inch, $8.58 each; 20 inch, $9.04 each.

Empress:—14 inch, $9.92 each; 16 inch, $10.40 each; 18 inch, $10.82 each; 20 inch, $11.28 each.

Grass catchers:—Galvanized bottom, medium, No. 16 G, $15.50 doz; galvanized bottom, heavy, No. 10 G, $20.00 doz.

Screen Wire Cloth and Poultry Netting

London, Ont.

SCREEN WIRE, CLOTH NETTING.—Good sales are being made in screen wire, cloth and poultry netting. Quotations are on the following basis:

Screen wire cloth—

Painted black:—50 ft. rolls, $3.30 per 100 sq. ft.; 100 ft. rolls, $3.25 per 100 sq. ft.

Bronze:—14 cents per sq. ft.

Poultry netting:—Canadian, 15 per cent. off list; American, or American pattern, 10 per cent. off list.

No Changes Shown in Garden Tools

London, Ont.

GARDEN AND HARVEST TOOLS.—A splendid volume of business is being handled on both garden and harvest tools. Quotations are unchanged at 17½% off list.

Binder Twine and Rope Sales Light

London, Ont.

ROPE BINDER TWINE—Booked orders of binder twine are now being shipped. Prices show no change and are as follows:

650 ft., 26½c lb.; 600 ft., 25c; 550 ft., 23¾c; 500 ft., 22c.

Rope sales have been light since the shipping of booked orders were finished. Quotations are unchanged as follows:

Pure manila, 34c; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Big Jump Made in Prices of Shellac

London, Ont.

SHELLAC.—New and much higher prices are now in effect for shellac. The new quotations are:

Orange, 1 gal., $4.65 gal.; ½ gal., $4.85; ¼ gal., $5.05; pints, $7.90 doz.; ½ pints, $4.45; ¼ pints, $2.65; ⅛ pints, $1.80.

White, 1 gal., $5.15 gal.; ½ gal., $5.35 gal.; ¼ gal., $5.55; pints, $8.65 doz.; ½ pints, $4.65; ¼ pints, $2.75; ⅛ pints, $1.85.

Putty prices remain unchanged. Sales have been very fair. The quotations are:

Standard, 100 lb. drums, $6.75 per 100 lb.; 25 lb. drums, $7; pure, 100 lb. drums, $8.75; 25 lb drums, $9.

White Lead in Oil Shows No Change

London, Ont.

WHITE LEAD IN OIL, PUTTY.—There has been a good sale for white lead in oil. Prices show no change, the quotations being as follows:

Pure, tons, $16.30 per 100 lbs., less than tons, $16.65; Elephant, tons, $16.90. less than tons, $17.25.

Linseed Oil Goes To Higher Levels

London, Ont.

LINSEED OIL.—Indications are that prices of linseed oil may go even higher. There has been an advance this week of 10c per gallon, and business is reported very good. Quotations are as follows: 1 to 2 bbls., raw, $2.15 gal., boiled, $2.18; 3 to 5 bbls., raw, $2.14, boiled, $2.17; 6 to 9 bbls., raw, $2.12, boiled, $2.15; less bbls. add 10 cents gal.

Turpentine is Firm Supplies Limited

London, Ont.

TURPENTINE. — Prices are very firm and supplies are somewhat limited. A good volume of business is being handled. Quotations have advanced 10c per gallon this week and are as follows: 1 bbl. lots, $1.30 per Imp. gal.; 2 to 4 bbl. lots, $1.29; 5 gal. lots, $1.40.

WINNIPEG MARKETS

WINNIPEG, May 29—Winnipeg is still in the grip of the general strike, which has practically tied up all lines of business. Some of the hardware jobbers closed their doors while others have been operating their offices only. However, the situation is beginning to clear up with the return of the striking bakers, milk men, delivery men, ice men and a few of the telephone operators, who have realized that the strike has been engineered by the Bolsheviki element rather than those representing the real labor class.

Hardware markets again show little change as all mails are held up, but numerous changes will no doubt occur with the resumption of mail deliveries which are now under way with volunteer postal employees.

No Changes Shown in Butts and Hinges

Winnipeg.

BUTTS, HINGES.—Prices on butts and hinges hold firm at former quotations, and no immediate change is anticipated, while a good demand is expected as soon as the proposed building program gets under way. To-day's ruling prices are confirmed as follows.

Butts—Plated dull brass or oxidized copper:—2½ x 2½ inch, 37c; 3 x 3 inch, 39c; 3½ x 3½ inch, 40c; 4 x 4 inch, 52c; 4½ x 4½ inch, 75c; 5 x 5 inch, 94c per pair.

Plain Steel Butts:—No. 840 "net list"; No. 800, 5 per cent. advance on list; No. 838, "net list;" No. 804, 5 per cent. off list.

Hinges:—Light T and light strap, 15 per cent. discount.

Corrugated strap hinges:—4 inch, $1.60; 5 inch, $2.20; 6 inch, $3.00; 8 inch, $4.75; 10 inch, $7.00; 12 inch, $10.80 per dozen pair.

Corrugated T hinges:—4 inch, $2.00; 5 inch, $2.50; 6 inch, $3.40; 8 inch, $5.70; 10 inch, $8.50; 12 inch, $12.00 per dozen pair.

Shovels and Scoops Are Holding Steady

Winnipeg.

SHOVELS AND SCOOPS.—Prices on all lines of shovels, spades and scoops continue unchanged, while the demand has been normal with stocks well assorted. With the proposed building of new railway lines during the year, increased sales are looked for. To-day's prevailing market prices are confirmed herewith.

Shovels—

Fox and Olds, D H, sq. pt., $15.05; L H, sq. pt., $15.05; D H, rd., $15.05; L H, rd., $15.05.

Bull Dog & Jones, D H, sq. pt., $16.30; L H, sq. pt., $16.30; D H, rd. pt., $16.30; L H, rd. pt., $16.30 per doz.

Scoops—

Black Cat and Crescent:—No. 4, $19; No. 6, $19.50; No. 8, $20.00; No. 10, $20.50, doz.

Moose & Jones: No. 4, $19.90; No. 6, $20.90; No. 8, $21.40, doz.

Prices of Bolts Seem to be Settled

Winnipeg.

BOLTS.—Bolt prices after the recent reduction seem to have settled down to a firm basis for this year's business, and the demand in general is reported favorable. Prices ruling on the various kinds are given below.

Carriage Bolts:—⅝ inch and smaller, up to 6 inch, 30; over 6 inch, 15; 7-16 inch and larger, all lengths, 10 per cent.

Machine bolts:—⅝ inch and smaller, up to 4 inch, 35; over 4 inch, 20; 7-16 inch and larger, all lengths, 20 per cent.

Plow bolts, 25 per cent.; stove bolts, 50 per cent.; shaft bolts, 5 per cent. on list; tire bolts, 45 per cent.; sleigh shoe bolts, 5 per cent. on list.

Turpentine Prices Remain Unchanged

Winnipeg.

TURPENTINE. — Turpentine prices show no change during the week, holding firm at the following figures: barrel lots, $1.35 gal.; half barrel lots, $1.38 gal.; 5 gal. lots, $1.40 gal; 1 gal. lots, $1.40 gal., plus the usual extras for containers. Primary markets are showing decided strength and the outlook seems to be for an even higher level of quotations.

Linseed Oil Prices Remaining Firm

Winnipeg.

LINSEED OIL.—Linseed oil prices remain steady at former quotations, but only a limited demand on account of the strike situation. Prices are confirmed

herewith. Raw linseed oil, $1.93 gal.; boiled linseed oil, $1.96 gal.; in single barrel lots. Indications are that a resumption of somewhat normal business activities will be the signal for a higher scale of prices.

PITTSBURGH MARKETS

PITTSBURGH, Pa., May 29.—There has been a distinct increase in the volume of steel buying. This statement applies to practically all products with the exception of tin plate, and includes even rails, since the Railroad Administration has bought 200,000 tons of rails, under protest, and there has been a fair volume of export rail business done.

With only occasional exceptions, as in the case of the rails just mentioned, purchases are confined to the supplying of immediate wants. As formerly, buyers take material only for immediate delivery, for absolutely known wants. They do not buy ahead, even in the most moderate way, and they keep demanding price guarantees, although according to the statements of steel producers the guarantees are seldom given. It may be, however, that guarantees are more common than is admitted. There is a very remarkable rumor, for instance, that one mill has guaranteed a certain product to the end of the year, a still more remarkable feature of the guarantee being that it is to be retroactive, upon shipments made from the date of the guarantee being given.

No new buyers have appeared in the market, the buying being by the same interests as formerly, including jobbers and manufacturing consumers. As there is no forward buying, and buyers had previously been withholding their orders as long as possible, it seems to be indicated clearly that general business in the United States has expanded. This may be a reflection of the progress of the season, as well as a general limbering up after the dislocations caused by the war ending, and thus it should lead to still better things in future.

Operating Rate

Since practically the beginning of the year the rate of steel mill operation has been declining continuously, the monthly ingot report indicating 87 per cent. operation in January, 85 per cent. in February, 77 per cent. in March and 65 per cent. in April, while the rate lately may be estimated at 55 per cent. There has been little fluctuation in the rate of new buying in these months, certainly no progressive decline, and the decrease in operations has been due to the gradual exhaustion of old orders. The increase in buying now noted may not be sufficient to make up for the winding up of old orders, so that mill operations may experience some further decrease, but even at that it is encouraging that part at least of the exhaustion of old orders is followed by the placing of fresh orders.

Construction Work

The construction firms and fabricating shops report that they have been estimating on very large quantities of new construction work in the past few months. The investors, however, do no go ahead with the projects. What they are waiting on cannot be conjectured, as there are many possible explanations, but it is encouraging that so much business is under consideration, for obviously these projects have not been abandoned. When conditions become satisfactory the projects will be undertaken. Either the conditions upon which investors are waiting will come or the investors will conclude the conditions never are coming and will go ahead without them.

Jobs now undertaken are small, but still they amount to something. Thus, the Bridge Builders' and Structural Society reported that April lettings of fabricated steel jobs amounted to 24½ per cent. of the month's capacity, this comparing with 17½ per cent. for March, 12½ per cent. for February and 12 per cent. for January. While the progress is slow, there is steady improvement.

Steel Prices

The great majority of steel producers insist that they are adhering to the recognized prices This may be true, but in some quarters it is claimed that on almost any finished steel product a cut price could be obtained if the prospective buyer could offer a sufficiently attractive order. Obviously on carload or other small lots for immediate shipment the mills would be indisposed to cut prices. In this connection it is to be noted that the American Locomotive Company has distributed plate orders aggregating 3,000 tons to four mills. the base price being $2.50, Pittsburgh, or $3 a ton under the regulations price of $2.65. In explanation of the cut price it is stated that this was "export" business because the locomotives will be made to go to Italy. As the British price on plates is equal to about 3.90c and the French price, if there is one, would be still higher, it cannot be said that a cut price on these plates was necessary in order to meet competition on the finished locomotives, but it might have been necessary to encourage placing of the locomotive order at this time.

Pig Iron

The pig iron market has now been under test for about two months, or since the majority of merchant furnaces declared their unwillingness to adhere to the fixed schedule of March 21, brought about by negotiations between the Industrial Board and the general iron and steel committee, on which the merchant furnaces claim they were poorly represented if indeed they were not misrepresented. There has been an "open market" in pig iron, furnaces feeling that they had no obligation to their competitors to obtain one price or another. Nevertheless prices have sagged only slightly, and in some districts not at all, while on the other hand, furnaces have been going out of blast. Probably the furnaces could afford to quote slightly lower prices, but costs are so high that they could not come down a great deal, and they prefer to let the situation liquidate itself, by production dropping below the rate of consumption. This would be necessary in the long run, since there have been stocks of considerable magnitude in the hands of consumers. Some of these stocks developed during the war, while some have been occasioned in the past few months by consumers taking iron because they had it under contract and not because they needed it. While steel producers speak of their high costs as a bar to reducing prices, the case is not altogether simliar, there being much more margin in steel than in pig iron, and if there were full operation of steel mills the cost would be still lower, through better distribution of overhead.

Connellsville Coke

Connellsville coke, famous throughout the world for years as an ideal blast furnace and foundry material, was produced to the extent of only 83,284 net tons in the week ended May 17, in the Connellsville and Lower Connellsville region, this comparing with an output averaging 324,000 to 350,000 tons during a considerable part of 1918. and with outputs running some 145,000 tons a week only a few years ago. Of course the coke production of the whole country is greatly reduced, but the Connellsville region suffers particularly at this time because so many furnaces formerly using Connellsville coke have installed by-product coke ovens at their furnace plants. They use Connellsville coal to an extent, but also coal from various other districts.

Connellsville coke is a shade stiffer than a few weeks ago, spot furnace coke being quoted usually at $4 per net ton at ovens, while not so long ago $3.50 and $3.60 were done. Ordinary grades of foundry coke, formerly available in spot lots at $4.25, now bring $4.50, while good brands remain at about $5. The usual time for making contracts for the second half of the year is at hand, but it is somewhat doubtful whether the furnaces still in operation, and not provided with coke plants of their own, will be disposed to make contracts. There is likely to be contracting for foundry coke.

A CORRECTION

In reporting last week the promotion of T. E. Doremus as general Eastern manager of E. I. du Pont de Nemours Export Company, it was stated that Mr. Doremus had been associated with the Dominion Cartridge Co. at Montreal. This was incorrect in that Mr. Edmund Doremus was at Montreal, leavivng last year to become associated with the E. I. du Pont de Nemours Co. at Wilmington. Otherwise the promotion of T. E. Doremus, as reported, was quite correct.

HOBSON'S HARD START

Continued from page 53

was "taking a big chance." Had he failed, his head would have been in the basket.

The deal went through although it took a month to complete it. The Munitions Board was in the transition stage at the time, the reorganization under Flavelle not having been completed. Mr. Hobson dealt with Lord Rhondda and Charles Hitchens and for various reasons these representatives of the War Office held off from signing. Mr. Hobson practically lived in Ottawa and on Pullman trains for the month. It was an anxious time for him because the options which he had placed for machinery and supplies were continually lapsing, and with the machinery market on the rapid upgrade, each lapse meant an advance in price. Finally, however, the contract had been negotiated to a point where it was satisfactory to the Imperial representatives and the signatures were duly appended. The total was eight and one half millions.

Then began a mad scramble to get the plant in shape to start. Many of the contracts were let within a few days of the signing of the order and within a week the work had begun. It was seven months before an actual start could be made but this constituted a record in building a plant of this description.

The initial order was successfully filled within a year and repeats were secured up to the time of the signing of the armistice so that the company used for war purposes over one half million tons of steel.

Unpreparedness in 1913

One of the officials with whom he dealt at Ottawa told him on one occasion of a striking evidence of Britain's unpreparedness for war. They were discussing a certain size of shell which was being made in enormous quantities both in England and Canada at the time.

"The firm I am connected with in a civil capacity," said this official, "has an order this year for 750,000 of these shells. Of course, there are lots of other orders placed as well. How many shells of that size do you suppose the War Office ordered in 1913? Exactly six hundred!"

In The Staff Lies Success

Mr. Hobson believes that much of the success of the Steel Company of Canada can be traced to the fact that the staff has been very carefully built up and maintained. It is a well-established truth that most men who have scored outstanding successes have achieved their results because of their ability to pick men to work with them. An organization cannot be a one-man concern. In the rush and hurly-burly of modern business, a carefully organized staff without any weak links is an absolute necessity.

Recognizing this, the Steel Company have always paid close attention to the matter of maintaining a strong personnel in all departments. In the operating branches of the business, the heads have almost without exception been with the company or with one of its component parts for from ten to fifteen years.

Three of the qualities which their men must show to get ahead are, loyalty, capacity for hard work and powers of observation. The first two go without saying. After all, a man does not get far anywhere unless he is prepared to work hard and with the utmost loyalty. On the third score Mr. Hobson lays special stress. He believes that the man who possesses the power to observe and to put into application what he learns in that way cannot be kept down.

EXPORT BUSINESS DEVELOPING NICELY

With a view to further development of export business, H. C. Crow, sales manager of the Canada Metal Co., Toronto, is leaving shortly for England. While there he will go thoroughly into the situation.

"Our export business is getting to be something really big," said Mr. Crow, in discussing conditions with HARDWARE AND METAL. "We have had any number of inquiries and are still getting them, and a large percentage of them have developed into excellent trade. I am satisfied that there is lots of business to be had and that the way to get it is to go after it. While we look after any inquiries that come to us through the Trade Commission and similar sources we do not rely upon them for getting trade. We depend upon our own men for getting results both at home and overseas. The way to get business is to go after it either here or over there."

Mr. Crow stated that business is developing nicely in South Africa, New Zealand and other countries as well as in England, and he looks for it to grow steadily.

"Business in all lines is particularly good," he said, "and there seems to be a large demand for nails."

Discussing the general outlook, he gave it as his opinion that prices are going to be firmer.

TIN PLATE MILL FOR TORONTO?

Negotiations have been carried on for some time past between Baldwins, Ltd., the Imperial Munitions Board, and the Harbor Commissioners relative to the purchase of the plant of the British Forgings at Toronto.

Baldwins, Ltd., will establish a large tin plate mill in Toronto if the negotiations come to a satisfactory conclusion and would use the electric furnace equipment of the present plant in the making of the steel ingots for tin plate.

The plant of the British Forgings, Ltd., Toronto, which is the largest electric furnace plant in the world, was erected in the spring of 1917 by the Imperial Munitions Board for the manufacture of shell forgings for the British and Allied Governments.

PROSPEROUS PAINT SEASON IN FULL SWING

W. S. McLennan, general sales manager of Brandram-Henderson, Ltd., Montreal, states that a very active condition obtains in the prepared paint trade. "We expect to have the biggest month in May that we have yet had," said Mr. McLennan to HARDWARE AND METAL. "Orders have been heavy and it is necessary to work overtime to keep pace with the business."

Mr. McLennan expressed his belief that the retailers have at least realized the improbability of prices declining on various paint products. Being confronted with real business, they are now requiring the stock, and this makes for a condition of renewed and decided activity on the part of the paint manufacturer.

It was further pointed out by Mr. McLennan that there was much difficulty in getting supplies of flaxseed through, and attributed much of the difficulty to the Winnipeg strike. It is a time when the manufacturer requires oil and plenty of it.

CONCRETE HOUSES FOR ENGLAND

Proposal For Speeding Up Buildings—Rental About $2 Per Week

LONDON, ENG.—A new method of reinforced concrete construction under the Government housing scheme has been designed to facilitate the erection of houses, and is now under consideration by the local and municipal authorities in the United Kingdom.

The system is said to be similar to that adopted for housing the American troops in France, and has been patented under the title of the "Lightning Construction System." Its superiority lies in the method of moulding the slabs. This is done on the actual site in portable moulds. It is claimed that a block of three five-roomed houses can be built by twelve men in three days, using unskilled labor under skilled direction.

It is estimated that such houses when completed will cost the British public about £390 per house, or £415 including the cost of land with twelve houses to the acre. The houses would let at about $2 a week, according to local rates. The buildings will include the latest modern improvements. such as central heating.

RECORD DEMANDS FOR PLATE GLASS

An unprecedented demand for plate glass for closed-in automobiles and windshields, and shortage of labor have resulted in the American manufacturers making an advance of ten per cent. in plate glass prices. This will be followed by Canadian importers. It is stated that the demands of the auto manufacturers this year are breaking all records and will take perhaps one-third of the entire output of the plate glass manufacturers.

The Automatic Gas Regulator Company, capital $50,000, head office Vancouver, plans to manufacture and deal in gas regulators.

Develop Business Between Sessions

Strong Arguments That May be Used From Now on With the Farmers, Showing That Regular Painting is Not Only Necessary, But Makes for a Definite Saving That Can be Figured in Dollars and Cents

UPWARDS of two-thirds of the hardware and paint business in Canada is directly or indirectly dependent upon farm trade. It, therefore, behooves these two-thirds to keep their ears close to the ground regarding the habits of the farmer, and the developments that are taking place in the conduct of his business.

The urgency of greater production under war conditions, together with the shortage of labor and other handicaps that tended to lessen that production, has taught him the necessity of figuring his costs, taking into consideration overhead charges, and other items which come between net cost and profit.

He has learned how to make money and where he has made it. He is rapidly growing to be a better producing manager, a better business man, a keener organizer and a larger factor in our commercial and political life.

On the fact that he has whetted up his arithmetic and is taking a keener interest in bookkeeping brings an opportunity for greater paint sales.

Appreciates Value

He is in a better position than ever to appreciate the value of paint from a purely business standpoint.

And now is the time to prepare for his business when he is able to use paint.

Between seed time and harvest, there is more or less of a lull in farm operations that will permit him to think of paint as a means of protecting and preserving his home, barns and stock sheds.

With a realization that his farm buildings are an investment from which the maximum interest earning capacity should be earned, paint as a preservative and as a means of prolonging that earning capacity should appeal to him as one of the necessities for proper up-keep and the reduction of overhead charges over a term of years.

Taken in the aggregate the value of Canadian farm property and its annual depreciation assumes large proportions.

Nearly a Billion

The census of 1911 gives the total value of farm property alone in Canada, at over $890,000,000. Largely through lack of paint there takes place annually a depreciation of at least 2 per cent., which places this loss at upwards of $17,000,000.

Canada's total production and importation of paints, varnishes and colors during that year was not above $10,000,000, so that the loss to farm property alone approached 70 per cent. above the value of our production of these lines.

These figures disclose such a wide discrepancy between what actually exists and what should exist if all farm property were properly painted that any paint dealer should have no difficulty in talking paint to his farm trade in a sound business manner.

Going further into figures on this question and using approximate prices of 1911 for so doing, we can still further widen this discrepancy. Barn paint then sold somewhere around 75c per gallon (wholesale prices) and rough hemlock was about $14 per thousand. On the average estimate of a gallon covering 500 square feet, one coat, we find that $1.50 was all that was necessary to protect 1,000 feet of lumber or a little over 10 per cent. of the cost of the lumber. Erected into a barn or stock shed of course that lumber becomes more valuable, which lessens the percentage of the cost of painting.

Value is Obvious

Two per cent. depreciation annually for 5 years amounts to at least 10 per cent., which shows that the use of paint pays and that the repainting of a barn at least every five or six years will enable a farmer to maintain the interest earning capacity of his buildings.

The writer was discussing this question with a farmer's son recently, and he recalled the fact that his father, a Nova Scotia farmer, had faithfully repainted his barns every four years with pure lead and linseed oil. High prices and war conditions had caused him to put it off two years ago when the property was due for repainting.

"But this year," remarked this man, "father couldn't stand it any longer; he had to have them painted, high prices and all."

This simply goes to show that once a farmer has learned the value of paint on his buildings, he realizes that he must keep on painting.

Noticeable Effects

Talking with a Montreal man the other day who has motored a great deal through Canada and the United States, he drew attention to the well-kept condition of the farms and their painted buildings in New York State in contrast to the lack of paint manifested in many parts of Ontario. This man was a layman so far as the paint

"Save the surface and you save all" *Paint & Varnish*

There's Something To A Name!

Every hardware dealer sells paint. Some more—some less.

The dealers handling "Moore's" are invariably selling more and more paint all the time. The name "Moore" is their assurance of increased paint sales.

A display of Moore's Paints and Varnishes in your window or on your shelves affords your prospect such a complete line of highest quality guaranteed paints and varnishes to choose from that an ultimate sale is always assured.

Moore's Paints dry hard but retain sufficient elasticity to prevent cracking or peeling. Thus they combine tip-top appearance with unbeatable wear.

The Moore Agency proposition will interest you. Write for particulars.

Benjamin Moore & Co., Ltd.

West Toronto
Ontario

business is concerned, but the effects had been so noticeable with him in the different communities that he said he had been deeply impressed with the results that were produced where paint was frequently used and where apparently it was seldom thought of.

It is also a noticeable fact among those concerned with the general distribution of paint, that where in certain localities paint is used on farm buildings, not only have those localities a more prosperous appearance, but paint for farm use is maintained year after year.

This indicates that it is largely a matter of getting the farmer started in the use of paint and he will keep it up. The development of this habit largely rests in the hands of the local paint dealer, who by personal contract with his trade can use his influence in this direction and bring to bear such arguments as are apparent from the figures given above.

Soon Mounts Up

Take any typical individual farmer whose house and barns have a value of say $8,000. On the basis of an annual depreciation of at least 2 per cent. he stands to lose at the rate of $160 annually or $640 in the course of four years. It isn't going to cost him anything like this sum to have his house painted every four years and his barn every six or seven years, and he can throw in for good measure the pride he can have in well-kept buildings and the added value that will come to him from well-kept appearance.

Paint can be advocated on a purely business earning basis to farmers and city dwellers alike. A paint dealer can develop it in this direction from what he intimately knows of property values in his community. With a fair idea of farm values and farm property values he can talk to almost any of his farm customers in the terms of dollars and cents as to the service that his brand of paint will render.

As has been pointed out in HARDWARE AND METAL before, impress upon the farmer the value he will get from his purchase and keep him away from thoughts of what you as a dealer are going to get out of it.

Can Adopt Figures

We have given approximately both Government figures and prices as they existed in 1911. It will not be a different matter for any dealer to adopt for individual use farm values as he knows them to-day against prices as they exist. There has been little change in their relative values from that year to this. The protective and preservative value of paint remains to-day the same as it did then. But the need for conservation is greater to-day than it has ever been before. This need is greater both from a national and individual standpoint which opens up the opportunity for paint sales in just that much greater proportion.

The slogan "Save the Surface and You Save All," which the paint trade is now putting forth co-operatively, is just as potent for the barn as it is for the dwelling, the bridge, the roof, the floor, or wherever surface protection is advocated by the use of paints and varnishes.

Opportunities for paint sales are not less by reason of high prices, they are greater. The need for paint is not less, it is greater, by reason of the high prices of materials that need surface protection. The farm trade is only a part of the great field that may be developed in paint sales, but it is a big field and an important one, and the two-thirds of the trade dependent on it should keep a careful eye on seeing that they get the profit it should bring to them.

CHEMICAL FIRMS MAY MERGE

Negotiations are under way which it is expected will result in the combination of the four largest chemical companies in the United States—the Semet Solvay Co., the Barrett Co., the General Chemical Co., and the National Chemical and Aniline Co. If the merger goes through the total capitalization, it is stated, will exceed $100,000,000. It is stated that the combination would prove most effective in preventing any attempts the Germans may make to flood the country with their chemicals and dyestuffs. Another result of the combination would be economy of operation and stabilizing of prices. The Semet Solvay Company, with a capital of $36,000,000, is the largest of the firms affected. Its headquarters are at Solvay, near Syracuse, N.Y. It is an allied company of the Solvay Process Company.

DEALS WITH CAREER OF JAMES H. McNULTY

In a recent issue of "System" appears an article by Bruce Barton dealing with the business career of James H. McNulty, president of Pratt & Lambert, Inc., of Buffalo, N.Y. It denls with the policies which resulted in his advancing from the position of shipping clerk to head of the firm. Mr. McNulty has been with this firm for twenty-five years and in that time has risen from shipping clerk to president of the company.

Sees High Brush Prices For Years

Russian Market Utterly Demoralized—Supplied Seven-Eighths World's Needs—China, Wise to Scarcity, Holds Out For Fancy Returns

THAT there will be a high price basis for all bristle brushes for years to come is the opinion of H. R. St. Michael, Montreal manager of the Canada Brush Company.

"Russia is out of the running. That country supplied seven-eighths of the bristles used for making brushes before the war, and she will not be able for many years to take her place again. The country is demoralized, there is no supply of hogs from which these bristles are secured, and there will be no improvement for a long time to come," is the gist of Mr. McMichael's expressions to HARDWARE AND METAL on this point.

The Russians had become expert in catering to the huge demands of the world for bristles, Mr. McMichael said. They knew how to sort and prepare the bristles for market, and excellent qualities of stock come from there. Usually there was no dearth of supplies and a fair price basis on what the manufacturer required, but this is now a thing of the past. One thing seemed certain, this informant asserted, and that was, pre-war prices would not and could not prevail again. Any changes that come in the nature of declines will, it is believed, be very gradual.

China on the Job

Realizing that not only Russia, but Roumania, Germany and France were all handicapped, and unlikely as factors of great importance in supplying the world of deficiency of bristles, China has been improving the time and has been the source of supply for bristles for many brush manufacturers. Not only so, realizing this position, and in common with every supplier of commodities that the world now needs urgently, she quickly fell into the class of high price dealers, and demanded increased prices for stock. She has had no lack of orders at these increased prices, and it is altogether unlikely that, until the above countries resume their position as competitors, there will be a lowering of bristle prices by the Chinese.

The Black Bristles

For many years there has been an extensive marketing of black bristle brushes. Mr. McMichael says that this will increase still, and that there will be more and more brushes of this sort. This will apply not only to paint and wall brushes, but to shaving brushes as well.

"There is an aversion to these black bristles," said Mr. McMichael, "but this will have to disappear. The black bristle brushes will have to be used more and more, and there is really very little difference for all practical purposes."

It was pointed out that the attitude was really a sentimental one and that, even with shaving brushes, the black bristle would be used more and more. The bristles are not dyed, as some might suppose, but simply come from a black-haired hog, and are subject to bleaching.

Glass Man Sees Bigger Markets Ahead

Will be no Diminution in Price Basis, But Enquiries Are Very Active—Actual Business Dependent Upon Smoother Relations Between Capital and Labor

F. A. FITCHETT, Montreal manager of the Hobbs Manufacturing Co., Ltd., believes that there will be a big stimulus to buying if the present labor unrest be soon settled. "We have been figuring on contracts of late, and many of these are of large proportions," said Mr. Fitchett. "But the man with capital is confronted with uncertainty regarding labor, and hesitates to place his business. What is most needed is a settlement of these difficulties.

"Take the painters, for instance. They recently asked for an increase of pay, and were out on strike. The advance was granted, and this means about 25 per cent. increase over the former wages they were getting. It is a big consideration."

When a man contemplates building, he makes his plans, basing his outlay upon the cost of material and the cost of labor. There is so much uncertainty in the matter of labor to-day that the tendency is to hold back, and this in large measure explains why there is not more building activity.

No Declines Likely

As to the trend of the market, Mr. Fitchett stated that there was no indication of lower prices obtaining for glass. "Importers have been getting in supplies on the old price basis in completion of orders that were placed. If this were not the case they would have to ask higher prices now. The present market is a higher one and the difference in exchange (equal to nearly 3 per cent.) is a big consideration, bringing glass of the first break to a cost within about fifty cents per case of to-day's selling price."

Mr. Fitchett indicated that any larger buying movement would unquestionably have the effect of advancing prices. It would mean that stocks in hand at this time would be depleted in a short time, and that the importer must go out and pay the present increased costs for renewing his stock. Supplies have not been laid in extensively by the importers, Mr. Fitchett said, and any increased activity would decidedly tend to firm the market.

Better Business

There is at the present time a considerable amount of jobbing business, it was stated, and this is much better than before. Plate glass is moving, and in a general way there is a satisfactory business condition.

Last year the sale of glass was very heavy in Eastern Canada. This was due to the Halifax disaster largely, when thousands of cases of glass were forwarded. There was even more glass sent forward then than was required. There was really a larger distribution of supplies at that time than there has been this season, but for all this there is not an undue or excessive supply in the hands of the trade. All indications point to higher, rather than to lower levels, Mr. Fitchett concluded.

Says Dealer Who Carries the Stock Will Do the Largest Business

Manufacturer Points Out Ways in Which He Believes the Retailer Can Increase His Paint Sales—Many Feature High Priced Goods and Never Mention the Medium Grades

THAT the retailer who carries sufficient stock to immediately supply the demands of customers, will do far more business than the dealer whose stock is small or very limited, is the contention of the leading manufacturers. In discussing the business outlook with HARDWARE AND METAL he instanced many cases of where men, who formerly did only a small business, had found that by carrying the stock they were able to greatly increase their turnover. One case in Quebec he spoke of particularly was where a dealer carried a stock of 100 gallons of a certain color and found it a paying investment.

"He told me himself that if he had not the paint to deliver right to the people when they came and asked for it, he never would have sold it," said the manufacturer. "My experience is that paint sales depend largely upon the dealer. If he is optimistic and thinks he can do the business, he will do it."

Why Some Sales Lost

"Because some hardware men are not carrying the stock they need for their business, and because they do not go after business in the right way, is one reason why the mail order houses are getting quite a large percentage of the trade," continued this manufacturer. Any number of hardware men lose business because they do not carry a sufficient stock. Most people, especially farmers, when ready to buy paint, want to take it home with them and do the work they planned. They do not go to the store for paint until they are ready to do the work. What happens? It is noted that there are cases where a man may need perhaps a gallon of paint and the dealer, without investigation, sells him one or two quarts, at the quart price. If he would take the trouble to find out what these buyers really needed they could usually sell them a lot more paint and more especially if they had the goods right there to hand over. Not only that they could find out a lot of other things the buyer needed when talking things over, and besides selling paint, sell him perhaps a lawn mower, garden tools and so on. We know of many dealers who do not carry even a stock of the popular colors or the trimming colors."

Might Sell Cheaper

"Another point where they lose out," this manufacturer stated, "is in always quoting a man on the highest priced paint, forgetting all about the medium grades. Many people plan to spend just so much money on painting. When they ask the dealer how much paint is, he tells them so much a gallon, quoting nearly always the highest price. He very often omits asking them what work they intend to do, or tries to figure up how much paint they want. It may be a medium priced paint, which will cost them perhaps half what the higher grade costs, that is wanted. The result is that in many cases the man puts off his painting altogether, or goes home and looks up the prices in the mail order catalogue, if he has not already done so. The mail order house features the medium quality paint, and by quoting in large lots shows a price that makes the dealer's figures seem high in comparison. As a matter of fact the hardwareman can make just as good, perhaps even a better price in some instances on the medium quality paint, if he would only suggest its use.

Has Both Kinds

"The mail order house quotes the high quality goods, too," this manufacturer went on, "but does not feature it. It is there if the party wants to buy it,

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, May 29.—Important features of the week are those of a stiff advance for linseed oil, some quotations being as high as $2.22 per gallon. Another stiff increase has been made on turpentine, and one of fifty cents for shellac. It is freely stated that there will be higher prices still on all three commodities. Whether there will be changes on putty and white lead are matters for future consideration, but there is surely a trend upward on basic materials in some cases. Glass prices are steadily firm and advances will come providing the importers' stocks run down soon, the manufacturers' prices being higher than they were. Mixed paints are decidedly active and the undertone steady and firm. The prospects are exceedingly good.

Oil Reaches $2.22; May Go Higher

Montreal

LINSEED OIL.—HARDWARE AND METAL'S report last week stated that linseed oil "may pass the $2 mark." This it has done, and prices are, in some cases, above $2.20, with some jobbers not quoting at all. The situation has been further aggravated by the Winnipeg strike, and quotations on flax at this writing are $4.26 per bushel. There will probably be stiff advances during the week, and it is questionable if there will be enough stock to meet requirements if improved shipment be not secured.

Raw	Imp. Gal.
1 to 4 barrels	$2 10 $2 22
5 to 9 barrels	2 09 2 21
10 to 25 barrels	2 08 2 20
Boiled—	Imp. Gal.
1 to 4 barrels	$2 12½ $2 25
5 to 9 barrels	2 11½ 2 24
10 to 25 barrels	2 10½ 2 23

Will Putty Hold With Oil Soaring?

Montreal

PUTTY.—While there has been no feeling in the trade of late that putty prices would immediately change to higher basis, it is clear that any new supplies made up with present high-cost oil will be held at firm figures. There is a steady demand of seasonable nature, and providing oil goes much higher a change may be necessary.

Standard Putty	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 35	5 10	5 45
Do., 25 lbs.	5 10	5 35	5 70
Do., 12½ lbs.	5 35	5 60	5 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Turpentine Gains 15c; May Reach $1.50

Montreal

TURPENTINE.—It is very probable, think some of the jobbers here, that turpentine will soon be selling at $1.50 per gallon. The basis this week is from $1.30 to $1.35, and every indication points to higher prices at any time. Supplies are being more heavily drawn upon, and stocks are constantly absorbed, some not being anxious to name a price. The situation is decidedly strong.

Turpentine—	Imp. Gal.
1 to 4 barrels	$1 30 $1 35
Small lots	1 37 1 42

(Packages extra.)

Very Firm Position On White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Less indication is apparent that there will be a drop in white lead prices than there has been all along. Producers of pig lead are not inclined to make any encouraging announcements in this direction, in fact the tendencies are the other way. It is apparent that there will be no downward revision for some time, unless something unusual should be brought about. Prices still remain at $15.50 per cwt. for five-ton lots, $16 for ton lots, and at $16.35 for smaller quantities.

Mixed Paint Sales Are Now Increasing

Montreal.

MIXED PAINT, SPECIALTIES.—No advances have been made for paint, but the undertone is strong. With linseed oil soaring it would not be safe to say that no changes will be contemplated, for while the manufacturer will have had some considerable stock made up he will now be grinding more paint to meet special sorting business. There is an excellent volume of trade coming forward, and this applies to paint and specialties.

Glass Very Firm; Shellac Again Up

Montreal.

GLASS, SHELLAC.—Prices are very firm on glass and the tendencies point to greater strength manifesting itself rather than to declines. Importers are still operating on stock purchased in a lower market than that obtaining to-day and this means that when the supplies are replenished, if this be necessary, that increases will come. Shellac is very strong, and another fifty cents per gallon has been added to the price on both white and orange, the former gallon basis now being $5.65 and the latter $5.15. Differentials are likewise increased in the usual relative proportion.

TORONTO

TORONTO, May 29.—Not in several years has the linseed oil market shown the strength that it has now and there is every indication that further advances are to be made in the immediate future. May flaxseed is now quoted at $4.26 and July at $4.08¾. This, in the opinion of many dealers, indicates that people are realizing that Argentine seed is not going to be available in the quantities required. With a splendid volume of business offering in linseed oil, some firms have found it necessary to withdraw quotations altogether, as they have not the supplies. An advance of five cents in prices of turpentine became effective to-day, the new quotation being $1.30.

Ten-cent Advance In Prices of Linseed Oil

Toronto.

LINSEED OIL.—Linseed oil has advanced ten cents and a further jump is expected at any time. Owing to the impossibility of getting the supplies they require, some firms have withdrawn quotations. A very strong and very firm market is looked for. Linseed oil prices have advanced no less than twenty-five cents during the month, and there is little doubt the crushers say that it is going to continue climbing. A splendid volume of business is offering. With many it is not a question of getting what they want, but of taking what they can get in the way of supplies. Many orders are being placed as far ahead as three months. Quotations are as follows:

Linseed Oil—	Raw
1 to 2 barrels, gal.	$2 15
3 to 5 barrels, gal.	2 14
10 barrels and over	2 12
	Boiled
1 to 2 barrels, gal.	$2 18
3 to 5 arrels, gal.	2 18
10 bbls. and over	2 15

Prices shown are those ruling on Thursday of

current week and subject to daily fluctuations of the market.

Steady Advance In Price of Turpentine

Toronto.

TURPENTINE.—"There will be no more cheap turpentine this year and in Canada the prices for the next sixty days will be high. This is the way in which one of the largest importers summed up the present outlook. Importers state that they cannot replace stocks they are now selling at anything even approaching former quotations. It may be interesting to note that prices in the South to-day are the highest since 1913. The highest price on record in the South reached on March 25, 1911, was only 12c above to-day's quotation, and the lowest, reached on September 14, 1896, was 63c below to-day's levels. Reports from the South state that large shipments are being made for overseas markets and that the production this year will not be more than forty per cent. of the normal. Latest Toronto quotations show an advance of from 8 to 10 cents over last week's figures with, a strong and very firm market in prospect. The figures are:

Turpentine—	Imp. Gal.	
1 barrel (barrel included)	$1 28	$1 30
2 to 5 barrels (barrel included)	1 27	1 29
5 gallon lots	1 38	1 40

New Records Made In Sales of Paint

Toronto.

MIXED PAINTS.—New sales records are being made this month in paint sales and as a result of the volume of business that has been pouring in many firms have not only been working overtime to get the orders out in good time, but they have had to take on extra help. "The buyers who did not place their orders early and adopted a holding off policy, are more than making up for it now," say the manufacturers. Repeat orders have been followed by repeat orders, and may firms state that their gallonage this season will surpass that of pre-war days. In view of the advances that are being made in prices of linseed oil and turpentine, and also considering the factor of shorter hours and increased pay manufacturers see no prospects of lower prices. On the other hand they are not looking for any advances.

Plate Glass Up; Putty May Go Higher

Toronto.

GLASS, PUTTY.—While an advance of ten per cent. has been made in plate glass following a similar increase in the United States, no changes are anticipated in window glass quotations. Business in general in window glass has been quiet, but there are indications that it is improving, and improvement is anticipated steadily as the building season gets under way. The new discounts on plate glass are not named.

While there is a firm undertone in putty, some dealers are making slightly lower quotations. The opinion seems general, however, that prices will advance as a result of the increases that have taken place in linseed oil. Quotations generally in effect are as follows, with some jobbers' prices 20c per 100 pounds below these figures:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. iron	6 15	6 40	6 55
Do., 25 lb. irons	6 40	6 65	6 80
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 45

Pure putty advance $2 per 100 lbs. over above.

White Lead in Oil Remains Unchanged

Toronto.

WHITE LEAD IN OIL.—An excellent volume of business is being handled in white lead in oil. No changes have been made in quotations, which are as follows: 5 ton lots, $15.80 per hundred pounds; one ton lots, $16.30; in smaller quantities, $16.65.

SAYS DEALER WHO CARRIES LARGEST STOCK WILL DO LARGEST BUSINESS

(Continued from page 66)

but the medium quality goods and large quantity price is quoted. Another point the mail order firm emphasizes is the satisfaction that will result from using the paint featured. Too many hardwaremen are absolutely afraid to stand behind anything they sell. They will say that the manufacturer guarantees it and that is as far as it goes. Of course there are exceptions to this and there are hardware firms that are selling paint and lots of it by going after business in the right way. They are not afraid to talk up their goods. I know one dealer who makes it a regular practice with each sale of paint to tell the customer if the goods do not give every satisfaction to return and he will adjust the matter. He does not have many returns and the customer feels better about the goods and the store to know that a guarantee of this kind is behind the paint.

"Many dealers do not realize the difference they could quote in prices if they tried to sell in barrels instead of quarts," continued this manufacturer. "It means a lot. Many customers need a barrel of paint for the work they intend doing, and if the dealer showed them that they would save perhaps $5 by buying it that way they would appreciate the suggestion and buy it. We have known cases where a man perhaps bought twenty quarts, one after another. Later they found out that if they had bought one large lot they would have effected quite a saving. Naturally, their opinion of the dealer who failed to advise them was not improved. Many dealers do not realize the force of the argument that it is cheaper to paint to-day because paint prices have not advanced anything like labor and materials. There is a big argument here for the paint seller and it gives him a real comeback when anyone talks about high prices. There is a lot of good business to be had and the man who gets it is the chap who is optimistic, and who keeps the stock to handle the trade when it comes. If he can't sell the high priced line, he sells the medium priced line, but he gets the business."

DECREASE OF LINSEED ACREAGE REPORTED IN INDIA

U. S. Consul-General James A. Smith reports from Calcutta that the second official forecast of India's winter oilseed (rape, mustard, and linseed) crop of 1918-19 indicates a decrease of 994,000 acres in the area under rape and mustard, and one of 1,091,000 acres in the area under linseed when compared with the corresponding figures for last season. The new figures are 2,939,000 acres for rape and mustard, and 1,841,000 acres for linseed. Scanty rains are said to have affected the crops in almost all the provinces, and their prospects at the date when this forecast was issued was below average. However, the irrigated crops in the Punjab and the United Provinces and the rape and mustard crops in the Northwest Frontier Province were reported to be generally good.

More Containers But Less Oil, Says Montreal Crusher

THERE has been, in the past, a great scarcity of barrels for holding linseed as well as other commercial oils.

"This scarcity came from the great use of these barrels by the Government," said Mr. McCuaig, Montreal manager of the Canada Linseed Oil Mills, Ltd. "These were extensively used for carrying fuses overseas, but this need is now past, and we are able to get a good supply of suitable barrels."

There is encouragement in this fact, and were it so with regard to the oil itself, there would be little anxiety on the part of the trade. Mr. McCuaig believes that the prospects are for somewhat of a hand-to-mouth business this year, so scarce is seed, and so high in price, but there seems to be every likelihood that sufficient oil will be available for the needs of the Canadian trade.

Outside Markets Good

"We have had large enquiry from outside for oil," said Mr. McCuaig. "Some of these enquiries are for options on rather large quantities, and those wanting supplies seem willing to pay the price."

It was further stated that the immediate future would be a busy season, and that prospects were splendid for a big outturn of oil. Orders in the hands

Does the Paint You Sell Make a Permanent Customer of Each Casual Buyer?

DOES it give such satisfaction that he will always return to you for that particular brand? Has it increased his faith in your store?

Does it cause him to look with more favor on your general line of goods which he has formerly bought from your opposition?

Remember every can of paint you sell is an advertisement for you and your store—good or bad according to the satisfaction it gives the buyer.

Paint is not a thing that can be used once and then forgotten. It stands in front of your customer's eyes day after day and month after month, and if it breaks down, chalks, scales off or fades he blames not only the brand but the store where he bought it.

Sell the best paint—it will pay you. Sell Lowe Brothers' Paint—with the quality in the can and the reputation behind it.

Lowe Brothers Paints

Have a reputation which proves a very valuable asset to every store which carries them.

They bring you that class of trade which every merchant prizes most highly—people who want the best and have the money to pay for it.

They draw to your store buyers you would not ordinarily expect to sell—people out of your territory—old customers of your competitors.

For Lowe Brothers' Paints are noted for their brilliant and permanent colors, their great spreading capacity, hiding power, easy working qualities and durability.

Write us for information about our special dealer's offer.

C. C. M. 3-Piece Crank Hanger

Standard Equipment on all

C·C·M· Bicycles

The most perfect satisfaction has been given to both riders and dealers for many years by the C.C.M. Crank Hanger.

It runs smoothly, with no "tight and loose spots." Does not easily get "out of true." Is very simple to adjust and repair. This is due to its special design which is mechanically correct, and to its sturdy strength and accurate workmanship.

This is but one of the special features which have made C.C.M. bicycles the fastest selling lines in Canada.

The "C.C.M. Family" includes these well-known name-plates:

Gendron
Columbia
Red Bird
Ivanhoe
Cleveland
Massey

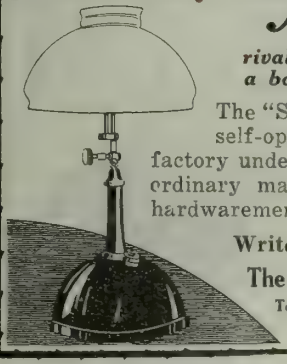
A Labor Saver

The curved lance of this O-K Spra enables you to get under the leaves without bending your back all day long.

The efficiency non-clog nozzle keeps in action longer without attention than any other type.



These worthy features of the

O-K Spra

should convince you of the wisdom of laying in a good stock of this easy seller.

RANKIN & CO., LIMITED
1535 Dundas St. W., Toronto, Ontario

They'll Sell Well and They'll Pay a Good Profit

We offer the Hardware Trade an opportunity of adding a new line on which good money may be made—our Steel Fence Posts have many evident advantages—and our list prices for them are in most localities such that they can easily be sold in competition with Cedar Posts.

Besides, we can furnish you with plenty of arguments whereby it may be shown conclusively that the Cedar Post is as much of a "back number" as a snake-fence.

There's a good dealer discount on

PRESTON Steel Posts

you can make satisfactory profit on every sale—and the sales will be easily made and numerous.

Your customers will not be able to resist these features:

1. **Easy to drive**—which means a great saving over cedar posts, in cost of installation.
2. **Never rot, break, burn or buckle** — therefore, economical as to cost of upkeep—cheapest of all posts in the long run.
3. **Lightning proof** — because the steel "grounds" the wire—therefore, safest for stock.
4. **Neat in appearance** — and never out of alignment — adding greatly to the value of property.

Write for particulars and prices; and we will explain how this can be made one of the most profitable lines in your store.

YOU cannot judge the quality of a man by his clothes nor the quality of a brush by its outward appearance, but—**just as you may measure the man unerringly by the company he keeps, so may you gauge the brush, truly, by the character of the people who sell it.**

RUBBERSET

TRADE MARK

PAINT AND VARNISH BRUSHES

meet the acid test of selection on the part of those concerns whose mere offering of any article amounts practically to giving their own bond as to its complete *worthiness* for rendering that particular service for which it is intended.

In proof of this statement, and as a most convenient and valuable guide for the use of dealers, manufacturers and other large consumers, we take pride in submitting the following directory of *jobbers* from whom RUBBERSET BRUSHES may be obtained at wholesale:

ALBERTA

Hudson's Bay Co., Edmonton.
Marshall-Wells Alberta Co., Ltd., Edmonton

We Are Making Prompt Shipment of

Seasonable Goods

The demand for all lines of hardware has been very much greater than most dealers anticipated, and stocks of seasonable goods are very much depleted. Prompt shipments on sorting orders are essential. Fortunately we have purchased freely and are in a position to handle rush orders for all lines of seasonable hardware.

LAWN MOWERS

We have a nice assortment of "Taylor-Forbes" and "Brockville" Lawn Mowers, including Empress, Woodyatt, Star, Daisy, "BB," "C", "K", also Townsend's "Victory" Mowers.

GARDEN TOOLS

"Maple Leaf" Garden Tools are well known for their high quality and are strictly guaranteed to give complete satisfaction. Our assortment is complete.

SCREEN DOORS, WINDOWS and REFRIGERATORS

These lines have already been in great demand and there is sure to be a shortage. At the present we are in a position to ship orders promptly.

SPORTING GOODS

The return of Peace conditions has completely swamped the factories with this business. We have a fairly good stock of "REACH" Base Ball Goods suitable for Town League Clubs, and are in constant touch with the factory for further supplies.

AUTOMOBILE ACCESSORIES

If you have not already received a copy of our Accessory Catalogue we will be pleased to send one on request.

MAIL ORDERS

OUR MAIL ORDER DEPARTMENT is at your service for sorting business. Your orders, large or small, will receive careful attention.

Stephens' Stephens' Stephens' Stephens' Stephens' Stephens' Stephens' Stephens' Stephens' Stephens'

Is Your Paint Business Going Forward —Or *Backward?*

Unless your paint business is built upon a rock, sooner or later your trade is going to be swept away by a competitor whose paint business **is** built upon a rock—the rock of good judgment in selecting the right line.

Year after year, Stephens' sales increase in volume —each succeeding year means a greater Paint turnover than ever before. **And we always knew it would.**

From the good-will begun the first day Stephens' Paints were manufactured we anticipated our present great volume of trade, because we have always given our customer—your customer—dollar for dollar value.

Stephens
REGISTERED TRADE MARK

Let us explain the Stephens proposition and tell you what it is doing for other dealers.

Distributors Wanted

If you have a business to dispose of, or are in need of efficient help, try a Want Ad. in Hardware and Metal, and let it assist you in filling your needs.

The Imperial Gasolene Iron

Has given absolute satisfaction in Western Canada for the past ten years. Easy to operate, economical, a real labor-saver that is indispensable during hot weather. Handy for travellers, and the ideal iron in homes without electric current. Absolutely guaranteed.

The Fansteel Electric Iron

A handsome appearing efficient iron having a peculiar element which utilizes every atom of heat generated. The Nichrome Ribbon is embedded in a cement-like base which is not an obstruction to electricity as is mica or porcelain.
This is a vigorous seller and satisfactory wherever used.

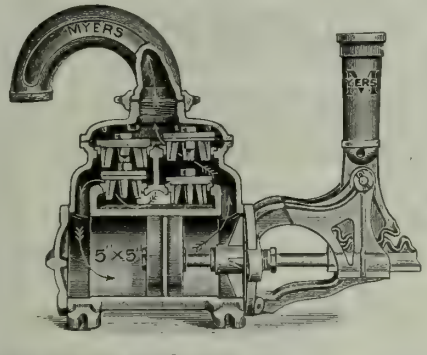
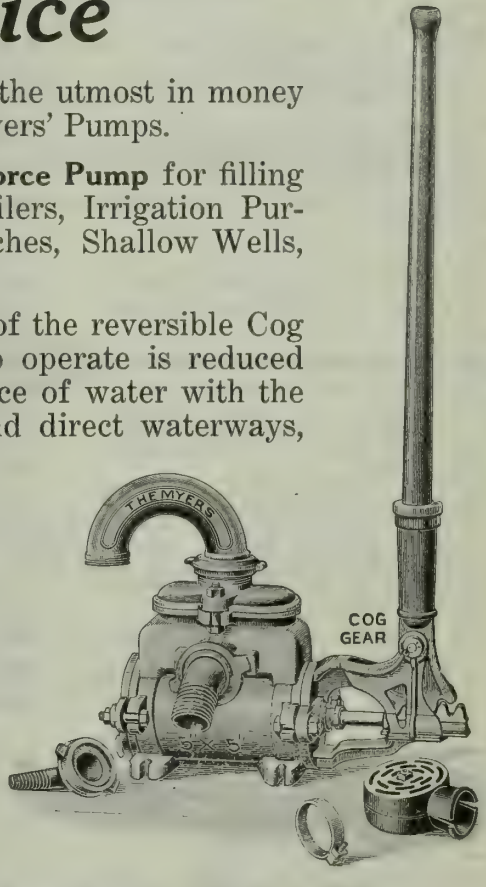
DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

MYERS' PUMPS



for Service



To the careful buyer out to obtain the utmost in money value you can safely recommend Myers' Pumps.

Myers' Cog Gear Double Acting Force Pump for filling Thresher Tanks, Washing Out Boilers, Irrigation Purposes, Pumping Water from Trenches, Shallow Wells, Cellars, Barnyards, etc.

An easy working pump, by means of the reversible Cog Gear Head, the power required to operate is reduced one-third. Will throw an abundance of water with the least of pumping labor. Large and direct waterways, ample Valve Capacity, compact and extra strong, etc., etc.

MYERS' Deep and Shallow Well Pumps

—have solved the Well Pump problem. The correct principles embodied in these pumps are productive of maximum service at minimum cost. Their adaptability to meet all well conditions demanded of a good pump is indicative of extraordnary efficiency.

Made with Cog Gear, Ratchet Handle and double acting; Anti-Freezing; with new adjustable base and Union Spout; Brass Lined Lower Cylinder, Tapped on out-side, Brass Upper Cylinder; Patented Glass Valve and Rubber Gaskets.

Write for complete information and prices of Myers' Pumps.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

CARTER'S

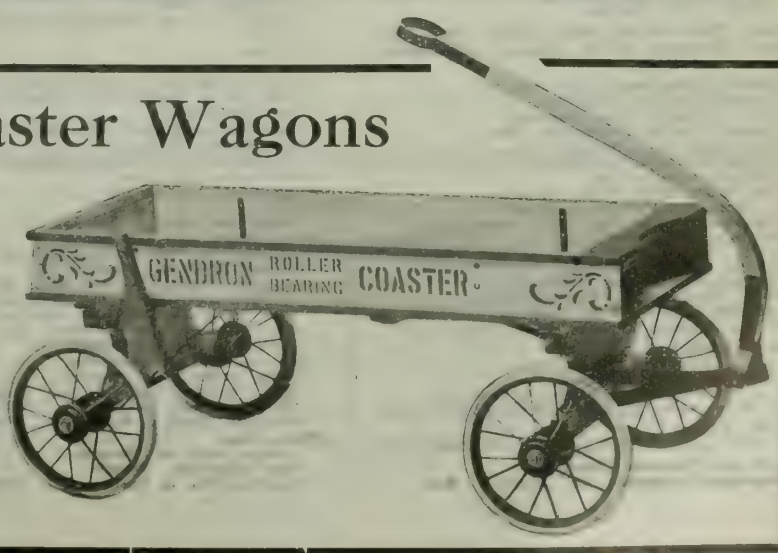
Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.



The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Roller Bearing Coaster Wagons

FOR BOYS AND GIRLS

Our new and exclusive line of Coaster Wagons will prove a profitable line for summer sales. Right now is the time to stock up. Be prepared for the new business that is just ahead. Furnished in either Iron or Rubber Tires.

These wagons are extra well made, handle design registered and absolutely reliable. A postal will bring you prices and complete information. Write us.

"Save the surface and you save all" *Paint & Varnish*

They've Got the Habit!

THE public have learned the lesson we have striven for years to spread. Paint and varnish does more than beautify, it preserves.

Now you will find that your customers have got the S-W Paint and Varnish habit.

It is up to you to profit by this. There is the trade. Get it for yourself.

The quality necessitated for better varnish is embodied in every varnish of the S-W line—

S-W Varnish Stains
Rich tones in hardwood imitations for furniture and woodwork.

Scar-Not
for inside furniture and woodwork—Water, hot or cold, does it no harm.

Rexpar
for outside woodwork, doors, etc. Waterproof—weatherproof. Great durability.

Mar-Not
for hardwood floors—tough and lasting, rubs to dull finish—proof against wear and tear.

Floorlac
an excellent finish for floors, popular hardwood shades.

S-W Paints and Varnishes

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly: packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TENTS — CANOES — PADDLES — PACK SACKS — CUSHIONS

These lines find ready sale through the hardware trade. Your stock need not be large—just a few standard size tents—as we carry a large, well assorted stock for prompt shipment. Canoes and paddles of all kinds can be supplied, but should be ordered as far ahead as possible to ensure delivery when required. Various kinds of canoe cushions as well as launch cushions made to order. Can be supplied on short notice. Pack Sacks of every kind and style. Send for catalogue.

WHY NOT ALLOW YOUR STAFF THE PRIVILEGE OF INCREASING YOUR SALES?

Making change takes time that might be used to better advantage in the selling of more good. And, too, it diverts the salesmen's mind from his real business. We have a cash carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps. They should not be forgotten.

Write for our four-page leaflet which tells how to obtain a double check on sales, and allow your salesmen in a greater degree, to display their selling ability.

All kinds of Cash and Parcel Carriers.

GIPE-HAZARD STORE SERVICE CO., LTD.,

GLUE

IN PACKAGES

Put up in the way that best appeals to the people—that's "Brantford" GLUE

It's an all 'round glue and makes good profits for dealers.
In ¼, ½ and 1 lb. packages at your jobbers

CANADA GLUE CO., Limited, Brantford, Ont.

"Maple Leaf" Belting

IN THE MACHINE SHOP, "Maple Leaf" belting is invaluable in the machine shop where belting is put to severe tests. Its strong construction of stitched cotton duck makes it a superior belting.

There is a good margin of profit in handling it. "Maple Leaf" Brand Belt Dressing gives longer life and more satisfactory service to all makes of beltings.

Why Did We Let Trotzky Go?

THERE was a time when Canada had it in her power to end the war. In the early days of the Russian Revolution a bushy-haired German was taken off a boat at Halifax and interned at Amherst, N.S. He pretended to be a Russian but was known to be in German pay—on his way to push the revolution—British and American Intelligence Officers so informed our authorities. But pressure was brought to bear and the man was finally released. He got to Europe and became the most sinister figure among the Bolsheviki. Largely as a result of his work, Russia dropped out of the war and Germany was able to fight on for eighteen months. That man was Leon Trotzky. His real name was Braunstein.

Why was Trotzky allowed to leave Canada?

Colonel MacLean discusses this question in the June issue of MACLEAN'S MAGAZINE. He tells the story of Trotzky's activities, of his arrest and subsequent release in full detail, tracing the threads of a strange intrigue from Germany to Washington, and Washington to Ottawa. It is a gripping story, the most important inside story of the war.

Other National Features of This Issue

"Victory Stuff" By Robert W. Service.

"Solving the Problem of the Arctic" By Vilhjalmur Stefansson.

"The Gold Wolf" By W. A. Fraser.

"Hobson's Hard Start" By William Byron.

"The Menace in the South" By Agnes C. Laut.

"The Undercurrents" By J. K. Munro.

And a score of other interesting articles.

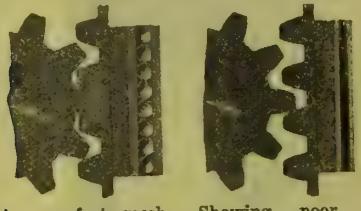
WOOD'S EVERLOC TIRE PATCH



Quick-Selling Automotive Equipment

There are on the Canadian roads to-day over 225,000 cars aside from motor trucks and other motor driven vehicles of a commercial character. Think then of the tremendous selling possibilities there are in store for the wide-awake dealer who features the well-balanced Hyslop line.
The Hyslop line comprises the largest and most complete assortment of automotive equipment, accessories and supplies ever offered to dealers. It is a line that insures attractive profits and quick turnovers. Below are a few of the thousands of items listed in our new 208-page catalogue.

Kelsey Ball Thrust Bearing for Chevrolet "490" Models

Rear axle difficulty rests chiefly with the flat thrust washers installed at left (gear) side of Chevrolet 490 differentials. These washers are for the purpose of keeping the teeth of the pinion gear and the drive gear in proper mesh.

Showing perfect mesh of gears with the Kelsey Ball Thrust.

Showing poor mesh with the regular washers.

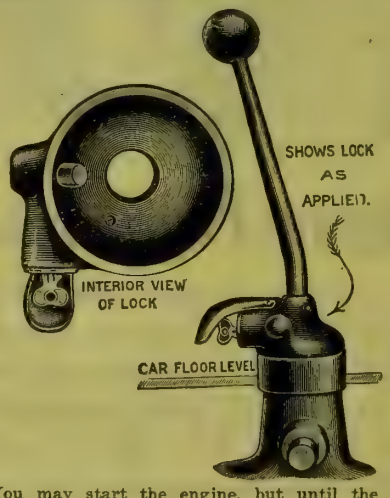
THE REMEDY for Rear Axle Trouble
The KELSEY BALL THRUST BEARING will not wear and so will keep gears in proper mesh, make them run smoothly and last indefinitely.
Carry this bearing in hand—be prepared to fill the need at a moment's notice.
No. 4324—**Price** **$4.50**

Holton Hood Clips for Chevrolet and Briscoe Cars

You save a great deal of time and trouble by having HOLTON HOOD CLIPS on your hood every time it is lifted or closed. This is a spring clip and can be installed in one minute without the use of tools by removing thumb screws at present on Chevrolet and Briscoe cars and attaching the HOLTON CLIP to same bolt at present in use. It will NEVER SLIP OR RATTLE and enables the hood to be opened and closed in one second.
No. 4326—**Price**, per set of four, black enamel finish **$2.40**
No. 4327—**Price**, per set of four, nickel plated **2.75**

Ideal Front Splash Pan Fenders

for 1917-18-19 Fords



This front Splash Pan Fender is all that its name implies—ideal equipment for Ford Cars. It covers the rough spots of your Car and protects the springs from being splashed. Your lamps, too, are kept clean and free from mud, making night travelling safe.

Made from 22 Gauge Iron, wired edge all around, extends to side fenders and so constructed that it is easily put on, besides it gives a neat and up-to-date appearance to the Car. Extra supports are furnished, going on to lamp brackets, which makes it firm and eliminates all rattle. The Ideal Splash Pan Fenders will fit 1917-1918-1919 Cars.

No. 4672—**Price, per set, complete $4.25**

McCoy Transmission Auto Lock

You may start the engine, but until the key is replaced in lock and gears released it is impossible to operate the gear shift lever when the car is equipped with the McCoy Transmission Auto Lock.
Simply removing the key—locks the car.
Key cannot be removed from the lock without automatically locking the car. Your key remains in the lock all the time the car is in operation, does not in any way interfere with its proper working, cause undue wear on transmission, and cannot fall or drop out.
This is not an ignition lock, but a TRANSMISSION lock.
For almost any car with centre transmission control. **Price** **$10.00**

The Chapman Roller Bearing Assembly for Front Wheels of Chevrolet "490" Models

No. 4325

Showing bearings disassembled on spindle

The bearings of the front wheels have the hardest service to perform, the strain of running over rough roads, getting into deep ruts and car tracks, dropping into holes, going over bumps and the continual side thrust of the steering.
The old style cone, cup and loose ball construction is unsatisfactory at its best. The various parts require constant adjustments and frequent replacements.
Chapman Roller Bearings will make the car run easier, keep front wheels properly adjusted and cause the car to steer better. They are made from the highest grade bearing steel and will withstand the most rough usage to which they can be subjected.
Anyone with the aid of a wrench can remove the cone and cup bearings from the front wheels and replace them with the Chapman Roller Bearings without any mechanical changes.
No. 4325—**Price**, per set complete for both front wheels **$15.00**

Making Motoring Popular---Keeping It Economical and Safe

1919 finds Dunlop Traction Tread—Cord and Fabric—out to surpass all quality records.

In 1918 more new friends were made—more "Tractions" were sold than in any other year.

Our own men, motoring in the various portions of Canada on their daily duties, had an excellent opportunity to see countless "Tractions" in service. They saw them on big city streets, in the quiet of the country, over the even, carefully-graded expanses of highways, and on the hilly going of the mountainous districts; but the important point is that they saw them delivering service of a new order—the kind of service that has no "backfire," no "added entries" of cost to the Tire Bankbook.

With "Tractions" now obtainable in Cord, as well as in Fabric Construction—with each part of the tire made sturdier than ever before, with countless car owners saying "'Tractions' Deserve Well Because They Serve Well"—the logical choice for tire equipment is the "Master of the Road."

The "Two Hands" Line consists of: Dunlop Cord—"Traction" and "Ribbed;" Dunlop Fabric—"Traction," "Special," "Ribbed," "Clipper," "Plain." Dunlop "Clipper" and Dunlop "Ribbed" (Fabric)—both anti-skids—sell at the price of "Plains," a remarkable opportunity.

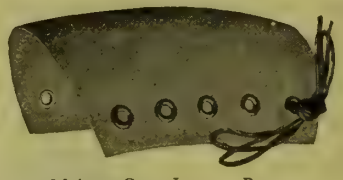
Tires for All Purposes --- General Rubber Specialties

T 150

Maltese Cross Cementless Patches



Dealer's Success Only Built on Satisfaction

Everybody who handles rubber goods knows how rigidly we cling to the High Ideals of Quality. Maltese Cross Accessories are known all over Canada, both in the trade and by the consumer. They have exceptional quality for the purpose intended. There are no misfits in Maltese Cross Accessories.

Maltese Cross Blowout Patch

Maltese Cross Tires and Accessories possess the quality that brings repeat orders, and that will increase your profits, by increasing your trade.

Maltese Cross Lace-on Boot

The Maltese Cross is a guarantee which everyone recognizes for the mark of merit.

Maltese Cross Pedal Rubber

The successful accessory man is the one who is selling goods that give satisfaction at all times. You know the motorist blames you for a breakdown or delay which mars his joy-ride. These disappointments will result in his purchasing his accessories elsewhere. You make friends every time you sell the dependable, reliable Maltese Cross Products.

Maltese Cross Tube

Gutta Percha and Rubber Limited

Head Offices and Factory : TORONTO

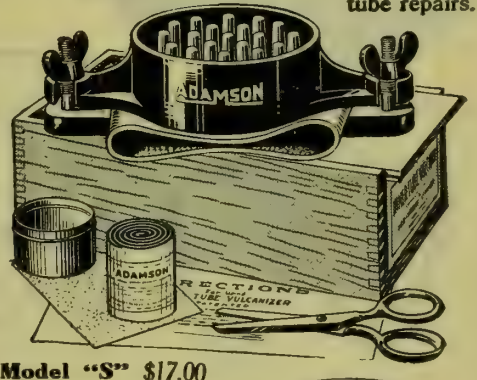
Make Economy Pay YOU Profit!

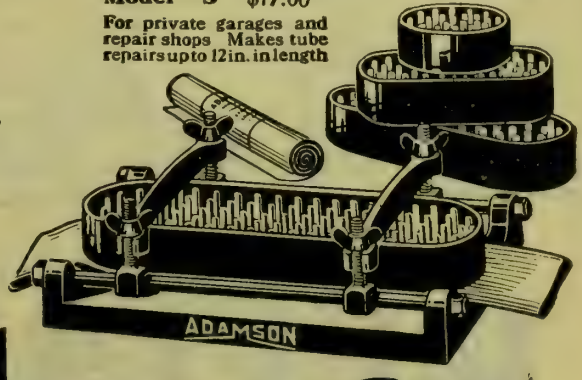
Model "U"
$3.50
Repairs tubes and casings; mends tread cuts and saves the tires.

Model "E" $1.50
Repairs tube punctures in five minutes Uses Adamson Dry Fuel or gasoline.



Model "T"
$2.50
For all inner tube repairs.

Every motorist is seeking a way to make his casings and tubes last longer, and protect himself against the rising costs and threatened shortage of new tires.



Adamsons best meet this increasing demand because they not only mend *tubes,* but vulcanize cuts and abrasions in the *casings,* and keep moisture and dirt from getting into the fabric and destroying the tire. That means thousands of miles more tire service at the cost of a few cents.

Profit by this opportunity. Display and sell the Adamson line—a vulcanizer for every repair a motorist can make; surest in results and cheapest to buy and use; all models burn common gasoline, the fuel that is always dependable and easy to get.

Write for Store Displays and Dealer Helps.

Model "S" $17.00
For private garages and repair shops Makes tube repairs up to 12 in. in length

ADAMSON MFG. COMPANY

Hamilton, Canada

GASTINE REDUCES THE COST OF GASOLINE BY 30%

Gastine increases the efficiency of gasoline—gives more power, also removes and prevents the formation of carbon.

Gastine is mixed directly with the fuel and can be used with every kind of gasoline or kerosene engine. The tablets are placed in the tank one to each gallon of fuel. Being soluble, they quickly dissolve and cannot in any way stop or clog the feed pipe. Gastine is guaranteed non-injurious (tested by Milton Hersey & Co., Ltd.). It is equally effective in use with

AUTOMOBILES, TRACTORS, STATIONARY ENGINES, MOTORCYCLES, MOTOR TRUCKS AND MOTOR BOATS

Gastine is guaranteed to meet every claim made for it and is being used with complete success throughout the civilized world.

We want agents throughout Canada. Sample package mailed postpaid on receipt of $1.25. Try it out yourself; you will then sell it.

WINDSOR, ONT.

Razor Selling Talk

Use just the right selling talk and you sell something—quickly, at a good, round profit.

Here is something to say in your selling talk about GENCO Razors, something right to the point:

GENCO Razors have professional blades of the type all barbers use. They are hollow ground with a slight supporting bevel just behind the edge. That bevel completes a blade lying against the strop at just the correct angle to get back its edge certainly and quickly. Anybody can strop a GENCO Razor, renewing its perfect shaving edge again and again for a lifetime. (The Safege has that same professional blade with a guard that merely has to be flipped back to strop it).

Have our handsome display cabinet on your counter (free with your first order). Use this real selling talk. Watch your razor profits jump.

Oatmeal In The Radiator

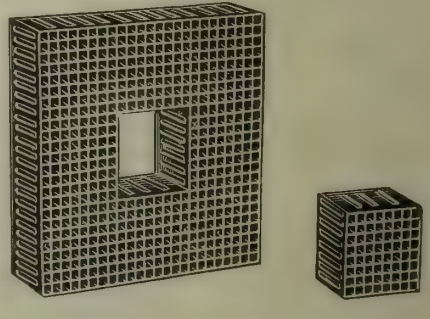
is an old-fashioned method of trying to stop leaks. It only works once in a long while, and then by mere chance.

What your customers really want is a radiator that DOES NOT leak at the slightest opportunity. Or, if it does, through some unforeseen circumstances, can be repaired at very short notice.

Engineers have decreed that Cellular Radiators are the best because they do not leak easily. But there is a difference between cellular radiators (some are, and some are not) but,

McKINNON RADIATORS

Are



"Really Cellular"

They are simply a combination of individual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core, the very method that hardens the metal and makes it crack so easily.

Corrosion is also one of the evil influences of water on the radiator. We overcome this by carefully tinning the inside and outside of McKinnon Radiators. The sides are straight downward and corrugated so that the water is constantly in agitated action carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water tubes are also constructed to permit of an outward strain many times before a burst will take place.

McKinnon Radiators do not leak unless they are forced to. But should this happen, the motorist would just plug up the leaking section with tire dough, or wood plugs, refill the radiator and drive on. Later, the repair man would simply replace the broken section with the new cells.

Vibration has no terrors for the McKinnon Radiator —because it is a solid unit, not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry. We invite correspondence.

Stores using a complete N. C. R. System can give the public good service

WHEN a customer goes into a store and sees an up-to-date National Cash Register on the counter, he knows at once that he is going to get quick, accurate service.

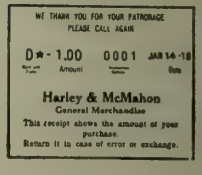
If the proprietor of that store is asked why he uses a National Cash Register he will reply that it is a labor-saving device that helps him just the same as labor-saving machinery helps the manufacturer, railroad man, farmer, and mechanic.

When a customer makes a purchase in a store using an up-to-date National, he can not help but notice how quickly the clerks hand out parcel and change. He notices how careful they are—the smart, modern appearance of the store—the good service and prompt attention that he gets.

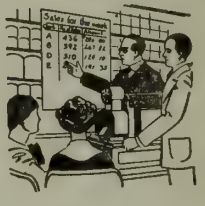
Customers are also quick to notice the good values that such stores are able to offer; the accurate printed cash register figures; the freedom from disputes; the absence of errors.

Without a cash register

Keeping store records by hand is as out of date as traveling by stage or fighting with bows and arrows.



With a modern National



The most progressive stores all over the world are using and endorsing National Cash Registers.

Machine-made records

National Cash Register records are printed and accurate. They protect merchant, clerk, and customer.

Careful, accurate clerks

An up-to-date N. C. R. System is a powerful force in training clerks to be careful, accurate and quick.

N. C. R. quick service

Cash register service is the fastest in the world. It makes shopping quick, pleasant, and convenient.

A modern N. C. R. System is a business necessity because it does so much to increase business and reduce expenses

UNIVERSAL ELECTRIC IRONS

TAKE THE WORK OUT OF IRONING DAY

A sturdy, dependable Electric Iron built of the finest materials and designed to stand up under hardest service.

Terminal troubles are practically eliminated by our patented seven point connecting sleeves.

An unusual heat storage capacity is provided by our extra heavy sole plate and large heating unit, making it unnecessary for the user to "wait for the Iron to heat up."

Full nickel finish, reversible heat proof stand equipped with 6 foot heater cord and attachment plug. UINVERSAL Irons give quick turnovers and good profits to the dealer.

UNIVERSAL ELECTRICAL HOME NEEDS

SAVE TIME — SAVE FUEL — SAVE WORK

UNIVERSAL Electric Home Needs comprise a wide variety of electrical cooking and heating appliances, each one of which has been designed to fill a distinct need in the home.

Each UNIVERSAL Coffee Urn, Percolator, Chafer or other liquid heater is equipped with our patented safety Fuse Plug (as simple in operation as the fuse which protects the lighting circuit in your home) preventing injury to the vessel should the contents boil dry with the current on.

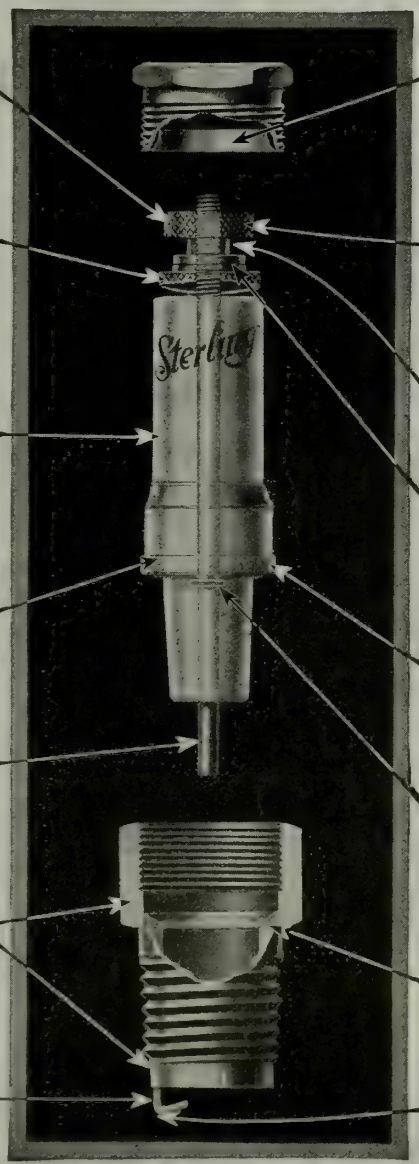
Sterling Spark Plugs

To many, a spark plug is **just** a spark plug. But mechanically, it is a mighty interesting and important part of an automobile. While it operates on the same principle as a lightning rod, it carries its miniature strokes of lightning—sometimes thousands a minute—into the engine instead of the earth.

Because the terminal nut is perfectly knurled, or roughened, it may be tightened with the fingers. Pliers often cause breakage.

This core nut keeps the centre electrode tight at the shoulder below, preventing leakage. The little disc spring here takes up the expansion by heat.



The Sterling core is big to defeat easy breakage, by heat or accidental shocks. Being large, it presents an unusually large insulating surface inside the explosion chamber.

The under side of the core shoulder gives a level seat in the shell. The conical fit of the gland nut further prevents leaning.

Monel Metal forms the entire length of the electrode. It is non-corrosive and heat-proof.

Sterling shells fit standard socket wrenches. The lower threads are turned off to make easier starting the plug into the cylinder.

This side electrode, which carries the current past the spark gap into the "ground" is cold swedged into the shell, proof against turning sidewise.

A copper ferrule inside this gland nut makes possible a snug fit when the core is locked in place, and conducts heat rapidly to the cylinder jacket.

Sterling Special ⅞-18 Plugs for Buick and Chevrolet cars have an exclusive Sterling Design terminal nut, so fashioned as to serve for either car by simply reversing.

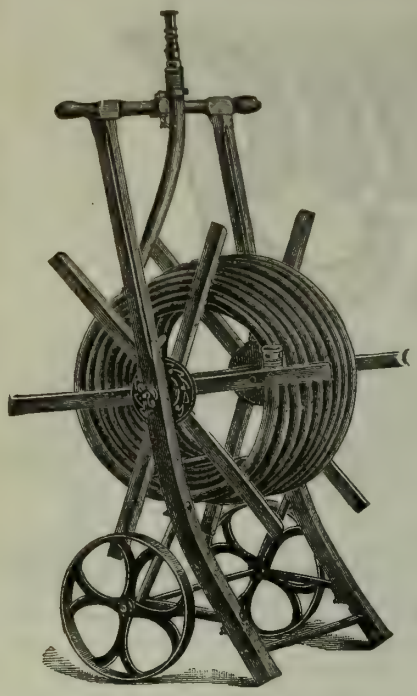
This narrow neck portion of the nut is designed for the ordinary spring clip terminal.

Here the contact is flat, insuring tight terminals and better electrical contact.

Here is the effective preventive against leakage in Sterling Plugs. This pliant asbestos washer is sandwiched between copper as shown in section through the cut-out shell below.

This little shoulder is an integral part of the electrode. It is cemented against the core, making it leak-proof.

This asbestos washer is heat-proof and leak-proof. The copper helps conduct the excess heat to the cylinder jacket.



Excess cylinder oil drips from here —the lowest point—thus keeping the spark gap free from shorting.

PLYMOUTH ROPE

is like pure Gold--- one quality only

Many dealers are in the habit of specifying for 100% pure Manila Rope, thus thinking to obtain the best that is made.

As a matter of fact there are hundreds of marks and grades of Manila fiber covering a wide range in quality and in price. Therefore, pure Manila rope is not necessarily high-grade rope, even though it may be made from all-Manila fiber.

The term "Pure Manila" does not indicate any particular standard of rope quality, and the buyer's only safeguard is his dependence upon the reputation of the manufacturer.

PLYMOUTH ROPE

"The Rope You Can Trust"

is everywhere known as the highest quality obtainable — like pure gold—one quality only—always the same.

Selling Your Customers What They Want

SUCCESSFUL merchandising is studying your customers' needs—selling them the lines which best meet those needs. "Study your customers and your business grows."

The biggest selling point in any line to-day is **value.** The time when price was the first consideration is past.

The public has signified by the purchase of many millions of pairs that it believes Neōlin Soles to be better value. In the same manner Neōlin Half-Soles offer them better value in half-soling materials.

For Neōlin Half-Soles have Neōlin's qualities. They are harder wearing —flexible—retain all the comfort of the old shoes.

The bigger value of Neōlin Half Soles has been extensively advertised. You can benefit from this by displaying Neōlin Half Soles on your counter — putting in a window display. It will mark you as a sincere merchant—one who offers his customers better-value goods.

Neōlin Half Soles come in a handsome display carton of assorted sizes. Order from your wholesaler.

To be sure of getting Neōlin's value—see that the word "Neōlin" is stamped on every pair.

Check Crooks May Rob You

$10.00

If your Jobber cannot supply you, write us.

Don't suppose because you have never had one of your checks raised, you never will.

YOU DON'T KNOW into whose hands your check passes before it is cashed.

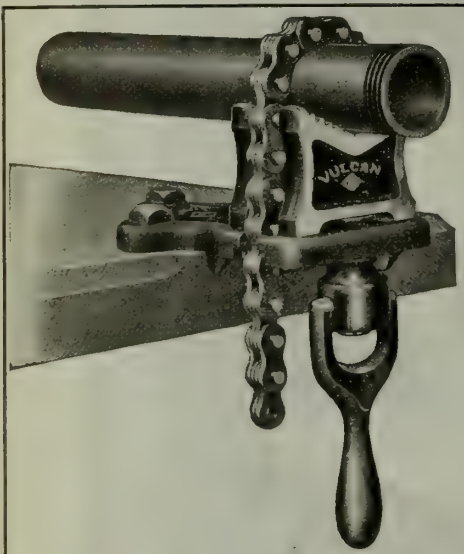
Over $20,000,000 was lost to check crooks last year through small **unprotected** checks.

What safeguard are YOU using? What evidence can you show if the bank cashes a check raised by some crook and lays the responsibility on you?

The jobbers are co-operating to keep the check crooks away from the hardware business. They have arranged to secure a supply of Dimunette Check Protectors.

This simple, sturdy device is made by the **oldest** concern of its kind in the world. It gives "standard protection" — that is, it shreds the paper and impregnates it with acid-proof ink—in one simple operation.

It defies the skill of any check crook—it has **never failed.**



Isn't it worth $10.00 to have the absolute surety, the peace of mind the Dimunette brings?

Williams' "Vulcan" Chain Pipe Vise

THIS Vise is, perhaps, one of the most remarkable of our products. It is the result of many years of careful study and comparison of many pipe vises—their advantages and weaknesses.

Williams' "Vulcan" Chain Pipe Vise is the **only** pipe vise made wholly of wrought steel and is stronger, lighter and more compact than the old style, conventional cast tool it is rapidly superseding. It embodies all the desirable qualities of a really superior pipe vise for it is unbreakable and combines positive grip, powerful action and rapid adjustment with ease of attachment anywhere.

Three sizes—⅛ to 8-inch pipe. Descriptive booklet free.

"EASY"

—all that its name implies

Its Name Sells It!

"EASY" Electric Washer

Easy to Operate. You cannot make a mistake in attaching it to the socket or receptacle, place the clothes into the tub with water and soap and then pull the lever and your washing has started. Ten minutes later, reverse the lever, remove the cover, and your clothes are ready to be wrung.

Easy to Wring

You place the clothes in the wringer, and by the use of the lever the wringer can immediately start, stop or reverse. When you have finished your wringing, the machine is ready for the next batch of clothes.

Easy to Clean

There are no corners where dirt would gather, and the inner surface is as smooth as glass. A discharge valve is placed in the bottom of the tub so as the water can be drained and rinsed through without difficulty.

Easy to Understand

The two arms which are inside the tub are equipped with vacuum cups, which force the soapy water through the clothes, thus bringing the dirt out without the wear and tear that happens when you used the old-fashioned wash board. The motor which operates the washer is ⅛ H.P., and is protected from an overload by being belt-connected to the washer. The wringer is connected to the motor, and wash-day is a pleasure to a housewife with an "Easy" Electric Washer.

Easy to Sell

The neat appearance, the smooth running, and the above-mentioned points make the "Easy" Electric Washer the best proposition on the market to sell.

Write our nearest house for attractive proposition, descriptive literature, etc.

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative, in the long run.

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

With the addition of our two newest and greatest models, the "1900" line is complete.

The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the wholesale department.

The "1900" Agitator Electric Washer

Of Course You Want *All* the Profits in Your Gasoline Sales

This Gilbert & Barker T-235 Five-Gallon Quick-return pump in front of your store attracts customers day and night.

Painted in a brilliant red, baked on, it acts as an eloquent salesman pointing out your establishment for blocks away.

It is quick, accurate, efficient. Only 20 seconds are required for discharging five gallons under normal operation.

One and three gallons may be measured by means of quantity stops which are securely fastened, and cannot slip and give over-measure.

Discharge is made from overhead through a ten-foot length of one-inch metallic hose. The filter automatically separates all the water or foreign matter from the gasoline.

THE SAVING WITH THIS UP-TO-DATE G. & B. PUMP IS SO POSITIVE THAT IT SOON PAYS FOR ITSELF.

Our Bulletin 52 will bring full particulars.

BRANCHES ALL CITIES

A Profitable Line

The demand for Brantford Roofing is growing rapidly because it fills a need for a fire-resistant, durable roofing at a reasonable cost.

Progressive hardware dealers who handle

Brantford Asphalt Roofing

and our other lines can fill every roofing requirement in their localities.

For sloping roofs—for flat roofs—for barns, freight sheds, factories, stores, banks, public buildings, homes, garages and all styles of buildings—there are suitable lines of Brantford Roofing.

The Brantford line is the most complete line of roofing in Canada. It is made of *first quality* materials by a purely Canadian company that thoroughly understands conditions in all sections of the Dominion. It is nationally advertised to the consumer.

Write for samples, prices and information.

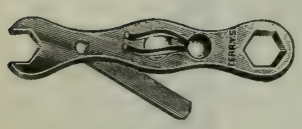
Branches at Toronto, Montreal, Halifax, Winnipeg

Terry's Patent Steel Spring Exercisers are of splendid wearing quality. Made from a high grade steel; they are good for years of service.

Each set packed in cardboard box, with illustrated chart of exercises.



We have a good standard range of display clips. Of proved value to the shop window or display dresser.

568—Handsome oak and plate glass counter case. Contains about 5 gross well assorted high grade springs. Size 22" x 13".

We also supply a good range of assorted boxes of springs, washers, hoseclips, cottars, pins, etc., split and taper.

603—Magneto Spanner Oxydized.

Our range of double-ended and folding spanners are worthy of your investigation.

TERRY'S

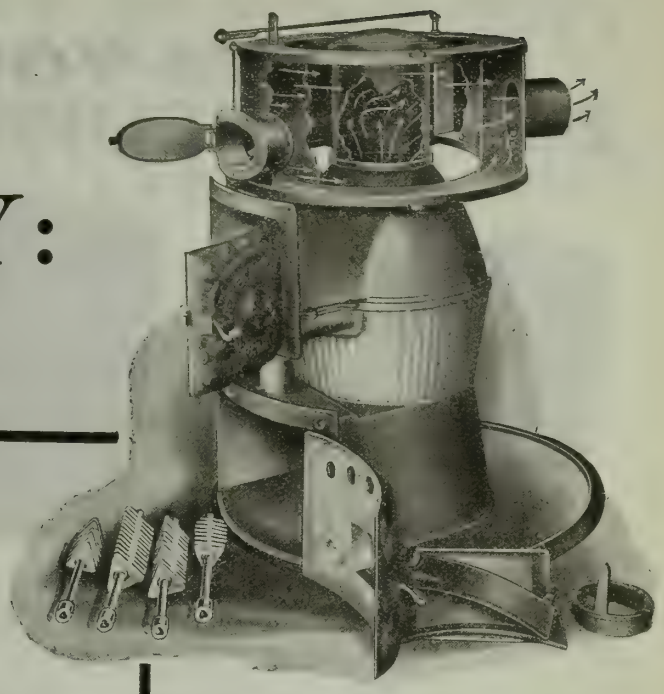
Representative is in Canada with range of Samples

WE are a thoroughly British firm with a 63 years reputation for honest straight dealing and excellent quality. Our MR. ERNEST CLARKE has planned to visit every city of note. You will be notified of his visit thro the local press and interviews will be arranged by appointment.

We trust you will make his visit successful and pleasant.

HERBERT TERRY & SONS, LTD.

Manufacturers



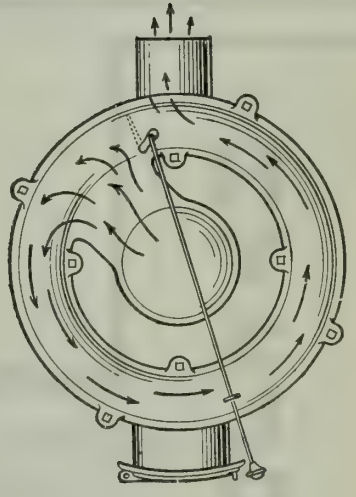
REDDITCH, ENG.

Established 1855

Our slogan is "a washer for every want," and an invitation is given to all who are interested to ask for prices and samples.

SUPERIORITY:

SUPERIORITY IS EASY TO CLAIM, BUT SOMETIMES HARD TO PROVE.



The fact that more homes in the City of Toronto are heated by the **Gurney-Oxford** Systems than any other **two** makes combined, substantiates our claim that the **Gurney-Oxford** Warm Air and Hot Water Systems are second to none.

For three-quarters of a century the **Gurney-Oxford Heating** Systems have been recognized leaders in the heating world. In all these years we have been building up to the standard we set, and never lowering our reputation by building down to a price. The result has been that we have gained the absolute confidence of the public and our oval trade mark on any heating or cooking appliance to-day stands for superiority.

We have illustrated here a **Gurney-Oxford** Furnace, showing the "one-way fire travel." Write us and we will be pleased to mail catalogue and explain our agency terms.

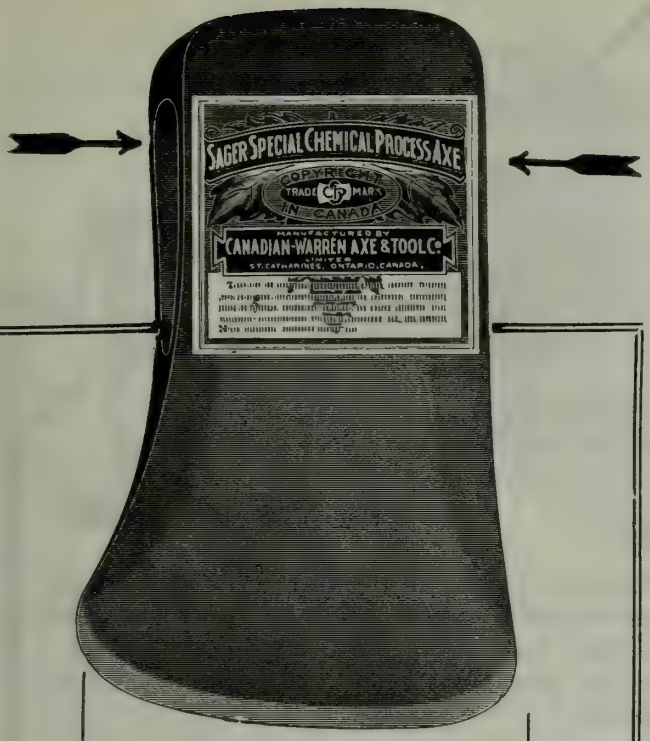
REGISTERED 1896

When a business engaged in building bicycles can withstand the forces of competition for 30 years and come out on top, then it is safe to assume that the product is worthy—that it has kept abreast of the times—and that it won public approval.

That is the reason why thousands of riders can be seen daily riding Hyslop's and proclaiming to their friends their all-round goodness and efficiency.

That's the line dealers should sell—one that is demanded by riders of every class.

You have the choice of 8 models of different styles and colors, that will enable you to supply every demand, broaden your selling scope and cash in on the greatest number of sales.



A generous display of Hyslop Bicycles will work wonders. They sell as Easily as They Ride.

PLEASING CUSTOMERS

is simply a matter of giving them what they ask for.

When buying files customers invariably ask for one or other of the "Famous Five" line.

If you carry stock, you can't help but make sales.

The only thing you need remember is to specify "Famous Five" files when ordering.

They are:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

NICHOLSON FILE CO
PORT HOPE
ONTARIO

Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible—their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.

The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They se themselves and stay sold! No come-backs or complaints.

This means easy net profits for you.

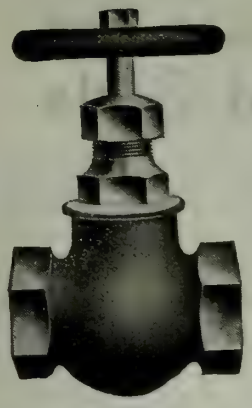
4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:



BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Here's the strongest Ratchet Drill made

Bridge builders, ship builders, boiler makers, and all who ask constant heavy service from Ratchet Drills are proving the "Monarch" Square Sleeve Single Acting Ratchet to be the strongest Ratchet made. The body is made of Drop-forged Steel, and handle of solid Bar Steel. Parts subjected to wear are extra hardened. This is the ideal Ratchet Drill for heavy work.

Remember that a Ratchet is almost useless without a Drilling Post. Therefore always suggest with every sale a "Keystone" Drilling Post. It will save many hours of time and permit of more perfect work.

"Keystone" Tools are known everywhere for quality of material and workmanship. If your jobber cannot supply you, write direct to us.

"Imagine my surprise on checking up my sales"

How one druggist profits by handling AutoStrop Razors

Extract from a letter

received March 27th, 1919, from Mr. Hughes, of the Hughes Drug Co., Limited, Charlottetown, P. E. I.

On March 15th, I made a window display of safety razors with the intention of boosting the sales of shaving requisites and perhaps a razor or two—imagine my surprise when one week later, March the 22nd, when checking up my sales to find that in that week I had sold outright EIGHT AUTOSTROP RAZORS.

When making these sales, I overlooked your special offer altogether and only sold the AutoStrop because I can always sell one against any other razor of the same price on the market, having tried every well known brand, and I would rather back your razor than any other I know of. I always show the customer the simplicity of the stropping device by simply putting the strop in the razor and making them try to cut the strop—if they succeed they get the razor free—if not they buy the razor.

THE above letter speaks for itself. No words of ours can add anything to the force of its argument or strengthen the conviction that AutoStrop Razors make ready sales for the man who handles them. Mr. Hughes has been good enough to imply that our advertising has helped—no doubt it has. But all the advertising in the world wouldn't keep a customer satisfied or enable a dealer to sell the AutoStrop Razor with pleasure and profit, if it lacked the ability to make good. And Mr. Hughes is wise enough to see this, too.

In his letter, he sets forth the reasons why the AutoStrop sells; our national and persistent advertising serves the purpose of making these reasons widely known. Both together they produce that readiness on the part of purchaser to prefer an article with which he has already been favorably impressed. Then the rest, and by no means the least important part, as Mr. Hughes' letter illustrates, is up to the dealer himself.

Polar Cub
ELECTRIC FANS

The Saturday Evening Post advertising of the Polar Cub Fan will produce sales for you if you show a window full or advertise in the local papers. This season our advertisement in the Post appears every week during July and August. THE DEMAND IS HEAVY NOW. What will it be in July?

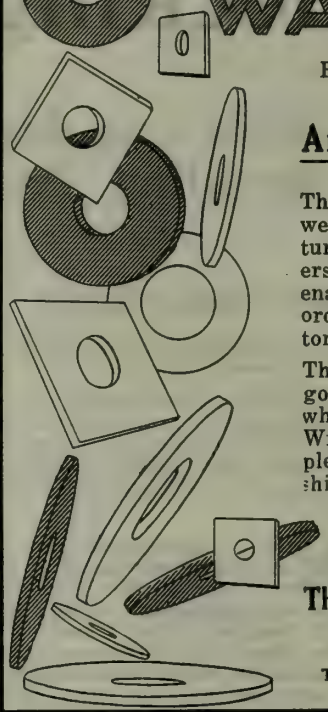
Polar Cub is recognized as being the busiest little breeze producer on the market—he has always met the test. But—the demand of previous seasons has oftentimes overtaxed a limited supply and dealers have been forced to turn away profitable sales.

Why not be ready to meet the rush with a quantity stock of both 6 inch and 9 inch Models? Nationally advertised, and each carry a year's guarantee.

Polar Cub
MODEL "D"

Here are some of the features that make him a profit-maker for dealers—Die cast frame, cannot possibly get out of alignment—Guard spot welded, practically unbreakable—Two speeds and stop—Fan adjustable to any angle—Mica filled commutators—Motor beautifully nickel-plated—base finished in rich velvet black—rust proof, black japanned blades, Will operate on either direct or alternating current 105 to 120 volts.

Height, 8 inches to top of guard, 6 inches to top of motor. Blade diameter, 6 inches. Equipped with 8 ft. cord and plug. Guaranteed for one full season. Packed in new protected carton, with attractive label.



The same features incorporated in the Model "D" fan are used in the construction of Model "9," the only changes being that the motor is much larger and the height of the fan measures 10½ inches to top of guard; 7½ inches to top of motor. The blade diameter is 9 inches.

The six inch Fan retails for $8.50 each. The nine inch for $12.00 each.

On the Main Floor at the Front

Hamilton, Ont., Firm Add Attractive Section of Electric Fixtures to Their Main Floor Display—Paint Sales Doubled in Year—Firm Has Also Sold Four Carloads of Mantels and Fireplaces

Based on an interview by C. E Parsons, of Hardware and Metal, with Messrs. Kent and Garvin, of Kent, Garvin & Co., Ltd., Hamilton, Ont.

KENT, Garvin & Co., Ltd., of Hamilton, Ont., have found such a demand for electrical fixtures that they have incorporated a special section for showing these lines into their main floor show room. They are stocking only high grade goods and report that the business is growing rapidly. A feature of this firm's business policy consists of keeping in the closest possible touch with the architects and contractors. They have specialized in builders' hardware and interior finishings for the home, such as tiling, bathroom fixtures, mantels and other lines. So many home builders come to the store to select one line or another and so many inquiries were made regarding electric fixtures that the firm saw an opening for big business and at once seized the opportunity.

Attractive Display

Attractive display is one of the features of the store of Kent, Garvin & Co., Ltd. Few stocks carried by hardware dealers lend themselves more effectively to making a really handsome showing than high grade lines of electric fixtures, bathroom fittings, etc. The accompanying photos will give some idea of the manner in which Kent, Garvin & Co., Ltd., have made the most of this. Their new department for electrical fixtures is right up at the front of their store. The goods make a most attractive showing under ordinary circumstances, but when the current is switched on and the play of lights on the metal work and from the many colored globes is given a chance to add its charm the effect can be better imagined than described. Unquestionably it is one to arouse in the home builder the desire of possession and once that desire is aroused it is only a question of making a selection. Goods like this displayed in this manner are half sold. They carry an appeal that wins the man or woman who is looking for something that will not only render real service in the home but make it more attractive.

An Ideal Setting

Kent, Garvin & Co., Ltd., have what seems to be an ideal setting for their new department. Right up in the front of the store, with a striking display of bathroom tiling and bathroom fixtures as a background, the cumulative effect from an artistic standpoint is one that is not often excelled in a store. As will

This is the electrical fixture display of Kent, Garvin & Co., Hamilton, which makes a most impressive display. The fixtures are neatly placed and are connected so that they can be turned on when wanted. A fine display of tiling is also apparent in this same view of the store.

The paint department here is not only a bright one from which the customer is served, but the firm of Kent, Garvin & Co., Hamilton, whose display this is, get the painters to bring their prospects there. Not only is the consumer solicited, but also the painter. It's an idea that's working well.

be seen from the photo the firm has two special display rooms arranged for no other purpose than to show house owners just how the tiling they handle and sell will look when in position. The walls are tiled in most attractive patterns and colors and the flooring shows a variety of designs.

Keep Them Handy

Immediately adjoining these display rooms, and within easy access of the salesman who may be showing the goods to prospective buyers, is a wall display made up of separate pieces of tiling. Any special shade or shape which may arouse the interest of the prospective customer can be handed to him in a couple of seconds for inspection, and he can make a close examination of its quality or any other points he wishes to investigate.

"This is a very handy arrangement," said Mr. Kent to HARDWARE AND METAL. "We find that people like to compare one piece with another and examine them thoroughly. We handle only the highest grade goods and this also is a big talking point. We can stand absolutely behind anything we are selling, and people appreciate the service we are in a position to give them. There is nothing like attractive store displays to get results in selling."

Good Window Displays

"In spite of the fact that the location of our store does not enable us to get anything like the results we should get from our windows, we find that they pull a lot of business," Mr. Kent continued. "If we had our two windows located on a main thoroughfare where thousands of people are constantly passing we would unquestionably get more business from them. We keep our windows changed regularly and always try to show lines that are seasonable, but to get the best results from window displays you have to have them where they will reach the greatest number of people."

Bathroom fixtures are good sellers with Kent, Garvin & Co., Ltd. As may be seen from the photo they are displayed in connection with the tiling stock and close to the electrical fixtures. In this way the full beauty of the fixtures is not only brought out but is enhanced by their surroundings, while they themselves also serve to show off to advantage the other lines.

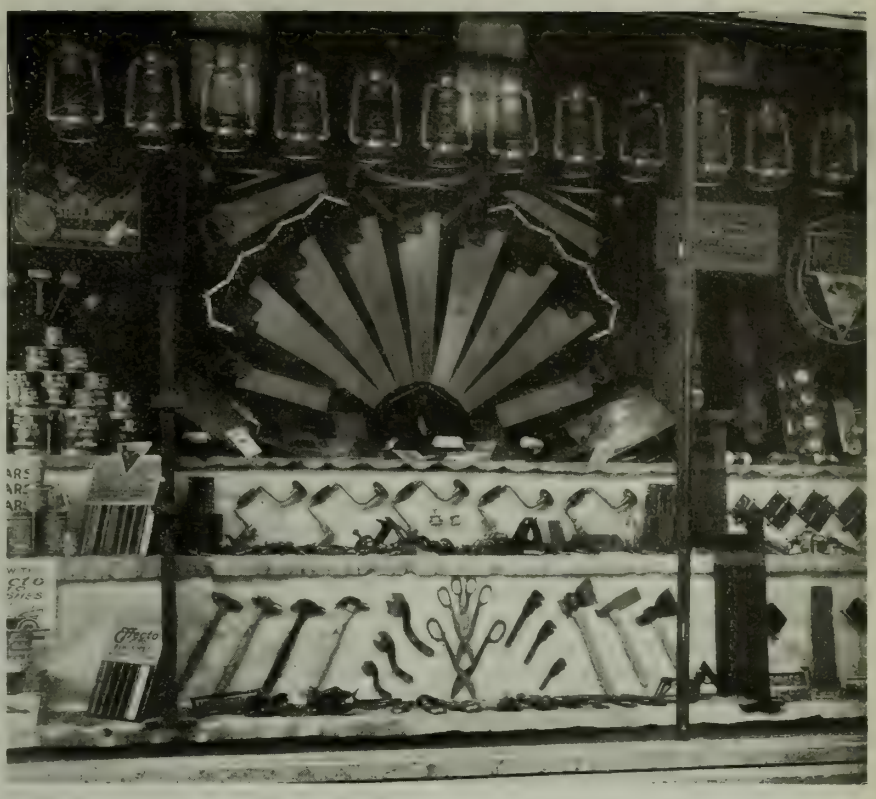
With renewed building activity, the sale of carpenters' tools is again becoming a big factor in the Hardware Stores' trade. Here is shown the tool section of the Kent, Garvin & Co. Store in Hamilton. Hammers, hatchets, brushes, axes, braces, trowels, planes, bits, screw drivers, etc.—they are all out in plain sight. The arrangement is a good one.

Brings the Business

It is a common thing for a man who is building one or more houses to come into the store to make a selection of tiling, or fixtures or some other line, to end up by placing with the firm a complete order for everything he needs that Kent, Garvin & Co. carry. From the firm's standpoint this is, of course, a most satisfactory proceeding, and one of their aims in adding electrical fixtures was to secure more and more of this business.

"We find," said Mr. Garvin, "that people are not only willing to pay the prices for but insist on having quality goods. If we can show them goods that are obviously high grade, well finished and attractive, and will make for comfort, utility and beauty in the home it is never a question of how much they will cost. They are always willing to pay a fair price for good goods. Not only this but they take a pride in what they buy and talk about our goods and our store to their friends. We often have people come in and tell us that while at Mr. So-and-So's house they saw this or that and that he told them he got it at our store, and that it was giving the best of satisfaction and they want the same thing. We can get no better advertisement than satisfied customers of this kind."

Paints Big Seller



Paints have been proving a big seller with the firm. Mr. Garvin stated that they have doubled their paint sales in the past year and more than doubled the sales of varnishes. In the last few months they have been pushing the sales of auto varnishes, not only from a retail standpoint but by getting in touch with garages.

"Our sales have been showing a fine increase in this line," said Mr. Garvin. "I would say that we are now selling five times as much as formerly and the sales are still growing."

The paint department is another feature of this store. It is located just in the rear of the section where tiling and bathroom fixtures are displayed, and is a model of neatness and arrangement. As will be seen from the photo every line the firm carries can be seen by prospective buyers and can be got at quickly by the salesmen. The photo shows the neat arrangement of brushes, the display stand of sponges, and how the color cards and paint literature are kept near the door and neatly sorted so that any particular folder or card desired is instantly accessible.

Is Kept Spotless

The paint section, in fact the whole store, is kept in spotless condition. This is not only a part of the firm's general policy but is specially emphasized because so many women come to the store to make selections of goods. Kent, Garvin & Co., Ltd., have secured many a good order through praise of their store, their goods and their service from satisfied women customers to their friends. Every attention is paid by the firm to the comfort of women customers, and one of the results may be seen in the steadily growing business. Paints and varnishes as well as brushes usually form a part of one, and very often both window displays. In addition auto finishes are kept displayed at various points of vantage. This, Mr. Garvin says, has been a factor in increasing sales.

The window displays of Kent, Garvin & Co., Hamilton, are bright and attractive. They are so well arranged that there is an appeal even to those not directly interested in the class of goods shown. Space was also given to paint, which is just shown at the left, and builders' hardware, which appears at the right. These were in separate sections of the window.

Sell Many Tools

Strange as it may seem, Kent, Garvin & Co. have many customers whom they never see. These are among contractors who are too busy to come down to the store and do their ordering either through the city salesmen the firm keep out all the time or over the telephone.

One of the secrets of the business the firm is building up is that they not only look after all the business that naturally comes to the store but they go out after more. They make it a point to be in touch constantly with the builders, contractors and factories. They do not wait for this business to come to them, they go out and get it. The result of this aggressive policy is apparent each year in the increased volume of business.

Sold Four Cars

The second floor of the store is devoted entirely to a display of mantels, fireplaces and similar lines. While a big stock is shown every care has been taken not to spoil the general effect by overcrowding or by placing the goods so close together that it is impossible for prospective buyers to look them over from every side. The same taste in arrangement that is a feature of the main floor is noticeable in the mantel display section, and it is producing results.

"We have sold four carloads of these goods in the past year," said Mr. Garvin. "The business has been most satisfactory in every way and is an all year round business."

As may be gathered from what has been stated, and from the photos shown, attractive arrangement is one of the big features in the store of Kent, Garvin & Co., Ltd. Added to this is sales service, backed by a quality stock and lots of "pep" in not only going after but keeping after business.

ATLANTIC CITY SCHOOL CLOSED

Owing, it is claimed, to th exorbitant rental demanded by the pier owners, the E. I. Dupont de Nemours & Co., Wilmington, Delaware, announce that they are going to close their trapshooting school at Atlantic City about June 1.

Since the Dupont trapshooting school was started at Atlantic City in the spring of 1916, it is indicated more than 20,000 visitors have shot over its traps, and more than 11,000 novices have there learned for the first time the fascination of clay target shooting. More than a million targets have been thrown. The school had become quite an attraction at this famous resort and the attendance was increasing. The attendance up to May 17 this year was 2,543, as compared with 1,060 in 1918 and 954 in 1917, during the same period.

Getting After Big Quantity Business

Richmond Hardware Dealer Sells Carloads of Cement — Also Does Big Coal Business— Electric Goods Sellers as Well as Stoves—Getting Down to Spot Cash Basis

H. D. SMITH, of Richmond, Que., is one of the enthusiastic hardware dealers of the province. Mr. Smith has been in business many years and has conducted a number of departments in a way quite different to that obtaining with many firms.

Big Cement Sale

Portland cement, for instance, has been one of his big sellers. Mr. Smith pointed out to HARDWARE AND METAL that he sometimes disposed of ten carloads of this commodity yearly. Even last year, when the war was raging, and when some were complaining of a dearth of orders for building materials, Mr. Smith stated that he sold from 10 to 12 cars of cement. Asked as to how this was done, Mr. Smith replied that he had urged the farmers to buy it for foundations for their barns, stables and other outbuildings. Satisfied with a small margin of around 10c per bag, Mr. Smith said that he made a satisfactory profit through selling the large amounts referred to. Very often the farmers would come to the car and take their supplies direct. In this way the handling expense was small, and the narrow margin of profit allowed induced greater sales.

Stoves a Seller—Electric Irons

Stoves have been a good seller. These are disposed of largely to the railway men. One of the larger railway companies has a divisional point at Richmond, and the engineers, brakemen and other employees are free spenders. At the same time Mr. Smith pointed to the fact that many of these men, contrary to the usual example set in many parts of the country, had been learning to save.

"Our turnover is practically for cash," said Mr. Smith. "The railway men get their money every fifteen days, so that we consider our business is pretty close to a cash basis. One of our bankers has been urging the railway men to save, and suggesting that they open savings accounts, and many of them would rather put their money in the bank now than spend it." This should be a healthy condition.

Electric irons and toasters have sold freely at Richmond, there being plenty of electric power. Mr. Smith intimated that the wives of the railway men had been good buyers of these.

Benefit of Dairy District

The district adjacent to Richmond is one in which much dairying is done and considerable stock raised. This has meant a source from which a steady flow of money into the till of the merchant could be diverted.

Said Mr. Smith: "The French-Canadian is a good customer with money and buys fairly well. One man sold 20 head of cattle recently averaging about 2,200 lbs. apiece; at 15c per lb. he was getting a good return for his work and investment. This is a good stock country and those who are following this end of farming are making money."

With butter and eggs to sell, and with these commanding a higher price than ever before, the merchants of Richmond have been cashing in on their selling.

Other Leading Sellers

Mr. Smith is one of the successful sellers of wall paper. He has handled this for many years, and has found it to be satisfactory. A reasonably good assortment is carried and there is little difficulty in selling the line once a trade has been established. It also carries a good margin of profit.

Another line carried on the side, and which has yielded a profit to justify its being carried, is that of coal. This is bought by the carload, and while it requires careful checking to make a success of selling, seeing that all tonnage charged for is available from each car, it pays to handle this commodity.

A reader of his trade paper, Mr. Smith said that he did not see how the modern hardware dealer could get along without

Current Events in Photograph

A FINE WAR CAPTURE

Submarine UC-97, 1918 model, which arrived at the port of Montreal, May 27, on its way to the Great Lakes. This submarine comes from New York and was towed in by the "Iroquois" and will make way to Detroit where it will be exposed for a few days. The UC was the means of getting numerous subscribers to the last Victory Loan held in New York. On the turret is the Imperial Eagle with two heads bearing the legend "Gott mitt uns."

What Other Hardwaremen Are Doing

Advertising Campaigns Reveal Aggressive Methods Being Employed—Screen Doors and Windows, Lawn Mowers, Sporting Goods, Hammocks, Paints, Oil Stoves, are all Being Pushed—Bathroom Fixtures Mentioned Too.

SASKATOON HARDWARE CO., LTD., SASKATOON, SASK.

"Put your house in order," is the heading of a three column ad. run a couple of weeks ago by this enterprising firm. Following was an appeal on window screens, screen wire cloth, screen doors and paint. An appeal to the boys, big and little, was made in the mention of baseball, tennis and golfing goods, and coaster wagons. Electric irons and garden tools were also mentioned. The ad. was well illustrated and prices shown all the way through.

* * *

FRED W. KARN, WOODSTOCK, ONT.

"The hot weather is coming," is the statement leading off an ad. on oil stoves by this merchant. "Absolutely odorless, every stove guaranteed, a great saver in fuel and most convenient for hot weather cooking, absolutely safe." These are points mentioned in connection with these stoves and the style and price are also added. It's a good type of copy.

* * *

WRAY'S HARDWARE, GRIMSBY, ONT.

"Would you willingly endanger your health or that of your family?—then why disturb all the dust and lurking disease germs when you can get the latest up-to-date ——suction sweeper? We will be glad to demonstrate at your home. This —— sweeper can be bought for cash at $45 or on easy payments." There's the whole story, and it is incorporated in a neat little ad., which this firm recently ran.

* * *

CLARKE HARDWARE, HAMILTON

There are many to whom this firm's ad. will carry a direct appeal these days. Read this: "Isn't it fine to be able to spread yourself out in a hammock and enjoy the coolness of the evening after a hard day's work?" The answer is ob vious so the ad. continues: "We have the hammocks in different styles and colors, prices from $3.25 and up. Hammock hooks 12c and 30c a pair." Note that little extra there, too, on the hooks.

* * *

THE LAWRENCE HARDWARE CO., LTD., HALIFAX, N.S.

Practically every individual is interested in labor savers. The heading for this firm's ad. last week was: "A labor saver—for amateur gardeners," and then followed a description of what is termed "this ingenious tool," along with the selling price and an appeal to "let us demonstrate its efficiency." There's something about a merchant who advertises the fact that he is willing to demonstrate or guarantee goods that one can't get away from. The public to-day want to be shown, and many dealers are cashing in on this attitude of mind.

* * *

MARSHALL'S HARDWARE, KINGSTON, ONT.

"Seven timely needs," formed the heading of an ad recently used by this firm. Following this heading were listed lawn mowers, step ladders, washing machines, mops (two kinds), floor varnish and paint. Descriptive matter showing cuts, sizes and prices appeared with each item. The layout of the ad. was attractive, the firm's name in a standard form appearing at the top and bottom, with a little panel in each corner drawing attention to a certain class of goods.

* * *

J. N. ALLEN, GLACE BAY, N.S.

It is not often that at this time of year, attention is directed to the arrival of stoves and ranges. However, here is one merchant who advertises the arrival of a carload shipment of new stoves, gives the price and illustrations also, and indicates that his customers can secure "terms." At this point a 12 months' sale of stoves in evidently more pronounced than in some sections where their sale is made a seasonable affair. Isn't this merchant probably creating business when some would say there was none? Are you getting all the stove and range business you should?

* * *

A. R. A. BEAR, MONTREAL

In a neatly arranged advertisement, this merchant draws attention to "clean-up specials" in the shape of paints, varnishes, lawn mowers and garden tools. Attention is also directed towards sales of screen doors, screen windows, poultry netting, hammocks and sporting goods. Prices are shown and the lines listed given prominence through what might be termed an individual panel effect.

* * *

THE RODGERS HARDWARE CO.,LTD., CHARLOTTETOWN, P.E.I.

It was about three weeks ago that this company, in a neatly worded, attractively laid out advertisement drew attention to the approach of fly time. "Fly time is coming, be prepared before they arrive, have the screen doors and windows in place." That's timely advertising and following these suggestions is a list of screen doors and windows, the various styles and sizes being mentioned along with the price. Attention is also directed to the screen door sets, hinges and catches. The ad is illustrated and is one that contains real news. That is a sample of real advertising.

* * *

CRAGG BROS. CO., LTD., HALIFAX, N. S.

"Lawn mowers, smooth running, close clipping. For a lawn of velvety smoothness, such as delights the eye and enriches the appearance of the plainest house, frequent clipping is necessary. Little of the usual labor will attend the operation if you use one of our lawn mowers. They have finely tempered steel cutting knives, and are an easy-running machine that makes the grass fly." These are extracts from a splendid ad. that recently appeared in the local press. Read this too: "The three-knife 12 in. model at $7.50 is recommended for the lady operator, and for parked sidewalks where a light mower is required. Clip this list as a shopping guide." Following is given the list of three and four knife ball bearing models with the prices. This is an ad. that carries a splendid appeal. Here again is found an example of an advertiser giving his customers the news about the goods that the customer wants to know.

* * *

RANKIN'S, OTTAWA

It is probably not right to say that any single line in the hardware store is neglected, but at least some are not advertised as they might be. This was the thought that came when reading over an attractive little ad. of this Ottawa firm on "bathroom fixtures." Under this heading the firm goes on to say, "The proper furnishing of the bathroom is as necessary, if not more so, than any other room in the house. The results obtained from proper fixtures and their use cannot really be estimated." Following this is a list of a few articles most commonly called for, along with the price. The suggestion is good and arrangement of space for the appeal neat. Are you neglecting this or any other class of goods in your store? There may be an idea here for you to work out.

EDITORIAL COMMENT

BIG BUSINESS AHEAD

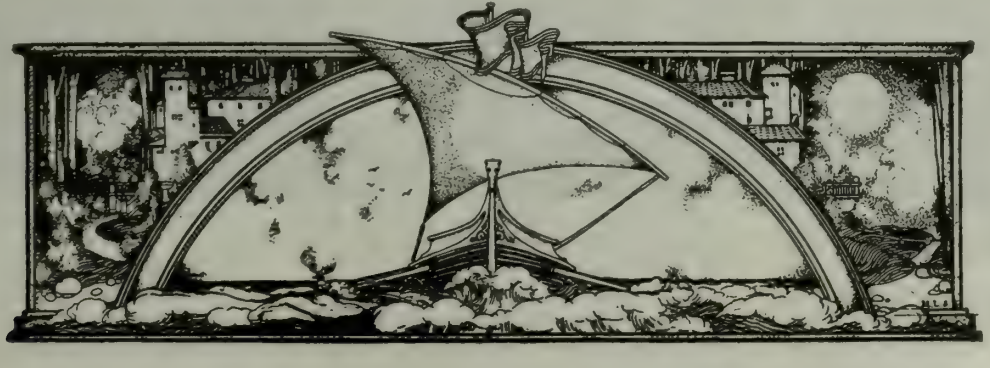
A FEATURE of the steadily improving business in the American steel market is the enormous purchases being made by the automobile and tractor interests. Orders have been placed by these firms for orders totalling 500,000 tons for delivery in the third quarter of the year. This indicates that continuous production is going to be necessary to try and catch up with the demand for autos and tractors. When business is so good with the auto and tractor firms it means that there is of necessity going to be a tremendous lot of auto accessories, tractor accessories and supplies of all kinds needed. While the tractor end of the game, so far as Canada is concerned, is perhaps where the auto accessory was seven or eight years ago, there is every indication that it is going to develop rapidly. In the meantime the sales of auto accessories are increasing by leaps and bounds. This is an absolutely legitimate field for the hardware dealer and any number of them are cashing in on it. The story of the development of their accessory departments is with most dealers a story of steady and in most cases rapid development. Most of them started in a small way when they thought they saw an opportunity and they freely confess that they have been more than satisfied with the way the business has developed. Many of them regard the business as still in its infancy and are planning for greater things than they ever dreamed of when they started in with one or two lines to "try it out." When the time comes and it is coming rapidly in some sections of the country when tractor accessories are to be added to auto supplies many dealers see in these two lines alone a splendid business.

A COSTLY EXPERIMENT

FIGURES which are now available indicate that the recent experiment made in the United States with Government ownership of railways was a most costly one. The taxpayers will have to pay $2,000,000,000 and nearly $2,000,000,000 more for two years through increased rates and fares. These figures are based on returns from forty-six companies operating 107,341 miles of lines. A profit was expected by Government operation, but instead the taxpayer and the consuming public will have to meet the huge deficits. By the end of this year the American express companies expect to have a deficit of at least $25,000,000. The water transportation lines, it is stated, are faring even worse under Government ownership than the railways. There may be some valuable lessons for Canada to learn from the experience they are having in the States. Retailers of hardware are vitally interested in all transportation matters and especially in the freight and express rates, even though the consuming public has in the final analysis to do the paying.

UNPARALLELED ELECTRIC OUTLOOK

REQUESTS for new power lines and extensions to existing power lines are pouring in to the power companies in numbers that show unmistakably the hold electricity has upon the public. It has gained this hold because of the real service, convenience and economy it has proven. Imagine what the average city home would be without electric lights, an electric washer, an electric sweeper or a dozen more utilities people have come to regard as part of their everyday comfort. And yet only a few years ago these devices were unknown. Because the farmers have learned from the city dwellers what electricity means they are clamoring for power lines, and they are getting them. Many millions of dollars are to be spent in the next few months in extending power lines into the rural districts. More millions are to be expended in providing for the additional power requirements of the cities. It is an ever growing business and it opens to the hardware dealer a field that is at once profitable and easily handled. Very few of the goods in his store will lend themselves more readily to display than the electric lines. Many of them practically sell themselves. Dealer after dealer will tell with real enthusiasm what good results have followed the taking on of electrical goods. When it is remembered that electrical development, vast as it has been, is still only in its infancy and that Canada is a land whose waterfalls contain boundless stores of electric energy, much of which is as yet untouched, some idea may be gained of what the electrical business of the future is going to be.



MEANS LARGER BUYING

THE last issue of the *Labor Gazette* gives some interesting figures showing how wages have advanced in the past year. The statistics also indicate

that there is little lack of employment this season, as compared with the same period a year ago when things were very busy and help scarce. In Montreal in April of 1918, 4,916 temporary workers in the first fortnight received in wages $90,352.12. In the same city during April, 1919, 4,417 temporary workers received in a fortnight $129,603.88. This indicates the much higher schedules in effect and the figures in other places show that the increase is general. In Victoria, for instance, in April, 1918, 200 workers received in wages $7,369.63, while in April, 1919, 198 workers received $9,019.80. At St. John, N.B., 247 workers received $8,161, as against only $7,627.27 received in the same period a year ago by 267 workers. All this has an important bearing upon retail trade in all its branches. People are making more and are spending more making full allowance for the fact that commodities have advanced. The average man is living better to-day than he ever did. The section of the buying public hit hardest by the increased cost of merchandise is the fairly well-to-do people working on a fixed salary, or those people who have money invested and receive from it an income that does not vary appreciably. These people have had to curtail their buying, while on the other hand, the average worker has been buying as he never bought before.

WANT TO KNOW PRICES

JUST how keenly interested the buying public is in knowing prices was shown at a meeting held at Goderich, Ont. In an effort to stop people buying out of town the retail merchants of Goderich have been putting on a "Spend Your Dollar at Home" campaign in one of the local papers. It seems, however, that people continued to buy out of town and with a view of securing co-operation from the workingmen a meeting was arranged to discuss the situation in general. The retail merchants were invited to attend a meeting of the Machinists' Lodge, one of the strongest in the town. The chief speaker for the machinists drew particular attention to the fact that many of the merchants did not put prices on goods they showed in the windows, also that when they advertised no prices were given. It was pointed out that women like to know the prices and that their strong personal liking is for shopping at home and not for buying by mail. As a result of the meeting a committee has been appointed to investigate the situation and make a report later. This meeting is one of the first of the kind ever held in the Province. It is significant, especially from the retailer's standpoint, as showing what is in people's minds and what course they are likely to take if they do not approve of the home merchant's methods. Putting prices on goods shown in the windows and on goods advertised seems a little thing to many dealers and very unimportant. As a matter of fact it is a most important matter and this was recognized by many of the leading business houses of the country long ago. One of the greatest features of all departmental store advertising is that they give the prices in large figures. Many firms not only give the figures, but spell the price out also so that there is no possibility of any mistake being made and also to emphasize it in the mind of the prospective buyer. This general policy of putting prices on all goods advertised and shown in the windows is declared by many of the largest firms in the country to be by far the best plan. They extend it in many cases to the goods on display in their stores, which bear plain price marks or tickets. Price is the very first thing the prospective buyer wants to know. A very large percentage of shoppers, especially women from the country, are timid about walking into a store and asking the price. Their fear is based on the idea that if the goods are dearer than they expect they may be forced into taking it. There are many people, many of them too, who would like to know the price and would probably buy, but do not like to go into a store and ask about goods and then come out without buying. The merchant who does not show prices of the goods in his windows is undoubtedly losing every day a percentage of sales he might easily make. Those who have investigated the situation state that the tendency almost invariably is for people to think that goods which bear no price mark are much higher than they really are. It is a simple thing and good business to let them know exactly what the price is.

Where and When Stores Are Closing

A List of Early Closings in Towns and Cities Throughout Canada Prepared From Information Supplied by Merchants——The Growing Prevalence of the Weekly Half Holiday Demonstrated—Additional List

ONTARIO

DESERONTO.—Stores close Wednesday at 12 noon, during June, July and August, and every evening except Saturday at 6 p.m. July 2 is an exception, stores remaining open until 6 p.m.

DUNDAS.—Stores close Wednesday at 12.30 p.m. all year, with exception of December, and every evening except Saturday at 6 p.m.

LAKEFIELD.—Stores close Thursday at 12.30 p.m., during June, July, August and September, and every evening except Wednesday and Saturday at 6 p.m.

PORT STANLEY.—No half holiday. Most stores close every evening except Saturday at 6 p.m.

PRESCOTT.—Stores close Wednesday noon, June, July and August, and nightly except Saturday at 7 p.m.

PRESTON.—Stores close Wednesday noon.

RICHMOND.—No half holiday. Stores close nightly except Saturday at 6 p.m.

RIDGETOWN.—Stores close Wednesday noon, May to August inclusive, and Monday, Wednesday, and Friday at 6 p.m.

RIDGEWAY.—Stores close Wednesday May to August inclusive.

RODNEY.—Stores close Friday 1 p.m.

SARNIA.—Stores close Wednesday 1 p.m., May to September inclusive, and nightly except Saturday at 6 p.m.

SAULT STE. MARIE.—Stores close Wednesday noon, May to end of August, and every evening except Saturday at 6 p.m.

SCOTLAND.—Stores close 12 o'clock Thursday afternoons, June, July and August.

SEAFORTH.—Stores close Wednesday, 12.30 p.m., May to August inclusive, and nightly except Saturday at 7 p.m.

SHELBURNE.—Stores close Thursday noon June 1 to September 14, and nightly except Saturday at 6 p.m.

SIMCOE. — Stores close Thursday noon, and nightly except Saturday at 7 p.m.

SIOUX LOOKOUT. — Stores close Wednesday at 1 p.m. from May to September inclusive, and every evening except Saturday at 7 p.m.

SMITHS FALLS.—No half holiday. Stores close Monday, Wednesday and Friday at 6 p.m.

SPRINGFIELD.—Stores close Wednesday noon, June, July and August, and Friday evening at 6.30 p.m.

STAYNER.—Stores close Thursday at noon during June, July and August, and every evening except Saturday at 6 p.m.

STRATFORD.—Stores close Wednesday, 12.30 p.m., May 14 to September 15 inclusive, and every evening except Saturday at 6 p.m.

STURGEON FALLS. — Stores close nightly at 6 p.m., except Monday 9 p.m. and Saturday.

ST. CATHARINES. — Stores close Wednesday noon; grocers and butchers the year round, others May to September inclusive, and evenings except Saturday at 6 p.m.

ST. MARYS.—Stores close Wednesday, 12.30 p.m., June, July and August, and nightly except Saturday at 6.30 p.m.

ST. THOMAS.—Stores close Wednesday, 1 p.m., May to October inclusive, hardware stores July and August, and evenings, except Saturday, at 7 p.m.

STOUFFVILLE.—Stores close Friday 12.30 p.m., May to November, and Monday, Wednesday and Friday evenings throughout the year at 6.30 p.m.

TEETERVILLE. — Stores close 12 o'clock Thursday afternoons, June, July and August.

TILBURY.—Stores close Thursday noon June, July and August, and every night except Wednesday and Saturday at 6 p.m., Wednesday and Saturday at midnight.

TILLSONBURG.—Stores close Wednesday noon May to September inclusive, and nightly except Saturday at 6 p.m.

TROUT CREEK.—No half holiday. Stores close nightly except Saturday at 6 p.m.

TOTTENHAM.—No holiday. Stores close Monday, Wednesday and Friday at 6 p.m.

TWEED.—Stores close Wednesday, 12.30 p.m., June, July and August, and nightly except Saturday at 7 p.m.

THAMESVILLE.—Stores close Wednesday noon, May 1 to September 1, and nightly except Friday and Saturday.

VANESSA—Stores close 12 o'clock Thursday afternoons, June, July and August.

WATERFORD.—Stores close Wednesday, 1 p.m., June, July and August, and every evening except Wednesday and Saturday.

WATERLOO.—Stores close Wednesday noon, June 1 to October 1, and nightly except Saturday at 6.30. p.m.

WELLAND.—Stores close Wednesday noon, May to October, and nightly except Saturday at 6 p.m.

WHITBY.—Stores close Wednesday, 1 p.m., May to September inclusive, and nightly except Saturday at 6.30 p.m.

WILSONVILLE. — Stores close 12 o'clock Thursday afternoons, June, July and August.

WINCHESTER.—No half holiday. Stores close Monday, Wednesday and Friday at 6 p.m., new time.

WINDHAM CENTRE.—Stores close 12 o'clock Thursday afternoons, June, July and August.

WINDSOR.—Stores close Thursday at 1 p.m., May to September inclusive, and nightly except Saturday at 6.30 p.m.

WOODSTOCK.—Stores close Wednesday, 12.30 p.m., June, July and August, and every evening except Saturday at 6 p.m.

WEST LORNE.—Stores close Friday noon May to September.

ZURICH.—Stores close Wednesday noon.

BRITISH COLUMBIA

COURTLAND.—Stores close Wednesday at 12.30 p.m. throughout year, and every evening except Saturday at 6 p.m.

CUMBERLAND.—Stores close Wednesday at 12.30 p.m. throughout year, and every evening except Saturday.

FERNIE, B.C.—Stores close Wednesday at 1 p.m. all year, and every evening at 5 p.m., except Saturday when they are open until 9.30 p.m.

PRINCE RUPERT.—Stores close Wednesday at 1 p.m. throughout year, and every evening except Saturday at 6 p.m.

ALBERTA

FORT SASKATCHEWAN.—No half holiday. Stores close every evening except Saturdays and days preceding holidays at 6 p.m.

GRANDE PRAIRIE—No half holiday. Stores open until 10 p.m. evenings.

SASKATCHEWAN

GULL LAKE.—Not decided on half holiday yet. Stores close every evening except Saturday and days preceding holidays at 6 p.m.

INDIAN HEAD.—Stores close Thursday noon from May 1 to August 15, and every evening except Saturday at 6 p.m.

LLOYDMINSTER.—No half holiday. Stores close every evening except Saturday at 6 p.m.

MELFORT.—No half holiday. Stores close every evening except Saturday at 6 p.m.

YORKTON.—Stores close Wednesday at 12.30, and every evening except Saturday at 6 p.m.

MANITOBA

CRYSTAL CITY.—No half holiday. Stores close every evening except Saturday at 6 p.m.

HAMIOTA.—Stores close Thursday at 12 noon, from May 15 to August 15, and every evening at 7 p.m.

MELITA.—Stores close Wednesday at 12 noon during May, June, July and August, and every evening except Saturday at 6 p.m.

RESTON.—Stores close Thursday at 1 p.m. during June and July, and every evening except Saturday at 6.30 p.m.

WINNIPEG.—Larger hardware and department stores close Saturday at 1 p.m. Grocery stores at 1 p.m. Wednesday, and every evening at 6 p.m.

And Now Here is the Bride's Month

June and the Brides Arrive—Big Opportunities for the Hardware Merchant to Develop Business—Electrical Household Appliances, Silverware, Cooking Utensils All in Demand

IN thinking of June one thinks of brides, and to the hardware merchant the June bride is a possible customer. Not only from the standpoint of the bride's purchases for the new home is this the case, but in the question of gifts the hardware store stands out as the logical headquarters for remembrances that are acceptable.

There are almost too many lines to mention them all, but not one should be overlooked. Take the question of electrical appliances for the home; a toaster and percolator bring pleasure to the preparation of the morning meal; an electric iron can be taken out to the porch where the cool breezes blow; the drudgery of sweeping is overcome by an electric vacuum sweeper. These are only a few of the lines which add to the pleasure of the home and start the bride on her household duties with a smile.

Or it may be silverware that is wanted—knives, forks and spoons; casseroles, bake dishes and kindred lines are called for—the hardware merchant is in a position to meet the demand and the goods should now be out on display.

In the photograph below is shown a very nice display arrangement of this class of goods by which business is being drawn. At the back are noted wall cabinets and directly in front are display cases carrying case goods and flatware. The arrangement as a whole is very neat, well thought out and a business-getter.

It may not be possible for all merchants to have such an extensive display, but this layout could be duplicated on a smaller scale with very little trouble. The main thing is to keep the stock bright, clean and out where the people can see it. Show cards can direct attention to the various lines, and price cards answer the unasked question.

The hardware man need only look through his house-furnishings department to see that stoves of some nature are necessary in the new bride's household equipment; a washing machine, wringer, refrigerator—the list is a long one when you start giving it a little thought. Do just that now and plan your sales campaign accordingly.

Here is an arrangement of goods that cannot fail in its appeal to the bride and those friends and relatives seeking gifts. Are you giving this class of merchandise the space it deserves at the present time? This layout is not a difficult one to duplicate, even though worked out on a smaller scale. Try it!

EVENTS IN THE TRADE

Business Changes

Elbow, Sask.—B. C. Booth, hardware, has given up business.

Toronto.—Canadian Oil Gas Heaters, Ltd., have obtained an Ontario charter.

Leamington, Ont.— Harry Lendon, hardware, has been succeeeded by Lendon and Cook.

Swansea, Ont.—H. Soper has purchased the business formerly run by Farrell & Eckersley.

Fort Saskatchewan, Alta.—W. A. Dubuc Hardware Co. has succeeded Gordon & Dubuc.

Leduc, Alberta.—H. A. Kelly has succeeded Mr. Skinner in the hardware business of Skinner and Dalgleish.

Hamilton, Ont.—Moncur & Cook, who deal in wholesale electrical supplies, have changed the firm name to James Moncur Electric Co.

Sudbury, Ont. — Purvis Bros., Ltd., make the announcement that contrary to expectations they will continue in business. New lines are being added, it is stated, to bring stocks up to their standard.

Obituaries

Georges Lanouette, of the Notre Dame Hardware Co., Montreal, is dead.

A former well-known business man of Owen Sound, Ont., Frederick N. LePan, died a few days ago, after a long illness, at the home of his daughter, Mrs. G. N. Griffin, Toronto. Mr. LePan, who was a son of the late F. N. D'Orr LePan, was born in Owen Sound, and spent his youth there, afterwards carrying on, for several years, a hardware business in partnership with the late J. W. Redfern.

The death occurred in Baltimore, following a brief illness of Robert H. Davies, of Toronto, vice-president of the Ontario Wind Engine and Pump Co., Ltd.

Anton J. G. Simmers, president of J. A. Simmers, Ltd., seed merchants, Toronto, was found dead in bed Wednesday morning at his home, 126½ Yonge street. Mr. Simmers was in his fifty-ninth year and had been in the best of health prior to his sudden death.

Upon the death in 1883 of his father, who had established the firm in 1856, Mr. Simmers was given control of the business along with his brother, Herman.

He was born in Toronto and educated at Upper Canada College. Six children survive, Charlotte, Joseph, Ralph, Otto, Victor and Price. Of the family three served with the Imperial and Canadian forces.

The late Mr. Simmers was a member of Christ Church, Deer Park. The funeral took place on Friday afternoon.

Fire Losses

In a fire which destroyed a number of business places at Fiske, Sask., R. G. Thrower, hardware, sustained a loss.

The Canada Iron Foundries Co., Hamilton, suffered loss to stock by fire to the extent of about $6,000 in the destruction of a G.T.R. warehouse this week. The Foundries Co. used the warehouse as a storage for patterns, sand and facing material.

Personals

W. G. Harris, president of the Canada Metal Co., Ltd., was in Montreal this week.

J. S. Hoffman, of the Canadian Ice Machine Co., was a recent visitor at Cardston, Alta., in the interests of his company.

W. H. Jones, hardware dealer, Amherstburg, Ont., who sustained a slight stroke of paralysis while in the store, is much improved.

W. A. Scott, South African representative of the Canadian Blower and Forge Co., Waterloo, Ont., was a recent visitor at the head office of the company.

An announcement in the May 24 issue stated that Joseph Giroux had joined the staff of the Cochrane Hardware Co at Sault Ste. Marie, Ont. It should have read at Sudbury, Ont.

J. E. Escheman, manager of the Canadian Hauck Burner Co., recently arrived at Port Hope, Ont., where the Canadian plant is now under construction, and will superintend completion of the plant. Fred Howell, secretary-treasurer of the company, accompanied Mr. Escheman.

Trade Notes

The Automobile Supply Co. has been registered at Halifax by H. G. Fraser.

H. A. Weiss has retired from the Albert Hardware and Junk Co., Edmonton, Alta.

S. J. Shaw & Co., wholesale and retail hardware, Quebec, have dissolved partnership, but a new firm has been registered under the same style.

The Hoover Suction Company's new Canadian plant is now under way in Hamilton. It is hoped to have the buildings ready in two months' time, enabling manufacturing to be started about the middle of July.

H. F. S. Gardner's hardware store at Bradford, Ont., has been the site selected by thieves for recent depredations.

The City Council of Kingston, Ont., accepted the tender of the Imperial Oil Co., Ltd., for 300 tons of asphalt concrete at $22.15 per ton.

The B. Greening Wire Co., Hamilton, instituted the nine-hour day voluntarily a few days ago, employees receiving 10-hour pay for the shorter day.

A new factory is planned for the manufacture of electrical equipment on Industrial Island, of New Westminster, B.C. The factory will be built by the Electrical Manufacturing Co.

The Rogers Hardware Co., Ltd., Charlottetown, P.E.I., are closing their store at 5 p.m. during the week and 1 p.m. on Saturdays during the summer months.

The Lake Huron Steel Corporation, which will have its head offices at Goderich, Ont., has been granted a Dominion charter. The new firm will be capitalized at $15,000,000.

Drummond, McCall & Co., iron and steel merchants, of Montreal, are now located in their new offices on the fifth floor of the Mark Fisher Building.

A company has been formed with offices at Calgary, Alta., with a capital of $2,000,000. It will be known as the Canadian Western Steel Corporation, Ltd.

Employees of the machine shop and foundry department of the Algoma Steel plant, Sault Ste. Marie, Ont., presented the superintendent, A. E. Stewart, with a silk honor flag, in memory of the 36 men who went overseas, 6 of whom made the supreme sacrifice.

A change was made in the directorate of the Canadian Malleable Iron Co., at a meeting a few days ago. The new directors are, it is understood, M. Kennedy, Sr.; D. J. Kennedy; M. Kennedy, Jr.; T. D. Kennedy, and E. Lemon. D. J. Kennedy is president, and M. Kennedy, Sr., vice-president. H. A. Gutenkunst will continue as manager.

A large amount of new machinery has been purchased and has arrived at the plant of the Kenwood Mills, Ltd., Arnprior. Mr. H. M. Ashby, executive manager for Huyck & Sons, Albany, and the Kenwood Mills, Ltd., Arnprior, stated that the Canadian field looks so promising that he expected the Arnprior Mills to be larger eventually than the plant in Albany, which covers several acres and employs hundreds of hands.

A meeting of the Builders' Exchange, Welland, Ont., was held, at which a board of nine directors was elected and other preliminary business transacted. The four original officers, W. J. Hickey, president; J. C. Diffin, vice-president; F. Dilworth, secretary, and Mr. Mitchell, treasurer, were elected to the directorate and retain their positions as officers, and the following were also added to the Board: Messrs. Gray, Hanlan, Geo. Scott, C. R. Hagen and A. D. Marshall. The meeting drafted a set of by-laws preparatory to taking out a charter. The exchange has now a total membership of forty-four.

A new by-law dealing with public health regulations recently passed in Saskatoon, Sask., is directed against the fly. It reads: "All outside doors on the ground floor and all windows so constructed that they can be opened or any building used as a dwelling shall be fitted with screens from May 1 to Nov. 1 in each year. The screens for all windows shall at least cover the entire lower sash and shall be fitted so that flies cannot gain access when the sash is raised." A further section says: "The screens on doors or other openings shall be fitted so that flies cannot gain access." The by-law provides: "It shall be the duty of the owner or occupant or agent of any building used as a dwelling house to fix and provide screens as above mentioned, and also to maintain them in such a state of repair that the entrance of flies or other insects shall be prevented."

It is stated that the designing of the Northern Aluminum Co.'s new skyscraper at Toronto will be proceeded with at once. The building is to be 280 x 60 ft., and will be 90 feet high. There will be 8 high stories, which will make it actually a 10-storey building, and it will be of reinforced flat slab concrete. C. A. P. Turner, C.E., a United States specialist, is in the city in reference to the designing of the large flat slab reinforced concrete building.

The tin goods trade in Japan has made such great strides that a large tin plate plant has been started to help supply the demand. In 1916 Japan imported 650,000,000 pounds of tin plate from the United States and England.

The plate glass industry in Japan has greatly expanded since the world war. Before the war about 550,000 boxes of glass were consumed annually, 420,000 boxes of which were imported from Belgium and Germany, the remainder being of home manufacture. During the past year 850,000 boxes were manufactured in Japan, of which 600,000 boxes were consumed at home, and the remaining 250,000 boxes were exported.

Montreal News

John Richardson, buyer for Caverhill, Learmont and Co., Ltd., wholesale hardware, is away on holidays. Mr. Richardson is spending some time in Hamilton, Toronto, and other Western centres.

R. H. Hancock, of the Osborn Manfg. Co., 395 Broadway, New York, was a Montreal visitor this week.

Good Roads Will Better Quebec Trade

WHAT Quebec needs mostly, from the standpoint of a trade developer, is better roads, in the opinion of George C. Davis, manager of the wholesale hardware firm of Frothingham and Workman, Ltd., Montreal. Mr. Davis has held this view for some time and his trips over the territory from time to time have impressed this need upon him the more.

Even adjacent to the City of Montreal the road conditions are anything but satisfactory, Mr. Davis pointed out to HARDWARE AND METAL. That there will be improvement in due time, Mr. Davis is hopeful, and the time is ripe, it would seem, when this great question should receive the careful attention of all who are interested in the bettering of trade conditions.

Farmers Are Prosperous

Mr. Davis pointed out that there was much wealth in the farming sections of the province. Fortune has smiled on the Quebec tiller of the soil, and some of this wealth is being used to develop the farms, to build more and better fences, etc. It presents an opportunity for the hardware dealer.

As an evidence of the prosperity existing, Mr. Davis referred to the better collections that were coming to hand. These had been splendid of late, and there is scarcely a truer index of the condition of a city, a community, or a country than that of the promptness with which debts are liquidated.

Fencing a Big Seller

Mr. Davis said that fencing had been a big seller. This indicates that more building has been undertaken and that there is an evident determination to keep properties fenced as crops are sown. Recent sales of fencing, barb wire, etc., have been so heavy in some instances that a temporary scarcity has been reported from one or two quarters. This, it transpired, had resulted from the failure of the trade to anticipate their wants far enough in advance. Then when more goods were wanted, and others also wanted their orders filled, the result was a grand rush, which taxed the jobbers' capacity to handle with their usual promptness.

Alex. Williamson, formerly travelling representative for Starke-Seybold Ltd., Montreal, and who enlisted in the First Canadian Tank Battalion, has returned and is again with the above firm.

J. G. Falls, of the New Haven Clock Co., with headquarters at Toronto, was in Montreal this week.

Mr. Schoeke, representing the Triumph Clock Co., Oneida, N.Y. is expected in Montreal this week.

Incorporations

The Spardon Electrical Products Co., Toronto, has been incorporated with a capital of $50,000.

The Mount Royal Rubber Co., Ltd., Montreal, has been incorporated to deal in rubber goods of all kinds, with a capital stock of $500,000.

Ontario Abrasive Wheels Co., Ltd., Prescott, Ont., has secured a Dominion charter to manufacture and deal in abrasive wheels of all kinds. The capital stock of the company is $30,000.

CHATHAM, ONT., RETAILERS TO HOLD PICNIC

The Retail Merchants' Association, of Chatham, Ont., at their meeting recently, unanimously passed a resolution setting aside Thursday, July 10, as a holiday and specifying that if it is possible to secure a suitable boat for the day, an excursion be run to Walpole Island, and if a boat is not available the picnic be held at Government Park.

The following committees were named to make the necessary arrangements, the first named to be the chairman of the committee: trip arrangements, E. Wanless, H. G. Hodges and S. Stone; publicity and printing, E. G. Gammage, H. Mounteer and E. White; refreshment, A. Sterling, C. R. Stevenson and W. J. Easton; sports, E. C. Brisco, B. F. Brown and E. E. Edgett; prizes, C. Austin, W. Foreman, N. Bilskey, A. C. Trudell and R. Boyes.

President Wanless reported that as a result of Organizer Newton's visit to the city last week about 16 new members were added to the organization.

L. H. Veale addressed the meeting on behalf of the retail clerks, asking that the weekly half holiday be extended to include the Thursdays of September. He stated that the clerks desired the half holidays to extend from the first of May until the last of September.

A NEW SERVICE FOR THE MERCHANT

Retail Merchants' Association Inaugurates an Advertising Department

Still another branch of service is being inaugurated from the provincial office of the Retail Merchants' Association at Saskatoon for the benefit of its members in Saskatchewan and Alberta, which should prove of value to every member who takes advantage of the service in extending his business, whether he lives in city, town, village or hamlet.

It is to be known as the "Advertisers' Service Department," and is meant to give practical service to every merchant who advertises or intends to advertise. Briefly stated, the idea of this new service is as follows:

To write newspaper advertisements for the members of the association. To supply illustrations for same. To draft direct mail advertising. To address and mail envelopes. To draw up complete advertising campaigns to pull both city and country trade. To write business-building envelope enclosures.

CLAY PRODUCTS MEN MEET

The 17th annual convention of the Canadian National Clay Products Association was held in Montreal last week.

The report of the secretary showed over one hundred clay products manufacturers. Among the delegates present was Sidney Higgins, of Wm. Higgins & Son, of Manchester, England.

The following addresses were delivered during the convention: "Use of firebrick in the steel and clay products industries." by W. H. Grant; "Pave with brick," by W. P. Blair; "Machinery and Dryers for large-size tile," by L. Haigh; "Brick tests and investigations," by W. W. Pearse, city architect, Toronto. Other speakers were A. F. Greaves-Walker, George Clifford, Theodore Randall and Col. Trotter. Officers elected for the year was as follows: Past president, Thos. Kennedy, Swansea, Ont.; president, W. M. Burgess, Todmorden, Ont.; vice-presidents, R. H. New, Hamilton; Millard F. Gibson, Toronto; T. H. Graham, Inglewood; secretary-treasurer, Gordon G. Keith, Toronto; councillors: J. S. McCannell, Milton, Ont.; N. T. Gagnon, Montreal; W. H. Freeborn, Brantford; H. H. Hallatt, Tilbury; F. B. McFarran, Toronto; C. B. Lewis, Toronto; C. A. Millard, Toronto; Andrew Dods, Mimico, Ont.; chairman technical education committee, M. F. Gibson; chairman title committee, H. H. Hallatt; chairman entertainment committee, C. A. Millar.

Vancouver Electrical Association Meets

A very successful electrical convention was held at Vancouver under the auspices of the Vancouver Association of Electrical Contractors and Dealers a few days ago. The gathering was a very representative and largely attended one of the leaders of the electrical industries of Canada and the United States.

Mr. E. Brettell, of the Electrical Supply & Contracting Company of Vancouver, presided, and William McNeill gave the opening address.

Other speakers who addressed the meeting were John D. Bell, general manager Canada Wire and Cable Company; Frank Groome, sales manager of Benjamin Electric Manufacturing Company of Toronto; R. E. Callaghan, manager Toronto branch of Majestic Electrical Supplies, Limited; H. Pim, Vancouver, district manager of the Canadian General Electric Company, and W. L. Goodwin of New York.

A luncheon was held at the Hotel Vancouver, at which the principal speaker was W. L. Goodwin, of New York. An interesting address by S. A. Chase, special representative Westinghouse Electric & Manufacturing Company of Pittsburgh, was a feature of the programme.

Among those attending the convention were: W. L. Goodwin, New York; Samuel Adams Chase, Pittsburgh; R. E. Callaghan, Toronto; Frank Groome, Toronto; A. J. Soper, Montreal; J. Short, Cumberland; S. W. Halls and W. T. Goward, Victoria; R. F. Hayward, Vancouver; W. McNeill, Vancouver, and A. Lewis, Nanaimo.

Returns From Overseas

Trooper Chas. A. Merrick, A squadron, C.R.C.R., Winnipeg, returned from overseas a few days ago, and is at present under canvas at the Fort Osborne Barracks, with his squadron, awaiting his discharge. Prior to going overseas Mr. Merrick had been associated for fifteen years with the Merrick-Anderson Co., Ltd., Winnipeg, coming from MacGregor, Man.

CHARLES A. MERRICK

Winnipeg, Who Has Recently Returned From Overseas.

His association with the company covered practically all the departments in office work as well as the warehouse, and for the past few years he represented the firm in Alberta.

He is the son of John B. Merrick, general merchant, of MacGregor, Man.

His many friends will be glad to know that Charlie, as he was familiarly called, has become an expert in peeling potatoes for the army.

G. C. DUFRESNE GOES TO CHICOUTIMI

G. C. Dufresne (Charlie), late with Lewis Bros., Limited, Montreal, leaves this week to assume the managership of the hardware department of the Cote-Boivin Company, Chicoutimi, Quebec.

Mr. Dufresne served six years with the firm of Prudhomme Freres, Montreal, with which firm he connected himself after leaving school. For the past fifteen years he has been associated with Lewis Bros., Limited, and for seven years of this time he has been head inside salesman.

Mr. Dufresne will be extended the best wishes of his many friends in Montreal and elsewhere, and in which HARDWARE AND METAL joins.

A CORRECTION

Inadvertently, in reporting an interview last week with A. C. McCuaig, Montreal manager of the Dominion Linseed Oil Co., Ltd., it was stated that Mr. McCuaig was manager of the Canada Linseed Oil Mills, Ltd. This should have read: "Dominion Linseed Oil Co., Ltd., and of which Mr. McCuaig is the manager."

STEEL TROUGH AND MACHINE CO., LTD.

Catalogue No. 30, issued by the Steel Trough and Machine Co., Ltd., of Tweed, Ont., contains thirty-two pages in which are listed steel tanks for cisterns, round galvanized tanks, stock watering and storage tanks, round galvanized steel tanks, wagon tanks, sheep dip tanks, pneumatic water supply systems, pressure tanks, steel shipping barrels, lawn rollers, tank heaters, gasoline tanks, water troughs, feed cookers, chimney tops, coal chutes, steel baths, sanitary chemical closets, ventilators, galvanized steel laundry tubs, lavatories and washstands, welded copper steel whey tanks, evaporators, sap pans, dough troughs, gasoline garage outfits, self measuring pumps, steel factory equipment, shelf boxes, shop and foundry barrels, garbage cans and special lines. The catalogue is profusely illustrated. Copies will be sent to readers of HARDWARE AND METAL upon request.

NATIONAL MANUFACTURING CO

The catalogue of National garage hardware issued by the National Manufacturing Co., of Sterling, Ill., lists the garage door sets made by the firm. It contains 32 pages and is attractively illustrated. Readers of HARDWARE AND METAL who desire copies may obtain them upon request.

Veranda Guards

J. L. Demers, Thetford Mines, Q.—Where can I buy veranda guards in Canada, made of cast iron of fancy pattern?

We refer you to Geo. B. Meadows Co., Ltd., Toronto, and the Dennis Wire and Iron Goods Co., Ltd., London, Ont.—Ed.

Water Boiler

Sakion Bros., Digby, N.S.—Will you advise us the maker of the Improved Buffalo water boiler, No. 016?

Your inquiry has been referred to the Canadian representatives, Steel and Radiation, Ltd., Toronto.—Ed.

Furniture Manufacturers

H. L. Martinson, Cottam, Ont.—Where can we buy furniture in Canada? Furniture manufacturers are: The Canada Furniture Manufacturers, Woodstock, Ont.; Knechtel Furniture Co., Hanover, Ont.; The Geo. McLagan Furniture Co., Stratford, Ont.; Waterloo Furniture Co., Waterloo, Ont.; Paquet & Godbout, St. Hyacinthe, Que.—Ed.

Importance of the Cash Discount

Being Extracts From a Pamphlet Issued by Wallace D. Simmons, president, Simmons Hardware Co., St. Louis—How It Works—Trade Acceptance Not a Substitute—A Subject of Interest to Canadian Merchants.

WALLACE D. Simmons, president of the Simmons Hardware Co., of St. Louis, has published a pamphlet entitled "The Importance of the Cash Discount in the American Credit System," in which he strongly opposes trade acceptances.

Explaining the origin of the American system, Mr. Simmons says:

"The wholesale merchants who worked out the American open account—single name paper—cash discount system recognized the risk involved in one type of credits as compared with another. They offered to the pioneer merchant of limited capital every assistance and facility to enable him to build up his business rapidly, to make it profitable and to get on a stronger financial footing. They gave him every inducement and encouragement through that course to get in position to pay his bills promptly upon receiving them, and in line with that policy they offered to the man who was in a position to eliminate or minimize credit risks, compensation for so doing. This was a practical, sound and farsighted adaptation of the idea of mutual or group credit insurance. The manner of working it out was somewhat unusual, but the principle was there and the effectiveness. While the situation in this country has changed somewhat, and at present materially differs in some sections, careful study will show that the difference is not so great after all."

Mr. Simmons says that we should keep carefully in mind the principal elements of the cash discount system, which he thinks are the following:

How It Works

First—That the cash discount is distinctly a quid pro quo. It is a price paid for a distinct value received. The quid is the amount of the discount allowed. The quo is the shortening of the period of credit risk effected by the payment of the account on or before a definite date much earlier than its net due date. The discount represents the value of the use of the money for a definite period, plus the value of eliminating the credit risk by final settlement of the account within a period very much shorter than that of its net due period. On terms sixty days, with 2 per cent. cash in ten days, it means that the debtor has the alternative of paying the bill in full sixty days from the date of the invoice, or he has the option of deducting 2 per cent. provided he places the funds in the hands of his creditor, so as to release him from all further risk at least fifty days before the account is due and payable. Two per cent. for fifty days is practically at the rate of 15 per cent. per annum.

When Custom Abuses Principle

There is, however, abuse of the "cash discount" plan to which I wish to refer. At least it seems to me to be an abuse of the principle involved and by those who can ill afford to abuse it—I mean those who offer the discount to others.

I refer to the custom of making the terms of credit so short and the so-called "cash discount" so large, as practically to make the terms net cash. It is either abuse or the evidence of conditions existing in that line of business which create extreme credit risks.

For instance, in some lines of merchandising the usual terms now are 30 days with 5 per cent. or cash in 10 days. That practically means that no man who cannot discount can afford to stay in business. His competitors with more capital, will buy goods under those circumstances so much lower as to make it only a question of time when they will force him out entirely.

A differential of that kind is not a "cash discount" as I see it. It is simply going through the motion of offering a "cash discount" but in reality selling goods on terms—10 days net.

I have no quarrel with the man who makes his terms 10 days net—and hence offers the goods only to those who have or can get ready cash to pay for them. I do quarrel with any plan which makes it very difficult, if not impossible, for any small merchant to do business in this country unless he has sufficient capital to buy all his goods for cash. I am a great believer in giving the able, thrifty, industrious young man of small means a chance to branch out for himself. I believe the American credit system gives just such an opportunity with adequate protection to all interests involved. I believe that plan is in line with one of the basic ideals of our country, one of the prime assets of American citizenship—the chance to prosper and progress to whatever extent each man has in him the requisite capacity, energy and business ability to take advantage of the opportunities which abound in this great republic.

There is another abuse of the "cash discount" which the business men of this country have lately been urged to adopt and which is so full of fallacies that it would take a large volume to cover them all in detail.

The idea is that we should allow the "cash discount" to a man who sends us a trade acceptance. That is simply giving the quid without getting the quo—giving the "cash discount" without getting the cash—giving the value of eliminating the credit risk, and then having it extended instead of eliminated—allowing each customer to borrow money on our credit by endorsing his paper, and then paying him for the privilege of doing so.

For instance, those of us who are doing business on terms of 60 days with 2 per cent. for cash in 10 days are urged to offer to our customers the privilege of sending us a 90 day trade acceptance within 10 days and deducting the 2 per cent. "cash discount." Let us see how that would work out as compared to the present arrangement.

Roughly speaking, about half of our customers discount their bills—it is probably more than half in dollars and cents, therefore we get half of our money within 10 days. We get cash and the transaction, together with the credit risk, is terminated. On the other half, the large majority pay their bills at the end of 60 days. Some few run over a little bit, but the average of the whole, including the half which pays in 10 days, results in about a 45-day credit period with an allowance of 2 per cent. on one-half of the total of 1 per cent. of the whole amount.

The plan we are urged to adopt instead of that, is to allow 2 per cent. to everybody, but to charge them 1½ per cent. interest for 90 days which interest we in turn would pay to the bank. Therefore, we would be out 2 per cent. discount on the whole business instead of 1 per cent.

Then, in order to transfer this loan to the bank we must endorse each customer's note for the full amount of his purchases and wait for an average of 90 days instead of 45 for the closing of the account and our liability and the elimination of the credit risk.

The "cash discount" system provides an adequate means of governing two important factors in domestic trade, one that of enabling the new merchant to take advantage of opportunities, to grow by availing himself of the credit accommodations offered by those firms whose representatives visit him regularly and are personally acquainted with his business, his methods and his likelihood of success.

It also provides amply and correspondingly for the man who does not need credit accommodations, but who can, so to speak, carry his own credit risk.

Mr. Simmons argues that the use of the trade acceptance would practically mean the abandonment of the cash discount and says: "If we should allow ourselves to be led to abandon the American systems by substituting acceptances for cash discounts, it would, of course, mean the substitution of the payment by notes for payment by cheques, and if the scheme is worked out according to the evident design, it would mean that for every one of our invoices we would have a note which we would have to pass to our banks for collection, and on each one of which there would be a collection charge. To sum it all up in a nutshell, our American system has proven itself to be a good system—and we would be very foolish to allow anyone to lead us to abandon it.

THE CLERKS DEPARTMENT

It's the Go-Getter That Wins Out

And the Time For Him to Go and Get Things is When the Other Fellow is Afraid to Start

An interview with Walter H. Cottingham, president of the Sherwin-Williams Co., by Mary B. Mullett in the "American Magazine."

A FEW months ago hundreds of business men were sitting in their offices, looking solemnly down their noses, and declaring that they were going to hold back on plans for the future, because no one could predict what conditions would be.

At precisely the same time, another man was sitting in *his* office, with a smile on *his* face, laying a campaign to *increase* the business of his organization by a million dollars a month!

This man was Walter H. Cottingham, president of the Sherwin-Williams Company of Cleveland, Ohio, a whole-souled optimist who works on the somewhat startling theory that a good time to make your own business better is when the other fellow believes that his is going to the bad.

Back in January, when some men were talking retrenchment, Cottingham talked Expansion. When others said "Caution!" he said, "Courage!" While some were holding back and wondering how business was going to be, he said "Business, with us, will be just what we make it—and we are going to make it better than it ever was before!" Whereupon he started his campaign for a million-a-month increase.

"In my opinion," said Cottingham to his men, "the big thing just now is to get rid of the idea in people's minds that the bottom is going to drop out of things. It's not going to do anything of the kind. Courage is what we need, courage to take hold when the weaklings are holding back.

"The time to get business is when the timid and hesitating are afraid they *can't* get it. This is the biggest campaign we ever started; and we have put some pretty hard ones across. Obstacles? Sure, there are some! But obstacles are the very things that develop strength, energy, and resourcefulness. We've got the confidence, the courage, and the enterprise. I know what you can do. I've never yet been disappointed in you, and I know I'm not going to be now."

Two months after he started this campaign I had a long talk with Walter Cottingham. The day was raw and depressing, but none of the outside gloom had found its way into his office. Across a desk as clean as a ship cleared for action, he talked about the great game of business with the enthusiasm of a boy; or, better still, of a man who never has lost the freshness and the fire of youth.

"You know," he said to me with a laugh, "I admit that I *love* business. To me it is the greatest game in the world; the one there is the most excitement in playing and the one that is the most worth winning. Because the man who wins, by conducting a fair, square, prosperous business, helps everybody in his community and the effects spread in a widening circle throughout the whole country.

"I honestly believe there is no way in which a man can be of greater public service than by running a legitimate and successful business. To do that, you have got to love it. It is because Americans are chock full of enthusiasm for their work that they are the greatest business men in the world."

One of his favorite sayings is, "A dead fish can float with the stream; but it takes a live one to swim against it." In his own career he has shown that he himself belongs among the live ones, for whenever the current sets against him it is just a signal to him to strike out all the harder.

As a boy and a young man the tide was dead against him. Fifty-two years ago he was born in the village of Omemee, in Canada. His English mother died when he was only six; and his Irish father lived only a year or two longer, leaving his affairs in such bad shape that there was no money for his children.

For a while the boy lived with an older sister. But, young as he was, he had the courage and independence which make him a fighter to-day; and before he was in his teens he began to shift for himself. He spent his days in work and his evenings at a night school.

At fifteen he got his first real position as clerk in a hardware store. Back in his mind, in all those years of his boyhood struggles, was one determined ambition; the ambition to have his own business and, especially, a business in which he could be manufacturing something, not merely selling what other men made.

"When I was about twenty," he told me, "I bought for twenty-five dollars a formula for mixing gold paint; and I used to experiment with it in my room in the boarding house where I lived. The result was most awful smells, which got me literally into bad odor with my landlady; but I myself was so pleased with what I accomplished that I gave up my position and, at twenty-one, hung out my sign and started in business for myself.

"Then I bought another formula, this time for a roller composition for printing presses, and I mixed the gold paint myself and made the roller composition in a kettle. I had one boy to help me; he and I constituted the whole "force." But I managed to get business, and I expanded it as fast as I could.

"That is one of my business creeds—that the more nets you have out, the more fish you are likely to get. I mean that your business should not depend on the sale of one product alone. Always be on the alert for new lines that you can add. Demands change; and you must be ready to meet, or to create, new markets when the old ones fall off. American business men have been learning this lesson during the war, and if they have really taken it to heart it is going to stand them in good stead now. You can't go on blindly making the same thing, year in and year out. You must be looking ahead and saying, 'This particular thing will be hard to sell this year, but it looks as if there would be a demand for that other thing, and we'd better be getting ready for it.' A policy like that has saved many a business failure. It is the old idea of not having all your eggs in one basket. Make as great a variety of products as you can within the scope of your business. Be on the alert for a change in demand, and give people what they want instead of pig-headedly trying to force sales of something for which there is no market.

"Well, I followed this idea myself. I knew there was a limit to the gold paint business, so I kept branching out, and before I was twenty-five I owned two companies and was a member of several other firms. I looked even younger than I was; so much so, in fact, that I was afraid to let people know I was the real head of the concern, for fear they would think I was only a boy and hesitate about giving me orders.

"I remember that one time a customer from another town came to my office and, when he found that my name was Cottingham, asked me patronizingly if my father was in.

"'No, sir,' I said.

"'Will he be in soon?' he demanded.

"'I'm afraid not,' I admitted. 'He—well, he's dead.'

"The man looked at me sharply, and then said, 'You don't mean that *you're* Walter Cottingham?'

"I owned up that I was—and I remember blushing like a girl as I did so. Another time a customer from the West, to whom I had shipped some pretty big orders, wrote that he was coming to Montreal and that he was looking forward to seeing our factory. As my 'factory' was merely a little room in a shed, I was considerably disturbed and asked a friend of mine what I should do.

"'Why,' said he, 'I guess the best thing you can do is to take him down to the canal and point to all those fine plants on the other side, and tell him the factory is over there. If he insists on being taken across the canal—well, I guess you'll just have to drop him into it!'

"I believe that the thing that developed me most in those early days was the fact that I married young, and got the right kind of a wife. I was only twenty-two when I married and I was just starting my little gold paint business, with no assurance that I could support a wife. But there are two ways of meeting responsibility: you can let it scare you and make you afraid to move; or you can get courage and inspiration out of it. As for marriage, the right kind of a wife *gives* her husband courage and inspiration. So I believe in marrying young; but I also believe in choosing the girl very carefully.

"Your wife can help you; so can your parents, your boss, your associates, your observation of other men. But, after all, the one person who can help you most is yourself. You've got to have fighting blood in you, or the world will walk right over

you and never know you were there. And you've got to have some incentive to make you *want* to fight. That is why so many successful men are those who began as poor boys. They *had* to fight or go under. Rich men's sons are actually at a disadvantage, because they don't have to put up any kind of struggle to get the things all normal human beings want—comfort and independence, pleasure, position, a reasonably sure future.

"Poor boys are not naturally any brighter or abler than rich boys. The reason they achieve is because they have an incentive, a spur. There is one incentive, though, which any young man can have, no matter what his circumstances are—that is, the determination to make something of himself. He may not be pushed by poverty, but he ought to be driven by the ambition to make himself count in the world. Sitting on the side lines and watching other men play the big game of life seems to me a pretty feeble part in the scheme of things. I don't want my own boys to be content with it. I want them to get into the business game and play it to win, for themselves and for their team-mates.

"That is why I did not send them to college. I'm not down on colleges. But it seems to me that when a young man has definitely chosen business for his career he can spend those four years getting actual experience which will be almost invaluable to him. There are good arguments on the college side, I know. But in my own experience the best records, take it as a whole, have been made by the men who went into business at the age when a boy would be going to college.

"That first boy I had in my little gold paint business is now the manager of one of our big branches. Four of our important managers began with us as office boys, and two began in minor clerkships. I am always on the watch for bright boys. One of the four I just mentioned was the son of a neighbor of mine, and I had my eye on him for quite a while. He was always eager and alert and doing things. I knew, too, that he was mighty good to his mother, and I liked that. So when there was an opening, I got him into our office. And to-day, as I said before, he is one of our branch managers.

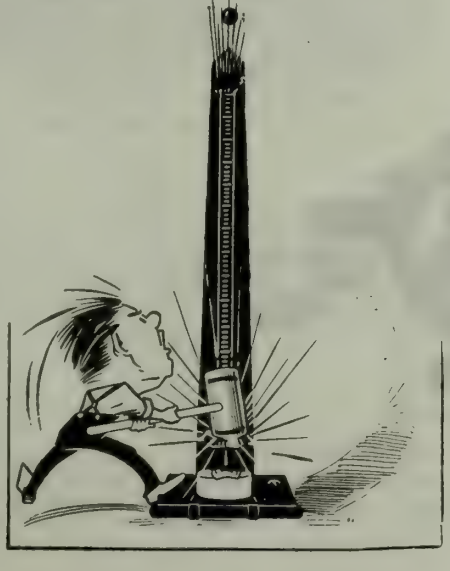
"I think a good many parents don't have the right attitude toward a boy's work. They are very apt to think the chief thing is the amount of pay he gets, and they will let him take some easy job which perhaps pays him pretty good wages, but which doesn't give him the right training and experience. Boys ought to be started right; for the start is going to influence their whole future career. In my judgment, the best place to start them is in a big organization which is managed on sound principles and by up-to-date methods.

"And after he is started, neither he nor his parents should expect too much in the way of quick results. That is the time when you, if you are a boy, must be learning patience, perseverance, and pluck, just as surely as you must learn the routine of business. If you know the training is good, stick to it. Don't be impatient if your pay isn't increased as fast as you want it to be. You are probably getting more out of the business than your employer is getting out of you. Show your eagerness to learn, do even more than is expected of you, and the money question will take care of itself. Even if it does not, you will be ahead, just the same; for knowledge and industry never have to wait for a market.

"Backbone and pluck and staying power make a good fighter. A man met one of our salesmen a while ago, and said to him, referring to our organization:

"'I understand that's a fine place to work in, but a darned hard one.'

"I guess he was right, too; but from my point of view it was a compliment. I believe in hard work. I like it. I do ask my men to work hard. But I have never asked them to work harder than I have been willing to work myself. And hard work brings achievement—which is the greatest joy and satisfaction in the world.



"In our organization we have what we call our 'Top-Notcher' competitions. I started them, and I have kept them going in the face of a certain amount of opposition. Each year we make out an estimate of the results which the men in the various positions should get during the twelve months. It is too elaborate for me to explain all the details; but every man who comes up to his individual estimate gets a bonus; while the ones who make the highest scores, above the estimates for *them*, are 'Top Notchers,' and receive special prizes. We have had men who were 'Top Notchers' several times. They make a score occasionally of two hundred and three hundred per cent. of the estimate for them. The 'T. N.'s, as we call them, belong to the Top-Notcher Club.

"I believe this plan is a good thing, both for the individual and for the organization. It stimulates a man to show what he is really capable of. And it helps me to pick out the live, energetic men. Every employer knows how hard that is in a great organization. When it is small, you know all your men and can watch their work. But when it grows so that they are scattered all over the country, it is impossible to do this. And it is discouraging to the men themselves to think that their best efforts may go unrecognized. But with the scheme that we have worked out a man can show what he is capable of, no matter where he is. And as we are always wanting to know where to put our hands on a good man when we need him, the plan is distinctly helpful to us.

"I believe in keeping a man in the organization if it can be done. I believe in making men feel that service and loyalty are appreciated. We give certificates and gold watches to our twenty-five-year men, and we always make a kind of celebration of it. In Canada, where I built up the business and started most of these men myself, I add my personal check for a thousand dollars.

"I believe in having convictions, getting our men together from all parts of the country, to swap ideas and tell each other the news and find out what the central office is doing and planning. We have regular 'Get-Together Clubs' where the men meet and talk and learn how to express themselves with clearness and confidence.

"That scheme grew out of my own experience. I used to think I had some pretty good ideas, but when it came to *telling* about them, I couldn't do it. I remember coming down here to a directors' meeting when I was a young chap up in Canada. I had some ideas I wanted to put across, but I couldn't argue with those men. I hadn't the confidence, nor the power of expressing myself. When it came to talking, they could put it all over me. Going back on the train, pretty discouraged and disgusted with myself, I made up my mind I'd learn how to talk and, if necessary, to talk on my feet. It is a good thing for anybody to learn; and, just as soon as I had the chance, I started the 'Get-Together Club,' and went into it myself.

"As I said before, I believe in conventions, banquets, celebration. Enthusiasm is contagious. It is an electric current, and men need to be brought close together, so that the spark can jump from one to another."

The great secret of Cottingham's success is his own fighting enthusiasm. He is not merely the kind of optimist who thinks it is a nice world, on the whole, and that conditions are pretty good, take them by and large. He is the kind that tries to make "pretty good" conditions better. And the way he does it is to fight poor conditions and to enlist everybody he can in the same spirit.

Because he loves business, his interest is naturally keenest in that direction. And because he considers men the most vital factor in any business, he is always working and talking and writing in the effort to develop them and to help them develop themselves. He is a lecturer at Harvard, in the School of Business Administration. But his greatest interest is in the men of his own organization, and, in the twenty years since he became general manager of the company, he has talked to them on one subject and another until he has formulated a definite sort of creed about men and business. The very first thing about which he talked to them was "enthusiasm." In a letter to "*The Chameleon*," the house organ of the company, he said:

"Enthusiasm is a good thing. It is good to be enthusiastic over what you sell. It is good to be enthusiastic over the firm you represent. It is not a bad thing to be enthusiastic over yourself. But it is even greater if you can instill enthusiasm in *others* for your goods, your firm, and yourself.

"If you cannot be enthusiastic over your business and your firm, drop it. Get into something where you *can* be enthusiastic; your chances of success will be greater there. Enthusiasm makes the heart light and the mind bright. But it must always be genuine, or it is *not* enthusiasm, but poor hypocrisy and easily detected."

I spoke of his desk being like a ship cleared for action. It was a flat-topped affair without the inviting pigeonholes which are so often a temptation to store up unfinished business. On the wall opposite the desk was a framed placard which bore the inscription in large letters:

DO IT NOW

Cottingham is a great believer in slogans and mottoes; and this is one of his favorites.

"There is only one way in which a busy person can keep up with his work," he said; "and that is to do it *now*. One postponement merely leads to another. There are days when the work on your desk will pile up so that it seems impossible to get it out of the way. The temptation is to turn away from it and wait until you have more leisure.

"Don't do it! Wade into the pile. Tackle the first thing that lies in front of you. Never mind if it is the most difficult. Get rid of it, and take up the next. Clean up the desk. It's the only way to keep abreast of your work and to be ready for more. It will develop in you a great capacity for work. *And the difference between a big business man and an ordinary one is largely a matter of capacity for work.*

"If you have any work left undone—do it now. If you have planned work which you haven't begun—do it now. More good ideas perish than ever see the light of day; and they do it simply for the want of action.

"The most valuable thing in the world is time; for time is opportunity. There is always a way, no matter what the conditions, for the man who learns how to use time. The man who has learned how to make the

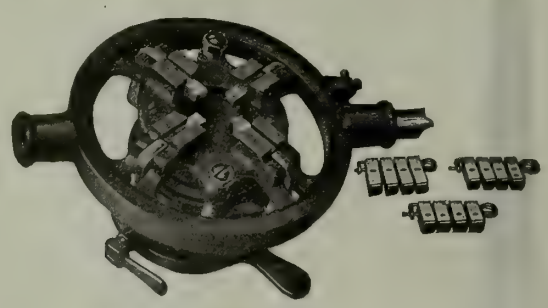
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

WIDE MOUTH OILERS

Whereas a wide mouth oiler is not a new line to the Canadian trade, the Wrico line of wide mouth copper plated heavy steel oilers now being turned out by the E. T. Wright Co., Ltd., Hamilton, is, and further it is indicated that this is the first time this line of heavy steel copper



Wrico Wide Mouth Oiler.

plate oilers has been made in Canada. The manufacturers state that these oilers have the collar attached to body of can without soldering or brazing. Screws are made from 24 gauge high grade steel, with rolled thread, and bottoms are made of spring steel. They are made in six sizes.

RATCHET RECEDER

To provide for the performance of pipe threading operations in trenches or near to walls, and other places where the amount of space is limited, a ratchet receding pipe threader has been placed on the market by the Greenfield Tap & Die Corporation, Greenfield, Mass. The ratchet mechanism, it is stated, is incorporated right into the die stock instead of being made an attachment. The head is so designed, it is claimed, that the pulling strain of the handles comes directly back of and in line with the chasers, thus minimizing the pull and preventing danger of trouble caused by twisting strains. The threader, it is stated, is made with two-handle lugs, and two handles are furnished with the tool. When it is to be used with the ratchet mechanism, one of these handles is taken off, and the tool will then, it is stated, swing in a 14-inch circle; but it is equally feasible to disengage the ratchet, screw the second handle into place in its lug, and use this tool just as the regular receding pipe threader is operated.

Pipe Receder

LIBERTY ADJUSTABLE CULTIVATOR

The J. E. Gilson Co., of Port Washington, Wis., has just announced a new 5-tooth Liberty adjustable cultivator, which, it is claimed, is an ideal tool for all-round garden work in the city garden or on the truck farm. The special design of its cutting teeth makes quick and thorough work of cutting weeds, the

Liberty Adjustable Cultivator.

manufacturers state, and at the same time thoroughly cultivates the soil between the rows. The cultivator is adjustable to different widths between the rows and the teeth are so sharpened as to be in cutting alignment at all widths. The teeth of the Liberty cutter are made of malleable iron, and the cutting edges are properly sharpened. The Liberty cultivator is furnished for either hand use or in connection with a wheel outfit.

BLOW TORCH

The Detroit Torch and Manufacturing Co, Detroit, Mich., have recently put on the market what they term their No. 2 quart size Detroit torch. It has a brass

Detroit Blow Torch

tank, said to be heavily reinforced, thus being made rigid. The burner is tapered and of special design, it is claimed, giving equally good service in or out of doors. It has hook and support for soldering coppers. It is indicated that the feed vein encased in the burner body makes a powerful generator, as it preheats the gas, making it possible to produce an intense blue flame. Other points the manufacturers enumerate are that the pump is automatic and of simple construction. Lead gaskets used on all fittings make the joints tight. The wire wheel on needle never gets hot and the concave bottom takes the place of a funnel in filling the tank. Every part is thoroughly inspected and tested.

DOUGALL DA-COTE

The Dougall Varnish Co., of Montreal, has introduced a new line of motor car enamel. Dougall Da-Cote, as the new line is called, is put up in quart, pint, and half pint cans. There is a range of ten shades in Da-Cote, including black and white.

While essentially a motor car enamel, it is stated Da-Cote may also be used for bicycles, velocipedes, buggies, baby carriages, etc. It dries overnight.

CONTRACT LET FOR WIRE FACTORY

The contract for the erection of a factory for making wire gates, fencing, etc., for the Page Wire Fence Company, Montreal, at Three Rivers, Quebec, has now been let. The contract price is $150,000. This is the factory referred to in a special news paragraph in HARDWARE AND METAL some months ago. E. Laurie and Co., Montreal, are the contractors.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LINSEED oil is again to the fore in the hardware markets, quotations showing advances ranging from 15c to 21c per gallon over figures in effect just seven days ago. This is in line with predictions made last week and there seems every reason to believe that the peak is still to be reached.

Argentine seed seems to be finding its way to European markets rather than American and consequently supplies of seed are not accumulating from this source. Five dollar seed is talked of now. Paint manufacturers are big buyers of linseed oil now to complete orders for mixed paints which are pouring into their offices. Retailers are buying their absolute requirements which, however, aggregate a very nice total.

Turpentine seems to vie with linseed oil for premier position in hardware featuredom. A sharp jump has occurred during the week, amounting to 20c per gallon. An unusual situation is revealed in the South where supplies at this time of year usually aggregate 7,000 to 8,000 barrels, but at the present time are very little over 2,000. Demand from Europe continues to be heavy and no easing away in the sale is apparent. What the outcome of present unusual developments is is uncertain, but high prices seem to be a prospect for some little time to come.

A reduction of automobile tire prices, which is variously estimated at from 12½ to 15%, was determined upon the first of this week. The big factor in bringing about the lower prices has been, it is stated, the releasing of large stocks of rubber which had accumulated at far Eastern points awaiting shipping space. Space has been secured and outlook is for ample deliveries from now forward.

Some points record a further advance in shellac this week. Supplies of this commodity are decidedly limited and there seems to be no immediate prospect of any improvement in this respect.

Jobbers report business for the month of May well ahead of last year. Great activity is now manifest in lawn mowers, screen doors, garden hose, refrigerators and kindred lines. All summer lines of stoves are decidedly active and prospects for business are decidedly good.

MONTREAL MARKETS

MONTREAL, June 5.—Changes of importance have been made this week in hardware markets. Shot basis has been reduced to $16.20 per 100 pounds. Screw hinge discount is now 12½ per cent. Clothes pins of the common variety are materially advanced and iron handles are reduced. Wire goods, such as screw hooks and eyes, etc., are reduced in price, while horse clippers are higher. Celluloid handle table cutlery is also advanced. Some lines of inner tubes and also automobile tires are being quoted on a reduced basis. Lead wool is down one cent and wire solder is up. Yellow brass has advanced one cent per pound. There is a steady demand from the country and nails, coal oil and gasoline are decidedly active.

Shot Base, $16.20; Screw Hinges Down

Montreal.

SHOT, SCREW HINGES.—Reduced prices are in effect for screw and strap hinges. The new discount quoted here is 12½ per cent. Ordinary chilled shot is new being quoted at a base price of $16.20 per hundred pounds.

Clothes Pins Up; Iron Handles Down

Montreal

CLOTHES PINS, HANDLES.—Advances are made in this market for clothes pins. This is very considerable, the common style advancing from 80c to $1.50 per box and the square style from 80c to $1.25. Potts' iron handles are reduced in price from $16 per gross to $15.

Wire Goods Less; Tires Also Decline

Montreal.

WIRE GOODS. TIRES.—Through a change of discount prices are lower on various wire goods such as screw hooks, gate hooks and eyes, etc. The new discount is 85 per cent., the previous one being 82½ per cent. Declines are made in various automobile tires. As an indication of this tendency the following prices will serve to illustrate: For 3 in. plain, prices are reduced from $17.90 to $16.55; studded, $19.25 to $17.40; nonskid, $20.60 to $18.20, while inner tubes (grey) are down to $2.50 from $3 each.

Horse Clippers and Table Cutlery Up

Montreal.

CLIPPERS, CUTLERY.—Advances have been recorded for horse clippers of Newmarket variety. These, selling previously at $32.50 per dozen, are now priced at $37.80. Table cutlery is also higher. This is for the celluloid handle varieties and the change is effective at once.

Steel and Iron On Held Basis

Montreal

STEEL AND IRON.—Features of the iron and steel market here are limited. The basis is still unchanged and selling is conducted on a fair and seasonable demand. Country orders are rather heavier than those from the local trade.

Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22

Country Demand Steady For Nails

Montreal.

NAILS AND WIRE.—Demand has been well maintained for nails from the country, and this evidences a considerable amount of building there. Orders are frequent and the tonnage each week is considerable. Within the city there is not so much demand as work in hand is more limited. Prices remain unchanged at $4.75 for standard wire and cut nails. There is a steady and even quite a heavy movement of various kinds of wire fencing, and barb wire is a big seller. Smooth steel wire base is still $5 per 100 pounds.

Ample Stock of Cordage; Steady

Montreal

CORDAGE.—No indication of any increases this week, and the raw material supplies remain plentiful. Maritime orders are well up to the mark, with a more or less steady price in sight. Prices are unchanged with pure manila based at 34c, British manila at 30c, and sisal 27½c per pound.

Dealers Buy Stoves; Summer Wares, Too

Montreal

STOVES AND WARES.—The markets are very firm on stoves, and in view of the firmness there is not the holding back from buying that there has been. Oil stoves, gas, and electric lines of these are in big demand. The market for various summer goods, watering cans, pails, etc., has been active in a general way.

Gasoline Sale Heavy; Coal Oil Active, Too

Montreal

COAL OIL, GASOLINE.—There has naturally been a stimulated selling of gasoline, with hot weather conditions so conducive to car driving. Price remains at 34c. Coal oil is also very active and selling still on the unchanged basis of 20 to 23 cents per gallon.

Sheets Are Bought For Present Needs

Montreal.

SHEETS AND PLATES.—Since it is possible to procure requirements of sheets and plates promptly from day to day there is little evidence of dealers stocking beyond present needs. The buying basis is rather a favorable one, and importers would like to see a heavier movement.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35

20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made

Lead Wool Down; Wire Solder Up

Montreal.

LEAD PRODUCTS. — Advance has been made for wire solder of the various grades of three-quarters of a cent to one cent per pound. On the other hand lead wool is down, the price being 13 cents as revised. There is not a great deal of buying, some withholding of orders being apparent still in anticipation of reduced prices being made effective, which jobbers say is unlikely.

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	15%
Lead wool, lb.	0 13

50-50	0 40¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Yellow Brass Has Advanced One Cent

Montreal.

BRASS.—Yellow brass has been in a somewhat firmer position this week and the price is advanced one cent. This is due more to the desire of the trade to stimulate sales. The list, as a rule, is biding time and changes are lacking.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00
Stove plate, ton	....	15 00

Wrought iron, No. 1, per gr. ton	....	11 00

Tin and Pig Iron Higher; Lead Less

Montreal.

INGOT METALS.—The sales on lead being dull, a slight easing in the price has been made. Pig iron is up $3 per ton, and tin is a cent higher, with other markets firm.

COPPER.—The market is steady and the price of 18½c per pound stands.

TIN.—The price last week was 58c. Jobbers are asking 59c this week. A good volume of business is being transacted.

LEAD.—The dullness of the market, with fair stocks on hand has caused a decline of ½c, leaving the market this week at 7¼c per pound.

ANTIMONY.—Firm sales are made and supplies are fair. This market is held at 9½c per pound.

ALUMINUM.—Trading steady; has a tendency to stabilize the present price of 38c per pound.

PIG IRON.—This commodity has jumped to $48 over last week's quotation of $45, and the steady trading with further demands will prove sound to buyer and seller.

SPELTER.—Very quiet trading with a quotation of 8c per pound ruling.

TORONTO MARKETS

TORONTO, June 5.—Revised prices are again in evidence on tin plate and ferne plate, the new level of quotations providing for a decline from figures formerly ruling. Some changes in the lubricating oil list have also been made with fuel oil down another ½c per gallon. Ingot metals show some revisions downward with copper and antimony showing a somewhat stronger tone.

Jobbers report business for the month of May well ahead of last year. Great activity is manifest in lawn mowers, screen doors, garden hose, refrigerators and kindred lines.

Tin Plates Quoted Lower

Toronto.

TIN PLATES.—Quotations on tin plates have been revised again, and figures now being named to the trade show a slight decline from former levels. The following are the figures in effect to-day on tin plate: I C 20x28 base $18 per box; I X 20x28 base, $21; I X X 20x28, base, $23; I X X X 20x28, base, $25.

Terne plate has also declined, the price to-day for I C 20x28, 112 sheets, being $19, representing a decline of $1.50 per box.

Some Lines Oils Revised

Toronto.

OILS.—There have been some revisions made in the price of lubricating oils this week, the tendency in all lines being downward. New prices which are

being quoted on the more familiar lines are: machine oil, regular grade, 57½c per gal., and paraffine oil, 22c per gal., both these figures being list and subject to discount of 15 per cent.

Fuel oil has also been revised downward, the decline amounting to about ½c per gal. On the present basis in barrels the price is 8c per gal., net, and in tank cars the price is 7c per gal.

Summer Stoves Active; Wares Too

Toronto.

STOVES, WARES.—There have been no new developments in regard to stoves and ranges this week. There is very little movement as far as the manufacturers are concerned. There has been a big demand for all lines of summer stoves, including coal oil, electric, gas and gasoline. Jobbers report sales as being very active and indications point to a record season.

The outlook in regard to all kinds of wares is unchanged. Manufacturers report a very fair volume of business coming to hand, and seem to be satisfied with prospects. The hot weather of the past ten days has stimulated sales of all summer lines.

Repeat Orders Rope Yet to Come

Toronto.

CORDAGE.—Sales are still very much restricted on all kinds of rope. Repeat orders which are usually commencing to materialize by this time are somewhat slow in coming and it looks very much as though retailers are going to confine their purchases to absolute needs. Whereas the market at the present time is steady, the fluctuations which were apparent some couple of months ago are still remembered and the tendency will be to keep away from heavy purchases at the present level of prices. Quotations which are now being named to the trade are for pure manila, 34c per lb.; British manila, 30c; New Zealand hemp, 30c; sisal 27½c, and sisal lath yarn, 27½c.

Steady Market on Iron and Steel Bars

Toronto.

IRON AND STEEL.—Jobbers report a very fair volume of business and indications point to the market being steadily maintained for some little time. Stocks are very well assorted and the difficulty which was so recently experienced in getting special prices is gradually being overcome. The range of quotations on the more familiar lines is given herewith.

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

TIRE PRICES REDUCED

A reduction in prices, which will figure out on an average of about 12½ per cent., went into effect on Monday on tires. The big factor in bringing about the lower prices, it is stated, has been the releasing from Singapore and other far Eastern points, of the huge stocks of rubber that accumulated there, because of lack of shipping accommodation. These have now been moved and are available for the manufacturers. Another factor in bringing down the price has been by taking advantage of the opportunity to get some cheaper cotton. In connection with the new schedule of prices the dealers who handle tubes will benefit through the establishment of a new resale price to dealers only.

Sheets Maintain Steady Level

Toronto.

SHEETS, PLATES.—There have been no new developments in the market on sheets. Business is coming along quite satisfactorily and jobbers report sales as maintained at a very good level. Reports from the U. S. indicate a general improvement in operations of the steel industries, and reports would tend to the feeling that the outturn from now on will show a steady gain. Prices are ruling without any change at the levels shown below:

10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets. 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Sales Corrugated Sheets Improve

Toronto.

CORRUGATED SHEETS.—The gradual increase in building activities is being reflected in the sale of corrugated sheets, and manufacturers report that the outlook is one which can be considered satisfactory. The labor troubles which have been threatening seem pretty well on the way to adjustment and another couple of weeks will probably see all industries humming again. There has been no change in market quotations, which are given as follows:

	Per 100 sq. ft. Gal'zed	Painted
Corrugated Sheets—		
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe, Boiler Tubes Hold Firm

Toronto.

WROUGHT PIPE, BOILER TUBES.—Business on wrought pipe, whereas not reported as excessively large, is considered very good. Manufacturers are accumulating very satisfactory stocks, and they report sales coming along in increasing volume. Prices have undergone no revision and no immediate change is looked for. Prices appear in the current market quotations.

There is very little doing in boiler tubes as yet, and the outlook seems to be that this condition will prevail for another month or so. By that time it is hoped that more activity will be manifest and jobbers indicate that they should be in a position to take care of all business from the standpoint of supplies. There is no difficulty now being shown in getting through shipments promptly. The range of prices follows:

	Per 100 feet Seamless	Lapweld
BOILER TUBES—		
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Market Holds on Solder; Lead Products

Toronto.

LEAD AND ZINC PRODUCTS.—The market maintains a steady level and whereas some slight change is reported this week in quotations on tin and lead, this has not been sufficient as yet to influence the price of the manufactured lines. Quotations now being made by the trade are as follows:

Lead pipe, lb.	....	$0 11½
Lead waste pipe, lb.	....	0 12½
Lead traps and bends	....	15c
Lead wool, lb.	....	0 14
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb	0 35	0 39
Solder, strictly, lb.	0 33	0 35
Solder, commercial, lb.	0 30	0 33
Solder, wiping, lb.	0 29½	0 32
Solder, wire, lb.	0 36	0 42
Zinc sheets, per lb.	....	0 17

Old Material List Unchanged

Toronto.

OLD MATERIALS.—The list of old materials remains without change this week. An inquiry early in the week revealed the fact that some dealers are not offering stove plate and machinery cast, but generally stocks are considered ample in view of the light demand. Range of buying prices to-day follows:

Dealers' Buying Prices—		
Tea lead		0 03
Heavy lead pipe		0 04
Pipe scrap		8 00
Stove plate, per ton		10 00
No. 2 busheling		8 00
Yellow Brass		0 07
Red Brass		0 10
Light Brass		0 05½
Scrap zinc		0 04½
Heavy copper		0 15
Wrought iron, No. 1, per gr. ton		15 00
No. 1 machinery cast		14 00
Heavy melting steel		9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots		0 04½
Bicycle tires		0 04½
Automobile tires	0 03½	0 04

Gasoline Active; Coal Oil Too

Toronto.

OILS, GASOLINE.—The situation in respect to coal oil remains unchanged. Business is coming along at a very satisfactory rate, the increased use of oil stoves being a factor in this increased turnover. Quotations remain unchanged for the week at 19½c to 22½c per gal., according to grade.

There is a remarkably heavy sale of gasoline reported in all quarters, with prices ruling at 33c per gal., which is an unchanged figure.

Nails Hold; Wire Unchanged

Toronto.

NAILS, WIRE.—There is a very fair volume of business in nails, jobbers report, and they view the situation with general satisfaction. There has been no change in prices reported during the week, the wire nails selling at a base of $4.70 per 100 lbs., and the cut nails at $4.75 base.

There have been no particularly new or interesting developments in the situation on smooth steel wire and kindred products. The base for smooth steel wire is maintained at $5 per 100 lbs.

Waste Affected by Strike; Oakum Quiet

Toronto.

WASTE, OAKUM.—The better demand for waste which was reported last week is still noticeable and manufacturers and jobbers report a fair volume of business being done. The tie-up in Western business has affected sales to some extent. There has been no change in price recorded during the week, and there seems to be no immediate prospect that the level of quotations shown in the current market page will be revised.

Oakum is moving out fairly well, but the demand is by no means heavy. Quotations have held steadily and without change at figures shown on the current market page.

Antimony, Copper Register Advances

Toronto.

INGOT METALS.—There is very little change in the situation as it effects ingot metals although slightly lower prices are shown in some lines than those prevailing last week. Antimony and copper are exceptions which have recorded further advances in the last few days.

COPPER.—The market has stiffened slightly in view of the outlook in the States, and the market here has reacted as a result. Price locally is now around 18½c per lb., which shows an advance of ½c over last week's figures.

TIN.—There is lots of tin available and about the limit in price which is being asked here to-day is 60c per lb. This is slightly easier than the highest figures named a week ago, but the market shows little indication of any great recession.

SPELTER.—The situation seems to have eased away again somewhat on this metal. Stocks are ample and the buying movement is as yet rather restricted. Prices which are being named to the trade to-day are 8c per lb.

LEAD.—Although 7c per lb. was quoted in some quarters last week, the general tendency has been to stick around the 6½c level, and this is the figure most generally heard to-day. There is little new in the situation, stocks being sufficient and there being a fair demand.

ANTIMONY.—The market has stiffened still further this week, prices are up around 9c per lb. There is a very good demand in evidence and there is no indication that stocks are any too heavy. This does not mean that there is a scarcity of the metal, but from reports available there is no huge surplus lying around.

ALUMINUM.—As far as can be learned there is really no great activity in this metal. From all accounts there is enough stock available, but the demand is still along rather narrow channels. Price ranges around 40 to 42 cts. per lb.

LONDON MARKETS

LONDON, Ont., June 5.—Linseed oil is again a feature of the markets this week, showing an advance of 15c per gallon over figures prevailing seven days ago. Turpentine has also kept up in the feature class by showing an advance of 20c per gallon. The market on both these commodities is very strong. Shellac has undergone a further advance this week along with nail pullers, one line of auto tire pumps and calf meal. Potts' sad irons are lower, with window rubbers showing an increase.

Business is reported exceptionally good, jobbers and retail merchants being kept going to full capacity. Paints, lead, oil, screen doors and windows, screen wire cloth, lawn mowers and refrigerators are among the lines in most demand.

Nail Pullers, Tire Pumps Go Higher

London, Ont.

NAIL PULLERS, TIRE PUMPS.—A higher price has been named on the "Sure Grip" nail puller in figures issued to-day. The present basis of quoting to the trade on this line is $1.50 each. Yankee auto tire pumps have also reached higher levels and are now selling to the trade at $4.75 each.

Calf Meal Registers Advance

London, Ont.

CALF MEAL.—Quotations just named to the trade on Royal Purple calf meal show an increase over figures formerly ruling. The present schedule of prices is given as follows: 25 lb. bags, $4.90 per 100 lbs.; 50 lb., $4.85 per 100 lb.; 100 lb., $4.80.

Sad Irons Show Decline

London, Ont.

SAD IRONS.—Potts' sad irons have come in for revision this week, the new schedule of prices providing for a decline. The quotations that are now in effect are for the plain, $1.80 per set, and nickel-plated, $1.90 per set.

Higher Prices on Window Cleaners

London, Ont.

WINDOW CLEANERS.—A revision in the price of window rubbers or cleaners has occurred this week. The new range of quotations shows a substantial advance. Figures quoted to the trade now are: XLCR, metal frame, 10 in., $2.75 per dozen; 12 in., $3.25; 14 in., $3.75; 16 in., $4. Peerless, wood frame: 10 in., $3.75 per dozen; 12 in., $4.15; 14 in., $4.50.

Garden Hose Selling Freely

London, Ont.

GARDEN HOSE.—Sales of garden hose are numerous, and for good quantities, the result being that stocks are rapidly being absorbed. The markets have held steadily and without change at levels below. Hose fittings are selling well at firm prices. Range of quotations on hose and fittings follows:

Lawn Hose, price per foot, Corrugated—½ inch, 17½c; ⅝ inch, 20½c; ¾ inch, 23½c. Less 5% in 500 ft. reels.

Three Ply—½ in., 11½c; ⅝ in., 13½c; ¾ in., 15½c.

Four Ply—½ in., 13c; ⅝ in., 16c; ¾ in., 17½c.

Five Ply—½ in., 14½c; ⅝ in., 17½c; ¾ in., 18½c.

Hose Reels—No. 10, McKinnon, $1.80 each; No. 20, $2.65.

Hose Nozzles—Gem, $6.30 dozen.

Hose Bands, galvanized, per dozen: ½ in, 35c; ⅝ in., 38c; ¾ in., 38c; 1 in., 60c; 1¼ in., 95c.
Hose Couplings, brass, per dozen: ½ in., $1.85; ⅝ in., $1.90; ¾ in., $1.90; 1 in., $3.60.

Great Activity in Oil Stoves, Ovens

London, Ont.

OIL STOVES, OVENS.—Great activity is manifest in oil stoves, ovens and wicks, and jobbers report sales of these reaching very large proportions. The hot weather experienced during the past few days has proved a great stimulus to the sale of these. Prices remain firm and unchanged, one line being quoted herewith:

Perfection Stoves, 2 burners, $14.06 each; 3 burners, $18.19; 4 burners, $23.06.
Perfection Ovens—No. 21G, $4.31 each; No. 22G, $5.44; No. 41G, $4.31; No. 42G, $5.44.
McClary Ovens, No. 70, $4.25 each.
Perfection Oil Stove Wicks, $3.15 dozen.

Higher Prices Named on Shellac

London, Ont.

SHELLAC.—The advance on shellac continues and quotations this week have again been shoved up somewhat. Supplies are hard to get and there is no immediate prospect of any improvement in this respect. Figures reached in this week's advance are:

Size Container.	Orange	White
1 gal.	$5 15	$5 65
1½ gal.	5 35	5 85
¼ gal.	5 55	6 05
Pints	8 40	9 15
½ pints	4 95	5 15
¼ pints	3 15	3 25
⅛ pints	2 30	2 35

Wheat Lead Active; Putty Very Firm

London, Ont.

WHITE LEAD, PUTTY.—More activity is noticeable in white lead in oil, with prices holding at very firm levels. The situation in linseed oil is influencing present strength of undertone to the market. Quotations are for pure white lead in oil in ton lots, $16.30 per 100 pounds, and smaller quantities, $16.65. There is a better demand for putty, and on account of high prices being reached on linseed oil, market tends towards higher levels. Range of prices this week is as follows: Standard in 100 lb. drums, $6.75 per 100 lbs.; 25 lb. drums, $7; pure in 100 lb. drums, $8.75 per 100 lbs.; 25 lbs., $9.

Linseed Oil Up 15c; Turpentine 20c Higher

London, Ont.

LINSEED OIL, TURPENTINE. — Higher prices are again in evidence this week on linseed oil, the advance in the last seven days amounting to 15c per gal., with indications that even higher levels are considered. Some factors are predicting $2.50 oil, and at the moment there seems to be no reason to think that this figure won't be reached. Quotations in effect to-day are: 1 to 2 bbls., raw, $2.30 per gal.; boiled, $2.33; 3 to 5 bbls, raw, $2.29; boiled, $2.32; 6 to 9 bbls., raw, $2.27; boiled, $2.30. Less barrels, add 10 cents per gallon. Turpentine has moved up 20c per gallon and is now around $1.50 per gallon in single barrel lots. Strength marks the situation at primary points and a very firm level of quotations is the prospect for some time to come. Range of prices now being named is: 1 bbl. lots, $1.50 Imp. gal.; 2 to 4, $1.49; 5 gal., $1.60.

WINNIPEG MARKETS

WINNIPEG, June 5.—The strike situation in Winnipeg shows very little changes as far as the wholesale hardware jobbers are concerned. Practically all their men are still out and very little freight has been shipped since May 15.

The postal service is gradually getting back to normal with the volunteer workers and new men which have been taken on to fill the places of the strikers, and the street car service is being resumed this week. The railways are doing all in their power to make shipment of goods to Western points with the limited staff still working.

Again this week there are no price changes to report owing to no mail being received from outside points, but from all indication markets in general appear steady, with all jobbers preparing for a big rush of business as soon as the labor troubles are settled.

Firmness Marks Sheet Situation

Winnipeg.

SHEETS.—Prices on black and galvanized sheets show no change over previous quotations, all markets showing a firmness, with no immediate change anticipated. Prices now ruling are confirmed as follows: Black sheets, 28 ga., $7.50; 26 ga., $7.40; 24 ga., $7.35; 22 ga., $7.35; 20 ga., $7.30; 18 ga., $7.30; 16 ga., $6.70; 14 ga., $6 60; 12 ga., $6.55; 10 ga., $6.50 per 100 lbs. Galvanized sheets, 10¾ oz., $9.40; 28 ga., $9; 26 ga., $8.70; 24 ga., $8.85; 22 ga., $8.55; 20 ga., $8.40; 18 ga., $8.40; 16 ga., $8.25 per 100 lbs. For 36 in. widths in either 28 ga. or 10¾ oz. add to above prices 20c per 100 lbs. net.

Wrenches Hold At Steady Levels

Winnipeg.

WRENCHES.—Prices on all lines of wrenches are holding firm and manufacturers advise that no reduction in price is looked for this season as the demands of labor are offsetting any reductions in the price of material. Prices now in effect on many of the various lines are as follows:

Agricultural wrenches.—6 inch, $6.70; 8 inch, $8; 10 inch, $9.40; 12 inch, $12 dozen.
Engineers' Wrenches, Single End.—No. 0, 9c; No. 1, 11c; No. 3, 16c; No. 4, 20c; No. 5, 23c; No. 6, 28c; No. 7, 36c each.
Engineers' Wrenches, Double End.—No. 25, 15c; No. 29, 22c; No. 31, 27c; No. 34, 41c; No. 37, 60c each.
Knife Handle Wrenches, 6 inch, $12; 8 inch, $14.40; 10 inch, $16.80; 12 inch, $21.60; 15 inch, $28.80; 18 inch, $38.40; 21 inch, $46.80 dozen.
Perfect Handle Wrenches.—6 inch, $12; 8 inch, $14.40; 10 inch, $16.80; 12 inch, $21.60; 15 inch, $28.80; 18 inch, $38.40 dozen.
Railroad Special Wrenches.—8 inch, $12; 10 inch, $14; 12 inch, $18; 21 inch, $39 dozen.
Pipe Wrenches, "Stillson."—6 inch, $1; 8 inch, $1.15; 10 inch, $1.25; 14 inch, $1.75; 18 inch, $2.50; 24 inch, $3.65; 36 inch, $6.75 each.
"Perfect Handle"—8 inch, $1.25; 10 inch, $1.40; 14 inch, $1.90; 18 inch, $2.75; 24 inch, $4 each.
Trimo.—8 inch, $1.35; 10 inch, $1.50; 14 inch, $2.10; 18 inch, $3; 24 inch, $4.35 each.

No Revision Looked For in Wringers

Winnipeg.

CLOTHES WRINGERS.—Prices on all lines of clothes wringers continue firm and no revision is looked for in the immediate future. Sales so far this year are reported as very favorable. Prices now ruling on a few of the more familiar lines are as follows: Universal, $39.75 doz.; Royal Canadian, $57.95 doz.; Crest, $55.25 doz.; Eze, $62.55 doz.; Signet, $60.50 doz.; Reliance, $73.70 doz.; Eureka, $49 doz.

Lower Prices on Burners Expected

Winnipeg.

BURNERS.—Prices on lamp and lantern burners which have held firm for the past year have as yet showed no change. However recent advice from other markets would indicate a reduction in this line within the next 30 days. Prices now in effect are given herewith: lamp burners, Banner, size A, $1.27; size B, $1.60; Security, size A, $1.52; size B, $1.90; Canada, size A, $1.02; Regal, size, D, $3.30 per doz. Lantern burners, No. 1, $1.03; No. 2, $1.80 doz.

Turpentine Shows Firm Undertone

Winnipeg.

TURPENTINE. — Turpentine prices show no change during the week. Markets in the South are reported as firm, with advances in evidence which will surely be reflected here. Practically no sales are reported locally just now. Prices now ruling are confirmed as follows: barrel lots, $1.35 gal.; ½ barrel lots, $1.38 gal.; 5 gal. lots, $1.40 gal.; 1 gal. lots, $1.40 gal., plus the usual extras for containers.

Linseed Oil Decidedly Firm

Winnipeg.

LINSEED OIL. — Linseed oil prices continue unchanged, but are very firm on the local market. Owing to the strike situation sales are very small. To-day's prices are given herewith. Revisions upward are expected to follow a resumption of normal business. Boiled linseed oil, $1.96 gal., raw linseed oil, $1.93 gal., in single barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., June 5.—The increased rate of buying of steel products already reported is receiving more attention and on all hands it is being said that the market situation is greatly improved. In new shipping orders, and in specifications or shipping orders against contracts, the Steel Corporation had a tonnage in May equal to about 75 per cent. of its capacity, while its actual shipments were probably in the neighborhood of 60 per cent. This in itself would not mean that the statement of unfilled obligations, to be made public June 10, will show an increase, for that statement includes tonnage merely sold under contract, much of the actual business received in May being in specifications against contracts which stood on books as unfilled obligations at the close of April. By reason of the increased bookings the Steel Corporation is increasing its production along some lines. The independent producers have also been in receipt of considerably more business, but in their case the business is chiefly in the form of new orders, as they had relatively few contract obligations.

Steel mill operations probably averaged about 60 per cent. of capacity at the beginning of May, dropping to about 55 per cent. by the middle of the month. Since then there does not seem to have been any decrease and there may be a slight increase this month.

Summer Usually Dull

No one, except perhaps a few ultra-optimistic among the producers, contend that the improvement recently inaugurated represents the actual beginning of a full-fledged buying movement such as would set the steel industry to operating at capacity and cause prices soon to begin moving upwards. About the most that is claimed is that the continued decline in demand, with its weakening influence upon prices, has ended, and that whatever changes occur in future will be for the better. For there to be a full all-around demand for steel it would be necessary that there be large orders for steel for construction purposes, such orders being but little in evidence, and that there should be a fair volume of railroad buying, while, as a matter of fact, there is practically none. The 200,000 tons of rails bought about ten days ago do not count for much, and there does not seem to be anything else definitely in sight, at least until the railroads are returned to their owners at the end of this year.

July and August are always very dull months in the steel market, unless conditions are altogether exceptional. This improvement in the market, therefore, is going to be submitted to a crucial test in less than four weeks, and its behaviour then will no doubt throw considerable light upon its prospects. To illustrate this point, in the summer of 1915 there was much activity, as the foundation for the great war boom in the steel industry was being laid, while in 1916, when the steel trade was going strong at full speed, there was not only a summer dullness, but the dullness began in June. Correspondingly, the market began picking up in August, not waiting for September.

Price Cutting

Even the steel producers who insist that they are adhering strictly to the price schedule of March 21 in all particulars admit that there is considerable shading of prices by some of their competitors, but this shading is usually only a couple of dollars a ton, four dollars a ton being an altogether extreme case. Such cutting, however, is not altogether unfavorable to market stability in general, because it furnishes a proof, formerly lacking, that there is business to be attracted at approximately the present prices. When the reductions of $5 to $7 a ton were made in March it was thought that if those cuts did not produce a reasonable amount of business, further and still larger cuts would have to be made. Now such extensive reductions are regarded as altogether improbable. Recent predictions that there would be another general reduction in June, following those of December and March, have been withdrawn.

Divergent Conclusions

As formerly, altogether divergent conclusions can be reached from practically the same facts. The facts are substantially that buyers are very conservative, purchasing only what they know they must have early deliveries only, and seeking price guarantees even at that, investment buying not being into the market to any extent, as large construction jobs are conspicuous by their absence, and there is practically no railroad steel being bought. The conditions for a good, strong, broad market are practically all absent. Construction work is usually assumed to absorb half or more than half the steel output when it is at normal rate and it is stated everywhere that ordinarily the railroads take a large part of the steel made, estimates of the railroad proportion of the total steel made in a good year ranging from 20 to 35 per cent. Obviously then the steel situation is very bad. Viewing matters from another angle the conclusion must be diametrically opposite. The steel mills have not averaged less than about a 55 per cent. operation, and earlier in the year when conditions were still more unsettled they ran at much higher rates than that. Orders are being received at more than 55 per cent. If the irreducible minimum of buying is so high then when all the other buyers now absent from the market come in there must be a very heavy demand indeed. Some time there is going to be construction buying as many large projects are on the boards, simply deferred, and there must be heavy railroad buying some time or the country is going to tread the path of having hardly any railroad facilities at all in a few years.

For "the long pull" at any rate one cannot possibly avoid being very sanguine as to the American steel trade. As to prices, and "price readjustment," the idea six months ago was that there would have to be great reductions, as the war-time steel prices averaged 111 per cent. above the ten-year pre-war average. During the intervening six months the steel situation and prospects have been helped not so much by what has gone on within the trade, though the December and March reductions brought prices to only 81 per cent. above the pre-war average, as by what has occurred or has failed to occur outside the steel market. Other commodities, in general, have come down but little, and it is now admitted that they are not going to come down to any extent. The inflation is to be more or less permanent. The deflation will proceed slowly, with many stoppages. The latest Dun and Bradstreet index numbers, based on a wide range of commodities, show prices approximately double the pre-war average. When commodities in general are not coming down there is no particular reason why steel should be an exception.

Pig iron remains practically at the March 21 prices. There are some irregularities, but there have been no outright declines of any consequence, and none are expected now, with so many furnaces out of blast.

The Connellsville coke market shows a stiffening tone. Coke operators are thinking of higher prices for second half furnace coke than they would have entertained three weeks ago. The furnaces will hardly agree, and if they do not the purchases will be made from month to month instead of for the half year.

FAMOUS BESSEMER MEDAL STOLEN

LONDON, ENG.—The British Institute of Civil Engineers have presented to Leon Greiner, son of the late Dr. Greiner, a replica of the medal that was awarded to his father, and was stolen by the Germans during their occupation of Belgian terrtiory.

"Well, Rastus, I hear you are working again. What business are you engaged in?"

"Ise don be engaged in de mining business, sah."

"What kind of mining are you doing—gold, silver or diamond?"

"Ise doing calsimining, sah."—Detroit "Free Press."

IT'S THE GO GETTER THAT WINS OUT

(Continued from page 59.)

most of his time has learned how to make the most of himself. I believe in fixing your time for everything you do—rising, dressing, eating, working, study, recreation, and sleeping. And keep your eyes and ears open, and your mind active. Be curious. Know the why and the wherefore of things. It's better to run the risk of being a nuisance than never to learn anything unless it is pounded into you.

"I've been talking about the qualities which boys and young men should have, but this is the time for the heads of business to show the stuff that is in *them*. The country isn't poor. People have the money to buy what they need—and now that the war is over and the period of restriction is past, they need a lot of things. The man with courage and enterprise is going to sell them those things. The man who hesitates and holds back is going to miss getting the prizes.

"People are saying that the boys coming back from the front are going to miss the excitement of war; and I suppose they will. But I believe the men in our organization will tell you that *they* don't find life unexciting. We have our campaigns, like the one that is now on; and they are good stiff ones, too. When we start a 'drive' we do it with as much preparation as an army corps does when it launches a big offensive.

"I believe in business campaigns, just as I believe in military campaigns. And the time of all others to put up a big fight is the time when the situation is the most critical. If you were a general, you wouldn't demobilize part of your forces when things were going against you. You would not put your men into rest billets, and tell them to take it easy for a while and that, when things look more encouraging, you will get them into action. Not much! If you were any kind of a fighter, you would say:

"'Boys, we're in a tight pinch. If we don't get the enemy, they'll get us! I don't intend to let that happen, and I know you'll back me up. The thing for us to do is to *attack*. Here are your marching orders. Let's go to it—and win!'

"Bad trade conditions—panics, depressions, lack of confidence—are the 'enemy' the business man has to meet. And the way I have tried to meet them is not by standing still and marking time, but by mobilizing every man in our force and starting a big offensive.

"The time to pull the hardest is when the tide is against you; not when you can ride on the flood. That's the way my men do. And it succeeds, as I know by experience. This is the fourth time within eleven years that we have met an emergency in business, and *made use of it*. Here is the list of our four big campaigns:

"Marching Orders"	1908
"Forward Again"	1914
"Jubilee Campaign"	1916
"Million-a-Month Gain"	1919

"When business is unsettled and there is hesitation and timidity in the air, you can take one of two courses: you can call in your salesmen, curtail production, and go slow, or you can send out every available man, fill them full of pep and enthusiasm, get out new lines of goods, shove your goal ahead, instead of setting it back, and speed up the whole organization. I believe in the latter way.

"Anybody can *accept* orders when customers are eager to give them. But it takes energy and courage and enthusiasm to *get* orders when people are hanging back, fed up with doubts and pessimism. The first man to show energy, courage, and enthusiasm must be the head of the business. If the general doesn't believe his campaign will win, his soldiers will be half-hearted fighters. When we start a campaign, in some business emergency, I stand to lose more than anybody else does in case of failure. The fact that I am willing to take the big risk is proof to my 'soldiers' that I believe we can win. And Confidence, backed by preparedness, will win almost any battle. That was the way we went into this present campaign. And as things look now we are going to win it—and *then* some.

"I don't pretend to say that my way of running an organization is the best one possible, but I do know that in an emergency like the one with which business is now confronted it is a great thing to have a body of good live fighting men ready to back up your own confidence with their courage and enthusiasm. This country is going to do a greater business in the future than we dreamed of before the war. I expect to see an unprecedented expansion of foreign trade. We won't get it by mere talk and hot air. But we will get it if we have the enterprise to go after it in the right way.

"This company had already established its business in England and Australia before the war came, and had learned a good many lessons from that experience. Most Americans make the mistake of wanting to impose their business methods on the foreigner, regardless of his preferences or prejudices. We want him to take our product, put up the way we like it, paid for according to our system of credit, and so on.

"When I first went to England that was the way I tried to start. I thought, and still think, our ways are best. For instance, I tried to force the English agents to take our goods in our own packages. But I found that they wanted things not only *when* they wanted them, but *as* they wanted them. At least, they knew that their customers would insist on having them that way.

"I'll never forget one man saying to me: 'Why, if I got an order from India to send out two hundred gallons of paint in *plug hat* containers, I'd send it that way!'

"It is the willingness to meet the customer's wishes, no matter how eccentric they may seem, that helped the British to establish themselves in foreign trade. And we must imitate them in that respect. We ought to be training men for the export business right now. For the ideal arrangement is to have Americans at the head of our foreign branches, with agents and salesmen under them who belong to the country itself.

"I read once that Andrew Carnegie compared a successful business to a three-legged stool and called the three legs, capital, labor, and business ability. It seems to me it would be more exact to call it a four-legged stool, with co-operation as the fourth leg. For the other three would be pretty wobbly if there wasn't harmony of action and a common purpose and enthusiasm to inspire them.

"As for business ability, there are two kinds—natural and acquired; and I put more faith in the latter than the former. What you get by hard knocks usually sticks. And the business ability you acquire by doing things over and over, always watching and comparing the results, by learning how not to make the same mistake twice, and how to follow up and develop each success, will be the kind of business ability which will stay by you in every emergency. Master every detail of each piece of work that comes to you. The genius of success is nothing more, in most cases, than doing *well* whatever you do. It is more important to know how to do a few things well than to do a great many things indifferently. Begin by being a specialist in one thing, and then take on, besides, some other thing. Get your feet firmly on one rung of the ladder and then reach up for a handhold above you. But *climb;* don't stand still. And don't try to get onto the next rung without looking up, getting a handhold, and making sure of your footing. I believe a man can be practically whatever he wants to be, *if he is willing to pay the price.*

"The price is, chiefly, concentration. I suppose there never was a man who didn't *want* to be a success. If he fails, it is generally because he wanted *more* to be something else. If he puts time and strength and thought into other things than business, for instance, he shows where his real interest lies. He wants to be a politician, or a society man, or a sportsman, more than he wants to be a business man. He may say that he doesn't, but he is fooling himself.

"Concentration is the surrendering of one's self to one definite aim. That is the price—and few are willing to pay it. Don't misunderstand me. A certain amount of outside activity is not only right, but necessary. A man needs diversion, friends, physical exercise. But when he allows these things to rob his main effort, instead of *contributing to* it, he is not concentrating his powers, he is dispersing them.

"For example: to play tennis for the sake of exercise, the amusement, and the friendly association with other men is a good thing. But if a young man becomes so wrapped up in tennis that he takes time from his work to go around playing in tournaments here, there, and everywhere, it is certain that he cares more about being a tennis champion than about becoming a general manager or a head salesman. Or perhaps he begins to speculate a little on the side. Before long he will be reading the stock reports instead of his trade paper. The thing he wants is to get rich quick, not to climb steadily and surely in his own business. If you want to own a piece of property, you have got to pay the price for it. If you want a great reputation, you must pay the price for it. And if you want success in business, you must pay the price for that, too.

"Backbone, enthusiasm, and staying power are what enable men to win any fight. Backbone makes a man stand up for his principles, his opinions, and his rights. Enthusiasm makes him love the game and feel that it is worth playing with all his heart and soul. And staying power gives him the grit and endurance to overcome all the disappointments and discouragements that come to him.

"A great many young men go into the game full of confidence and hope. They make great plans, have high aims and ideals; but the wear and tear of opposition, the discouragement of making mistakes, the constant need of new effort, are too much for them. They can't stand the knocks. They fret and worry, and finally throw up the sponge.

"'Oh, what's the use?' they say. 'Luck's against me; and you can't beat luck.'

"But business is not a game of luck. It is a game of skill and endurance. Don't expect relief from outside yourself. It is up to you personally. Don't give up the fight. Rub your dimmed eyes, stir up your tired mind, freshen up your enthusiasm—and hang on. With you, just as with the organization itself, the way to meet a discouraging situation is to *attack*. Be your own general, and give yourself your own marching orders. Mobilize within yourself, and say, 'I'm in a tight place. The enemy will get me if I don't get him. I'm going to put every gun I have into action. And I'm going to win'."

A SEASONABLE WINDOW IDEA

A timely and very attractive window display of sporting goods in a Toronto store this week has for its central idea a camp scene. In the centre is shown a canoe, at the left is a small tent, and at the right a cedar tree. By the side of the tree stands a man with a steel fishing rod. In front of the tent is a flag-pole, with flag waving. An electric fan is so arranged that, while invisible, it keeps the flag floating and also stirs the cedar tree. The arrangement, while simple, adds a most realistic touch to the whole window display. In the various spaces between tree, canoe and tent is arranged an attractive display of goods, such as are required by every camper. A price ticket is attached to every article.

Develop Paint-Up Idea with Children

Young Hopefuls Can Brighten Up Old Articles Dear to Their Hearts—Teaching Economies of Property Values—Early Impressions Sink Deepest—Building for the Future

WHAT are you going to do to-morrow, son?" I enquired idly of the young hopeful on Friday night. "Don't know, Dad; I've got my garden all in, but Billy and me was thinking of painting up some of our things in the woodshed, if you'll set us up with the paint," came an earnest reply, tinged with hopeful expectancy.

"Sure, I'll set you up," was the only reply I could make as a paint man. "What do you want? Got a list of things to do?"

"Have we got a list? I'll tell the world we have" came the joyous reply, as he bounded for pencil and paper.

"There's Billy's bicycle and my express cart and the garden swing, and little Teddy's scooter and Billy's old go-cart," and there followed a long line of old articles dear to every boy's heart, together with his sister's miniature domestic furniture, that promised a busy morning for the two boys.

Children Get the Idea.

"What's the big idea?" I ventured to make enquiry into the youthful objectives and purposes.

"Well, I've heard you talking up 'Paint-up and Clean-up' and 'Save the Surface' and 'Protection and Preservation with Paint and Varnish,' so I thought we'd try it out and perhaps get some fun out of it too."

Being interested in advertising, as every paint man is, the boy's idea gave me a starter on a more serious line of thought. If all these advertising ideas are good for the grown-ups, why not implant them early in the minds of the children?

Just then Billy hove in sight. "Hey, Billy," shouted the boy. "Dad's promised to set us up with enough paint to fix up all the things we were talking about after four to-night. Are you on for the job to-morrow morning?"

"Sure I'm on," agreed Billy, and forthwith the list grew.

"Would you let us do the tool house, and the arbor in my back yard?" asked Billy.

"Go the limit," I replied, "but first of all, how are you going about it, and what paint do you want for all these things?" I enquired.

Absorbing Idea

A spirited exchange of ideas followed, in which I was able to direct them into methods of preparation of the surfaces, and application of the different lines required.

What struck me most forcibly was the intense manner in which the youthful minds of the two boys absorbed the ideas I was able to give them. From that I was led on to the thought that no more fertile ground for profitable future trade promotion could exist than by implanting in the minds of children the value of paints and varnishes as a means of protection and preservation of property.

They are bound to become the property owners of to-morrow. To them will be given sooner or later the trusteeship of the welfare of our villages, towns, cities and country. To them the problem of conservation of our national resources will become more keen as we draw upon and diminish these each year.

When paint can become such a large factor in protecting and preserving our property values, why not seek some means of instilling its most prominent economic service into the minds of the children, when the lesson will obtain its most deep and lasting impression??

Economies of Property Value

Our schools are teaching economics, both domestic and political, but the writer has never heard of any direct emphasis having been placed on the economics of property values in the sense that it represents real dollars and cents, and should be made to last as long as human ingenuity can make it last.

A man can be prosecuted for whittling his initials on another's property. Yet that same property owner will permit the ravaging factors of deterioration to carve their initials into every square inch of his buildings through lack of paint. And, what's more reprehensible, will defend himself for doing it because of prices or some other false so-called idea of economy.

Every board or brick, or piece of structural steel that must be replaced because of deterioration through lack of paint is an economic sin against the welfare of the nation, whether or not the property owner willingly pays the shot for his negligence.

The writer does not know the technical limits of legislation or jurisprudence. Some enactments have made some pretty deep inroads into the personal liberty of the individual. But it does not seem to be a possibility of too drastic a nature to enact some measure whereby a property owner should be compelled to paint his property with sufficient frequency to keep it protected and well preserved.

Continued on page 72

MOORE'S LINE

A PAINT VARNISH AND ENAMEL FOR EVERY PURPOSE

"Save the surface and you save all" *Paint & Varnish*

The constant and ever-increasing demand for IMPERVO PORCH and DECK PAINT is the Best Proof we have of its Good Qualities.

IMPERVO PORCH and DECK is not an ordinary Floor Paint and must not be classed with such. It is made on Moore's House Color Base with Spar Varnish added to make it tough and durable.

IMPERVO PORCH and DECK PAINT is made especially for Porches, Verandah Floors and Steps and dries perfectly hard with a High Gloss. It produces a Hard-wearing Surface that satisfactorily resists the wear and tear and continual scrubbing to which such floors are subjected.

EVERY CAN IS FULL OF QUALITY AND CUSTOMER-SATISFACTION

MOORE'S PRODUCTS are sold on the most modern and up-to-date business methods. There are no expensive and ineffective advertising frills attached to our proposition. This insures the consumer getting a FULL DOLLAR'S WORTH for every dollar expended. It also insures the Merchant BIGGER PROFITS.

What other line can boast of such SPECIALTIES:—

MOORE'S HOUSE COLORS—A Pure Linseed Oil Paint.
MURESCO —The Best Wall Finish
SANI-FLAT —A Superior Flat Wall Paint
TILE-LIKE —A Varnish and Stain Combined
MOORAMEL —A Perfect White Enamel

Give us an opportunity to show you a REAL AGENCY PROPOSITION which will bring you BIGGER PROFITS.

The Brush Department

Better Display Sells the Brushes

B. Mongeau Attributes Bigger Sales to His Better Displays—Let Customer See and Handle Brushes—Is Also a Time-Saver

B. MONGEAU, 252 Laurier Avenue West, Montreal, attributes the big increase of turnover in his brush department to a display idea that has been adopted and carried out for the past two years. Until this more complete display was made, sales were very small compared with what they are today. And there is reason to expect that sales will increase in paint and wall brushes.

"We sell from $600 to $700 worth of brushes per year now," said Mr. Mongeau, "and we believe that display has made this possible. People come into our store and look around. They see the brushes and can pick out what they want without any trouble. Our sales are very much larger than they were before."

Small Trays Used

The idea is a simple one, but effective. Small trays are employed to hold the brushes. These are really regular knife trays carried by the hardware trade, and which are usually inexpensive. They may be retinted if this is desired, and with the centre division and sawed out "handle hold," the trays may be readily lifted for dusting.

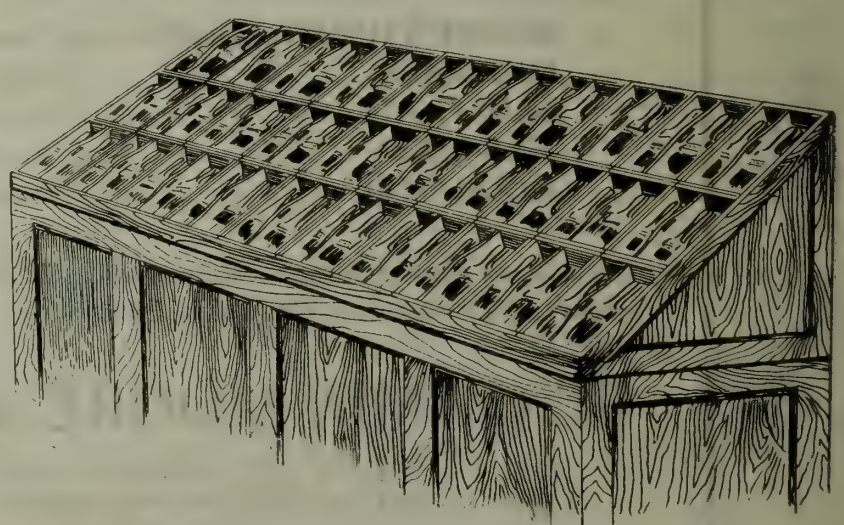
Some of the trays have a middle section and some are used without. They are about 9 by 14 inches in size and rather shallow. The Mongeau store uses these on the housefurnishings side of its store and they are placed at an angle of about 35 to 40 degrees, and slanted back toward the wall of the store. In this way they retain their position, and have the advantage of attracting. This is the big thing with brush selling, Mr. Mongeau believes, and his idea has won out, for the turnover in brushes was much smaller before the idea was developed two years ago.

Show Cheaper Brushes

HARDWARE AND METAL raised the question as to whether there was not a certain loss through the operation of this plan, brushes being open to the pilfering menace of those minded that way. "We usually display only the less expensive brushes in this manner," said Mr. Mongeau, "and the others are kept in drawers. We sell brushes up to $7 and $8 apiece, and take no chances with these being stolen."

There is really no need to show all one's stock, and Mr. Mongeau has believed this to be the case. With the plan used, hundreds of brushes can be displayed of the less costly kind, and if the prospect wants something better, it is simply a matter of diverting the attention to the better brushes where they are kept.

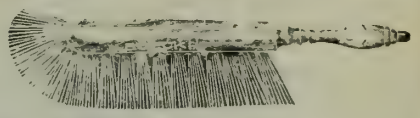
The idea of letting the customer see and handle a brush is a good one. There are many who wish to take their time in selecting. In addition there are many more who will buy a brush when same is displayed before them, who had no intention of making such a purchase when they entered the store. With this firm this type of display has worked well.



Industrial Varnish Co. For Hamilton

The latest industry to be established in Hamilton is the Industrial Varnish Co., whose plans for erecting a plant are already well under way. The president of the new company is W. J. Wix, who for many years was general manager of the International Varnish Co. of Toronto. Prior to that time Mr. Wix was associated with the Standard Varnish Works of New York City.

In connection with the new plant, it is understood Mr. Wix has practically completed arrangements to install an absolutely new method in this country for building gum melting houses. Instead of the type with brick chimney, from which it is said smoke and fumes constantly escape during the time when gums are being melted, the new melting house will be without chimneys. The fumes from the kettles will be drawn off by strong suction fans into one large main leading to a series of tanks where the fumes from the gums and oils or thinners will be caught separately and reclaimed. Not only will this method be a great saving in money to the company, but, it is said, much comfort and safety will be given the varnish maker through the absence of escaping fumes while the melting gums are being stirred. Although this method of building melting houses is a new one in this country, it has been successfully used for a number of years in England, and a few of the newer plants have installed this system in the United States during the past two years. Manufacturing operations are planned to start about July 15.



Elected to the Montreal C.M.A.

In last week's issue of HARDWARE AND METAL, a list of those elected to the Montreal branch of the Canadian Manufacturers' Association appeared. This was incomplete, in that the name of W. S. Fallis, managing director of the Sherwin-Williams Co. of Canada, Ltd., was omitted. The list appearing was that given HARDWARE AND METAL as a complete one by the office of the C.M.A. and this explains the omission of Mr. Fallis' name. Mr. Fallis was elected with others whose names appeared.

Brush display idea used by B. Mongeau, 252 Laurier Ave. West, Montreal. Small knife trays such as sold in Hardware Store may be used and adjusted to such shelving on either side of store, or arranged on counter as shown herewith. These are in some cases divided to suit the smaller brushes. Trays are placed at angle of about 35 to 45 degrees.

BOECKH'S HOUSEHOLD BRUSHES

You can confidently recommend Boeckh's Household Brushes to your customers for ease in operation, length of service, and maximum accomplishment.

BOECKH'S HOUSEHOLD BRUSHES

stand up to the hardest kind of work and wear longer than other makes. Boeckh's Brushes satisfy customers, besides giving you handsome profits.

Here's a Dependable Electric Washer That Sells at a Popular Price

There is a big, responsive market in Canada to-day for a dependable electric washer that sells at a nominal price. It will not be long before an electric washer will be found in every enterprising home. As yet the demand has only got nicely started. RIGHT NOW is the time for dealers to get in.

The "AJAX" ELECTRIC WASHER

is an easy washer to sell because it is both highly efficient and moderately priced. **It is the best washer in its class on the market to-day.** It is strongly built in every part so that it will stand up for years under the heaviest kind of work. Once it is installed there are no complaints or "come-backs" from customers. In fact, every "AJAX" Washer is fully guaranteed by us, so that you take no risk in selling it. And we help you get customers by supplying you with attractive advertising literature.

Let us send you complete information about the "AJAX," and the handsome profit you can make in your own territory selling it.

McDonald & Willson, Limited

347 Yonge Street **TORONTO**

DEVELOP "PAINT-UP" IDEA WITH CHILDREN

(Continued from page 68)

Early Impressions

But, as is a common saying amongst educationists, "The earlier impressions of childhood are the deepest and the more lasting." It is to be hoped that the "Save the Surface" idea will be both extensive and broad enough to impress its significance in the growing minds of the children in such an indelible manner that it will bear fruit in the years to come.

During the public school days of many men now in business, lessons were given in temperance, the evils that followed the use of John Barleycorn, with reasons and results. Undoubtedly those lessons of by-gone days have had influence in producing the dry wave that has swept this continent. They were taught, and it is now being taught, the economic value of birds in ridding the country of insect pests. Methods of overcoming destructive fungi, and insects that were a hindrance to agriculture are largely the outcome of educational work in our rural schools, agricultural colleges, farm papers, and grange societies.

Many other present day advancements can be directly or indirectly traced to educational work in one form or another. Many of these movements did not overlook the children in their work.

Property Economy.

So why not with paint? Few advertised commodities have as deep and as sound economic reasons for educational work, whether one views the problem from a national protective standpoint, or from a purely commercial standpoint. Why not incorporate paint amongst other articles and advocate property economy in schools and elsewhere, as well as domestic economy, in which many food products have been benefited?

Better Paint Than Back-alley Politics

If little Johnny Jones wants to paint, let him paint, and more power to him. He might better soil his clothes in applying paint than his mind with a lot of "back-alley" politics that the "gang" will contrive because they have nothing else to do.

If Johnny's mother objects, sell her a pair of overalls for the boy, and pour a little educational material on the value of paint, into her ear. Fill Johnny up with all the educational material you have. If he's interested, he'll absorb a great sight more of it than his mother or dad, if they're not interested. Keep it in mind that if Johnny is on the right track, it will not be many years before he'll be leading the family around with ideas of his own.

Children's Week Opportunities

I do not know the details of how the St. John, N.B., merchants worked out their children's day recently in featuring goods pertaining to children, but it is a good idea. Fact of the matter is, merchants who are on their toes, could work out a dad's day, a mother's day, and a children's day any week in the year with seasonable goods, and if it works any week in the year, it wouldn't be a long step to every week.

There's never a week, but what the educational value of paint can be impressed on someone. A week directed towards the children in regard to paint would not come amiss in either the spring or the fall.

Building for Future

Every father of a growing family realizes the constantly increasing purchasing demands that his children bring before him. If it isn't for amusements, it's for necessities. Perhaps some of your paint dealers can take a suggestion from this idea and devise some novel idea of developing paint business from this never ending development which takes place with every generation.

If you can teach the young idea how to shoot in this direction and buy paint for the real economic services that it can render, you will be laying a permanent foundation for your paint department in the future.

TO ALL SALESMEN

ANONYMOUS Says:

When the train pulls in and you grab your grip,
And the hackman's there with his frayed-out whip,
You call on your man and try to be gay,
And all you get is "Nothing doing today,"
Then you're a peddler,
By gad, you're a peddler.

When you travel along and everything's fine,
And you don't get up till half past nine,
When you see each concern and talk conditions,
And write it all home with many additions,
Then you're a travelling man,
By gad, you're a travelling man.

When you call on your trade and they talk "slow times,"
"Lower prices" and "decided declines,"
But you talk and you smile—make the world look bright,
And send in your orders every blamed night,
Then you're a salesman,
By gad, you're a salesman.

TORONTO PAINT, OIL, VARNISH AND ALLIED INDUSTRIES FORM CLUB

Manufacturers and wholesale distributors of paints, oils, varnishes and kindred lines met at a dinner in the King Edward Hotel on Thursday evenng last, and adopted a constitution and by-laws for the formation of a club of all those interested in this branch of the business in Toronto and vicinity.

The organization of the club was attended by representatives from a large majority of firms interested.

The purposes of the club, it is indicated, will be to promote fraternal and social relationships among those engaged in the allied trades, as well as the promotion and stimulation of their business. Matters of common interest, such as the removing of customs and practices contrary to sound business principles and ethics, will be dealt with by committees appointed for such purposes.

The club will be affiliated with the National Paint, Oil and Varnish Association, and strong co-operation with other organizations of a similar character throughout the Dominion will be sought and developed.

The officers elected for the ensuing year are:

President, T. F. Monypenny; vice-president, John Anthony; secretary, H. E. Mihell; treasurer, W. W. Scholes; members of the executive, F. J. Penberthy, W. N. Burden and A. C. Ransom.

HOW MUCH PAINT NEEDED?

One of the first questions that arises in the prospective paint buyer's mind is how many gallons of paint do I require for the house?

While the quantity of paint required varies somewhat with the nature of the surface to be covered, and the conditions under which it is applied, yet the following method of measurement will serve as an accurate guide:

A good grade of prepared paint will cover at least 350 square feet to the gallon, two coats.

First, measure the distance around the house and multiply it by the average height; then divide by 350 and the result will be approximately the number of gallons to buy. Of this quantity one-fifth will represent the paint required for trimmings, cornices, etc.

For blinds or shutters of average size, you will require one gallon of paint to each 12 pairs of blinds, two coats.

GETTING AFTER THE BIG QUANTITY BUSINESS

(Continued from page 48)

a good paper bearing on his business. He thought he must have had a hard time and a great deal of difficulty to know just where he was in the matter of prices and general information.

Referring to the future, Mr. Smith was optimistic. He feels that there will be a revival of building activity before a great while. In the matter of book accounts, while, as before stated, the greater portion of business is now done on a cash basis, there has been little trouble to get these in. "These are readily collectible, and we have not lost any money to speak of on book debts." This is saying much, since this business was established about 50 years ago, and for the past 25 years hardware lines have been handled quite exclusively.

It Pays To Push "Berry" Brands

It's easy to sell any varnish once but a lucrative and growing varnish trade can only be built on quality. The wide reputation of Berry Brothers' Varnishes, Enamels and Stains for giving the utmost in quality values has caused "Berry" label to be known and trusted by all varnish buyers.

It pays to recommend and sell "Berry" Finishes, they create satisfied and permanent customers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 5.—Turpentine has the interest of the week in point of market change and the price has advanced to $1.40 per gallon. It is very scarce and may advance more. Linseed oil is very scarce of course, and there is a probability of prices being higher than the present basis. An excellent trade is passing in mixed paint and no changes have been made on any of the regular lines bepond that for turpentine.

Oil Now Matter Of More Stock

Montreal.

LINSEED OIL.—In view of the strike situation being little changed, some of the dealers in this market are not quoting. Very reserved selling is practised and the indications are that if shippers in the West experience continued difficulty further advances may be looked for.

	Imp. Gal.	
Raw—		
1 to 4 barrels	$2 14	$2 22
5 to 9 barrels	2 13	2 21
10 to 25 barrels	2 12	2 20
Boiled—	Imp. Gal.	
1 to 4 barrels	$2 17	$2 25
5 to 9 barrels	2 16	2 24
10 to 25 barrels	2 15	2 23

Turpentine at $1.40; Is Very Scarce

Montreal.

TURPENTINE.—The price on this commodity has risen to $1.40 this week and this follows the definite trend pointed out in last week's issue of HARDWARE AND METAL. It is quite probable that $1.50 may yet be reached for this, and the supplies are light.

	Imp. Gal.
Turpentine—	
1 to 4 barrels	$1 40
Small lots	....
(Packages extra.)	

Putty in Demand On Held Basis

Montreal

PUTTY.—Demands have been made on putty stocks in a steady manner and there has been quite a volume of business all around. The basis is a steadier one but quite unchanged.

Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	5 10	5 35	5 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Good Summer Sale White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Seasonably speaking, the demand for white lead in oil is satisfactory and the market is steadily held. The price basis on standard grade remains at $15.50 per 100 pounds for five-ton lots, and at $16 for ton lots, while smaller quantities are quoted at $16.35.

Mixed Paint On Most Active Basis

Montreal.

MIXED PAINTS.—This excellent outside painting weather is leaving the dealer and manufacturer little cause for complaint and the factories are particularly busy. That this condition will probably continue is dependent upon the weather man largely. The basis is steadily firm.

TORONTO

TORONTO, June 5.—Many of those who are in closest touch with the linseed oil situation are now predicting $5 flax seed and $2.50 oil. The market for flax seed shows steadily increasing strength, and yesterday's quotation was $4.50. During the week oil has advanced from fifteen to twenty-one cents. The paint manufacturers have been big buyers. The retailers in general are buying only for immediate needs. Turpentine during the week has made an advance of twenty cents and the market is very strong. Advices from Savannah tell of heavy shipments overseas, with supplies lower than they have been for a long time. Usually there are from 75,000 to 80,000 in the port, but the latest figures state that there are only 2,000 barrels. Dealers are awaiting with keen interest the announcements of Sir Thomas White, and there is much speculation as to whether or not the war tax will be removed.

$2.50 Linseed Oil Is Predicted Shortly

Toronto.

LINSEED OIL.—There is no telling at this writing what is going to happen to linseed oil prices. With seed supplies in great demand and not nearly enough being offered to meet the requirements, many crushers see $5 seed in the very near future and oil at $2.50. "Business has never been better," said one crusher. "We are swamped with orders. Many manufacturers are placing business as far ahead as the end of August." The supply situation is being further complicated by overseas demands for Argentine seed, and reports indicate that shipments are being made to European points. According to dealers further advances in linseed oil prices are likely to occur at any time. The quotations are:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$2.30	$2.36
3 to 5 barrels, gal.	2 29	2 35
10 barrels and over	2 27	2 33
	Boiled	
1 to 2 barrels, gal.	$2 33	$2 39
3 to 5 barrels, gal.	2 32	2 38
10 bbls. and over	2 30	2 36

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Twenty-cent Advance In Price of Turpentine

Toronto.

TURPENTINE. — Turpentine prices have advanced twenty cents, and there is every indication that still higher quotations may become effective very shortly. There is a large volume of business offering. Stocks at Savannah have been reduced to the lowest point in many years, there being only about 2,000 barrels in port. Legitimate demands are absorbing all offerings there and still more orders are coming in. In the Canadian markets the splendid business that the paint manufacturers have been doing and expect to do is a big factor in the large orders they are placing, not only for immediate, but for future delivery. Overseas demands for turpentine are reported to be steadily increasing, and according to importers there cannot possibly be any reduction of prices before September, and there is nothing now to indicate that they will go down very much then. The quotations are:

	Imp. Gal.
Turpentine—	
1 barrel (barrel included)	$1 50
2 to 5 barrels (barrel included)	1 49
5 gallon lots	1 60

Livingston

THE SUPREME PRE-EMINENCE OF

Livingston Brand

Linseed Oil was not achieved in a day or in a year. It is the result of over 50 years' persistent effort and honest service. During all these years there has never been a time when Livingston Brand was not what it claimed to be—

SIMPLY THE BEST

The Science of Expressing like every other branch of learning moves forward. Better constructed warehouses, steam-heating, cleaning and drying machinery make possible to create ideal conditions for the ageing of Livingston Oils.

This is technical talk and may not interest you. After all, what you want to know is, which is the best? There should be but one answer to that question.

LIVINGSTON BRAND

BEST IN QUALITY, MOST RELIABLE, GUARANTEED ALWAYS

BE SATISFIED WITH NOTHING SHORT OF THE BEST

The DOMINION LINSEED OIL CO.
LIMITED

BADEN
MONTREAL
TORONTO
WINNIPEG

Paint Makers Still Working Overtime

Toronto.

MIXED PAINTS.—Despite the fact that they have greatly increased their staffs and have been working overtime for weeks, the paint manufacturers are still unable to keep pace with the volume of orders that have been pouring in. Business has been more than good, they say, it has broken all past records, even those of pre-war days. The best part of it all is that the manufacturers declare it is going to continue good, and they are looking for a banner season. No price changes are looked for.

Prices of Brushes Pointing Upward

Toronto.

BRUSHES.—All indications point to higher prices for brushes, and while these are not expected to become effective immediately there is little doubt, according to manufacturers, that advances will be made during the next couple of months. Two of the main factors in the situation centre around the scarcity and advanced quotations of Chinese bristles and the higher costs of production. As a result of the situation in Russia no supplies of bristles will be available from the country for some time, and the world will be dependent upon Chinese sources.

Plate Glass, Putty Expected to Advance

Toronto.

GLASS, PUTTY.—The advance of ten per cent. in plate glass prices, which was announced in last week's issue of HARDWARE AND METAL, has been withdrawn by American firms and a new and higher price is to be named shortly. It is stated that the ten per cent. was found not to be sufficient to take care of the increasing costs of production. An enormous business is being done by the American firms.

The greatly increased cost of linseed oil is expected to result before long in higher quotations on putty. In the meantime prices show no change, and are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. iron ...	6 15	6 40	6 55
Do., 25 lb. irons ...	6 40	6 65	6 80
Do., 12½ lb. irons..	6 65	6 90	7 25
Bladder, in barrels ..	7 05	7 30	7 45

Pure putty advance $2 per 100 lbs. over above.

No Changes Shown In White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—With an excellent volume of business offering, quotations for white lead in oil show no change. The prices are as follows: 5-ton lots, $15.80 per hundred pounds; one-ton lots, $16.30; in smaller quantities, $16.65.

"Every Clothesline Represents a Washing Machine Prospect," Says Dealer

"EVERY clothesline represents a washing machine prospect." That is the slogan adopted by a Western Ontario hardware dealer who has been building up a steadily increasing business in washers. This dealer is located in one of the most prosperous farming sections in the province. Discussing with HARDWARE AND METAL the changes noticeable in the past three or four years in the buying viewpoint of the farmer and his wife, he said:

"Practically everybody is interested in labor-saving devices. The women are just as anxious to get away from heavy, hard work as the men, and there is a big field open to the dealer who can supply the goods.

The duties of the household are being curtailed and drudgery eliminated by adopting modern time and labor-saving methods. The national need of economy has brought the home-keeping proposition down to a basis of work without waste. Even in the modern homes nowadays the housekeeper spends her money freely for all the utensils of comfort and convenience. The possibilities for the hardware merchant in the power washer line are very great. There is a steadily growing popularity for everything electric. This is due to the fact that it is found the work can be done thoroughly and economically with electrical appliances and thus save a lot of drudgery.

Most women in the country either own or know about hand washers and the advantage they have over the tub and washboard. Now, where they have electric or water power or gasoline engine a power washer is easily installed. The power washer is so much better than the hand washer as an up-to-date harvester is ahead of a sickle for cutting grain. It is not hard to prove this to farmers' wives, especially if they see a demonstration of an electric machine.

The whole farming community has changed its views on buying.

We find that what a father was satisfied with five years ago is much behind the times for the boy to-day. Take, for instance, the machinery they are using to-day. They are all buying the machines that will save labor and at the same time do the work much quicker and easier, such as tractors and gasoline engines; in fact everything that will lighten farm work. Why should a man do the work a machine will do for him? is the new cry.

A few years ago a good horse and buggy was all right, but to-day this is much too slow. They find that with a car they are able to do their shopping much quicker, not spending so much time on the road.

Three or four years ago when a farmer came in to see about wire fence the first thing he would enquire was the price. This seemed to be the most important thing. If your price was high he would remark, "Oh, I can get it down street much cheaper than that!" He didn't stop to consider that the fence down street might not be as good a quality and have such a secure lock. To-day when the farmer refers to the subject he wants to know what make of fence you handle, and demands the best. They do not mind paying a few extra cents per rod, when they know that they are not going to have any trouble with it—that it will stand up to the test and give them real service. They also take into consideration that it takes the same time and labor to put up a cheap fence as to put up the best.

If you handle goods that you can guarantee to give satisfaction—quality goods—you need not fear any comebacks. Your customer will remember where he gets the best line of goods and will not forget you. A satisfied customer always tells someone else how well pleased he is with his purchase, and doubtless when his friend wants anything in that line he will come to you.

If you have a good thing to offer to the public advertise it. Let them know you have it and explain thoroughly its advantages. The paint season is at hand. If you have a good paint or varnish to offer advertise it, showing that although the price is higher than other makes on the market it will give much better results. The average customer has realized more thoroughly than ever the last few years that there is no gain in buying a cheap article just because it is cheap in price. They are demanding a better class of goods in every line.

"I always buy the best class of goods—no seconds for mine. It doesn't pay to disappoint a customer by giving him inferior goods. When he buys anyting, no matter what price, he expects to get something good. If the article doesn't give good satisfaction, he fails to consider the price paid and comes back and complains how short a time he has had it. If you had sold him something better which you really knew would have given him service you would have had a satisfied customer. Even if they do object a little to the price at the time, they forget all about it once they are away and the goods give entire satisfaction."

The successful merchant, though he may not know it, is one who has a knowledge of psychology. Not only does he know quality in the commodities handled but he has learned by careful observation and experience how best to approach his customers to sell them goods and maintain their confidence in his integrity, which is his idea of business building. He is as courteous to a buyer who makes a ten cent purchase as to one who spends as many dollars over his counter.

QUALITY

"Save the surface and you save all" *Paint & Varnish*

The *Practical* Value of Paint—

Is determined by the quantity and REAL body that is requisite to cover that surface that is sure to decay without a good coat to protect it from the weather conditions that will try the best of material unless it is covered with JAMIESON'S building preserving and protecting paints and varnishes, that have been at the forefront of paint sales in the enterprising and successful hardware store for over sixty years.

Both dealer and consumer have long since been educated to the fact that it pays to pay a little more for good paint especially when such a paint *returns this slight extra first cost by giving better and longer service.*

"Sixty years preserving properties, wherever a Jamieson product has been used."

Settled Warm Weather Means More Bicycle Sales

THE very best part of the bicycle selling season is just before us.

To take full advantage of it, two things are most necessary:

First—As complete a stock as possible of Men's, Ladies' and Juvenile models of the most popular and best-selling make of bicycles.

Second—The same earnest selling effort that is necessary to successfully push other lines of goods.

How's your stock of

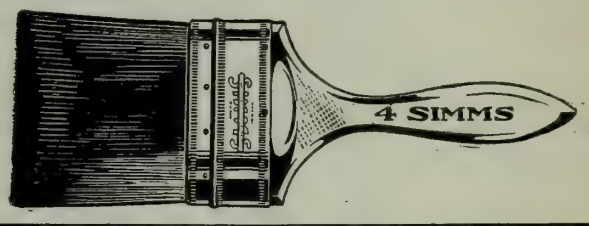
Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.

TRADE SIMMS SET IN RUBBER MARK

This Set-in-Rubber is our own patented process. You can find no other Brushes anywhere so good. The bristles are set in forever—they are absolutely guaranteed **never** to come out.

Each Brush is a perfect tool for the painter—doing everything that a good paint brush should do—and then a little more.



Made in every shape and style by skilled workmen for use in skilled work.

Don't let your stock run low. Order a new supply **now.**

T. S. SIMMS & CO., Limited

ST. JOHN, N.B.

Branches: Montreal, Toronto, London

TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

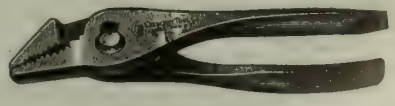
Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.

In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

Morris Carswell & Co., Ltd.

118 Howard Street, Glasgow, Scotland



Wrenches, Pliers, Screw Drivers

MEHASCO

On this line of goods we have built a reputation. We have taken care of the trade on Crescent Pliers and Wrenches particularly well, and at the present time are guaranteed deliveries by the manufacturers to the end of 1919. In addition to the well-known Crescent lines we handle the Bemis & Call Adjustable, the No. 80 Motor Wrench, the Carll Wrench, which is interchangeable, can be used as a nut or pipe wrench. The Bonney Stillson, the Special Auto Stillson, the Como Pipe, and Eagle Claw, the Imperial Angle, the Lane Set of Ratchet Wrenches and the Allen-Eureka Ford Ratchet Sets. In Screw Drivers we have the Crescent Hammer Handle, the No. 35 assortment with Oak Display Stand, and the small Screw Driver for hard-to-get-at-places. If your stock runs low on Pliers, Wrenches or Screw Drivers at any time we are the people to write.

There Will Be A Big Demand For Hay Carrier Goods

There is every indication of a larger demand for Hay Carriers, Forks, Slings, Pulleys, etc., this year than in any year for some time.

Farmers will soon be wanting these goods and wanting **them in a rush.** The dealer who has the material in stock will get the business.

A Bumper Hay Crop

Everything points to a bumper hay crop. All through the country the hay is showing up in splendid shape.

Hay is still high in price, making it a very profitable crop. Farmers will not want to take a chance on getting it spoiled by rain, and will be buying hay carriers to get it into the barns quickly.

Great Scarcity of Help

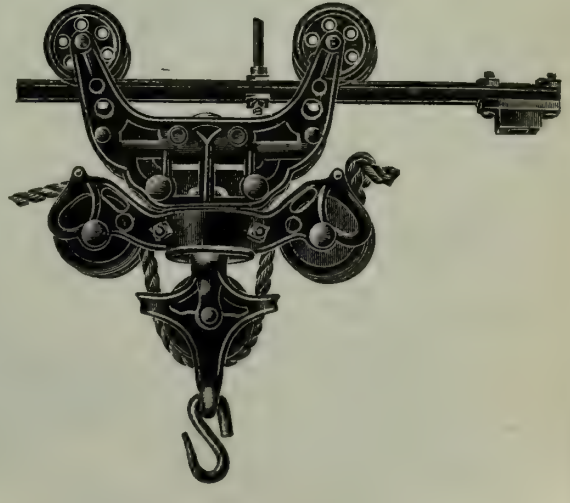
Not only is there a promise of an extra big crop, but the labor situation is still difficult. Farm help is practically unobtainable in many sections and scarce all over the country. A good hay carrier saves the work of two men in the busy harvest season.

We Have the Stock

We are carrying a full stock of all hay carrier goods now. When the rush comes we cannot guarantee not to run short on some lines.

The late and backward spring has given the farmer a lot of extra work, because so many things have to be done at once.

In a short time now, he will be needing repairs for his old carrier, or a new, up-to-date outfit to replace his old one. Many new barns are being built or remodelled and will need new carriers.



Get your stock in now. Cut out telephone and express charges. The dealer who has the stock gets the business.

Is Your Stock Complete?

This is a splendid time to sort over your hay carrier stock and see that outfits are complete. Have you rope hitches, rafter brackets, hoisters, pulleys, rope, sufficient track and a good assortment of carriers?

Your order will be shipped immediately now. There will be no telephone charges on rush orders to pay and no express charges to decrease your profits.

Let us have your order. The demand is going to be big as we can tell from the orders coming in. Have your Hay Carrier stock safely in hand before the rush comes.

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, are a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

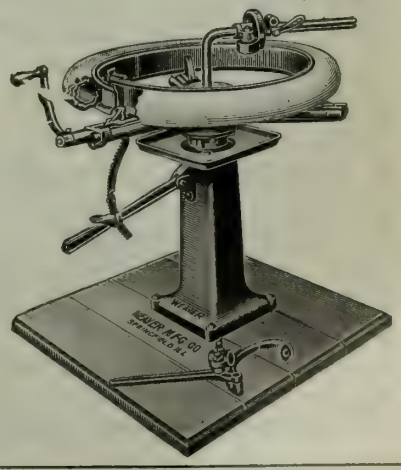
WINNIPEG, MANITOBA LIMITED

WEAVER GARAGE AND SHOP EQUIPMENT



The requirements of the garage and repair shop have been carefully studied and diagnosed by the manufacturers of this line with the result that the various difficulties and contingencies that arise in the handling and repairing of automobiles can now be disposed of

Quickly and Economically

and with a minimum of labor.

Each device in this very complete line is an article of real merit and a practical necessity to the garage or repair man.

Ask for a copy of the WEAVER BOOKLET and also a copy of our 1919 ACCESSORY CATALOGUE.

When You Sell

LACO LAMPS

You stand up and square your shoulders with fullest assurance—With Laco Lamps you are sure of your ground. You know that a lamp that gives equal light (by the most severe laboratory tests) with all other lamps, but also is so sure of its ground that it gives an individual guarantee for 1500 hours against all other average guarantees of 1000 hours (and who is to determine the "average"?) MUST be "some lamp."

Every advantage is yours when you handle Laco.
The profit is rightly based—Larger sales efforts bring larger profits. Dealer profit is assured on all sales, and a fixed retail price is steadfastly maintained.

The Laco Dealer need not carry heavy stocks, as there is available at all times a quick distribution of goods from Laco Warehouses, and from Jobbers in all parts of Canada.

Laco Lamps are your opportunity.
Write us to-day for particulars.

INSECTICIDES

CANADA'S STANDARD

PARIS GREEN—For Potato Bugs

ARSENATE OF LEAD—Dry and Paste—For Fruit Trees and Shade Trees

ARSENATE OF LIME—For Fruit Trees—Combined with Lime Sulphur

LIME-SULPHUR DRY—For Fruit Trees–Ready for use

DRY DUSTING SPRAY—

No. 1—Composed of 90% Superfine Dusting Sulphur
10% Dry Arsenate of Lead — For Fruit Trees

No. 2—Composed of 85% Superfine Dusting Sulphur
15% Dry Arsenate of Lead — For Fruit Trees

No. 3—Composed of 65% Sulphur
25% Lime
10% Arsenate of Lead—For Peach Trees

SPRAYIDE—For the Vegetable Garden, Flower Garden and Orchard—a combination insecticide and Plant Tonic and Fungicide, composed of Bordeaux and Arsenate of Lead.

BUG-O-CIDE—Cheaper than Paris Green and just as effective.

Write us for descriptive folder giving full instructions as to when and what to spray with

Distributors Wanted

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

DU PONT CANADIAN INDUSTRIES

Encourage Crow Shooting

Crows are no good. They steal grain and young crops. They pillage the nests of game and insectivorous birds.

Get your customers interested in "crow shooting." Tell them what good sport it is. Remind them that crows are a nuisance and an expense to the community. This will increase your sales of Du Pont Powders, and Du Pont-loaded shells.

On request we will send you details of the "national crow shoot" and the prizes we have hung up for this competition.

Write for details to-day and pass the information along to your customers.

Goodbye, Mr. Potato Bug!

POTATO growers have absolute confidence in Munro's Pure Paris Green. They know that its application to potato plants means sure death to the destructive little pest that has ruined so many potato crops.

Farmers and gardeners who know how to grow big crops of potatoes are the big users of

Munro's Pure Paris Green

(Government Standard)

Their business is worth cultivating. They won't be satisfied to try a new bug powder when Munro's Paris Green is to be had. Get them into your store and earn their good will by supplying this sure-killer they believe in.

Munro's Paris Green comes carefully and strongly packed, put up in ½ lb. and 1 lb. cartons, 25 and 50 lb. drums, 250 lb. kegs and in barrels.

Keep your stock in shape.

Order from your wholesaler or direct

BOWSER

PAINT OIL STORAGE

enables workmen to handle paint oils without loss. They prevent leakage, evaporation and gumming of oils. The pumps deliver accurate quantities, no over-running cans or other containers —no loss through dripping faucets — no oils left in barrels.

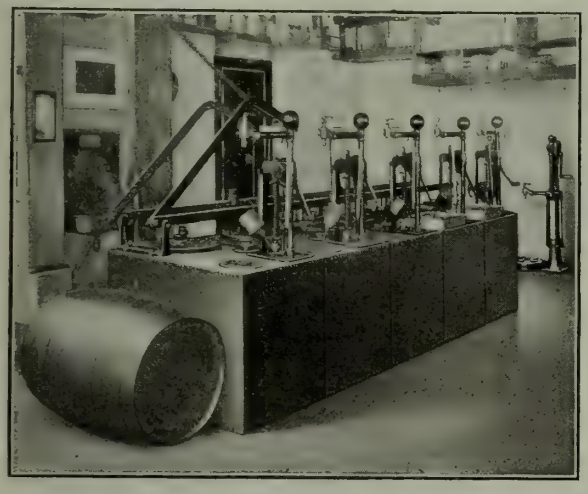

Illustration shows a Battery of Bowser Figure 109 First Floor Paint Oil Outfits with one Bowser Long Distance Paint Oil Pump, Figure 41.

There is no fire hazard from such oil storage. All oils are kept in a uniform consistency which means better results in the Finishing Room.

There are Bowser Systems suitable for all requirements in storing and handling paint oils as well as gasoline, lubricating and other oils.

Now is the time to sell Lawn and Garden Hose

Dominion Rubber System Hose

is the Best Hose to sell

"Daylight Saving" means lots of business for you, if you take full advantage of the opportunities it presents.

"Daylight Saving" means hundreds and hundreds of extra home gardens which must be watered; to say nothing of lawns and flower plots.

For the next month, anyway, feature DOMINION RUBBER SYSTEM HOSE in your windows, in the front of your store, in your advertising. Remember, too, that every man who comes to your store for Garden Hose is a prospect for Garden Tools, Lawn Mowers, Seeds and other things on which you make almost as good a profit as on Garden Hose.

Like all other Dominion Rubber System products, our Garden and Lawn Hose has stood the test of quality, and has given satisfaction to dealers and customers alike.

You are building up a permanent and profitable trade when you sell DOMINION RUBBER SYSTEM products.

Wire, write or telephone the nearest branch for full description and prices on Dominion Rubber System Lawn and Garden Hose.

Listen to Mr. Lauder!

Many interesting letters from dealers come to the desk of our Sales Manager, Mr. Burdette. Here is one from a North American dealer, George P. Lauder, of Elphinstone, Minnesota, who formerly handled the Sharples line. There is a lot of food for thought for dealers in Mr. Lauder's brief but pointed letter.

"Your letter of the 19th received, and I regret that I am unable to secure the agency for the Sharples this season. I have been out of business for the last two years and am only now opening up in the machine line alone, and would very much like to get your agency this year.

"I am handling the . . . . . and . . . . . makes of separators at present, but find them slow sellers, as the price is high and I do not like them as well as the Sharples, which I handled for about ten years or so. I have sold four separators, so far, and think if I had the Sharples next spring I would sell a dozen at least.

"Kindly let me know if there is any chance of getting back the Sharples contract at any time."

We hope the above will catch the eye of the dealers who are still handicapping themselves by handling makes of separators that do not represent the modern principle in separator construction—separators that are slow sellers—separators that cannot possibly give the dairyman efficient service.

As Mr. Lauder's letter indicates, the Sharples contract is not being hawked around and is not handed out to every dealer just when he wants it. If you are a progressive dealer, in a good territory, and that territory is open on Sharples we will be glad to acquaint you with the many advantages of the Sharples contract.

UNIVERNISH

The Sanitary Varnish—

You can wash UNIVERNISH with boiling water. Scrub it and Scour it. **It won't turn white.** That's why so many large institutions insist on UNIVERNISH being used.

You can cash in on its popularity.

UNIVERNISH gives such universal satisfaction that dealers who sell it profit by its popularity.

For inside, for outside, anywhere, everywhere that Varnish can be used, UNIVERNISH is the logical verdict.

It's the best all 'round varnish to sell. Simple and satisfactory for your customers. Steady, continuous business for you.

Trade with Gt. Britain

Extract from the "Times," London, May 2nd, of cable sent to Ottawa by Canadian Mission:

"Canadian manufacturers should realize the advantage of having representatives in England, they should not overlook the British market, where a great variety of commodities is needed, and the market is favorably open and worthy of individual effort."

The Opportunity Now Before You.

A director of an influential British firm will be visiting Canada during June and July to buy from Canadan manufacturers, or would act as selling agents throughout Great Britain.

The goods of interest are Enamelled and Aluminum Kitchen Utensils, Domestic Woodware and Household Hardware.

Propositions carefully considered; Please communicate (in confidence) with

SIDNEY S. FREEMAN, (London,) Eng.
National Park Bank, New York.

A GOOD INVESTMENT

Stamp your name on every tool and be insured against loss and theft. We will make for you a stamp, hand cut from tool steel, it will last a life time. Send 20c for each letter or initial, and 10c postage.

We also make special Trade Mark Stamps and Dies. Steel Letters and Figures in sets for the hardware trade.

Starrett Hack Saws

are more than just hack saws—each blade is a cutting tool specially designed to cut one or more kinds and shapes of metal most economically.

It's only a small shop with a wide range of miscellaneous work and very frequent changes that can afford to use one hack saw blade to cut every kind of metal.

The big concerns, cutting quantities of metal, work the Starrett way. They standardize by specializing because they've found it cheaper in cost per cut.

You can help your customers lower their cutting costs by giving them a Starrett Hack Saw Chart MA.

Digs under skin after cutting whisker

Glides over skin after cutting whisker

LET your customers shave with this double bevel blade. Let them take a Penn Razor home with them on a 30 day free trial, without paying a nickel deposit.

Say to them, "try this razor, and if you don't get the best shaves you ever had, return it. If you want to keep it, pay us $5."

Then show them how the tiny double bevel on the Penn blade *protects* their face from after-shave soreness—how it keeps the edge from digging under the skin after cutting through the hair.

And tell them how easy it is to keep the first-time keenness on the blade, and get — every time — shaves that make their face feel fine.

Write us for full details about this razor and how we protect you on the 30 day free trial offer.

A. C. PENN, Inc., 100 Lafayette St., N.Y.. Canadian Distributors : Menzies & Co., Toronto

Your LINK-UP:—

One of the Series of Advertisements used in our National Campaign in Newspapers.

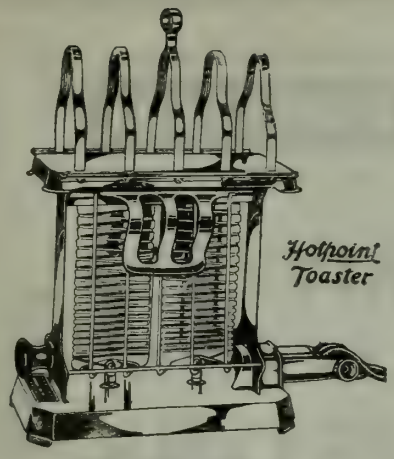
HAVE you seen some of the O-Cedar advertisements in the newspapers?

They are inserted to help you sell more O-Cedar Products. The large number of satisfied users of these products must be reminded about O-Cedar Polish and O-Cedar Polish Mop. The number of women using O-Cedar Polish is being increased, by its merits becoming better known.

All O-Cedar ads read "On Sale at your Hardware Shop." It is only necessary for a merchant to display the goods in his window and advertise O-Cedar Products in his local newspaper, to get a good share of the O-Cedar demand.

We have also prepared a series of sales-getting advertisements which we can supply you in plate form. The advertisements do not confine themselves to O-Cedar Products, but embrace many other profitable lines which you sell. Their use would result in saving time—and worry, and would give you effective advertisements that will bring more sales.

One of the Dealer Ads. which we supply free to O-Cedar Dealers.



Keep O-Cedar Products in evidence in your newspaper ads and about the shop. You will be surprised at the way your sales will increase.

Channell Chemical Company, Limited

O-Cedar Polish

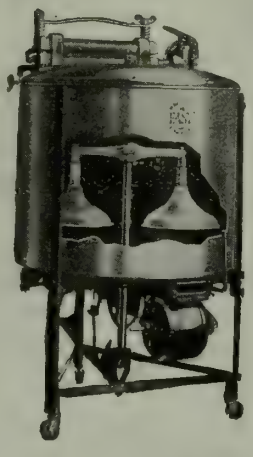
HARDWARE AND METAL, June 14th, 1919. Volume XXXI., No. 24. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

HOTPOINT TOASTER

An efficient, handsome appliance suitable for every day use, makes a splendid wedding gift, has toast rack.

POLAR CUB FAN

Small, but a great air disturber, sells very readily at a popular price. It is staunch, serviceable, finely finished. Sizes 6" and 9".

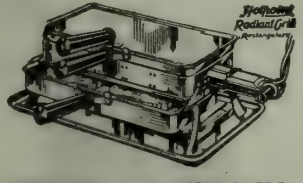


"THOR" ELECTRIC WASHER

This type of machine is very popular with users. The "Thor" has established itself in Canada very strongly. It is a recognized leader. Made in other types as well.

HOTPOINT BOUDOIR SET

A real travelling companion, an excellent wedding gift.



"EASY" ELECTRIC WASHER

The only washer on the market made on the vacuum principle—suction not friction. It's a high grade washer which washes fine fabrics as well as the heaviest blankets. The soapy water is forced through the fabric, loosening the dirt without wearing or straining the fabric. The "Easy" is made in several sizes and styles, the most popular being the type here illustrated. The "Easy" is also made in hand power type.

HOTPOINT VACUUM CLEANER

Like all Hotpoint products the vacuum cleaner leaves nothing to be desired in point of efficiency.

HOTPOINT RADIANT GRILL

This is the rectangular type, adapted splendidly for toasting.

Hobnobbing with the "Nineties"

It is ancient history, but yet there are some of us who remember when the mercury hobnobbed with the nineties long before the First of July. This year seems to be repeating history and breaking records, so let us prepare for it.

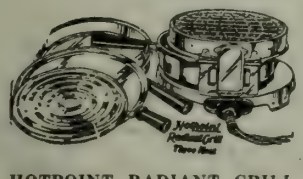
In the old days Madame Housewife was forced to roast over a hot stove or prepare cold meals. To-day she does neither, for electricity with its modern appliances has come to her aid.

We carry a very fine range of electrical appliances, not only appliances for lightening the preparation of the meals, but appliances which lighten the summer work—the washing, ironing and the cleaning.

Our stock consists of such lines as —

"Hotpoint" grills, toasters, percolators, stoves, etc.
"Hotpoint" vacuum cleaners.
"Hotpoint" electric irons (all styles).
"Thor" electric washing machines.
"Easy" Electric washing machines.
and not the least, the

Polar Cub Electric Fan.



which stirs up the stagnant air of the home and starts a circulation of fresh invigorating air—making the hot days more liveable. Sells at a popular price. Every home should have at least one.

If the Rice Lewis man hasn't arrived, mail your order direct. Every day counts this weather. Get your summer stock in.

HOTPOINT IRON.

The domestic size iron, nicely finished, efficient, thumb rest which relieves strain, stand attached.

HOTPOINT RADIANT GRILL

Made in single and three heat, has a great range of usefulness.

UNIVERSAL
in Every Home

UNIVERSAL ELECTRIC IRONS

TAKE THE WORK OUT OF IRONING DAY

A sturdy, dependable Electric Iron built of the finest materials and designed to stand up under hardest service.

Terminal troubles are practically eliminated by our patented seven point connecting sleeves.

An unusual heat storage capacity is provided by our extra heavy sole plate and large heating unit, making it unnecessary for the user to "wait for the Iron to heat up."

Full nickel finish, reversible heat proof stand equipped with 6 foot heater cord and attachment plug. UNIVERSAL Irons give quick turnovers and good profits to the dealer.

UNIVERSAL ELECTRICAL HOME NEEDS

SAVE TIME — SAVE FUEL — SAVE WORK

UNIVERSAL Electric Home Needs comprise a wide variety of electrical cooking and heating appliances, each one of which has been designed to fill a distinct need in the home.

Each UNIVERSAL Coffee Urn, Percolator, Chafer or other liquid heater is equipped with our patented safety Fuse Plug (as simple in operation as the fuse which protects the lighting circuit in your home) preventing injury to the vessel should the contents boil dry with the current on.

Is this Display Working for You?

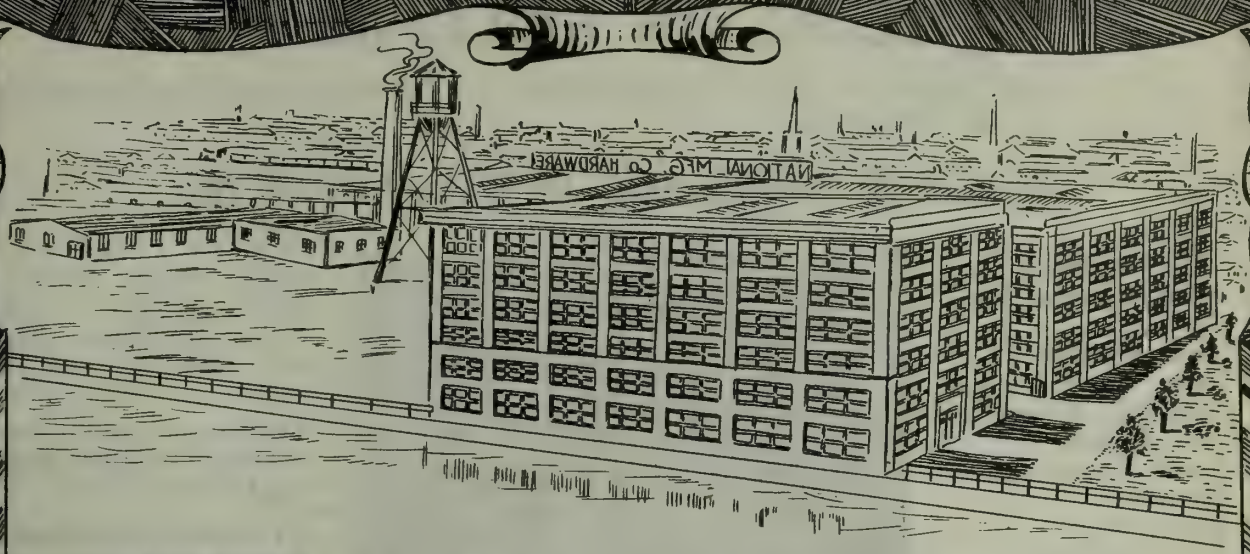
Here's a display stand that will sell braces for you because it shows our nationally advertised brace to best advantage and gives your customers all its selling points at a glance.

This 732 Brace is a big seller because it will do far more than the ordinary brace and this fact is "getting across" big in our national advertising.

Has a patent chuck that will hold twist drills as well as regular auger bit shanks. Bores wood, plaster, cement and metal.

With this stand on your counter or in your window you connect your store with our national advertising in the "Saturday Evening Post" and other mediums. The stand helps you sell this leading tool which is half sold already when your customer sees the brace in your store.

Stand is furnished free with small order of No. 732 Braces. Write for pocket catalog and our special offer to the trade.



Our Handbook, "How to Sell Tools," helps you cash in on our national advertising in your tool department. It is full of money-making ideas and selling suggestions that you can use. Write for your copy to-day.

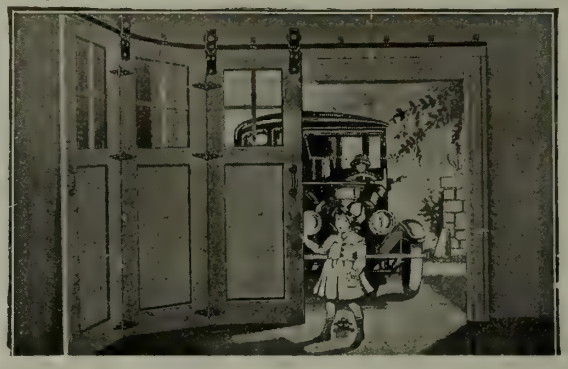
Reduce Your Selling Costs With The NATIONAL No. 500 Butt.

Puts your sales efforts on a profitable, minimum basis. Comes packed in the sales-inducing "National" way. All ready to hand over the counter to your customer.

Our **No. 500 Butt** in all sizes is packed one pair to a box and wrapped separately with screws.

This splendid seller offers you an opportunity to get acquainted with the advantages of handling "National" products.

Write to-day for your copy of the "National" catalogue.



ALL GARAGE DOORS SHOULD BE HUNG ON ROLLERS

No equipment ever produced offers the many attractive features or gives such universal satisfaction to the user as does the

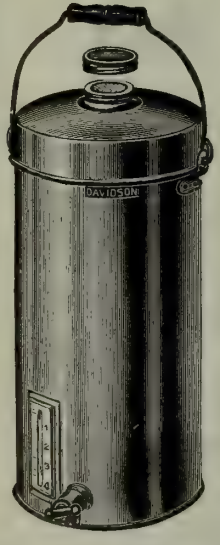
HATCH GARAGE DOOR OUTFIT

Outfit includes:

- **3 Special Swivel Door Rollers**
- **22 Feet of Track**
- **3 Pairs Special Garage Door Hinges**
- **3 Stay Rollers**
- **2 Extra Heavy Door Handles**
- **1 Safety Hasp**
- **1 Hook and Eye**

Makes doors weather-tight, sag-proof; prevents slamming, and does not get out of order.

The hinged door allows entrance without opening the other two.



Complete directions packed with every set.

The roller bearing swivel hangers hold the doors in place, take the bind off the hinges and roll the doors around the corner, on the inside of building to the side wall.

Time to Prepare

THE wise dealer will stock up with a line of McClary's Simplex Ranges. There will be a great demand for this fine interchangeable gas and coal or wood range this season.

The changeable seasons of the past few years have taught their lesson. One day cold, the next day unbearably hot. The Simplex has an appeal for the housewife who wants a comfortable kitchen all the time——cool in hot weather, warm in cold weather.

Your trade will recognize the selling points of the Simplex. Your customers cannot fail to realize its convenience and usefulness. The Simplex embodies the functions of both a coal or wood and a gas range.

A simple turn of a lever changes the Simplex from coal to gas or from gas to coal.

The oven can be heated by either coal or gas, or by both if desired. The range has four heating holes and four standard star gas burners. The Simplex is a handsome range—a range that makes a creditable display. It is finished with white porcelain enamel oven door panels and burnished top.

A dealer can recommend the Simplex with a feeling of perfect confidence. He is backed by the knowledge of the reliability and dependability that is associated with the name McClary's—a name that stands out as that of an institution of over seventy years' establishment and high standard reputation.

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

We Put It To You Squarely:

"Do You think it is fair to Yourself and Business to countenance an Avoidable Waste?"

Here is a waste you can easily stop at practically no expense to yourself. The old method of handling varnishes, oils, turpentine, etc., is just as wasteful and just as antiquated as the old-fashioned horse car and the still older ox cart.

GILBERT & BARKER
Oil Storage Systems

will quickly pay for themselves in time, labor and the **saving of oil.** This is the experience of thousands of users of G. & B. equipment. THEY KNOW. Seepage, due to leaky containers, is eliminated. This equipment is proof against evaporation and reduces fire risk to the minimum. The Gilbert & Barker line of pumps and tanks is complete.

You intended to look into this—do it to-day. Send for Bulletin 52. To-day is a better day than to-morrow—write.

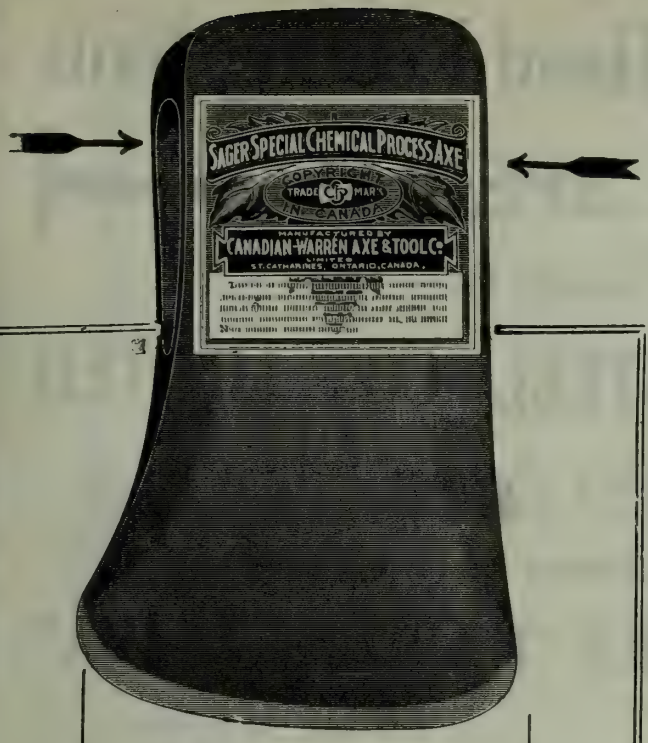
A.R.C. BRAND

The Brand Behind The Product

When it's a question of workmen's mitts and gloves—it pays to sell the best. You can't afford to lose time and money experimenting with unknown brands.



The High Quality of "A.R.C." Brand Mitts and Gloves is well known. The Workman recognizes the "A.R.C." Trade-Mark as the stamp of good money-value.

Dealers make better profits selling this brand, for we share the middleman's profits with you.

May we send you particulars? Write us.

A. R. Clarke & Co., Limited, Toronto

Demand Is There— It Is Only a Matter of Supplying It

There, in a phrase, is the sales story of "Famous Five" Files as far as dealers are concerned.

Customers come to buy. You don't have to spend time explaining their qualities. All you need to do is carry stock enough to fill orders and specify "Famous Five" when buying from jobbers.

They are:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

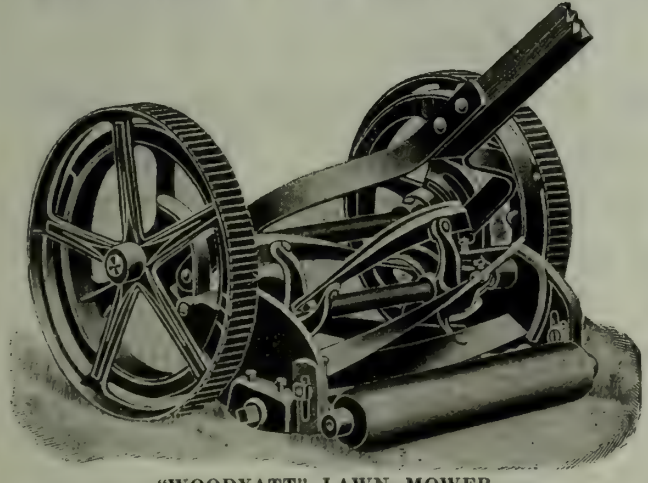
The Evidence Is There

The big feature of the Stack Gas Water Heater is readily apparent.



Your arguments may be clinched by simply opening up the Heater. Those near perpendicular copper tubes will convince your customers. They can see at once that the water is subjected to intense heat. They will understand how small columns of water will heat quicker than in a large coil. The fact that the *Stack Gas Water Heater* heats water in one minute will make sales for you. You will have no trouble convincing your customers that this is the best heater on the market to-day.

Display card sent on request.

93-97 Adelaide Street West - TORONTO

GENERAL FAVORITES

"WOODYATT" LAWN MOWER

"EMPRESS" LAWN MOWER

T-F Lawn Mowers for years have been general favorites and with Summer started in earnest a splendid opportunity is afforded you, Mr. Dealer, to make big sales by pushing the T-F lines strongly. The popular lines are the Empress, Adanac, Ontario, Woodyatt, Star and Daisy. Many sales of any of these lines means many satisfied customers.

Order a stock from your jobber to-day.

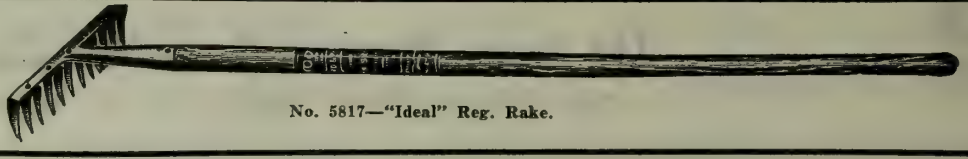
No. 5757—The "Perfect" Patent Dutch Hoe.

WARD & PAYNE W P WARD SHEFFIELD



These garden tools are now off the list of "restricted exports" and we are thus able to supply and ship them in any quantities. The Ward & Payne line embraces a varied line of high quality fast selling garden tools. Write our nearest Canadian Agent if your jobber cannot supply you.

The Unbreakable "Perfect" Dutch Hoe. This is the only genuine Solid Dutch Hoe on the market. It is not welded, but from tip of blade to end of shank is one solid piece of steel. No more broken sockets or shanks as with a welded tool. Your customer will be perfectly satisfied.

The "Ideal" Rake for any Soil. This is a strong, practically unbreakable tool that will work in either light or heavy soils. Its specially-shaped teeth prevent clogging and break the soil up with less labor. It is a popular seller.

PEERLESS POULTRY FENCE

The kind that endures—in place to stay and please — because it lasts. It looks well and is always in place — "it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes. **Write for Catalog.**

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Stanley Tools

Stanley Steel Squares

Every Stanley square is weldless, or, in other words, made from ONE piece of steel, and all four edges are machined. Particular attention is called to the finish on all numbers and the depth and accuracy of the graduation.

Special care has been given to the simplifying of all tables used, so that the workman can get the measurements he desires with ease and rapidity.

They can be furnished in a number of different styles, and the variety of finishes offered include Royal Copper, Blued, Nickel Plated, Galvanized and Polished. All Royal Copper and Blued finished Squares have white enamel figures and graduation.

Each Square is packed in an anti-rust wrapper and this stamp STANLEY NEW BRITAIN CONN U.S.A. appears on the surface of all numbers.

Send for special circular containing complete description.

Why Did We Let Trotzky Go?

THERE was a time when Canada had it in her power to end the war. In the early days of the Russian Revolution a bushy-haired German was taken off a boat at Halifax and interned at Amherst, N.S. He pretended to be a Russian but was known to be in German pay—on his way to push the revolution—British and American Intelligence Officers so informed our authorities. But pressure was brought to bear and the man was finally released. He got to Europe and became the most sinister figure among the Bolsheviki. Largely as a result of his work, Russia dropped out of the war and Germany was able to fight on for eighteen months. That man was Leon Trotzky. His real name was Braunstein.

Why was Trotzky allowed to leave Canada?

Colonel MacLean discusses this question in the June issue of MACLEAN'S MAGAZINE. He tells the story of Trotzky's activities, of his arrest and subsequent release in full detail, tracing the threads of a strange intrigue from Germany to Washington, and Washington to Ottawa. It is a gripping story, the most important inside story of the war.

Other National Features of This Issue

"Victory Stuff" By Robert W. Service.

"Solving the Problem of the Arctic" By Vilhjalmur Stefansson.

"The Gold Wolf" By W. A. Fraser.

"Hobson's Hard Start" By William Byron.

"The Menace in the South" By Agnes C. Laut.

"The Undercurrents" By J. K. Munro.

And a score of other interesting articles.

"Dependable and Accurate"

—it is dependability and accuracy that have built Dominion Ammunition sales for the dealer. From the beginning Dominion Ammunition has been subjected to inspection and tests that have brought it up to the highest of ammunition standards.

Dominion Ammunition

Above are shown two of the many processes that insure the dependability and accuracy of Dominion Ammunition —the individual inspection and the final machine test as to size.

is recognized by your customers because of its two cardinal points—**dependability and accuracy**—and they insist on having the ammunition that possesses them. Impress on them that the nimble fingers and quick eyes of scores of inspectors detect the slightest visible imperfection in Dominion Cartridges or Shotgun Shells. Intricate machinery tests the quality and quantity of loads and measures to a hair the calibre and size—all a part of the Dominion Service to guarantee ammunition that is "dependable and accurate."

Build your sales of Dominion Ammunition on this and benefit by the profit you make on these sales.

Order from your jobber to-day.

3 STANLEY BALL BEARING BUTTS TO A DOOR

TRADE S.W. MARK

Many of your customers and carpenters have already been won over to the 3 butt method of hanging doors. If you can get the rest of them to adopt it, it will greatly increase your sales.

The use of the third butt keeps doors from warping, binding or sticking. It makes a better looking, better hung door.

Get your butt buyers into the 3 butt habit. They will be pleased with the satisfactory results they will have from the third butt and you will increase your butt sales 50%.

We have published a folder "3 Butts to a Door." On request, a reasonable quantity will be sent you with your name and address conspicuously printed on the cover.

Vol. XXX. TORONTO, JUNE 14, 1919 No. 24

Tariff Changes May Help Business

Manufacturers Generally Though Are Looking for Little Material Change in Hardware Trade—Business Has Been Good, They Say, and There is Every Indication That It is Going to Remain So

MANUFACTURERS with whom HARDWARE AND METAL has discussed the proposed tariff changes seem generally inclined to believe that business will not be materially affected in any way by the new schedules. In some instances the tariff changes will mean slightly higher or slightly lower costs, but in none of the hardware lines is it expected that there will be any changes of sufficient importance to disturb conditions generally. Business has been good the manufacturers say, and there is every indication that it is going to continue good. If anything the proposed changes should help business, manufacturers say.

Protect New Industry

"It is evident," said Mr. A. T. Enlow, president of the Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont., "that the Government has in mind protecting the new industry to some extent in view of the fact that they have changed the duty to read 12½ per cent., instead of the former duty of 5 per cent. plus the war tax, 7½ per cent.

The total result is the same, but, if in the future the war tax should be removed, this will not affect the duty, and hence sheet manufacturers (both those producing black sheets and galvanized sheets) can go ahead on a more assured basis, and develop the business in Canada at considerable expense and trouble.

Will Be No Hardship

In view of the fact that the trade generally has been accustomed to paying the 12½ per cent., this will be no hardship in the new form, and I do not anticipate any change in price, either advance or decline, in the near future.

Canadian prices on black and galvanized sheets have closely followed the U. S. markets, and at the present time show a very considerable reduction from the prices heretofore in effect as indicated by your current price column.

Will Show Increase

Our cost will show somewhat of an increase, due to the fact that we are now forced to pay 1c per lb. duty on spelter, instead of war tax 7½ per cent. as heretofore, this meaning about $1.50 per ton increase in our manufacturing cost, but in view of the fact that the spelter producers in Canada are located so far away and the freight rate is so high as compared with the east St. Louis rate, we think it is only fair to give them some protection of this kind, and especially remembering their very loyal attitude during the war, at which time they gave the Canadian Government the entire benefit of their plant and output and at a very low price.

It may be of interest to consumers of our galvanized sheets to know that everything that enters into the manufacture thereof, except sal ammoniac, is now produced in Canada, and of a very superior grade, and as regards sal ammoniac, that is imported from England, as no one has yet been able to equal the quality of the English article."

THE NEW INCOME TAX

Hardware merchants throughout Canada will be interested in the federal income tax schedule announced by the Minister of Finance last Thursday. These imply a substantial increase over the present tax. There is a normal rate of four per cent. upon all incomes between $1,000 and $2,000 for unmarried persons, and widows or widowers without dependent children, and between $2,000 and $6,000 in the case of all other persons. There will be a rate of eight per cent, upon all incomes above $6,000 and a graduated surtax commencing with incomes of $5,000 instead of $6,000 as heretofore. The Finance Minister gave the following table to illustrate the present and proposed taxation on all incomes from $3,000 to $1,000,000 and over for married persons, and widows and widowers having dependent children:

Income	Present Tax	Proposed Tax
$ 3,000	$ 20	$ 40
4,000	60	80
5,000	100	120
6,000	140	170
8,000	266	370
10,000	392	590
12,000	790	830
14,000	788	1,090
16,000	986	1,370
18,000	1,184	1,670
20,000	1,382	1,990
60,000	7,872	12,590
70,000	9,962	12,590
80,000	12,327	20,890
90,000	14,967	25,790
100,000	17,607	31,190
150,000	34,282	61,190
200,000	50,957	93,190
300,000	96,857	161,190
500,000	195,407	303,190
1,000,000	499,157	663,190

Says Business Good

Adam Hall, of Beardmore & Co., Toronto, does not see that tariff changes are going to have any material effect on business. It will make the general situation just what it was before the war as far as duty is concerned.

"Business," said Mr. Hall, "has been very good. One of the great troubles for some time has been to get enough stuff. Prices are high but they are going much higher. Export business has been developing very nicely. As far as tariff changes are concerned I do not see where it is going to affect our business materially."

Will Not Be Affected

"We are dependent for supplies of leather upon the American market and tanners have notified us of a big increase in prices," said S. L. Trees, manager of the Whitby, Ont., branch of the saddlery hardware firm of Samuel Trees & Co., Ltd. "The tariff, I do not think, is going to materially affect business in any way. It has been very good. I am not looking for any export business in our lines. Take in England and France for instance, they will be amply able to look after all their own requirements. Harness prices, it seems to me, are going to remain very firm. They have been materially lower though for some time than American prices. Harness is the only Canadian manufacture that is not listed by the Grain Growers in their catalogue. The American firms have not bothered much with the Canadian market for the past two years as they have been so busy looking after their own war requirements. Now when they are getting back to normal business again they are finding a great scarcity of stocks with which to work. Prices are very high, and I think will continue high, but there is lots of business."

Will Help Business

"My opinion is that the tariff changes will, if they do anything, help our business," said W. G. Brymer, of the Canada Metal Co., Toronto. "I am not looking

Tripled Accessory Sales

Business Still Growing—Ralph & Wilson, of Dundas, Ont., Are Like Display to Keep Goods Moving, Says Member Stove Sales—Some Details

Based on an interview by C. E. PARSONS, of Hardware and

"OUR sales of auto accessories have tripled in two years, and the business is still growing. They are nice goods to handle and carry a good profit." This was the statement made to HARDWARE AND METAL by J. Wilson, of the hardware firm of Ralph and Wilson at Dundas, Ont. The firm keeps a display of auto accessories right up at the very front of the store. Auto accessories and electric washing machines are the first things you see when you open the door. Electric washers are a new line with them, although they have sold a lot of water-power machines.

"We find a general tendency on the part of people to want better goods," said Mr. Wilson. "The price is not the big consideration. A dollar or two is neither here nor there with most people if you can show them a really better article, which will give real service."

Plan Demonstration

Although they have been handling electric washers for only a few weeks, Ralph and Wilson are going right after the business. They believe one of the most effective ways to sell electric washers is to put on a demonstration, and with that end in view they are planning one to which all the women in the vicinity will be invited.

"Stove demonstrations have proven most successful for us," said Mr. Wilson. "We have found a three-day demonstration to produce excellent results. We usually have them the last three days in the week, and on Saturday serve coffee. We have found our stove sales maintained steadily. Even in a season like the last, when so many firms, owing to mild weather and other causes, found business slower than usual, we did as good a business as ever. Our stove business, taking it year in and year out, is one of our big departments."

Display Big Feature

Ralph and Wilson have a big, roomy store, three storeys high, but it is too small in some ways for the stock they carry and their ideas of display.

"We try to let the people see as much of our stock as we can," said Mr. Wilson. "There is no better way to sell goods than to let people know you have them. We are changing our arrangement on the main floor, with the idea of getting even more display than we have now."

Tinware and enamelware have always been a big line with Ralph and Wilson, and until very recently there was a large, complete display of all kinds of these goods arranged on special display stands and occupying the centre of the store. The stands ran back for a distance of about thirty-five feet, and most of them were double-deckers, capable of carrying a lot of pans, tins, etc. Showing these goods in this way and in such

To the left of the Ralph and Wilson store, Dundas, Ont., one will notice on entering a battery of silent salesmen in which such lines as table cutlery, shaving materials, electrical household appliances and other goods are most effectively arranged. Back of the silent salesmen are wall cases, which display a stock of the larger goods. The entire arrangement is one designed to keep the merchandise moving.

In Space of Two Years

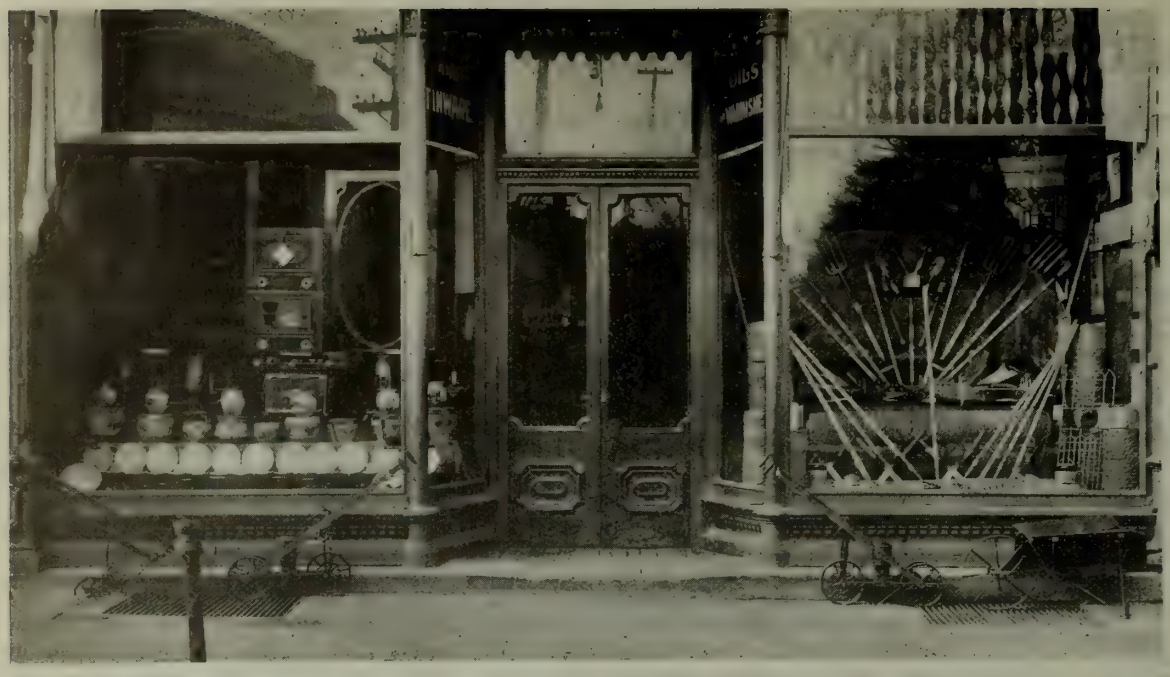
Also Going After Sales of Electric Washing Machines—Nothing of the Firm — Demonstrations Aid in Developing of the Store Arrangement

Metal, with G. Wilson, of Ralph & Wilson, Dundas, Ont.

a prominent part of the store, not only resulted in large sales being made, but in a steady turnover. This branch of the business has become so well established now and has grown to such magnitude that Mr. Wilson says it is planned to move it to the second floor. Here a new and much larger tinware and enamelware department will be located. This will not only provide the necessary quarters for the expansion now required by the growth of the department, but it will give the firm the best space in its store for pushing new lines. One of these will be electric washers.

Kept at Front

"We will use the new space secured by removing the tinware upstairs to display electric washers and lines that are seasonable," said Mr. Wilson. "We are satisfied that one of the very best ways of boosting sales is to keep seasonable lines right up in the front of the store. We think there is a big future in this territory for the sale of electric washers, and are going right after the business."



The general display arrangement used on the ground floor of Ralph and Wilson's store might be of interest to hardware dealers. As one enters he faces the display stands of tinware and enamelware. Along the left are no less than seven large, all glass silent salesmen and wall display cases. These contain cutlery, silverplated ware, tools, etc. On the top of many of the silent salesmen are shown alarm clocks, thermos bottles, and similar lines. In some instances the effect is almost one of overcrowding, but Mr. Wilson says this is because their space is limited and they want to keep all the stock possible before the public. On the right side of the store at the very front are shown auto accessories, a display of guns and rifles, a cabinet display of bathroom fixtures and a section for shelf hardware. At the rear of the store is a section where stoves are shown, along with wall racks of forks and shovels and the paint department. This section, although it is at the rear, is an important one and is kept well lighted.

Growing Steadily

"We have been selling a lot of paints," said Mr. Wilson. "Comparing one year with the other the paint department shows a steady growth. Every time we sell paint we make a point of trying to sell one or more brushes. We always suggest to the buyer and in the majority of instances make at least one sale. We have found that this season people seem to be buying paints in larger quantities than usual. Price is not the big consideration with most buyers that it used to be. Many of those who want to buy paint now never mention it. They have apparently forgot-

Here is a view of the other side of the Ralph and Wilson store at Dundas, Ont. One of the big features of this store that can easily be seen is the display of goods—getting the merchandise out where the customers can see it. The arrangement of the tables of enamelware and tinware at the left of the photograph is neat and in its immensity if nothing else could be termed very effective.

This is the store front of Ralph and Wilson, hardware merchants, Dundas, Ont. This photo was taken about a month ago at which time the displays were very seasonable. This firm finds the windows one of the best methods of attracting trade and change the arrangement frequently. This is one of the methods used to increase sales of auto accessories which has proved very successful.

ten about it, or are used to it. In showing brushes we always show a good quality brush. Most people will take one or more, but if they do not, and ask for a cheaper brush, then we have a cheaper line to sell them.

Uses Newspaper Space

Ralph and Wilson have been consistent users of space in the local paper. Generally half page advertisements are used, but very often this amount of space is doubled. The paper in Dundas is a weekly, and one of the troubles that has been discovered in connection with it is that maximum results are not always obtainable, owing to circulation limitations. In order to meet this condition, Ralph and Wilson are contemplating the publication of a catalogue or price list of their own.

"Our present plan," said Mr. Wilson, "is to issue two of these each year. A spring and summer catalogue, and a fall and winter catalogue. We would send these to everyone in the district. This would not mean that we would discontinue our newspaper advertising. The catalogues would supplement the newspaper space and keep our lines before the buying public in our whole district."

Reducing Credits

The question of reducing "credit" accounts to the minimum is receiving a good deal of careful consideration by the firm.

"We are adopting the cash plan as much as possible," said Mr. Wilson. "The question of eliminating credit business is a very important one in the smaller towns, especially in view of conditions that have prevailed. A great many of the "carry" accounts are for small purchases, which the customers asked us to charge up to them. While insignificant in themselves, it is not long before they begin to run into considerable money. Collecting all these little accounts, or trying to collect them, means quite a loss, as they soon eat up all the profits we might have made on the sale. We have found also that as soon as the average person gets into you, even if it is only for a small amount, he ceases coming to the store, ashamed to come and get anything more because he owes you money. Thus you not only have the time and trouble of collecting the old accounts, but you lose, temporarily at least, any other business. I have been thinking over the matter of offering a discount for cash. It seems reasonable that the good customer, who always wants to buy for cash, should be given better terms than the party who always runs an account. I think giving a discount on all cash sales, and charging interest to those who do not pay up, might eliminate a lot of the troubles, and am thinking of trying out the plan."

Poultry Supplies

High prices of living have resulted in many people in Dundas and vicinity going in for poultry raising, in the last few months. Ralph and Wilson were after this business quickly with a stock of incubators and poultry netting and supplies generally.

"These are a new line with us," said Mr. Wilson, "but the business gives every promise of developing satisfactorily. We have sold a dozen incubators and a lot of supplies, and prospects look good for selling a lot more."

Toys are another line in which the firm has been building up a big trade. Three years ago they started in with a stock of toys valued at $400. During the Christmas season last year, in five weeks they sold over $2,000 worth of toys and had to employ five extra salespeople in the toy department to handle the business. This year they are planning to sell even more, and are already busy with their arrangements for going after the business.

Two Display Windows

The firm has two medium sized display windows. They are kept in excellent condition and filled with seasonable lines.

"Good window displays are real producers of business," said Mr. Wilson. "We find people come right in and that sales are stimulated in whatever lines we are showing. We change the windows every week. Our two windows are one of the best advertising mediums we have."

Ralph and Wilson have found that their business in dishes and crockery has not only been growing steadily, but brings a lot of people into the store for other lines. Women especially come in for these lines and buy other things they see displayed around the store. The same methods of showing the dishes and crockery are used as for enamelware. The various lines are put out on a display tables. They are kept looking clean and attractive, and the turnover is a steady one.

WM. H. HART SIXTY-FIVE YEARS AN OFFICER

Friday, May 16, was the 65th anniversary of the election of Director Wm. H. Hart as an officer of the Stanley Works. Mr. Hart became a Stanley worker in 1854, and was elected secretary and treasurer May 16 of that year, and has served continuously as an officer of the company since that date, having been secretary for eighteen years, treasurer for fifty-one years, president for thirty-one years, chairman of the board of directors for three years, and is at the present time a director. Mr. Hart was remembered by office workers with flowers and congratulations. — "The Stanley Workers."

Alberta R.M.A. Convention a Success

Retailers in Session at Medicine Hat Hold Lively Sessions—President Outlines Legislation—Resolutions Adopted Are Numerous and Entail Wide Discussion—Stockdale Was There

RETAILERS in Alberta got together at Medicine Hat for the annual meeting of the Retail Merchants' Association last week. A series of lively meetings was held and the discussion generally was very animated. This is one point wherein the sessions proved valuable—that is, in the discussion. It is this "open forum" idea which, when taken advantage of, proves of real value to those in attendance. Getting away from being just a listener can be a good thing. It opens up avenues from which knowledge is disseminated and absorbed. One comes away from such a gathering where ideas are exchanged feeling better—whether it is from helping the other fellow or being given a lift. The reports would indicate that the discussions proved a big feature of the Alberta gathering.—EDITOR'S NOTE.

President's Address

THE sixth annual convention of the Alberta branch of the Retail Merchants' Association of Canada was opened at Medicine Hat, on June 3, with an address of welcome by Acting Mayor Huckvale, on behalf of the city.

President I. G. Gaetz addressed the delegates at the opening session of the convention as follows:

Another year has passed since our convention last July in the City of Edmonton. We had thought that conditions prevailing last year commercially were very extreme, but as time progressed we come up against problems we never dreamt of.

The great conflict which has been going on for the last very near five years has been terminated, the armies of the allied powers have been successful, and right, not might, has prevailed. We do not wish to think of any particular part of the allied armies being instrumental in winning the war. They all did their duty, and have suffered very heavily since the conflict started in August, 1914. We do, however, look with pride on the accomplishment of our own civilian Canadian Army. They have covered themselves with glory and placed the name Canada among the nations of the world.

Our men are now returning to take up their life amongst us again. This will be no easy matter for them. The strain of the great war has, in lots of cases, unsettled our boys, making it hard for them to adapt themselves to the conditions prevailing here, which are so different to what they have been accustomed to for the last four years.

It behooves us, as a body of organized retail merchants, to do our part in assisting these men in every fair and legal way to become again a part of our national and commercial life. Some of these boys went away while so young in years that it is going to be difficult to re-establish them, unless something is done to help them along. I believe the Government is now planning arrangements to meet all cases possible. It is our duty to aid the Government and see that these plans are carried out successfully.

We, as retail merchants, have a great duty during the reconstruction period. It is our duty to employ all returned men possible. Many of our former clerks formed part of our Canadian Army, and all who have been spared, and returned to us, that wish to take up their former vocations in life, it is up to us to see that their positions are available.

The Great War Veterans' Association in the different provinces of the Dominion are certainly taking a magnificent part in the reconstruction work, showing themselves in their actions to be very fair-minded and democratic in their principles. They will be a strong force in our national life, and it is up to us to give them our undivided support in every fair demand they make to our different governmental bodies, to aid in the re-establishment of their members in their different vocations, always remembering that had it not been for our volunteer army, together with our allies, that conditions might not be as favorable for us as they are to-day.

We are passing through a period of unrest in our Dominion to-day which most of us have never seen before, or never thought could occur. This is caused by conditions arising out of the past war and is supplemented by the high cost of living, the profiteering that has been carried on by the big interests, and other causes which I had hoped our Federal Government would have taken extreme measures to combat.

The strikes that have occurred in Western Canada during the past month have been very detrimental to our association. We, in the small cities and towns, have not been affected as in larger centres. I think it is very unfair that such a large number of our citizens in Western Canada should be made to suffer inconveniences when concerted action of our Government could no doubt bring this situation to a satisfactory end.

Our Provincial Association to-day is in a better condition than it has been in for some time; our membership is larger to-day than it has been for some years. The conditions prevailing have impressed the retail men of the Province that organization is the only way to accomplish ends. We will in the next year or so find greater need of stronger organization, and it behooves every retail men to give his earnest effort to the success of this association.

It appears to me in order to successfully carry out our work in Alberta that we should have a Provincial Secretary in the Province. This secretary should be, I think, in the capital city of Edmonton. My reasons for this are, that he could keep in touch with the Provincial Government, secure the copies of the Bills before the Legislature that we wish to secure to better our conditions. I have felt this need very much during the present year.

I would also like to make some arrangements with the Retail Merchants' Association of Saskatchewan to remain affiliated with them, so as to derive the benefits of their very complete organization, in their different branches they have initiated for their members, making our Provincial office, as it were, a sub-office of theirs. I advocate this step because I feel it would very materially reduce our cost of expense in running our Provincial office.

I can never forget the great work the Saskatchewan Retail Merchants' Association has done in Western Canada in aiding the retail trade, especially their help in Alberta, as I know personally that we would not be in existence to-day if it had not been for their efforts. They have a very strong organization, the strongest in the Dominion. The reason for this is in the service they have given their members. They have instituted so many different branches, namely, collection of old accounts, collecting of excess charges on freight bills, fire insurance, checking fire insurance policies, and a number of other items. They have an expert in every department. These are some of the privileges we could secure by not separating from them, and I think satisfactory arrange-

Where the Convention Was Held

ments could be made with the Saskatchewan executive along these lines.

Legislation

We met the Alberta Provincial Government and placed before them requests for the following legislation:

An amendment to the Hawkers' and Pedlars' Act, raising the Provincial fee from $25.00 to $100.00 per year on foreign companies operating in the Province and making it necessary to take out a Provincial license before a local license is granted; also that that section of the Foreign Companies Act prohibiting municipal councils from assessing a license be repealed.

Small Debts Act be amended as follows: 1, That the amount that can be sued under the act be raised to $100. 2, The right of action in this district where the debt was contracted. 3, Providing for a garnishee summons. 4, Providing for a distress warrant.

An amendment to the Chattel Mortgage Act providing for preferential security on growing crops or crops to be grown covering the purchase price of such necessities of life as clothing, groceries, flour, meats, binder twine, etc. Such security to take second place only to seed grain liens.

The Factories Act was also discussed at some length.

Your executive were the means of having a course of commercial lectures given in the city of Edmonton during the last week in May; also in the city of Medicine Hat during the present month. This work has been carried on by the University of Alberta, and we hope is only the beginning of this good work.

In conclusion I wish to appeal to every retail man in the Province to assist this Association in their efforts to better the conditions of the retail trade. We wish you all to join with us, becoming members of the Association, boost for the Association whenever possible and help us to make this year the banner year for the Retail Merchants' Association in Alberta.

The epidemic of influenza which raged through this Western country last fall seriously affected our work of organization, throwing us behind some six weeks of two months, so that a large portion of Southern Alberta is behind, but two organizers are now busily engaged in bringing this up to date, and they are meeting with good success, increasing the membership to the Association at most of the points visited.

Moved by Mr. Beart, of Edmonton, seconded by A. F. LePage, Medicine Hat, that the President's address be adopted.—Carried.

Treasurer's Report

N. J. McDermid, treasurer of the Alberta branch of the R.M.A., made his report to the convention at the Thursday morning session. The report contained the following statement of finances:

Receipts to Dec. 31, 1918, including fees		$4,586
Disbursements	$1,152	
Organizers' expenses	1,645	
Due Dom. Association per capita tax	382	3,180
Balance		1,635

The Alberta branch is not responsible for any part of the expenses of the Saskatchewan office from which the operations of the R.M.A. in Alberta are directed. A credit of $500 advanced within the past few weeks from Secretary F. E. Raymond wipes out all liabilities of the Alberta branch.

The question of what Alberta members should pay for the services rendered by the Saskatchewan office was brought up. As outlined, Alberta has paid all its expenses with the exception of a pro ratio payment of office expenses.

T. A. GAETZ,
General merchant of Red Deer, Alta., elected President for the coming year.

President Gaetz explained to the 1918 convention Alberta was to pay 25 per cent. of the running expenses of the office at Saskatoon, though he added that this was not a hard and fast bargain.

W. J. Illsey, Calgary, thought 25 per cent. was too much for the service being rendered by the Saskatoon office to Alberta retailers. This proportion had been arrived at merely on the basis of comparative membership in the two associations.

The suggestion of a settlement with the Saskatchewan office was not favored by the delegates. On the other hand it was proposed to have the executive committees of the two associations meet and arrive at some working basis whereby Alberta might in future conduct its own affairs and handle its own finances.

A delegate from Edmonton suggested that the organization at Saskatoon give more service to Alberta retailers than had been done. He thought it unnecessary to talk settlement when Saskatchewan was handling the finances.

OFFICERS FOR 1919

President, T. A. Gaetz, Red Deer, General Merchant.

1st vice-president, A. F. LePage, Medicine Hat, Department.

2nd vice-president, Geo. F. Beart, Edmonton, Men's Wear.

Hon. secretary, J. W. Bawden, Lethbridge, Furniture.

Treasurer, N. J. McDermid, Calgary, Druggist.

Secretary, F. E. Raymond, Saskatoon.

The position of honorary secretary was the only one to change at the election of officers at the sixth annual convention.

Nominating committee consisted of following delegates: J. G. Robinson, Foremcst; H. Hill, Taber; E. F. Purcell, Brooks; J. W. Bawden, Lethbridge; J. Kellas, Medicine Hat.

President Gaetz gave his opinion that a paid secretary should be appointed in the Province of Alberta, with office preferably at Edmonton, where legislation passing through the Provincial Government could be watched. He was of the opinion that the provincial membership could be greatly increased and better service given to Alberta retailers.

Secretary F. E. Raymond of the Saskatoon office was asked for a statement of the probable cost of maintaining an independent office in Alberta, and also for an expression of opinion as to the advisability of separating the provinces.

"I suggested that Alberta should take over its own affairs in 1917," said Mr. Raymond, going on to explain that when Saskatchewan retained the direction of affairs in Alberta at first one-half of the fees of Alberta retailers was kept in Saskatoon, whereas later $7 was turned back out of the $12 fee.

"We in Saskatoon merely wanted to put Alberta on its feet," continued Mr. Raymond, pointing to the fact that when the affairs of the province were taken over there was a deficit of some $2,500 to be met. This deficit has been paid off now. In regard to giving greater service, Mr. Raymond pointed out that all the services of the Saskatoon office are at the disposal of Alberta members.

"During the year 1918 we received $4,586 from Alberta," said Mr. Raymond, "but we lost half this amount by neglecting our work in Saskatchewan. We had two men with automobiles out as organizers, and before the cars worked in our province at all they had spent several months in Alberta in the interests of organization."

Mr. Raymond explained that northern Alberta had been well worked by the organizers and that in places visited the old membership had been retained and in some places increased 100 per cent. Interest in the organization was increasing as was evident from the larger attendance at the present convention. No charge had been made by the Saskatoon office to Alberta for postage, stationery, staff expenses, depreciation on motor cars, etc.

At this point Mr. Raymond outlined the expenses of the Saskatoon office for one year which totalled approximately $1,000 per month.

"Saskatchewan is willing to settle on the basis of the actual expense of carrying on the work in Alberta," added Mr. Raymond, who favored the idea of taking the responsibility for handling Alberta affairs out of his jurisdiction.

"A good secretary and a good organizer in the field could carry the work on sucessfully if we did not pay you five cents," said Mr. Raymond, pointing to the fact that the Saskatchewan organization started in 1913 in debt, while it now had $6,000 to its credit.

A resolution to leave the settlement of the matter to the executive committees of the two provinces as soon as a joint meeting could be arranged was moved by W. J. Illsey, seconded by H. S. Ireland, Medicine Hat, and carried by the convention.

At this point President Gaetz addressed the delegates further on this subject, having in mind his long experience with the association.

"We should have a paid secretary in Edmonton," said Mr. Gaetz. "More attention should be paid to the Alberta branch of the R.M.A. Up until last February matters were very quiet regarding retail matters in the province. This is because we could not do anything else. Saskatchewan did the work. Conditions have now changed. Every day there are questions coming up in the province due to the reconstruction period being here. It is up to the retailers to be awake. Legislation affecting the retail merchants is coming up every day. The time has come when we should take some steps to combat certain legislation. We should have someone to look after our interests in the province and see that nothing more is put over

as has been done in previous years. I do not favor eliminating ourselves altogether from the Saskatoon office. They have put our association on the footing it has to-day. I have no doubt that a settlement will be arrived at between the two executives.

"I suggest that there be a good capable man secured for the position of secretary. It is better to have a man who does not need to devote all his time to the work. I suggest we open an office in Edmonton and have the secretary attend to all correspondence with retailers, etc. Freight claims should be sent for adjustment to the Saskatoon office. Some services it would not pay us to duplicate in this province.

Half Holiday and Early Closing

The question of setting aside a certain day for the half holiday each week and of securing legislation in regard to a stated hour of closing was proposed, though opposition was taken by several delegates to the discussion of this question which has so often been left with no solution.

Replying to Delegate H. Hill, Taber, President Gaetz stated that he had hoped to get some data from the retailers before the next session of the legislature. A Bill had been brought in at the last session but had been laid over. He had been informed it would come up before the next session.

"Premier Stewart told me the Retail Merchants' Association would be given notice before any Bills were put through affecting merchants of this province," said Mr. Gaetz, expressing his opinion that the only satisfactory way to settle the matter was to have a compulsory holiday declared on a specific day.

A. F. Le Page stated that the Government and Trades and Labor Council were appointing a commission to recommend which day was preferred for the holiday by the various municipalities. Merchants of Medicine Hat preferred Wednesday.

"The Government appointed a commission to sit in Calgary, Medicine Hat, and Edmonton," explained Mr. Gaetz.

"We want something that will apply to all the people all the time," said Mr. H. S. Ireland. "This legislation will be framed on about 25 per cent. of the merchants and will not take into consideration the smaller towns where the merchants work much harder than we do."

Mr. Le Page thought it was the intention of the Government to consider the rural districts in the matter.

R. H. Anderson, Taber, thought the closing hour was a more important matter than that of a half holiday. "The retailer should not work 12 to 14 hours when other trades are working only 8 hours," said Mr. Anderson.

One delegate quoted Mr. Pingle, M.P., as stating that a Shops Act will be framed affecting every constituency, and that the Retail Merchants' Association should draft legislation providing for the taking of shops out of the Factories Act.

When meeting Premier Stewart, Mr. Gaetz stated that he did not know whether to ask for an amendment to the Factories Act or ask for shops to be taken out of that Act.

On the motion of Mr. H. S. Ireland a resolution making one of the first duties of the new executive the drafting of a Shops Act that would bring forth wise legislation for the whole province was put. The resolution further provided for the submission of such legislation to expert counsel so that no mistake will be made in placing the matter before the Government. The motion was carried unanimously.

The matter of early closing and the question of a half holiday are matters to be included in the resolution, taking into consideration the report of the commission.

Wednesday afternoon closing with a closing hour of 6 p.m. on week days, and 9.30 p.m. on Saturdays was favored by the majority of delegates present, though it was conceded that in many cases this plan would not work out to advantage.

Insurance Writing

The question of extending the services of the Retail Merchants' Mutual Fire Insurance Company of Soskatchewan to members in the Province of Alberta was a live topic at the convention, and action along this line was looked upon as one of the important steps taken by the delegates.

President Gaetz brought the matter to the attention of the convention, expressing his opinion that he thought it advisable to have the insurance operative in Alberta.

"This is one of the services it would not pay us to duplicate" said Mr. Gaetz. "In order to operate here we must deposit with the Provincial Government a guarantee fund of $10,000. A resolution was passed by the officials of the company in Saskatchewan that when 500 members could be secured in Alberta, each paying an application fee of $5, that the company would deposit the $10,000 and commence operations in Alberta. It was impossible at that time to do anything as 500 members were not in sight," added Mr. Gaetz.

At this point Secretary Raymond took the floor to explain the matter in detail, pointing out that with the deposit of $5 each by even 300 members he thought the matter could be arranged satisfactorily. Explaining the benefits of the organization Mr. Raymond explained that over $1,000,000 of business is in force to-day with $60,000 of a surplus.

As to premium payments Mr. Raymond pointed out that where the board rate is, say, $40, this amount is deposited to the credit of the policyholder as a guarantee premium deposit. The assessment of the R. M. company has so far been equivalent to only 75 per cent. of the board rate. The guarantee premium deposit is merely a guarantee that the policyholder will pay his assessment.

The saving on a $1,000 policy would be equal to the membership fee in the association, and this could be used as an argument for increasing the membership of the R.M.A. Last year the risk had been increased to $2,000 in country places and to $4.000 in cities. The doubling of the risk taken naturally doubles the saving to policyholders.

Mr. Raymond stated that the company could afford to assess at 50 per cent. of the board rate but that the assessment of 75 per cent. was made to help in building up a surplus so that the amount of risk can be increased.

The $5 application fee is a guarantee of good faith desired by the directors of the company. The money is held in trust and

Banquet of the Alberta Retail Merchants' Association in Convention at Medicine Hat, last week

returned if no business is written. This is not an annual fee and it furthermore covers any number of business places owned by an individual merchant.

Board adjusters are employed, and the expenses of adjusting distributed pro rata. Losses of the Saskatchewan company in 1918 were about $5,000. Only members of the association are insured.

J. B. Gillies, Edmonton, thought this matter was one of the "big things" the association had done and stated that he could speak for Edmonton merchants in saying they would be willing to avail themselves of the opportunity.

On the suggestion of President Gaetz, that each member work up his own territory, offers were forthcoming from E. F. Purcell, Brooks; J. B. Gillies, J. W. Bawden, Lethbridge, and others.

A resolution proposed by J. B. Gillies, requesting the new executive to take active steps to have the R. M. Mutual Fire Insurance Company's advantages placed before the retail merchants of Alberta Province as soon as possible, was seconded by J. W. Bawden, and carried.

Resolutions Cause Wide Discussion

Wholesalers Aid Chinese Merchants

A RESOLUTION which brought forth much discussion during the Wednesday morning session of the convention was that dealing with Chinese engaging in the grocery, restaurant and confectionery business. Mr. Watson, Grassy Lake, called the attention of the retailers to the dire need of action, particularly in the smaller centres.

"In Grassy Lake we have four Chinese joints and a fifth one is soon coming. This class of competition is unfair," said Mr. Watson. "The Chinaman lives on very little, and unfortunately seems to have the sympathy of a large number of our white townspeople. The Chinaman never takes a holiday and in our case the Chinese stores were open even on Sundays up until a short time ago. Many farmers find it more convenient to come to town on Sunday than any other day and they buy from the Chinese and pay cash for their purchases, whereas, they expect and get credit from the white merchant. In our case sanitary inspectors advised the local health board to close the Chinese places of business, so unsanitary was their way of living and in close proximity to the foodstuffs being sold in the store.

Club Together

"The Chinese club together and are able to undersell us," continued Mr. Watson, "and when I brought the matter to the attention of the wholesale grocers they say. "If they don't sell to the Chinaman then someone else will."

A resolution empowering the executive to use its influence to bring about similar legislation in Alberta to that adopted by the Province of Manitoba in regard to the Chinese question was proposed by Mr. Watson and seconded by Mr. J. H. Anderson, Taber.

"The yellow race is coming in as a thief in the night," said Mr. Anderson. "You in the larger centres do not see it as vividly as we, but we see that these people are taking away our very birthright. There is one feature of the Chinese labor question with which we cannot cope, and that is their apprenticeship system of securing labor. The Chinese merchant who has been in business here returns to the Old Country and brings out ten boys, paying the head tax in each case. These boys return in labor the equivalent of the tax, while the merchant has to pay the union wages. This is one reason why the Chinese merchant can undersell us. The yellow race can never assimilate with the white and the sooner we realize this the better."

A Serious Matter

H. S. Ireland stated that the growth of Orientalism in Canada was a very serious matter and one to which the Retail Merchants' Association could well devote much attention.

"I charge it to the wholesale grocer that the Chinaman has the support of the wholesaler," said Mr. Robinson, amid an outburst of applause, "and I could name the wholesaler," he added, speaking of his own district.

NEXT CONVENTION

The next convention is very likely to be held in the city of Calgary. The matter was left to the Executive for decision, but president Goetz expressed himself in favor of Calgary, thinking a meeting in that city would do most good for a local organization of retailers.

Calgary delegates presented a strong case for taking the next convent on to that city.

Continuing, Mr. Robinson stated that in his town no white merchant was handling confectionery because there were five Chinese "dumps" selling ice cream and candy.

"The membership of the Retail Merchants' Association will be increased and its members will become more active if they know the Association is working along this line in their interests."

Mr. Fraser, Pincher Creek—"The solution of this problem is in our hands and we can lay down an ultimatum to those on whom we depend for our supplies as to whether they are going to supply the Chinaman or the white man. If we keep a stiff upper lip in our dealings with the wholesalers we will solve this difficulty."

Local Conditions

Mr. Hill, Bow Island—"Local conditions affect us first. In our town there are three Chinese employers and twenty-two Chinese employees. They are not spending a cent in the town. They buy their foodstuffs from the wholesaler and clothing from the larger centres. The Chinaman has no honor. They give their word of honor to close at a certain hour and then deliberately remain open as long as they please. Much of the sympathy with the Chinaman is because he gives a service by keeping open at all hours which no other class of merchant will do.

"We may have to resort to violent means if our legislators do not take action."

Mr. Hill stated that in a Montana town a Chinaman is so disliked that if one is seen on the street he is promptly knocked down and when taken in hand by the police is fined for disturbing the peace.

"If I am appointed Justice of the Peace in Bow Island, I will get white men to knock down all the Chinamen and we will fine the Chinks $10 and give $5 to the white man who started the trouble," said Mr. Hill in conclusion.

A delegate from Lethbridge stated that the Great War Veterans' Associations were in accord with this movement, but they were delaying action until the R.M.A. stated their position.

Urges Co-operation

Frank Stockdale made a passing reference to the Chinese problem before opening his address on "Opportunities in Retail Advertising."

"While you do not want to mix your civilization with the Chinese, you want to learn one thing from them," said Mr. Stockdale "The Chinese are winning because they know how to work together, and when merchants come to this point the Chinese question will vanish. If it requires to wipe two hundred retailers out of business to accomplish this end it will be well worth while. One merchant cannot stand alone against the Chinese combined. As regards the wholesaler you will find the reason he likes the Chinese business is because when he sells one he sells the whole group, because the Chinese stick together in their buying. A programme of education among retail merchants is very much needed, and we can well start with the solution of the Chinese problem in our own cases in our own towns."

Other resolutions adopted at this session were as follows:—

Grants to Soldiers

Moved by G. F. Beart, Edmonton; seconded by J. M. Cooper, Medicine Hat. "The executive should forthwith proceed to give its support to the granting of a bonus to all returned soldiers of the Great War, varying from $1,000 to $2,000 each, having regard to the details of their service. That this resolution be forwarded to the Dominion Secretary to be presented to the authorities concerned."

Mr. Beart, who moved the resolution said he had talked with many returned men and acquired their viewpoint. One old soldier who had served in this war and had also sent his two sons. had told him of the Rhyl riots which he had said was the "first evidence of the stupidity of the Canadian Government."

Few of the men in big centres had homes and thousands of them were without work or homes. The street corners every night were occupied by soldiers openly preaching disloyalty and Bolshevism. The authorities left them alone because if they were roughly handled they would grow and spread into thousands.

It must be recognized that Canada only gives a summer's work and but seldom gives a working man a full year's work and this year when everyone is highly strung, hysterical and ready to fly off the handle it is well to remember that when fall comes we will have spent our money.

Land Settlements

Regarding the land settlement scheme, Mr. Beart said the terms offered to the soldier by the Government were almost as good as the C.P.R. offered to anybody and the size of the staff needed to administer the scheme was so large that they were wondering how they could pay them, creating a big overhead to be charged up to the taxpayer.

To meet the amount needed for the soldiers' bonus scheme would require $830,000,000, about one-third more than the last war loan. Based on a very conservative estimate of four million people in Canada and disregarding the natural increase in population 2½ cents a day paid for twenty-five years would wipe off this amount.

For that sum we could provide a standing army to stand between us and evil for the next two years. It would take that time for the hysteria bred of the past four years to pass away; for everyone to become mentally normal again.

After alluding to the broken and disabled soldiers, he said: "Nothing we can do will repay them. We must get into the frame of

mind to do the just thing because it is the just thing or we are not decent citizens. We can't expect the Government to take a step like this unless the people are behind it. So that if a soldier is short of money in the fall he'll wait, because he will know the right thing will be done.

"If we don't try and help the soldier and he falls into the hands of the Red element you have no idea what it will mean."

The resolution was seconded by Mr. J. Cooper and was passed unanimously with a standing vote.

Foreign Companies Act

Moved by Mr. Gillies, Edmonton; seconded by Mr. Scott, Edmonton:

"The Dominion Executive Council and the Provincial Executive for Alberta shall take up with the Dominion and Provincial Governments the question of legislation demanding that the Foreign Companies Act be amended, making it necessary for such companies operating in the various provinces throughout Canada and selling to any person in Canada in the wholesale or retail trade, be assessed in the Provincial and Municipal license fee."

Small Debts Act

Moved by Mr. Gillier, Edmonton; seconded by Mr. Kellas, Medicine Hat:

"Whereas, the Association has been informed that several of its members have tried to put the Small Debts Act into operation and have failed to get the police magistrate or justices of peace to act, on the plea that there is no remuneration to them provided in the Act, therefore, be it resolved that a schedule of fees be published by the Government immediately and that a copy of such schedule be forwarded immediately upon publication to the secretary of each provincial branch of the R.M.A."

Endorse Coast to Coast Trip

Moved by H. S. Ireland, seconded by Mr. Black, Medicine Hat:

"That this convention endorse the proposed coast to coast excursion to be held during the coming summer."

Mr. T. A. Gaetz, past president, explained that it was planned to have the excursion follow a route from Halifax to Vancouver through Regina, Moose Jaw and Calgary, returning to Calgary and proceeding north to Edmonton, thence to Saskatoon, Winnipeg and returning east.

In reply to a request from Mr. Illsey, for information re the programme cost to merchants, etc., Mr. Gaetz explained that an expression of opinion regarding the principle of the matter was all that was required.

Commercial Education

Moved by Mr. Gillies, Edmonton; seconded by Mr. Illsey:

"The executive shall be empowered to select a committee representing the commercial interest to work in co-operation with the authorities of the University of Manitoba in connection with the courses in commercial education."

Speaking to the motion Mr. Gaetz stated that the universities wanted to take action along this line. They were paying Mr Stockdale's expenses and were agreeable to continuing the lectures each year. The committee to be appointed was to see that this work was carried on.

Mr. Illsey asked that a tax be made on business men to defray the cost of the course as the university could not easily spare the money.

Secretary F. E. Raymond outlined the plan for commercial education during the next year. The idea was to select twenty centres throughout the Province and to hold a more intensive course in commercial education than has been done in the past. A lecture would be held one evening with a conference in the morning and afternoon of the following day. There would be two courses, one in the spring and one in the fall. The cost would be $160 per course, or a total of $320 for the year. Twenty districts would cost $6,400. There would be an allowance of $200 made for advertising. Mr. Raymond stated that the university would be willing to set aside $3,000 for this purpose, leaving the cost to the merchants $3,200. A guarantee of $4 from forty merchants would be necessary in each district. It was explained that should greater revenue be secured from districts containing a large number of merchants, this money would be used for assisting the smaller districts.

Moved by Mr. Gillis, Edmonton, and seconded by Mr. J. Kellas, Medicine Hat, the resolution was adopted.

"Resolved, that this convention request the incoming executive to continue the efforts towards obtaining legislation requiring produce dealers and collection agencies to enter into a bond with the Government as a condition before entering business."

The above resolution was adopted on motion of Mr. Illsey, Calgary, and Mr. Gillis, Edmonton.

Mr. Raymond explained that the object was to prevent produce dealers and collection agencies starting up in business and after obtaining large quantities of produce and money from collections to decamp. This had happened on numerous occasions in the past and a bond with the Government would put a stop to this practice.

"Resolved, that this convention is strongly of opinion that all premium contests are absolutely against the principles of the Retail Merchants' Association and good merchandising, and should be strictly avoided by all retail merchants. Further, that the Dominion executive should be urged to continue their efforts in favoring the passing of legislation making such contests a continual offense."

On motion of Mr. A. F. LePage, Medicine Hat, and Mr. Illsey, Calgary, the above resolution was adopted after several incidents had been related of how merchants had been victimized in these contests.

Convention Briefs

There was no question of the Wednesday afternoon session of the convention starting on time. A great deal of interest was taken by the delegates in the various industries visited in Medicine Hat and Redcliffe, on the motor tour in charge of H. S. Ireland on that afternoon.

The Chinese merchants came in for a lot of hard knocks, but Mr. Stockdale saw one redeeming feature and one which white marchants can learn from the yellow race, and that is co-operation. Even though Mr. Stockdale emphasized that the best advertising possible was the knocks from competitors, several merchants continued to hammer the Chinaman. It is significant that a number of such delegates told of eating in Chinese restaurants.

Custom and advertising are poor ways to combat such a retail problem as the Chinese merchant offers.

The Resolutions Committee included the following delegates: Hill, Taber; Illsey, Calgary; Scott, Edmonton; J. Kellas, Medicine Hat; and Gillies, Edmonton.

List of Delegates

Bow Island, J. W. Hird, T. R. Blaine; Burdett, Geo. Lomas; Brooks, E. F. Purcell; Calgary, W. J. Illsey, N. I. McDermid; Cardston, W. H. Duce; Edmonton, Geo. Beart, E. H. Scott, J. B. Gillies; Foremost, J. G. Robinson; Grassey Lake, J. H. Watson; Jenner, C. J. Williamson, Thos. Wilton; Lacombe, W. N. Morrison; Lethbridge, J. W. Bawden, E. M. Ryland; Olds, A. P. Chase; Oyen, S. G. Miller; Pincher Creek, W. A. Fraser; Regina, G. W. Anderson; Red Deer, T. A. Gaetz and wife, W. E. Lord; Saskatoon, M. E. Raymond, A. Hallam, C. L. Kilburn; Suffield, J. F. Powers; Taber, E. Venville, J. J. Horrigan, R. H. Anderson, H. Hill, A. L. Wood; Winnifred, M. H. Smith; Winnipeg, H. L. Southall, J. A. Banfield; Medicine Hat, Thos. Bell, J. P. Mitchell, H. G. W. Forster, H Brown, J. Bullivant, S. Silver, J. M. Cooper, W. J. Fleming, H. S. Ireland, James Kellas, W. B. Kester, F. C. Taylor, S. E. Gust, D. Mitchell, C. S. Pingle, W. F. Foster, J H. Bell; A. Macpherson, A. F. LePage, P. Yeo.

INDUSTRIAL EXPANSION IN ALBERTA

Mayor Brown outlined some of the plans of the Provincial Government for the development of the Province of Alberta at the banquet held in the Cecil Hotel on Wednesday evening. He stated that experts had been employed to report on the resources of the province. Mention was made of the forthcoming Congress to be held in Calgary to which four or five hundred manufacturers from Eastern Canada and the United States would come. Mayor Brown urged the co-operation of the retail merchants of the province.

"This is one of the most important movements in Western Canada," said the Mayor. "The merchants will benefit as much as anyone, and it must be remembered that the development of one section of the province will help every other section."

GUN CLUB ENTHUSIASTIC

At an enthusiastic business meeting in the "Blue Room" of the Windsor Hotel, the Montreal Gun Club, first announced in "The Star," elected as officers: Hon. pres., T. O. Lyall; hon. vice-pres., Wm. Strachan; president, R. B. Hutchinson, K.C.; vice-pres., S. T. Handley; sec.-treas., Darcy Bogue. Executive committee, W. G. McIntyre, Art. Ross, Chas. Hart, and B. R. Clark. Publicity official, R. M. Gagney. Field captain, Dr. J. H. Condon.

The members were very much interested in the plans for their new "clubhouse" which the Dominion Cartridge Co. are building for their use.

The trap layout will consist of three Western automatic traps, and capable of handling an almost unlimited number of shooters.

EDITORIAL COMMENT

AN ENORMOUS WASTE

IN his final report to the Government, Fuel Controller Magrath gives some figures regarding an annual preventable waste in Canada of $60,000,000 that should receive careful consideration. This huge amount is absolutely lost each year, he says, owing through wasted heat and energy in the domestic and industrial use of coal. He favors a greater use of soft coal for domestic purposes. He points out that with an annual fire loss of $30,000,000 and a preventable loss through wasting heat of $60,000,000 that it is high time something should be done to stop it.

NO ROOM FOR BOLSHEVIKI

THE Government will have every right-minded citizen in Canada at its back in the bill it has passed to rid the Dominion of all Bolshevist agitators and troublemakers. For a long time it looked as if everybody but the Government was ready to call these people by the names that rightly belong to them. Apparently someone at Ottawa has had a much needed awakening and there is every reason to suspect now that some of the action that would have stopped the trouble before it had a chance to get under way is to be taken. There is only one way to deal with the Bolshevik menace and that is to root it out entirely.

WATCH THIS BUSINESS

THERE is a new angle to the recent building figures available from the various Canadian cities that is particularly worthy of the careful attention of hardware dealers. The permits for new garages show an enormous increase, so much so, that in many cities attention has been directed to the fact that automobile salesmen must be doing a record business. Every time an automobile is sold it means that the new owner is going to need supplies and accessories and in many cases a garage and garage hardware. If the hardware man does not sell these things to him somebody else will. Thousands of hardware dealers all over the Dominion are cashting in on the ever-increasing business that is directly traceable to the automobile trade. With many of them auto accessories has grown to be one of the most important departments in the store. It should be remembered that the big jump in the number of autos owned in the cities is really only a fraction of the trade and that all through the country farmers are buying cars at a rate that is keeping the factories working to capacity. There is an insistent demand for better and ever better cars. In a recent issue of HARDWARE AND METAL it was shown that the automobile manufacturers are now taking nearly one-third of the entire output of the American plate glass factories because there has been such a big increase in the demand for closed-in cars. The average car owner is not the man to hum and haw over an expenditure of a dollar or two. If the hardware dealer can show him a device that is going to be of real service on his car the owner will buy it and buy it gladly. Every year sees thousands of new buyers of this kind in the market and the hardware stores are the legitimate places for them to make their purchases.

ANSWER YOUR LETTERS

THE statement made by Henry B. Thomson, of the Canadian Trade Commission now in London, England, that the business reputation of Canada is being hurt, because so many firms fail to answer letters promptly, touches upon a question that has an important bearing from a retail standpoint. Mr. Thomson states, that when letters of inquiry or letters about business remain unanswered the impression is created among British firms, who in many cases would become good buyers, that Canada is not only not looking for business, but is not making much effort to get it. "Trifles of this kind," he says, "create a false idea, especially as American firms are very particular about prompt replies to all inquiries and many of them carry on a regular follow-up correspondence. If the Canadian firms do not deal in the goods asked for it is a very simple matter to write a note to the party inquiring and say so." Mr. Thomson is not the only one to complain about the laxity of some firms in replying to letters. Some of the most bitter complaints Canadian firms have to make is against retailers who delay answering letters. Many merchants offer the excuse that they are too busy. This is no excuse at all and is a decided reflection on their lack of business method. It is good business to answer letters requiring attention as quickly as possible. Some business men make it a rule to answer business letters at once.

Others apparently make it a rule to let them lie around for a week or two. There are, it would appear, far too many of the latter class. Many of the delays caused by unanswered correspondence are annoying. Very frequently they are costly. An unanswered business letter at best is in nine cases out of ten causing somebody worry. There is no excuse for doing this, either deliberately or carelessly. The results mentioned by Mr. Thomson hold through all the business world. If you don't answer your mail somebody is going to size you up as lax in methods, or perhaps worse.

UNFAIR CRITICISM

NEWSPAPERS who have been attacking the seed firms and accusing them of profiteering and taking advantage of the gardening enthusiasm which has swept the country, because prices have been advanced, are not well advised. One criticism declared that "there do not appear to be any more seeds in the packages than formerly." This is absolutely incorrect. There are more seeds. No mention was made in any of the articles of the increased costs of labor or materials, but the whole article was designed to arouse suspicion in the minds of the buying public and make them dissatisfied not only with the seed firm, but with the dealer who sold them. Hardware men have been selling a lot of seeds and gardening tools this season and they state that very, very few people questioned the higher prices, most of them accepting the advances as part of the general increased cost of everything.

MAKING AND KEEPING FRIENDS

THE ability to make and hold friends is most important in the success of a retail business. The proprietor who has the happy faculty of making people feel every time they come into the store that he is really pleased to see them, whether they buy or not, and whose clerks give the same impression, may not always be the keenest business man, but other things being equal will hold his trade. Every minute of every business day every merchant in the land, and every clerk in every store, is unconsciously creating a good or bad impression. He is either advertising himself as a good fellow and the store as a good place to deal or the opposite. Everyone is advertising, all the time. The smile that greets a customer when he comes in the door, the handshake he gets when he goes out, the things he sees and hears while in the store all advertise you and your store. They either make the customer want to come again or decide that he will henceforth buy elsewhere. When it comes down to a final analysis every individual, whether he is in business or not, is advertising himself every minute. In the business world the good advertiser is the cheerful chap, with the handshake and the cheery welcome. Imagine how much better chance a merchant of this type will have of getting a loan if he goes to his banker with a cheery tale about business being good than if he went in with a long face , said business was bad and everything looked as if it was going to smash. Many of the biggest men are big just because they believe in the work they are doing. They may meet obstacles but they look beyond to the time when these will be past and they work hard and cheerfully to win.

BUSINESS IS SPLENDID

"THE best season we have ever had." "Business is showing a big increase." "We certainly have no kicks coming," these are the sort of replies you get all along the line these days when you ask hardware men how they are finding business. Many of them will tell you also that they are surprised at the business they have been doing and at the way it keeps up. Why should they be? Canada is more prosperous than ever before. There is lots of work for all who want to work, in fact for a lot who don't want to work and have gone out on strike. Those who are at work, and they are by long odds the great majority, are making wages they never thought possible not so very long ago. But aside from the workers the great farming community right from coast to coast is growing everything it can grow and selling it at top-notch prices with people clamoring for more. All this means not only good business but continued good business. When the farmers are prosperous it is a pretty good sign that business is going to be brisk. While strikes and labor disturbances may cause some trouble in a few sections of the country the great buying districts, the rural sections and the thousands of small towns and villages, remain as sound as ever from a business standpoint. It is the business that pours in from these sources, just like the little streams that make the big river, that makes the general volume of business good or bad. Sometimes it is good only in some sections. A poor crop in one Province may make business quiet throughout that whole section. Just now, however, the outlook all over the Dominion is for a splendid year and the hardware men are among those who are acclaiming it loudest. At the present time scores of them are right in the middle of one of the best paint seasons in their history. A lot of these men months ago had faith that business was going to be good and stocked accordingly and they are now reaping the reward. A lot of other dealers who did not have as much faith and stocked lightly have found business good and have had to send in repeat orders and still more repeat orders and still business is coming. A lot of dealers have been cashing in on other lines as well as paint. They are most optimistic regarding the outlook. They are beginning to see the vision that a lot of the biggest men not only in Canada but in other countries have seen, that this Dominion is merely starting on a great and wonderful future.

Auto Manufacturers Unable to Keep Up With Rush of Orders

Farmers All Over the Dominion Are Buying Cars This Year in Greater Quantities Than Ever Before—Many Firms Are Months Behind With Delivery—Big Chances for Dealers Handling Accessories

AT the present time orders for automobiles are pouring into many of the factories about four times faster than the cars can be produced. While a large percentage of this business is from the cities, the really big buyer is the farmer. From one end of Canada to the other, the farmers are sending in their orders for automobiles, and instead of the orders decreasing as the season advances, the business is increasing.

"At the end of May, 1918," said Mr. F. I. Fox, manager of the Toronto branch of the Ford Motor Company of Canada to HARDWARE AND METAL, "we had about 15,000 cars ready for delivery for the spring business. This season, with many times the volume of business offering, we had about 1,300. It is simply an impossibility to get the materials to make the cars. Orders are pouring in from all parts of the Dominion, and we are turning out cars as quickly as we possibly can. We have never yet been able to catch up with our orders, and the way business is coming in we will not have any chance to do so this year.

Farmers are Buying

"The farmers are buying more cars than ever before," said Mr. Fox. "They are one of the biggest buyers in the whole field to-day. From all parts of the Dominion we get the same story, the farmers are buying autos. We have been doing our best to make them and ship them, but you cannot buy copper wire, or batteries, or a dozen other things that are required. There are no cars in "cold storage", that is there are no reserve stocks. During the early part of the year lots of people who planned to buy cars held off apparently in the belief that prices were going to come down. Many of these people may have to wait many months now before they can get cars. Some firms cannot promise deliveries at the present time for at least eleven months."

Buy Second-Hand Cars

One result of this huge demand for autos has been to put second-hand cars at a premium. Many dealers who saw what was coming made more or less of a killing by buying up all the used cars they could get, fixing them up and offering them for sale. They found ready buyers, as it has been impossible to get new cars. It is stated that in many places, one can go to dealer after dealer and not be able to buy either a new or second-hand car.

Both the shortage of new cars and the big demand for used cars means a lot of good business for the hardwaremen handling auto accessories and supplies.

Larger Turnover

Many hardwaremen have been taking full advantage of their opportunities,and their turnover of accessories, supplies, auto finishes, and so on has shown an increase that will go a long way toward swinging the balance on the credit side of the ledger into nice proportions when the books are closed at the end of the year. Just how many new cars will be produced this year it is impossible to estimate at the present time. Even those who are right in the business and in closest touch with all that is going on will not venture a prediction. One plant has reached a production of 3,500 cars a day, and is still months behind with its orders. When it is considered that every new car that is turned out, and every second-hand car that is rebuilt and put back into service means business, and good business, for the man who is selling the supplies and accessories, it can readily be seen just what the possibilities are.

Want Better Cars

And the demand, according to the manufacturers and the dealers, is ever for better cars. There will be more higher-priced automobiles made and sold this season than ever. Compare the luxury car of this year with the luxury car of a few years ago, and note the difference. It is the accessories and the equipment, this part here and that part there, that make the difference. Each and every one of these little devices make the car more comfortable, easier running, or renders some real service. People are demanding these things more and more each year, and the dealers who handle such equipment and devices are handling a line that is easy to sell, that carries a good profit and that brings a lot of other business.

Trade and Barter for Canadian Products in Europe

THE direct, practical benefits of the representation in Great Britain and Europe of Canadian manufacturing and agricultural interests by capable business executive with power to negotiate without being hand-tied by red tape are emphasized by the details of the activities of the Trade Mission, given by Lloyd Harris. In speaking before the members of the Canadian Manufacturers' Association, who are in convention in Toronto this week, Lloyd Harris pointed out that on account of stringent financial conditions in Europe, dealers would have to go back to the old Indian system of trade and barter. When the assembled delegates heard specific instances of what that meant, astonishment was paramount: "I have a proposal from the Russian Provisional Government in Southeastern Europe," said Mr. Harris. This Government had no money, he said, but had materials which they would exchange for Canadian goods.

What the Russians had to offer to Canada were enumerated by Mr. Harris. They included hides, potash, tobacco, cement, wool, pig bristles, sausage casings, licorice root, oak staves, horse hair, sheep skins, cattle, benzine, crude oil, lubricating oil, axle grease, alcohol, manganese and iron ore, one million bottles of wine, and one hundred thousand bottles of champagne. The announcement of the last two items was received with regretful cheers by the delegates.

What Russia Wants

What the Russians wanted in exchange for these goods was also told by Mr. Harris. These items included: 88 million yards of cotton textiles and woollen cloth for men's and women's clothing, 100,000 gross cotton thread on spools, one million pairs of boots and shoes, immense quantities of rubber goods, including goloshes, rubber sheets, bicycle and automobile tires and inner tubes, solid carriage tires, surgeon's and technical instruments, agricultural implements (Russian type), binder twine, over a million dollars' worth of medical supplies, tools of all kinds, belting, lathes, paints and railroad equipment.

Mr. Harris outlined the opportunities that were before the Canadian manufacturers and dealers in the overseas market. He reviewed the successful efforts Canada had made to have the British embargo removed, and told the association clearly that Canadians did not realize the immense possibilities in trade that lay before them in Great Britain. Canadians, he said, had demonstrated their ability to manufacture efficiently and economically, but he was not so clear as to their ability to sell. He urged the necessity of studying the markets overseas, so as to offer what the purchasers wanted. Britain, he said, was absolutely bare of everything. The market in raw materials alone was tremendous. There was not a single item made in Canada but was in demand in Great Britain. The markets of the overseas Dominions were also wide open and were well worth cultivating.

Market in Roumania

The French and Belgian markets, Mr. Harris said, were not at present of much use, as both these countries were determined to make all possible to be made in their countries, so as to provide work

(Continued on page 64)

Discusses Strike Situation in Winnipeg

Address by C. H. S. Bamford, Sales Manager, J. H. Ashdown Hardware Co., Ltd., Winnipeg, Before Sixth Convention R.M.A. Held at Medicine Hat, Alta., Deals With "Peg" Troubles

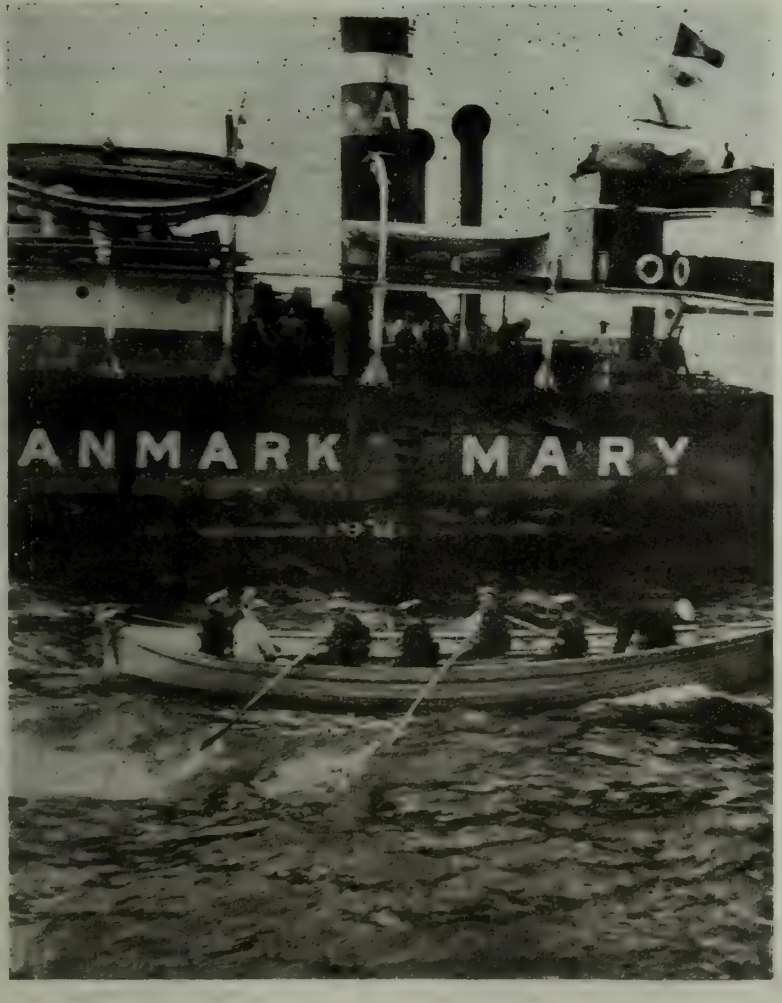
THE session closed with a recital of events leading up to the Winnipeg strike and the situation there at the present time, by Mr. Bamford. It was not a strike, he asserted, but an industrial revolution; an attempt to set up a Soviet form of Government.

Mr. Bamford, starting with the civic employees' strike twelve months ago, related the succession of events leading up to the strike this year. He told of the formation of the Citizens' Committee, and the work it had been able to accomplish.

The men who engineered the strike were not real labor men he asserted, but are foreign agitators. The demands made before the strike were varied: the wholesale and retail employees asked a minimum wage of $30 per week of 44 hours; those now getting $30 to receive an increase of 20 per cent. They had stated that when these demands were granted in Winnipeg they would be granted throughout the length and breadth of Canada. Further demands were: that two weeks' vacation with pay be given; when absent through sickness salary to continue while absent, and that all bonuses, concessions and privileges now possessed should still be enjoyed.

After describing the walk-out of 30,000 men on May 15, the speaker averred that then five men proceeded to rule Winnipeg. This they were able to do as the police were in sympathy with the strikers and there were not enough troops in Winnipeg to be effective.

He detailed the work of the Citizens' Committee, and, referring to the resolution favoring the soldiers' bonus scheme, he said he had all sympathy and honor for the returned men, but he wanted them to be as loyal to Canada as they were to the allied armies.



Fifty per cent. of the men who returned to Winnipeg, he said, were in sympathy with the Soviet Government there. We may not have it here, but the scape-goats and ne'er-do-wells gravitate to the larger centres. They say, "We have been overseas and now we are back we are going to be drones in the hive." All honor to the other men who enlisted in the work of reconstruction.

Unfortunately, in the larger cities, Montreal, Vancouver, Winnipeg, etc., the soldiers now home fail to realize their responsibility in connection with reconstruction.

He did not believe there would be any rest in Canada until every enemy alien was deported. The people must go with the G. W. V. A. and demand of the Government that every alien enemy in Canada be sent back from whence he came.

In conclusion he advocated that laws be placed in the statute book giving power to apprehend those who are at the back of the strike, and who, under our present laws, cannot be touched.

Current Events in Photograph

LEAVING THE RESCUE SHIP

Great interest attached to the flight across the Atlantic attempted by Hawker and Grieve. Their disappearance and subsequent rescue created consternation, followed by world-wide joy. This photo shows Hawker and Grieve (in white sweater) leaving the Danish steamer Mary in a boat from the Destroyer Woolston.

EVENTS IN THE TRADE

Business Changes

Grande Prairie, Alberta. — George Robertson and Archibald Stewart have registered partnership in the Robertson, Stewart Hardware Co.

Trade Notes

T. J. Harrison, of Toronto, traveler for the Imperial Oil Co., is moving to Guelph.

Stuart & Darragh have succeeded Mrs. W. J. Henry, dealer in sporting goods and supplies.

The Mount Royal Rubber Company, capital $500,000, head office Montreal, has been granted a charter.

The ratepayers of Bowmanville, Ont., carried a by-law granting $17,500 to the Canada Scale and Slicer Co.

Andrew Lennox has taken over the tinshop in connection with the Innisfail Hardware at Innisfail, Alberta.

The Northern Aluminum Co., of Toronto, contemplates the erection of a ten-storey office and warehouse building.

The Ames, Holden Tire Company, Limited, capitalized at $2,000,000, has secured a site at Kitchener, Ont., and plans to locate a large new factory there for the manufacture of tires and rubber goods.

A. E. Dyment has been elected vice-president and chairman of the Board of Directors of the Canadian General Electric Co., Limited, to fill the vacancy created by the death of W. D. Matthews.

At a meeting held in Montreal, Lt.-Col. Herbert Molson, M.C., and Sir Charles B. Gordon were elected to the Board of Directors of the Canadian Consolidated Rubber Company.

The plant of the Victoria Wheel Works at Galt, Ont., is being equipped to manufacture shafts, poles, and all bent goods required for carriage making. Much of this work was formerly done at the Windsor, Ont., plant.

H. E. Shirk, who has been connected with the Canadian Hart Wheel Company at Hamilton, Ont., has disposed of his interests in the firm and is going to California, where he will engage in fruit farming. G. R. Harvey is now sole proprietor of the firm.

The Strathmore Hardware, of Strathmore, Alberta, recently opened a special rest room for women and children, and according to press reports, it is being used freely by wives of farmers and other women shoppers.

It is stated that a plant will be erected in Montreal for Dupre Iron Works, Ltd., to cost $75,000, which will be used for the manufacture of architectural iron.

Personals

H. C. Crow, sales manager of the Canada Metal Co., Toronto, has left for England, where he plans to spend about six weeks.

George Ashton has returned after serving overseas with the Canadian troops, and has resumed his position with the Cochrane Hardware, Ltd., at Sudbury, Ont.

A. M. Marsh, of Marsh Grape Juice Co., Niagara Falls, Ont., met with an unfortunate accident on Sunday last, while cranking his car. It backfired, striking him on the jaw and cutting it. Fortunately no bones were broken.

Obituaries

The death occurred in Toronto of Anton J. Simmers, president of J. A. Simmers, Ltd., wholesale and retail seeds.

The death occurred at Coaticook, Quebec, of A. O. Norton, president of the firm of A. O. Norton, Limited, manufacturing of lifting jacks.

The death occurred suddenly at his home in Winnipeg of Henry Spriggs, aged seventy, managing director of the Trees-Spriggs Company, Limited. He came to Canada from London, England, 48 years ago, and after being for thirteen years with the Samuel Trees Company, Ltd., of Toronto, went to Winnipeg, where he established the Trees-Spriggs Company, Limited.

Following an operation for appendicitis, J. Frank Brown died in St. Michael's hospital, Toronto, nine days after his return from overseas, where he had been serving with the 1st Canadian Tank Battalion. Prior to going to the front he was employed as a metallurgical chemist in the Brown Copper and Brass Rolling Mills at New Toronto, of which his father, J. F. Brown, is owner.

The death occurred at Galt, Ont., of Alexander C. Fraser, aged 81, founder of the Fraser Hardware Co. Mr. Fraser, who was born at Aberdeen, Scotland, came to Canada when 23 years old, and after working for some time with his uncle, who conducted the Dumfried foundry at Galt, went into partnership in the hardware business with the late James Warnock. He was a member of the Board of Managers of Knox Presbyterian Church for many years, and was one of the oldest members of Alma Masonic Lodge. John A. and Richard M., of Galt, are sons.

Montreal News

Leo Fischler, representing Spring Butt Company, Chicago, was a Montreal visitor early this week.

O. N. Parent, of Canadian Yale and Towne, Ltd., St. Catharines, called this week on the Montreal trade.

Frank R. Rusk was in Montreal this week. Mr. Rusk is representing the A. S. Boyle Co., Cincinnati, O.

John Irwin, managing director of McArthur, Irwin, Ltd., Montreal, returned from New York on Tuesday.

R. N. Murphy, with the Victory Furnace Company, Ottawa, spent several days in Montreal this week.

A. W. Poole, of McArthur, Irwin, Ltd., Montreal, was in Toronto this week attending the C. M. A. convention.

C. E. Peabody, representing C. E. Peabody & Co., of New York, was calling on the Montreal trade this week.

Ernest Bureau, of Richardson and Bureau, manufacturers' representatives, Montreal, was down to Quebec this week.

Raymond A. Catlin, with the Corbin Cabinet Lock Co., New Britain, Conn., visited Montreal this week in the interests of his firm.

William Allan, with the Marathon Tire and Rubber Co., Ltd., St. Catharines, Ont., was in Montreal this week and went on to Quebec before returning to St. Catharines.

G. R. Hagerman, Montreal, has accepted a position with the James Walker Hardware Co., Ltd. Mr. Hagerman was formerly with Lewis Bros., Ltd., as city salesman.

George Henderson, president Brandram-Henderson, Ltd., Montreal, and who has been in the Canadian West for several weeks, was in Toronto this week attending the annual meeting of the Canadian Manufacturers' Association. Mr. Henderson was expected home before the week end.

J. H. Schocke, representing the Triumph Trap Co., Incorporated, New York, was in Montreal last week. In speaking of Mr. Schocke's visit last week, HARDWARE AND METAL stated that he represented the Triumph Clock Co. This should have read as above.

Victor Gagne has succeeded Charlie Dufresne as head salesman with Lewis Bros., Ltd., Montreal. Mr. Gagne has been with Lewis Bros., Ltd., for the past six years in the sales department. Previous to this he spent four years with the Durand Hardware, Montreal.

Winnipeg News

E. L. Meadowcroft, representing the Miller Lock Co., of Philadelphia, was in town during the week, calling on the jobbing trade.

H. Wright, president of the E. T. Wright Co., Hamilton, Ont., is in the city this week visiting old friends and looking over the ground with a view to Fall business.

Homer Conley, who for a number of years has been manager of the sporting goods department of the J. H. Ashdown Co., wholesale, has left their employ to enter into the commission business, and is at present in the States looking up new lines. Mr. Conley was presented with a gold watch and a purse of gold from the members of the staff on retiring from the company.

Incorporations

The Anglo Canadian Malleable Steel Manufacturing Company, Limited, head office St. Patrick de Rawdon, Quebec, capital $50,000, plans to manufacture and deal in malleable goods.

The Anglo American Wire Rope Company, Limited, capital $200,000, head office Montreal, plans to manufacture and deal in wire and wire cables.

Richer, Ayers, Limited, capital $20,000, head office Montreal, plans to manufacture and deal in automobiles, motor trucks, tractors, boats and engines.

Sorel Shipbuilding and Drydock Company, Limited, head office Sorel, Quebec, capital $350,000, plans to carry on the business of shipbuilding and also of steel makers.

T. A. Morrison & Company, Limited, capital $10,000, head office Montreal, plans to deal in brick, stone, cement and building materials.

PLAN BIG BICYCLE MEET

G. A. Wenige and other members of the committee are very busy preparing for the Dominion championship bicycle meet to be held in London, Ont., on Dominion Day.

The plan this year is to have the big annual Dunlop road race transferred to London and run off in connection with the Dominion meet there.

A splendid programme is being prepared.

CAVERHILL-LEARMONT COMPANY WELCOME BOYS HOME

Gradually as they secure their discharge from the service of King and Country, the "boys" who enlisted from the wholesale hardware firm of Caverhill, Learmont and Co., Ltd., Montreal, are returning to the firm, several having already taken up their duties.

Sergeant-Major Henry Gabbot has again assumed charge of the heavy goods department on Colborne street. Major Gabbot enlisted as a private and won his way upward on the field, receiving a Belgian decoration and also the British Military Medal. The order accompanying the later reads: "For efficiency in directing ammunition supply while under heavy shell fire, in which task he displayed great coolness."

Other employees of the firm who have already returned and resumed work with the firm are Frank Johnson, Armand Bernard, and Romeo Delisle. Others who are expected back in the near future are C. C. Slatford, Jack Smith and Malcolm McCuaig.

Major W. G. Andrews is Coming to Canada

Major W. Gresham Andrews, who recently returned after serving overseas with the United States army, has been appointed superintendent of the varnish works of Pratt & Lambert, Inc., at Bridgeburg, Ont. Major Andrews was in command of the 3rd Battalion, 107th Infantry, 27th Division. This division saw considerable service in Flanders with the Canadian overseas forces. Major Andrews has had several years experience in the works and executive offices of the firm in Buffalo. He is also well known as one of the famous players and later coach of the football team of Princeton University.

MAJOR W. G. ANDREWS

Who recently returned from overseas and has ben appointed superintendent of the varnish works of Pratt & Lambert Inc. at Bridgeburg, Ont.

RACERS HEEDED WARNING AND REFUSED TO RIDE

The merry little war which has been waged on the C.W.A. officials by a small group of insurgents resulted in a fruitless journey to Toronto by four Brantford riders on Saturday.

A road race was put on by the Victorias in connection with the competition for the Beardmore Cup, riders from other clubs and from Brantford being invited. C. W. A. sanction was refused, however, by Fred Johnston, chairman of the racing board, because of the lateness of the application.

The promoters of the race stated that it would be run notwithstanding the refusal of the C.W.A. sanction, and published a list of handicaps, including practically all the Toronto riders in the various clubs. The C.W.A. thereupon announced that any rider taking part in the race would be disqualified and would not be permitted to enter races sanctioned by the C.W.A. This warning was heeded by Toronto riders and practically none of them showed up for the race except the members of the Victoria Club.

Outside of Toronto the situation was not so well understood, and four of the young Brantford riders, including Shaw, Jackson and Walker, came down at their own expense to compete. When they learned that riding in this race would bar them from the big London meet on Dominion Day, and from other races under C. W. A. sanction, they refused to ride, and the race was then run by the Victoria Club members only.

Long and Narrow But Effective

Vancouver.—Kydd Bros., Vancouver, hardware merchants, have moved into new premises at 151 Hastings St. West. The fact that the new store is about one hundred feet long and particularly narrow, has necessitated quite a complete change in the method of displaying the various lines of hardware, plumbing and bathroom fixtures. About half the depth of the store on one side is furnished with glass-fronted bins and showcases that have a very neat and effective appearance, as one enters the store. The opposite side has been faced with solid wood to a height of perhaps eight feet and covered with a rich red burlap. "We planned this," explained Mr. Kydd, "in order that wherever we drove a nail, or sunk a screw, we should find wood." This entire space is mounted with all the latest bathroom fixtures that modern craftsmen can fashion. The display of bevelled mirrors, shining nickel and white porcelain is quite striking, even as seen from the street. Shelf hardware, aluminumware, etc., is displayed on one side of the back, and garden tools, lawn mowers, etc., on the other. As the store is a little wider at the back, a row of silent salesmen displays the cutlery. "The whole store is laid out more like a complete display of samples, more than a display of stock," said Mr. Kydd. "We have a cheap warehouse floor on another street; we cannot see any advantage in renting expensive floor space to store our surplus stock. One would have to maintain a much greater volume of sales to make the difference, and then only be working for the landlord." W. McGregor, for many years associated with the Gordon Brown Hardware Co., has been secured to manage the hardware and tool departments in the new location.

The Corona Phonograph Co, Ltd., succeeds the Corona Phonograph Co., of Montreal.

Where and When Stores Are Closing

Additions to lists published in the last two issues of HARDWARE AND METAL are made herewith. The booklet which has been prepared for distribution to the travellers, is now ready, and will be gladly mailed to those sending in a request.

Ontario

FORT FRANCES.—Half holiday not yet decided upon. Stores close in the evenings except Saturday at 7 p.m.

PORT DOVER.—Stores close Thursday at 12.30 p.m. during June, July and August, and every evening except Wednesday and Saturday at 6 p.m.

ST. JACOBS.—No half holiday. Stores close every evening except Wednesday and Saturday at 6.30 p.m.

WIARTON.—No half holiday. Stores close every evening at 6 p.m. except Saturday.

Saskatchewan

MOOSOMIN.—Stores close on Thursday at 1 p.m. during April, May, June, July and August, and every evening at 6 p.m.

Alberta

TABER.—Stores close Wednesday at 1 p.m. during May, June, July and August, and every evening except Saturday at 6 p.m.

NOVA SCOTIA

DIGBY.—Stores close Thursday, 1 p.m., May 1 to September 30, and nightly except Saturday at 6 p.m.

BRIDGETOWN.—Stores close Wednesday, 12.30 p.m. (new time), June, July, August and September, and every evening except Tuesday and Saturday at 6 p.m.

INVERNESS.—Stores close Wednesday noon, May 1 to October 30, and Tuesday and Thursday evenings.

KENTVILLE. — No half holiday. Stores close May 1 to December 15 at 6 p.m. Monday, Wednesday, Thursday, and Friday, January 1 to April 30. Stores close Monday, Tuesday, Wednesday, Thursday and Friday.

NEW GLASGOW.—Stores close Wednesday noon, June, July, August and September, and every evening except Tuesday and Saturday at 6 p.m.

WINDSOR.—Stores close Thursday noon, June to September inclusive, and nightly except Saturday at 6 p.m.

YARMOUTH.—Stores close Friday at 12.30 p.m. May to October inclusive, and nightly except Saturday at 6 p.m.

WOLFVILLE.—Stores close Wednesday, 1 p.m., May, June, July and August, and Monday, Wednesday and Friday at 6 p.m.

WESTVILLE.—Stores close Wednesday noon, June to September inclusive, and nightly except Tuesday and Saturdays at 6 p.m.

PRINCE EDWARD ISLAND

CHARLOTTETOWN. — Stores close Wednesday noon, July 9 to September 10 inclusive, and every evening at 6 p.m. except Saturday, when closing hour is 10 p.m.

Workmen's Compensation Report Issued

The report for the fourth year's operation of the Workmen's Compensation Act, Ontario, is now printed, and contains much information concerning industry, workmen, and accidents in the Province.

During the year $3,514,648.47 was awarded for compensation, or $11,600 a day, and $369,346.37 for medical aid, or $1,219 a day, the number of cheques issued per day being 248 for compensation, and 139 for medical aid.

Payment was made for 40,930 accidents, 382 of these being death cases, 2,549 causing some degree of permanent disability, 25,446 causing only temporary disability, and 12,553 involving only medical aid.

It is estimated that over 500,000 workmen are covered by the provisions of the Act.

As the disability in serious accidents often continues into and sometimes beyond the following year, complete statistics can only be given for the prior year.

The average weekly wage of injured workmen was $19.06, and the average age of 34.07 years.

The total time loss from accidents durthe year was 565,526 days; the average length of temporary disability was 21 days.

In the present industrial conditions the existence of a law which is just and satisfactory to labor, and not unduly burdensome to industry is, it is indicated, of the highest importance, and the operation of the present Ontario Act is said to be a great satisfaction to those responsible for its enactment, among whom the representatives of labor took a leading part.

Amendments at the last Session have, it is stated, put the Ontario law in the first place in regard to benefits to workmen, the rates of assessment being low compared with those of other places. The explanation is in the fact that Ontario has a collective liability state system, in which the comparatively small cost of administration is mostly borne by the Province, and in the fact that the provisions and methods of administration of the Act are very simple, speedy, and inexpensive.

Comparison of rates of assessment are significant. The steel works rate, for instance, under the collective liability system, is in Ontario, $1.70; Nova Scotia, $1.90; and in Ohio $1.75, as compared with a rate under the private or mixed system of $3.74, in Michigan; and $5.02, in New York. For mason work the rates are in Ontario, $1.50; Nova Scotia, $2.00; Ohio, $2.85; Michigan, $5.41; and New York $8.74. In Michigan the benefits are a little more than half what they are in Ontario.

Newfoundland Importers' Association

The following Rules and Regulations were adopted by the Association at their Annual Meeting, held April 24th, 1919, for the seasons 1919-1920:

1st—Closing Hours.—Retail Dry Goods and Hardware Stores to close at 6 p.m. until June 28th, Saturdays at 9.30 p.m.

To close at 5 p.m. from Monday, June 30th, until August 31st, Saturdays at 9.30 p.m.

To close at 6 p.m. from Monday, September 1st, until December 13th, Saturday at 9.30 p.m.

To close at 10 p.m. from Monday, December 15th, to Wednesday, December 24th.

To close at 9 p.m. from Friday, 26th December, until December 30th; Saturday 27th, and New Year's Eve at 9.30 p.m.

2nd—Holidays.—May 24th, June 3rd, July 1st, August 6th, August 27th, September 10th, 1919; January 26th, February 18th, March 17th, (April 2nd, Good Friday), 1920.

3rd—Half-Holidays.—June 11th, 18th, 25th; July 9th, 16th, 23rd, 30th; August 13th, 20th; September 3rd, 1919; February 4th, 11th, 25th; March 3rd, 10th, 24th; April 7th, 14th, 21st, 1920. Stores to close 12.30 p.m.

4th.—Any week during the season in which there may be a general holiday other than as herein arranged for, the regular half-holiday will not be observed.

5th.—Closing hours apply to the closing of the Stores to the general public, and it must be distinctly understood that assistants shall work after these hours whenever so required.

N.B.—The attention of the public is called to the above regulations, and purchasers are asked to co-operate by making purchases before the hour named for closing the Stores.

R. A. TEMPLETON,
May 9th, 1919. **Honorary Secretary.**

MONTREAL STEEL MAN DROWNED

An extremely sad accident occurred in the St. Maurice River last week, resulting in the death of Captain J. D. McCall, son of J. T. McCall, of Drummond, McCall and Co., Ltd., Montreal. The sadness of the accident was accentuated owing to the fact that Captain McCall had survived the campaign in the field, and had only recently returned to Montreal.

Particulars of the accident, as received, indicate that deceased was canoeing with a friend when the canoe capsized. A party had gone on a fishing trip, it being understood that Mr. McCall, Sr., was a member of it. Captain McCall, on his return from the front, assumed a position with the above firm in the Engineering Department. He was a graduate of McGill University.

BIG SALES OF ICE CREAM FREEZERS

"There has been a very heavy demand for ice cream freezers this year, larger than for the past three or four years," said a large Montreal jobber to HARDWARE AND METAL this week. "The demand has also been large for lawn mowers, grass shears, etc., and in making repeat orders on the factory we find it hard to get the goods." Just now it is just a question of having enough seasonable goods to meet the trade needs.

FIRE LOSSES

The factory of Arbuthnot and Helmer, Vancouver, manufacturers of sash and doors, was considerably damaged by fire.

NORTHERN ELECTRIC CO., LTD.

The Northern Electric Company, Limited, has just issued a new catalogue of automotive equipment. It has a very attractive cover design, which helps make it distinctive.

There are approximately 250 pages of representative lines in the catalogue, several of which are shown in colors, notably harness sets, automobile cables and wires, and wire wheels. A special section is devoted to equipment, especially designed for use with Ford cars. Another section contains garage equipment, where it is indicated the needs of the repair shop can be met. Storage battery replacement information is given in the section devoted to this line. Copies of the catalogue can be secured by writing to the nearest branch of the company.

GRAHAME-WHITE COMPANY, LIMITED

The Grahame-White Company, Ltd., head office and works the London Aerodrome, Hendon, N.W. 9, England, has issued a very handsomely illustrated catalogue in which are listed the 1919 Grahame-White aircraft, including instructional machines, the Bantam sporting single seater, express air mail machines, four-seater area limousines, five-seater aero limousines, 24-seater passenger limousines. Readers of HARDWARE AND METAL, who are interested, may obtain copies of the catalogue upon request.

WHEELER & BAIN

Wheeler & Bain, 108 George St., Toronto, have issued a fifty-six page catalogue, in which are listed the lines of galvanized iron eavestrough, pipes, elbows, skylights, ventilators, corrugated roofing and siding, hot air furnaces and stoves manufactured by them. The catalogue is attractively illustrated. Copies will be sent to readers of HARDWARE AND METAL upon request.

CANADIAN GENERAL ELECTRIC CO., LIMITED

Catalogue No. 19, for 1919-1920, issued by the Canadian General Electric Co., Ltd., lists the lines of automotive supplies and garage equipment manufactured by the company, or which they handle. It contains 22 pages and is profusely illustrated. A special section containing twenty-five pages is given to listing accessories for Ford cars, and the firm points out in connection with these lines mentioned that it has endeavored only to list those accessories and parts that are of proven merit. The catalogue also includes a piston ring schedule, and brake lining data. There is a complete index to the catalogue. Copies will be sent to readers of HARDWARE AND METAL upon request.

CANADIAN GENERAL ELECTRIC CO., LTD.

"Fixtures, glassware and appliances for farm lighting plants," is the title of an attractively printed catalogue issued by the Canadian General Electric Co., Ltd., of Toronto. The pages are eight by ten and a half inches, and there are numerous illustrations showing the application of various electric devices to farm work. Among other lines listed besides the fixtures and glassware are portable electric sewing machines, heating and cooking appliances, motors for household work, vacuum cleaners, electric washers, wiring devices and supplies. Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

THE BARRETT COMPANY

The Barrett Company has issued a catalogue in which are listed the roofings and specialties manufactured by the firm. The catalogue is attractively illustrated, many of the illustrations being in colors. Readers of HARDWARE AND METAL who desire copies may obtain same upon request.

SELLING SPORTING GOODS FREELY

"There goes my last baseball mitt," said a member of the firm of Ralph & Simpson, of Neepawa, Man., when the HARDWARE AND METAL *man approached. "We have had the heaviest run in sporting goods that we have had for years," he added at the same time advancing the suggestion that relaxation from the strain of war, or the home coming of the soldiers had a lot to do with it.*

J. R. MEADOWCROFT PASSES ON

A WELL-KNOWN and respected heating and plumbing man in the person of John R. Meadowcroft, died in Montreal on Friday, June 6, at his home, 32 Lorne Avenue.

The late Mr. Meadowcroft was a native of Montreal, having been born there 64 years ago. For upwards of 48 years he had been connected with the Garth Company, of which firm he was managing director at the time of his death. Entering the shop of Mr. Charles Garth as a boy ,Mr. Meadowcroft continued to master various details of the business and as this expanded he was given greater responsibilities. He had taken a great interest, and particularly of late years in various fire-fighting apparatus. Some of his inventions have been approved throughout America, being recognized and used in some of the larger centres.

Among other things which enjoyed his support, Mr. Meadowcroft was a member of the Montreal Board of Trade. Membership was held by him in the St. George's, Engineers' and Montreal Reform Clubs. The funeral on Monday was largely attended, attesting the esteem in which the deceased was held and the wide extent of his acquaintance.

GETTING OVERSEAS BUSINESS

A report issued by the Canadian Trade Commission shows that up to the present time more than $15,000,000 worth of orders have been secured overseas as a result of the credits established in Europe. One of the largest buyers so far on this basis is Roumania, which, among other items, has taken binder twine valued at $940,990, paints and oils worth $189,845, edged tools worth $130,743 and dairy utensils valued at $12,790. In addition to the business that has come through the trade commission many Canadian firms have, by their own efforts, been securing orders in England. A lot of inquiries are being received that indicate future orders in all parts of the world. It would appear that there is quite a lot of business to be had in various oversea countries for Canadian firms. It is apparent also that there will be plenty of competition.

OPPORTUNITY IN SIBERIA FOR CANADIAN HARDWARE

In a letter to Canadian manufacturers the Canadian Trade Commission points out the opportunities for business in Siberia, and also draws attention to the fact that Hon. Raymond E. Hubbard, of the Siberian Supply Company, is remaining at Vladivostok and will continue to act on behalf of Canadian commercial and industrial interests. Among the hardware requirements listed are agricultural implements and machinery, 20,000 mowers, 20,000 rakes, 12,000 grinders for sharpening knives of harvesting machines, 27,000 smoothing harrows, 100 tractors, 3,600 tons of binder twine, 2,000 portable scales, 300 stationary scales, 455,000 feet of wire netting, 30,000 zinc sieves, 332,000 feet of leather belting, 360,000 feet of belting (camel hair), 16,000 separators, 500 crude oil motors, 3 to 12 h.p.; 5,000 cultivators, 200,000 axes, 300,000 scythes, 50,000 sickles, 200,000 forks, without handles; 100,000 steel shovels, without handles; 20,000 horizontal saws; 2,000 saws for sawmills, 5,000 iron gearings for grinders, 3,600,000 pounds of lubricating oil, files and carpenters' tools valued at $60,000.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

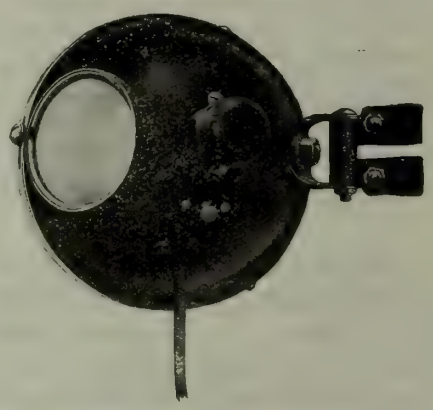
SAN-FER-ANN ANNUNCIATOR

Edwards and Company, of New York City, have put on the market their San-Fer-Ann Annunciator, said to be a high grade instrument. The case is made of steel, white enamelled finish, with nickel plated bell and trimmings. The drop openings are fitted with glass, and the case is securely fastened to the back board with hinges on one side, and a

San-Fer-Ann Annunciator.

screw lock on the other. This makes what is stated to be a very secure form of fastening, and at the same time the mechanism of the annunciator is very accessible, and in case it is desired to change the lettering on the drops, this can be done with a minimum amount of trouble.

The San-Fer-Ann has, the manufacturer states, gravity drops, which are positively locked in position so that it is impossible for them to shake down by vibration; however, as soon as the circuit is closed the drop falls by gravity. The San-Fer-Ann is, it is indicated, suited for houses, apartments, hospitals, etc., and can always be kept clean, as any dust or discoloration can be removed with a damp cloth; the case being made of steel prevents warping, splitting or twisting which is a common fault with some wood case annunciators. The Northern Electric Company, Limited, Montreal, and branches, are Canadian distributors.



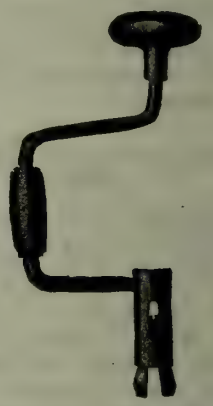
DECALCOMANIA TRANSFERS

Special transfers for use on metal, wood, glass, or leather goods are being manufactured in Canada by the Canada Decalcomania Co., 364 Richmond St. W., Toronto. These transfers, it is claimed, are quickly and easily applied by persons without experience in this class of work and are not injured by cold, heat or water. It is stated that they will last as long as the article to which they are applied is in use. By using Decalcomania transfers, it is claimed that the cost is reduced to a minimum. They can be made, it is stated, in many designs and sizes, and besides being used by manufacturers for marking their various lines of goods may be used also for advertising and window signs. Gold and silver leaf and permanent colors, it is stated, are used in the manufacture of the transfers. In some special cases, where metal name plates have been used, it is stated that Decalcomania transfers may be applied to better advantage as they cannot be removed without showing deliberate intent.

WIND SHIELD SPOT LAMP

A spot lamp neat in appearance, having an outside focus adjustment, swivel bracket, handle conveniently placed, a 3 in. condensing mirror for day driving, special type switch and positive lock door, is being put on the market by the K. D. Lamp Co., Cincinnati, Ohio.

The reflector is parabola in shape, and, it is indicated, drawn from heavy gauge brass, and silver plated. Other points enumerated by the manufacturers are that the body is drawn in one piece, from heavy gauge steel, two coats enamel baked on, door is hexagon shape, highly finished and nickel plated; bulb



Windshield Spot Lamp.

is 6-8 volt, 21 c.p. Mazda "C" double contact unless otherwise ordered; sufficient cord furnished for attaching to lighting system; each packed in individual cartons.

DEMOUNTABLE RIM WRENCH

The Hill Pump Valve Co., Chicago, Ill., have just placed on the market what they are naming an indestructible demountable rim wrench. According to the manufacturers the new wrench is made entirely of steel. The brace handle and knob at the end are heavy steel stampings attached in such a way that they cannot be broken off. The brace itself consists of a heavy steel rod, while

Demountable Rim Wrench

the tube which holds the reinforced, case-hardened, drop-forged jaws, is seamless steel tubing of the best quality. The handles and tube are finished in black enamel, while the brace itself is nickel-plated, making the wrench an attractive tool. This wrench, it is indicated, takes automatically, without any adjustment, every size of nut used on every make of demountable rim.

BERLING MAGNETO

The Canada Sales Company, 183 Church St., Toronto, has been appointed exclusive factory representatives in Canada for the Berling Magneto. Simplicity of construction is one of the features claimed for the Berling, also maximum results under the most exhaustive tests.

HARDWARE LETTER BOX

Motor Cycles

Saskatoon Hardware Co., Ltd., Saskatoon, Sask.—Will you give us the name and address of the makers of the Harley-Davidson motor cycles?

The Harley-Davidson motor cycle is made by the Harley-Davidson Motor Co., Milwaukee, Wis.—Ed.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

PROPOSED changes in the tariff have not created any great disturbing influence in the hardware markets as yet, though there are some lines likely to be affected. Chief among these are sheet copper and tinplate, which under the new scale may reach slightly higher levels. The effect on manufactured goods made from these has not been determined upon definitely, but it seems possible that an advance may be necessary.

Linseed oil is again on the upward move this week and $5 flaxseed predicted some little time ago does not seem to far away. Each day, so far this week, sees prices move up and there are no elements apparent to bring about a reaction. Argentine seed is moving to Europe, which is affecting supplies available in the United States and American crushers are taking delivery of Canadian seed. The demand for linseed oil is very good and no diminution in sales has been reported.

Turpentine, after a period of remarkable advances, reacted slightly to-day at primary points. Whether this means that the peak has been reached is hard to determine, but there are many who feel this is only a temporary stop in the upward move of this commodity. Receipts from the new crop are improving and stocks are as a result better. The outturn from the crop does not promise any more than enough for domestic consumption, and with overseas buyers clamoring for supplies, cheap turpentine does not seem likely. The net advance here was 5c per gallon.

Lubricating oils seem to be due for a slightly lower range of prices, though this has not developed as yet. Gasoline has come down 1c per gallon this week. There is some talk of a lowering of the price on cotton waste, the element of competition being a contributing factor, it is said. A slight decline in crowbars, mattocks and picks has been put into effect with higher prices being named on toilet and fetlock slippers, pine wash tubs and steel squares.

Business is reported as excellent and in many of the summer lines both retailers and jobbers have sold out their entire stocks. There has been an exceptionally large sale of prepared paints, while such lines as refrigerators, seasonable sporting goods and lawn mowers have been moving rapidly. Excellent sales of oil stoves and electric fans are reported.

MONTREAL MARKETS

MONTREAL, June 12—Changes of importance have been effected in this market during the week and tendencies are generally higher, though some declines have been made operative. Pine tubs are advanced considerably and steel squares also are much higher. Crow bars are reduced in price to $9.50 per 100 pounds, while set screws and cotter pins are selling under greater discounts, thus making a reduction. Brass butts are lower and various steel butts of the ordinary variety are due for a reduction. Coil chain of the electric weld class is advanced in one quarter, while semi-finished nuts are reduced by an increased discount becoming operative. The ingot market is a firm one, many lines advancing this week, such as lead, copper and spelter, while tin is easier. Lead products may rule higher soon. Gasoline is reduced one cent per gallon. Wares may be advanced in accordance with the tariff change of 5 per cent. on tinplate. The change made last week relating to screw and strap hinges should have stated that the discount was 20 to 25 per cent. instead of 12½ per cent.

There has been a particularly heavy sale for seasonable lines, such as fly screens, lawn mowers, hose, ice cream freezers, refrigerators, etc.

Pine Wash Tubs Make An Advance

Montreal.

WASH TUBS.—An advance has been made here in the price of ordinary pine wash tubs. The new prices on these are: No. 3, $13.20; No. 2, $15.40; No. 1, $17.60 and No. 0, $19.80 per dozen.

Crow Bars, $9.50; Set Screws Less

Montreal.

CROW BARS, SET SCREWS.—Declines have been effected for crow bars and these are now selling at $9.50 per 100 pounds. There also has been a reduction for set-screws, and while the new price is not available the change is about 12½ per cent. below former prices.

Brass Butts Down; Squares Are Up

Montreal.

BUTTS, SQUARES.—Declines that will, it is said, approximate about 25 per cent. are being effected for narrow brass butts of various kinds. Brass hinges may also be lower. Carpenters' steel squares are advanced very considerably, and some of the new prices are as follows: No. 1, old price $20.50, new $26.75; No. 2, $18 to $23; No. 3, $18 to $24; No. 03 $22.50 to $27.80; No. 11 $12.25 to $15; No. 14, $16 to $22.50; No. 100, $22.50 to $28; No. 0100, $24 to $33.

Chain is Higher; Special Nuts Less

Montreal.

CHAIN, NUTS.—One large jobber has

advanced prices for Electricweld coil chain both the BB and the BBB. The new prices are as follows for the two kinds, the BB being given first and BBB following: ⅛ in. BB, $19, BBB, $22; 3-16 in., $18 to $20; ¼ in., $15 to $18; 5-16 in., $13.50 to $16.50; ⅜ in., $11.60 to $14.60; 7-16 in., $11.50 to $14.50; ½ in., $11.25 to $14.25; ⅝ in., $11 to $14; ¾ in., $9.75 to $12.25. Semi-finished nuts are reduced in price, the sizes up to 1 inch being sold at a discount of 37½ per cent. against a former one of 27½ per cent., and 1 inch to 1½ inch at 30 per cent. against a former discount of 20 per cent.

Country Stores Buy Lots of Nails

Montreal.

NAILS AND WIRE.—A considerable tonnage of wire nails goes forward every week to country points, the city trade being less active. Prices are maintained without change, the base for wire nails being $4.75 per 100 pounds, and for cut nails the same. A good movement is reported of barb and other grades of wire fencing. The price on smooth steel wire, No. 9, is still $5 per 100 pounds.

Stoves Are Active; Wares May Advance

Montreal.

STOVES AND WARES.—Prices are probably due for a change on tinware of the pieced and stamped varieties; for the new tariff advance for tinplate imported from the States will make a difference to the manufacturer of 5 per cent. This will naturally have to be absorbed by the consumer sooner or later. In the meantime there is a good steady summer trade and markets are quite firm all around. Watering cans, etc., have been moving well.

No Lower Price On Rope; Cordage

Montreal.

ROPE, CORDAGE.—The market conditions are of a rather quiet nature here and prices are held unchanged. The effects of the tariff change are not likely to make for an immediate reduction of price unless British manufactured ropes are available for less money, much of the Canadian supplies coming from Mexico and the Philippines via the United States. Pure manila basis remains at 34c, British manila at 30c, and sisal at 27½c per pound.

Gasoline Down 1c; *Coal Oil Held*

Montreal.

GASOLINE, COAL OIL.—A decline of one cent per gallon on gasoline is recorded in this market, making the price per Imperial gallon for motor grade, 33c. There is a steady and good demand. Coal oil and lubricating oils, candles, etc., are steadily held unchanged. Coal oil prices range from 20c to 23c per gallon.

Steel Bars and Iron Are Steady

Montreal.

IRON AND STEEL.—The markets are steadily held here without change and a good trading condition prevails, particularly with regard to orders from the country. The average order is for limited tonnage, but the totals are very satisfactory.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Preference May Bring in Sheets

Montreal.

SHEETS AND PLATES.—If the British manufacturer is in a position to send along sheets and tinplate to this market, in view of the preferential tariff just effected, there will be a ready demand for them, importers state. Prices are ruling on spot stocks with less change than there was a few weeks ago and the sales are rather better. Stocks are ample.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00

16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Says Belting Prices Likely to Remain High

"There will be no more cheap leather goods this year." This is the opinion of one manufacturer who was discussing with HARDWARE AND METAL the outlook for prices of belting. He stated that materials which he now has in stock cannot be replaced to-day at anythink like the prices he paid for them. Stocks are low all over the country he says, and one of the troubles is to get enough materials. Leather which before the war cost 22c per lb. to-day costs 40c and is still going up. The manufacturer has to pay his help more, and all production costs are higher.

"There have been big advances in the past week," he said, "and it is certain that the markets, as far as leather is concerned, are going to be very firm for some time. In my opinion there will be no cheaper leather goods this year."

Firmer Prices May Rule Lead Products

Montreal

LEAD PRODUCTS.—In view of the changes for lead, with an added duty of one cent per pound, changes may be brought about on lead products. The market is ruling steady and a fairly good outgo of various products is maintained, plumbers being engaged in a considerable amount of jobbing and repair work.

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	15%
Lead wool, lb.	0 13
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10½

45-55	0 37½
50-50	0 40¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Old Metals Continue On Steady Basis

Montreal

OLD MATERIALS.—Price changes are few in old material, and there is a somewhat steadier feeling and tendency, nevertheless. It is probable that things may take better shape now that the Budget of the Canadian Government is announced, and prices should be somewhat better for copper and brass. There is still a rather quiet condition.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00

Strong Ingot Market; Copper, Lead Higher

Montreal.

INGOT METALS.—Markets are ruling with a decidedly better tone, and there have been advances for several of the principal ingots, with a slightly easier tone on tin.

COPPER.—Local markets are stronger in sympathy with those outside, and the price has been advanced to 20½ cents, an increase of 2 cents.

TIN.—An easier situation has developed, and the basis reduced to 56 cents per pound. Some trading has been passing.

LEAD.—In view of the tariff change, and also owing to the advances made by the trust in the States, prices are firmer, with a mark-up here of ¼ cent per pound to 7½ cents.

ANTIMONY.—The market is steady and unchanged on this, with a price ruling of 9½ cents per pound.

ALUMINUM.—Changes have not been

made in this metal, and there is about the usual limited amount of business, which is done around 38 cents.

SPELTER.—In sympathy with the firmer feeling on lead, this market has been advanced to 8¾ cents, a gain of ¾ cents per pound.

PIG IRON.—A price of $48 per ton obtains, and there is a limited trade for the product.

TORONTO MARKETS

TORONTO, June 12—Hardware markets show some revisions this week, clay picks, mattocks and crowbars all being under revision towards lower levels. Screw hooks and strap hinges are also easier and a decline of 1 cent per gallon has been made in gasoline. Lubricating oil may be revised and there is some talk of lower prices on cotton waste. A 2 cent decline has been made in tin, with copper, lead and antimony holding at firm levels. Solder shows a decline of 2 cents per pound in some quarters. Business as a whole is excellent and outlook very satisfactory.

Clay Picks Show Revision Downward

Toronto.

CLAY PICKS.—There has been a revision downward this week in the price of clay picks, the decline averaging about 50c per dozen. On the new basis those ranging from 5 to 6 lbs. assorted, are quoted at $11.25 per dozen; from 6 to 7 lbs. assorted, $12.25; 7 to 8 lbs. assorted, $13.25.

Crow Bars Down; Mattocks Change Too

Toronto.

CROW BARS, MATTOCKS.—There has been a substantial decline reported during the week in the price of crow bars. Those which have been quoted for some time past at $10.50 per 100 lbs., are now revised to a level where they will be invoiced at $9.75 per 100 lbs.

The situation in regard to cutter mattocks is somewhat different in that an advance has been made in some quarters amounting to 50 cents per dozen. The present price named to the trade is $13.75 per dozen, which replaces a quotation formerly in effect of $13.25.

Screw Hook and Strap Hinges Easier

Toronto.

HINGES.—There has been a revision downwards in the price of screw hook and strap hinges. New discounts have been named in some quarters, this being 35 per cent. from standard list. The list prices, per dozen pairs, are shown in the current market quotations. This, it is indicated, is a move on the part of manufacturers to get back to a basis which is in line with present production costs, and easier markets on some raw materials.

Heavy Summer Stove Business Reported

Toronto.

STOVES, WARES.—Reports from all sources on the volume of business being done on summer lines of stoves are most encouraging. That is, they are encouraging from point of actual sales, but the deliveries from the manufacturers are, in some instances, proving rather disappointing. One distributor here stated that on Monday there were orders for 55 stoves by mail, telegraph and telephone, to be shipped out by express. This is quite a volume of business to be handled in this way, and following on the heels of heavy shipments which had preceded, placed this firm in the position where they were absolutely cleaned out of stock. The worst of it is, they explain, the manufacturers themselves are working against time, trying to catch up with the orders which they have on hand.

The story is the same from all sources, and indicates that the trade as a whole are experiencing a remarkably good trade at the present time.

The same condition seems to apply in regard to enamelware, tinware, and kindred lines. Jobbers and distributors report that they are having difficulty in getting enamelware and tinware lines through. This they do not attribute to the shortage of raw materials, so much as to a shortage of skilled labor, which can be employed on the work which the manufacture of these lines entails. All summer lines are active and a splendid total is shown in the general movement of this class of goods.

Gasoline Down 1c; Lubricating Oils Too?

Toronto.

OILS, GASOLINE.—The trade will be interested to know that there has been a decline this week amounting to 1c per gallon on gasoline. There has been a change also in V.M.P. Naphtha, which is down 1c per gallon to 31c. What is directly responsible for this is not given out. The sale of gasoline continues at a very high level, and most certainly the reduction which is now named will not curtail the use by any means.

Indications seem to point to a revision in the price of lubricating oils, although nothing definite is yet available. The change when it comes about is expected to show a downward tendency, and something of a more concrete nature may be looked for in the next few days.

There has been nothing doing in the line of a market change on coal oil, quotations remaining at the unchanged figure of 19½c to 22½c per gallon according to grade. Business is very heavy and supplies are ample to take care of the demand.

Waste to Decline? Oakum Unchanged

Toronto.

WASTE, OAKUM.—There is a somewhat better demand for cotton waste, but this is not represented in any enormous volume as yet. The strike in Winnipeg for the past three or four weeks has certainly curtailed movement of goods to that section of the country, and consequently has cut down the volume of sales to a great extent. Prices have held without change at the figures shown in the current market quotations, though there is some indication of lower prices coming.

There is nothing new in the situation of oakum. There is a fair movement and quotations are well maintained at the figures shown in current market quotations.

Iron and Steel Maintains Level

Toronto.

IRON AND STEEL.—There is a very nice bunch of orders being received, and stocks are in such shape that jobbers are in pretty fair shape to handle business on the various lines of iron and steel bars. Quotations show no change from figures given herewith.

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75

Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Market Holds on Sheets, Plates

Toronto.

SHEETS, PLATES.—Indications are that there will be no change in the market situation on sheets, as a result of the proposed tariff changes. There has been no change during the week in quotations, the figures below being well maintained. The demands of labor submitted to the employers of the steel mills in the U.S. may not be met, and that means a possibility that July 1 may see a general tie-up of the various plants. Some interests state that they cannot possibly meet the demands, so unless the two elements get together, the situation may develop rather unsat-

isfactorily. Stocks in the hands of jobbers are very good, and they state they would experience no hardship for a month at any rate.

Sheet copper has advanced, being quoted at 26¼c per lb., mill shipment, and 29c per lb., shipment from stock.

10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 60	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Corrugated Sheets Show No Change

Toronto.

CORRUGATED SHEETS.—There has been no change in the position of corrugated sheets during the week. Business is reported fairly brisk and outlook satisfactory. Other lines of sheet metal goods are showing greater activity, and prices all the way through are well maintained.

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe, Boiler Tubes Hold

Toronto.

WROUGHT PIPE, BOILER TUBES.—The situation in wrought pipe and boiler tubes shows practically no change. There is some business on pipe, but only a limited movement on tubes. Prices on pipe hold at figures shown in current market quotations. Quotations on boiler tubes follow herewith:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder Down 2c; Lead Products Firm

Toronto.

LEAD AND ZINC PRODUCTS.—A revision downward on solder has been made this week in some quarters, the decline amounting to 2c per lb. Guaranteed is being quoted at from 33c to 37c per lb.; strictly at 31c to 35c; commercial at 28c to 31c; wiping at 27½c to 30c; wire at 34c to 40c.

No change in manufactured lead products has been made, the following figures being those ruling to-day:

Lead pipe, ib.	....	$0 11½
Lead waste pipe, lb.	....	0 12½
Lead traps and bends	....	15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 33	$0 37
Solder, strictly, lb.	0 31	0 35
Solder, commercial, lb.	0 28	0 31
Solder, wiping, lb.	0 27½	0 30
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.	....	0 17

Scrap Improvement Slow in Coming

Toronto.

OLD MATERIALS.—The scrap market is not improving rapidly, although there is a fair volume of business being done. The United States market is perhaps taking a little more material now than for some time past, but even yet the great bulk of this is in the form of shipments on contracts that run into thousands of tons. The scrap metal business is pretty well divided, and lines are quite clear. There is the small pedlar, with his wagon, who scours the country. He in turn sells to the man who handles about five or ten ton lots, and the next dealer is the one who takes in car lots. The clearing house is the large dealer who will undertake a contract up around 50,000 tons, deliveries to be made on a definite schedule. It is not until this last named class gets busy that the whole procession can be said to be fully engaged.

One thing is noticeable, according to some of the larger dealers, and they take it as a sign of improvement. There is very little kicking about the shipments that are sent out now. When the market is barren kicks about quality and grading are absent. When scrap is a drug on the market there is a great increase in the kick crop. There is undoubtedly a better feeling in the market, one that looks for much better trading in the very near future.

Some 600 tons of the U.S. shell steel scrap which had been stored in Canadian yards, was sold during the past week to an American concern. The price was rather lower than generally expected would be secured for the material.

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00

Automobile tires	0 03½	0 04

Cordage Holds at Firm Figures

Toronto.

CORDAGE.—Reports indicate that there seems to be a slight improvement in the demand for rope. This is not very pronounced as yet and manufacturers are not looking for a very heavy movement for another few days. However, the sale of hay fork rope should soon be a feature of the demand, and it is already manifesting itself in orders reaching the jobbers' hands. Quotations for the week remain unchanged, pure manila being quoted at 34c per lb. base; British manila 30c; New Zealand hemp 30c; sisal 27½c and sisal lath yarn 27½c.

Nails More Active; Wire Holds Steady

Toronto.

NAILS, WIRE.—Reports from the jobbers indicate that there is a very fair volume of business doing in nails. This is not so very pronounced as yet, but orders coming to hand give rise to the opinion that there is greater building activity apparent in all sections of the country. There has been no revision in the market price, the wire selling at a base price of $4.70 per 100 lbs., and cut at $4.75.

The situation in regard to smooth steel wire is generally steady. There is a better movement reported with kindred lines showing seasonable activity. The price for smooth steel wire is held at $5 per 100 lbs., other styles showing no change in their corresponding extras.

Tin Down, Copper, Lead Hold Firm

Toronto.

INGOT METALS.—The market continues to show a good deal of variation, but the undertone as it applies to copper, lead and antimony, seems to be in a fair amount of strength. The position of tin is rather quiet. Spelter is not providing much interest. Business is fairly good and there is no difficulty in getting supplies.

COPPER.— The buying movement which has been apparent in the United States, which has tended to keep the price fairly firm, is reflected in the situation locally. The price of 18½c per lb. is well maintained and stocks are at a sufficiently high level to take care of the business which is offering.

TIN.—There seems to be only a casual interest in this metal. Supplies have been coming through quite readily, and buyers do not seem inclined to go into the market for any more than their immediate need. The price shows a slight decline from the figure which was quoted last week, and now rules at 58c per lb.

SPELTER.—Production seems to be falling off, and there is little in the sit-

uation which would indicate any bullish tendencies. As a matter of fact there is really very little movement either way. The price remains at the unchanged figure of 8c per lb.

LEAD.—Greater buying activity is apparent in this metal. There is little indication that low prices, or very low prices anyway, are going to be reached. Markets in the United States are held at a pretty firm level, and the demand is really very satisfactory. There has been a considerable movement locally from all accounts, and the outlook here is pretty satisfactory. Price ranges around 6½ to 7c per lb.

ANTIMONY.—There is no indication of any easing away in the market of this metal. The price of 9c per lb. reached last week, is still maintained, and there is a fair amount of activity apparent. Stocks are not heavy or ample to meet the requirements of the trade.

ALUMINUM.—There seems to be some business coming to hand on this metal, but it is still along rather restricted lines. Supplies seem to be improving somewhat, and a much better trade is looked for in the coming week. Quotations range from 40c to 42c per lb.

LONDON MARKETS

LONDON, Ont., June 12—A number of price changes have gone into effect this week. Reductions have been made in bright wire goods, in clay picks, edge and pick mattocks and screw and strap hinges and crow bars. Following the strong market for linseed oil, prices of that commodity have advanced. Higher quotations are also in effect on Zenoleum disinfectant and on toilet and fetlock clippers. Business is reported as excellent all through this district and in many of the summer lines both retailers and jobbers have sold out their entire stocks. There has been an exceptionally large sale of prepared paints, while such lines as refrigerators, seasonable sporting goods and lawn mowers have been moving rapidly. Many dealers will be completely out of lawn mowers by the end of the season. Excellent sales of oil stoves and electric fans are reported.

Bright Wire Goods Are Reduced Slightly

London, Ont.

BRIGHT WIRE GOODS.—New and lower prices are now in effect on bright wire goods. Screw hooks, screw eyes, gate hooks and eyes, etc., are now quoted at 85 per cent. off list instead of 82½ per cent. as formerly.

Lower Prices Named For Screw and Strap Hinges

London, Ont.

SCREW AND STRAP HINGES.—Lower quotations on these goods are now being made, the new price being 35 per cent. off list.

Baseball Goods Are in Steady Demand

London, Ont.

BASEBALL GOODS.—There has been an excellent demand for baseball goods and up to date supplies have been very limited. No changes have been made in prices.

Good Business Being Done in Phonographs

London, Ont.

PHONOGRAPHS. — The hardware stores in Ontario are working up a good sale in this line. The prices on one of the makes handled are:

"Lois" No. 60, $75; No. 75. $96; No. 135, $140 each.

Harvest Tools Are in Brisk Demand

London, Ont.

HARVEST TOOLS.—Good sales of harvest tools are being made. Quotations are 17½ per cent. off list. Buco five-prong hand cultivators are also selling well. They are quoted at $12.38 per doz.

Lawn Mower Stocks Becoming Exhausted

London, Ont.

LAWN MOWERS.—Many stocks of lawn mowers are getting very low and by the end of the season a lot of dealers expect to be cleaned out. Sales have been very brisk. Quotations are:

Daisy, Star, Woodyatt, Empress, 35 per cent. off list.

Demand is Good For Paris Green

London, Ont.

PARIS GREEN.—A steadily increasing demand for paris green is noted. Quotations are as follows:

½ lb. pckgs, 54c lb.; 1 lb., 52c; 25 lb. drums, 50c; 50 lb. drums, 49c; 100 lb. drums, 49c; 250 lb. kegs, 48½c; 600 lb. bbls., 48c.

Oil Stoves and Ovens Are in Great Demand

London, Ont.

OIL STOVES AND OVENS.— Exceptionally good sales are being made of oil stoves and ovens. Prices are as follows:

Stoves: New Perfection, 2 burner, $14.06; 3 burner, $18.19; 4 burner, $23.06.

Ovens: New Perfection, 21 G., $4.31; 22 G., $5.44; 41 G., $4.31; 42 G., $5.44.

Wicks for New Perfection stoves, $3.15.

Hammocks, Hooks and Chains Selling Well

London, Ont.

HAMMOCKS.—Hammock sales have been brisk and also the parts. Prices are as follows:

Hammock hooks: No. 128 with screw, 80c doz.; No. 138 with plate, 90c doz.

Hammock chains: 4 ft., $4 per doz. pr.; 6 ft., $6 per doz pr.

Hot Spell Boosts Electric Fan Sales

London, Ont.

ELECTRIC FANS.—There has been a big sale of electric fans as a result of the hot spell. Prices are:

Polar Cub, 6 in., $6.25; 9 in., $9.

Clay Picks Are Reduced Slightly

London, Ont.

CLAY PICKS.—Prices of clay picks have been reduced a little and the new prices are:

5-6 lb., $11 per doz.; 6-7 lb., $12 per doz.; 7-8 lb., $13 per doz.

Edge and pick mattocks are also lower, the new prices being $13 per doz.

Grub hoes have been reduced also, the new prices being $10 per doz.

Crow Bars Down One Cent a Pound

London, Ont.

CROW BARS. — A new and lower price is now effective on crow bars, quotations being made at 9½c per lb. or 1c per lb. below former figures.

Higher Price Asked For Disinfectant

London, Ont.

ZENOLEUM.—Zenoleum disinfectant is again on the Canadian market but at higher prices. The quotations are:

30c size, $2.50; 60c size, $5; $1.10 size, $9.

Zenoleum Lice Powder, 30c size, $2.50.

Leather Soles, Heels Are a Little Higher

London, Ont.

LEATHER SOLES, HEELS. — New prices, which are a little higher, have been named on leather soles and heels. The quotations are:

Soles—Misses', No. 43½, $1.90 dozen pair; Ladies', No. 37½, $2.35; Boys', No. 31½, $3; Men's, No. 123, $3.80; No. 122, $4; No. 121, $4.20.

Heels—Ladies', No. 73¾, $1.20 dozen pair; No. 80, $1.20; No. 81, $1.10; Men's, No. 51, $1.30; No. 52, $1.15.

Toilet and Fetlock Clippers Are Higher

London, Ont.

TOILET AND FETLOCK CLIPPERS. Prices of toilet and fetlock clippers have advanced and the new quotations are:

Toilet clippers, A1, $1.20 pr.; fetlock clippers A2, $1.20 pr.

No Change Shown in Screen Wire Cloth

London, Ont.

SCREEN WIRE CLOTH. — Screen wire cloth has been in brisk demand. Prices show no change and are as follows:

Painted black: 100 ft. rolls, $3.25 per 100 sq. ft.; 50 ft. rolls, $3.30; bronze, 14c sq. ft.

Refrigerators Are in Brisk Demand

London, Ont.

REFRIGERATORS. — Excellent sales of refrigerators are being made. Sanderson Harold makes are quoted at 40 per cent. off list.

White Lead in Oil Remains Unchanged

London, Ont.

WHITE LEAD IN OIL.—There has been a good sale for white lead in oil. Prices show no change from the following quotations:

Pure, tons, $16.30 per 100 lbs.; less than tons, $16.65; pure elephant, tons, $16.90; less than tons, $17.25.

Prices of Nails Show No Changes

London, Ont.

NAILS.—There has been a fair sale of nails as a lot of building is getting under way all over the district. Prices are:

Wire, $4.70 base; cut, $4.75.

Exceptional Sales of Prepared Paints

London, Ont.

PREPARED PAINTS.—Exceptionally good sales of prepared paints are being made all through the district with prospects for a steady demand. Prices show no change.

Linseed Oil Advances; Turpentine is Firm

London, Ont.

LINSEED OIL, TURPENTINE.—Linseed oil prices show an advance of five cents with a firm market in prospect. Sales have been very good. Prices are:

1 to 2 bbls, raw, $2.35 gal.; boiled, $2.38; 3 to 5 bbls., raw, $2.34 gal.; boiled, $2.37; 6 to 9 bbls., raw, $2.32; boiled, $2 35; less bbls. add 10c gal.

There has been a good sale for turpentine. Prices are holding firm as follows:

Single barrel lots $1.50 per Imp. gal.; 2 to 4 barrel lots, $1.49; 5 gal. lots, $1.60.

WINNIPEG MARKETS

WINNIPEG, June 12—Price changes for the past week are again very few, the only lines affected being the American made guns, rifles and ammunition. These are all affected by the recently imposed excise tax.

The strike situation has improved considerably during the week, many of the striking employees returning to their positions after realizing that they have been misled by the strike leaders. Some of the hardware jobbers report full staffs at the present time, so that freight shipments will be moving freely during the coming week. All express shipments are still being refused by the express companies, as few of their employees have returned. The postal authorities are also handicapped in trying to get out the large quantity of accumulated mail, but hope to have a normal service within the next week.

New Excise Tax Hits Sporting Goods

Winnipeg.

SPORTING GOODS.—The new excise tax recently imposed by the United States Government on all sporting goods, both for home consumption and export, is responsible for the recent advance in these lines, which move up approximately 7 per cent. over former prices. Low prices now ruling on American guns, rifles and ammunition are given as follows:

Harrington & Richardson and Iver Johnson Shot Guns—Single barrel, plain, $11 each; single barrel, ejector, $11.50 each; single barrel reinforced breech and ejector, $14 each; single barrel reinforced breech, plain, $13.50 each.

Remington Shot Guns—No. 10A, $46.20 each; No. 10C, $77.50; No. 10S, $67.50.

L. C. Smith Shot Guns, No. 00 or Field, $50 each; No. 00 or ejector, $62.50; No. 0 or Ideal, $62.40; No. 0 or Ejector, $75.50; trap grade, $89; trap grade, ejector, $106; No. 2 or specialty, $107; No. 2 or ejector, $122.75.

Fox Guns, Sterlingworth — Plain, $48 each; ejector, $58.25; No. A12, $53.50; No. AE12, $63.50; B12, $64.75; BE12, $73 each.

Parker Guns—VH, $67.25 each; PH, $87; Trojan, $49.50; VHE, $92; PHE, $113; GHE, $133.50; GH, $108; DH, $143; DHE, $168 each.

Winchester Guns—1912 Trap Grade, $83.60 each; 1912 Tournament Grade, $68.20; 1912 Standard Grade, $46.20; 1912 Standard with matted rib, $53.60; 1897 Solid Frame, $38.50; 1897 Take Down, $41.80; 1901 Solid Frame, $41.80.

Ithaca Guns—Field Grade, $41 each; Field Grade, ejector, $54.50; No. 1 plain, $47.75; No. 1 ejector, $61; No. 1½ plain, $54.25; No. 1½ ejector, $67.

Stevens Guns—No. 520, $42.25 each; No. 522, $60; No. 235, $28.75; No. 335, $34.50.

Remington Rifles—12A, $21.50; 12B, $24; 12C, $24; 12CS, $24; 14A, $21.50; 14R, $36.35; 14½A, $35; 14½R, $34.25; No. 6, $9; No. 4, $13.40; Boy Scout, $10.75.

Stevens Rifles—Little Scout, No. 14½, $5.75 each; Crackshot, No. 26, $6.75; Marksman, No. 12, $8.50; Favorite, No. 17-20, $10.50; Favorite, No. 70, $17.25.

Hamilton Rifles—No. 27, $3.25 each; No. 027, $3.50.

Winchester Rifles—Model 1902 x 22, $8.25 each; 1904 x 22, $9.90; 1906 x 22, $22.55; Thumb Trigger, $7.40.

Winchester Sporting Rifles—Models 1890, 1892, 1894, 1903, 1886, 1895, 1905, 1907, and 1910 advance 10% on factory list.

Winchester and Remington Ammunition—BB Caps, $3.25; CB Caps, $4.10; 22 Short Black, $5.85; 22 Long Black, $7.05; 22 Long Rifle Black, $8.20; 22 Short Smoke, $6.25; 22 Long Smoke, $8.80; 22 Long Rifle Smoke, $10.30.

Centre Fire Pistol and Rifle Cartridges—17½% advance on list.

Centre Fire Military and Sporting Cartridges—17½% advance on list.

Revolvers Are Also Affected by Tax

Winnipeg.

REVOLVERS.—Revolvers are also affected by the newly imposed excise tax, and new prices ruling are given as follows:

Iver Johnson revolvers, double acting hammer, 3 in. n.p., $5.60 each; 4 in. n.p., $13.35; 4 in. blue, $13.70; 5 in. n.p., $13.70; 5 in. blue, $14.05; 6 in. n.p., $14.05; 6 in. blue, $14.40.

Automatic hammerless, up., $13.85; blue, $14.20; 4 in. n.p., $14.20; 4 in. blue, $14.55; 5 in. n.p., $14.55; 5 in. blue, $14.90; 6 in. n.p., $14.90; 6 in. blue, $15.25. For Western grip add to above prices, $1.15 each.

Linseed Oil Prices Are Holding Steady

Winnipeg.

LINSEED OIL.—Linseed oil prices record no change during the week although flax seed prices have again shown strong advances, and may have the effect of advancing prices later on. To-day's markets are confirmed as follows: raw linseed oil, $1.93 gal.; boiled linseed oil, $1.96 gal.

Turpentine Prices Likely to Advance

Winnipeg.

TURPENTINE. — Turpentine prices still hold firm on the local market, but reports indicate sharp advances in the near future, due to shortage in southern points. To-day's prices are as follows: barrel lots, $1.35 gal.; ½ barrel lots, $1.38 gal.; 5 gal. lots, $1.40 gal.; 1 gal. lots, $1.40 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., June 12.—The improvement in the steel market, which began say May 10 or May 15, has held its own in the past week, but has hardly made any further progress, as relates to actual tonnages booked. The present rate of buying is about the same as for a couple of weeks preceding. It can hardly be said that steel prices are any firmer, but they are not noticeably weaker. There have been some slight declines in pig iron. With another week of better buying, however, there is a better general tone to the market, and men are more sanguine as to the future.

The steel market is about to be subjected to a crucial test. Except under very abnormal conditions, July and August are very dull months as to steel buying. When fundamental conditions are particularly strong, the market rides right through July and August, gaining rather than losing. That is what it did in 1915, as observed in last report. If the steel market should increase in activity as the midsummer period approaches, and during the midsummer period, it would be absolute proof not only that the recent increase in activity represents the incipient stages of a great market movement but also that the movement is to be a rapid one, producing full mill activity within a few months. Observation of the past few days, however, seems to indicate that the market is not going to do this. No further increase in buying is perceptible, and in July buying may taper off somewhat, the movement to be resumed in the Fall.

Pig Iron Production

Pig iron production in May was at the rate of about 25,000,000 tons a year. From March to April there was a decrease of about 17 per cent. in the rate of production, and from April to May there was another 17 per cent. decrease. Indications now are that decreases have stopped, a low point having been reached some time in May, with production now at 25,000,000 tons a year or more. This is 56 or 58 per cent. of capacity, depending on whether one takes capacity at 45,000,000 tons a year or 43,000,000 tons. A very close estimate of existing capacity cannot be made as the furnaces have not had a good chance to show precisely what they can do. For about three years, until nearly the end of 1918, the furnaces tried their utmost to make pig iron, but from late in 1916 until the end of the war there was a practically continuous coke shortage of varying amount, and much of the coke furnished was of poor quality, that in itself operating to decrease outputs at individual furnaces. Estimates of present capacity, therefore, must be based upon

(Continued on page 68.)

TARIFF CHANGES MAY HELP BUSINESS

(Continued from page 35.)

for any material changes as far as the business situation is concerned. Business has been good and there is every prospect that it is going to continue so. Canada is not dependent upon the United States for copper supplies, so the slight change in the duty on copper will have little effect. Taking the duty off tin and changing the tax on lead. zinc and spelter will probably help business a little, but the whole question centres around the demand. If people want the goods slight changes in the price due to tariff alterations will be neither here nor there."

Back to Pre-war Days

"It simply brings cement back to a pre-war basis," said John Lavelle, secretary-treasurer of Alfred Rogers, Ltd., Toronto. "I am not looking for tariff changes to have much effect on the general situation. Business has been good. It would have been better but for unsettled labor conditions and strikes. There is not question at all regarding the amount of building to be done. There is an immense volume of business in prospect. As far as prices are concerned I am not looking for any immediate changes.

John Irwin, managing director of McArthur, Irwin, Ltd., Montreal, states that the preferential tariff will help the dry color manufacturers. Bi-chromate of soda is used extensively in making some of these lines, and various chromes can be produced for less money under the new tariff. The bi-chromate is now free, whereas it was subject to a 5 per cent. duty from England and 7½ per cent. from the States. Otherwise, in general paint lines, Mr. Irwin does not anticipate any changes in regular paint lines.

R. H. Reid, Consumers Cordage Co., Ltd., Montreal, does not look for any benefit to the cordage manufacturer. This will apply to those importing raw materials from countries other than British possessions. "Much of the material comes in by way of the United States and is therefore subject to a duty of 7½ per cent., shipments from the Philippines and Mexico coming this way."

Of course there will be an advantage in favor of any manufactured product coming from Great Britain and to the extent of the imposed duty of 7½ per cent. against imports from other than British possessions. Mr. Reid concluded.

A. H. Jenkins, of A. C. Leslie & Co., Ltd., wholesale metals, Montreal, stated that there will be an advance in copper and brass tubing. copper and brass sheets. etc. With the 7½% war tax and a specific duty of 10% there will naturally be a firming of prices on these goods, Mr. Jenkins stated.

On tinplate there will be an advantage to the British mills if they can take care of demand, there being an advantage of 5 per cent. to the British manufacturer. This, apparently, will also apply to black and galvanized sheets, but the exact meaning of the new tariff is not very clearly defined at the moment, Mr. Jenkins stated.

Edward Goodwill, manager of the Thos. Davidson Manfg. Co., Ltd., Montreal, expects an early effect upan manufacturers' costs for tinware of stamped and pieced varieties. As there is a straight advance on United States produced tinplate, someone will have to stand for the increase, and while Mr. Goodwill stated that no definite changes had been made and that none were as yet proposed, it is obvious that, with reductions recently made, prices may have to be again revised.

"It will also make a considerable difference on copper and brass goods, and on goods made partly of spelter. Galvanized ware and black sheet goods will be affected," said Mr. Goodwill.

Mr. Goodwill stated that there will be no effect upon stoves from the new tariff changes.

F. A. Scott, Montreal, manager of Carter White Lead Co. of Canada, Ltd., stated that there will be an immediate benefit to the Trail Smelters on pig lead. Mexican lead has been freely coming into Canada for many months without paying any dumping duty. Now, Mr. Scott continued, this will have to pay the one cent per pound, and it will give the Trail people a chance to cater to more Canadian demand. At the same time, Mr. Scott does not look for any decline in prices. Canadian production costs are high, and then there has just been an increase of $3 per ton in the price of pig lead in the United States. Grinders cannot sell for less money at present and may have to advance their prices on white lead in oil, Mr. Scott thinks. Then, American corroders have given notice of their intention to continue present prices and terms for some time, in fact until December 1 next. They may even advance prices, and have stated that there will be no reductions. With respect to Canadian prices on white lead, Mr. Scott does not look for any lower prices. Indications are decidedly the opposite.

John B. Paxton, Drummond, McCall & Co., Ltd., stated that the preferential tariff will undoubtedly help the British trade and stimulate greater activity as between Britain and Canada. He believes that there will be an appreciation of the greater trading that can be cultivated and accomplished. What is needed, of course, is a more normal condition of manufacturing activity in Great Britain, Mr. Paxton thinks. That is to say, a return of better price basis and labor conditions. This, it will take time to bring about, and then there ought to be a much improved trade as between the two countries.

WILL LOCATE IN TORONTO

The John Wood Mfg. Co., of Conshohocken, Pa., has purchased a site on Coxwell Ave. in Toronto, comprising 3¾ acres, and will start work shortly on a Canadian branch factory. The firm will make kitchen range boilers, sheets and plate, and various metal products.

Shingle Stains; Real Service Producers

Primarily a Preservative Medium—Creosote Oil Should Be Kept in Mind—Possibilities for Business—Sell on Dollar-in-Pocket Basis

ONE thing at least has been learned during the past four years, and learned well: That if anything is worth owning, it is worth preserving.

The H. C. of L. has doubly stamped it on our thrift-driven economic minds till we can repeat the formula backwards, frontwards and sideways.

And this goes for the roof over our heads, as well as the shoes on our feet.

Service in Shingle Stains

Which brings one to shingle stains, and their service to the property owner, as well as their possibilities for paint dealers. Shingle stains have never received the adequate attention that they should. Too frequently they are considered as a purely decorative medium. They have been sold as a specialty, where they could very well be established as a staple.

There's service in shingle stains for the property owner and profit in them for the dealer, and much greater possibilities in their sale if a "go-getter" attitude is more largely developed in pushing this line.

In fact the preservative service of shingle stains relative to their cost, greatly exceeds their decorative values and places them amongst the forefront protective lines of the trade.

Primarily Preservative Medium

Both in service and makeup, shingle stains are primarily a preservative medium. The largest single element in their makeup is creosote oil, with sufficient coloring pigment to give the shade desired. They can never replace paints, as they lack both the covering capacity and the protective body, but shingle stains possess greater penetrating power, and sink deeper into the pores of the wood, killing the destructive fungi that destroy wood cells.

Though from a decorative standpoint shingle stains can be used on shingles and half-timber construction with much better effect than paint in a large number of instances.

Creosote Oil Should Be Kept In Mind

In buying and selling shingle stains, the essential element, creosote oil, should be always kept in mind. There are many stains in which this necessary element for the purposes of preservation is sacrificed by the substitution of cheaper liquids. But the price of the best shingle stains is so low, compared with paints, that such a sacrifice is not worth while. And since the main function of a shingle stain is preservation, it should be maintained by selling the very best quality obtainable. A good shingle stain is an excellent preservative, and worth all that is being asked for it under present market conditions. Highly volatile liquids, or those that tend to mix with water, and are substituted for creosote in shingle stains, have nowhere near the relative value to the price asked for them that a pure creosote shingle stain has.

So much for obtaining the value in the stain in order to get the service that is expected of it, and that it should render.

Possibilities For Business

Now for possibilities in developing this business.

Shingles, like every other class of lumber, have gone up in price and they are likely to stay up. And shingled roofs are quite likely to remain a favorite with a majority of people for many years to come. Replacement of shingles will be just as costly as replacement in any other class of construction. A few gallons of shingle stain will obviate much of this at comparatively little cost to the owner. In fact, if shingles are dipped in shingle stain before laying, the cost of the stain and labor is more than offset by the prolonged service of the roof.

Railroads Large Users

The best evidence of the preservative value of creosote oil is found in the growing practice of railroads, who are now having railroad ties, posts and piling preserved with creosote in the various creosoting plants throughout the country. This impregnating is done under pressure, and more than doubles the life of such material. Doubling the life of this timber means economy in many ways and money in the pockets of the railroad.

While under ordinary conditions of construction, shingles cannot be impregnated under pressure, still that forms no reason why they cannot be treated either by dipping or brushing. If it pays the railroads to erect expensive plants and undergo the cost of preserving their timber resources, it will most certainly pay the average householder to take advantage of such materials and means as he can to prolong the life of his roof.

Sell on Dollar-in-Pocket Basis

Shingle stains can be sold on the same dollar-in-pocket basis to the property owner, as paints or varnishes.

Future Prices of Brushes Are Uncertain

Price of Silver Will be a Factor in Determining the Prices in China—Advance is Expected When European Buyers Come Into the Market

Based on an interview with W. G. Meakins, of Meakins & Sons, Limited, Hamilton, Ont.

PRICES of brushes for some time past have been governed largely by the prices which the brush makers paid for their supplies of bristles in April, May and June of 1918. Between the time a contract is made for bristles and they are received from China, generally from four to six months elapse. By the time the bristles are boiled, straightened and dressed and are ready for manufacturing into brushes eight or nine months has usually passed from the date of the purchase. Every large brush maker, therefore is practically using up bristles for which he contracted a year previously.

Prices Were Easier

In March the price declined for 66 case assortments to $1.45, while 55 case assortments declined to $2.60. Prices during the Fall will probably rule around these figures. Prices of brushes are likely to remain about the same unless the price of silver advances in which case they will probably go higher.

Up to the present time there has been little demand for bristles from Europe. When the European buyers come into the market it is likely that prices will advance. Just when this European demand is likely to commence it is impossible at the present time to state.

Average Prices

The average prices of the Chinese bristles used in paint brushes from 1911 to 1917 are shown in the table given below:

This is the average for the full year, the prices covering the average lengths running from 2½ in. in length to 6 in. in length.

Bristles are shipped from China in assortments. These assortments are standard and the same number of pounds of each length of bristle are in each assortment. The assortments are made up of 66 cases of 110 lbs. each. This is what is called a 66 or short length assortment and it runs as follows:

2¼ in., 23 cases; 2¾ in., 7; 3 in., 8; 3¼ in., 7; 3½ in., 5; 3¾ in., 4; 4 in., 3; 4¼ in., 2; 4½ in., 2; 4¾ in., 1; 5 in., 1; 5¼ in., 1; 5½ in., 1; 5¾ in., 0; 6 in., 1.

The other standard assortment is what is called the long assortment, comprising 55 cases, each case weighing 110 lbs. The 55 case assortment runs as follows:

2½ in., 2; 2¾ in., 3; 3 in., 5; 3¼ in,, 5; 3½ in., 5; 3¾ in.. 5; 4 in., 5; 4¼ in., 5; 4½ in., 5; 4¾ in., 5; 5 in., 4; 5¼ in., 3.

5½ in., 3; 5¾ in., 0; 6 in., 0.

Below are given the average prices of 66 case assortments, 55 case assortments and the general average:

Year	66 Case	55 case	General Average
1911	.55	.95	.74
1912	.54	.93	.72
1913	.65	1.05	.83
1914	.88	1.55	1.11
1915	.80	1.25	1.00
1916	.90	1.40	1.13
1917	.95	1.60	1.25
1918			
Jan. to June	1.20	2.10	1.61
June to Dec.	1.50	2.70	2.05
Mar. 1919	1.45	2.60	2.00

Lining Up For N.P.O. & V.A. Convention

A meeting of the sub-committee in charge of entertainment for the thirty-second annual convention of the National Paint, Oil & Varnish Association was held last week at the executive offices of the association, 100 William Street, New York. The time and place for holding the convention are Sept. 22 to 25, inclusive, Hotel Greenbrier, White Sulphur Springs, W. Va. Those present at the committee meeting were Chairman Dudley W. Figgis, F. P. Cheeseman, H. S. Hatfield and Secretary Horgan.

Mr. Figgis outlined to his associates the tentative program of entertainment planned, and announced that great enthusiasm exists among the members of local paint clubs throughout the country over the minstrel show to be staged on the second night of the convention. Some of the best talent in the trade is being enlisted and rehearsals of the several "units" have already been started.

The Bal Masque, scheduled for the third evening of the convention, also promises to be a novel and attractive feature. The committee urges everybody contemplating being present to give some thought to the preparation of a costume, as prizes will be given for the most unique.

J. H. McNulty, of Buffalo, is chairman of the golf committee; Emery Rockwell, of Chicago, chairman tennis committee, and a special program of water sports is also being arranged for by the general entertainment committee.

President Cornish and Secretary Horgan have already started work on the details of the business sessions, and indications point to one of the most highly successful meetings in the history of the association.

New Officers Elected to Flint Co.

New officers have been elected for the Flint Varnish and Color Works, Flint, Mich., one of the businesses taken over by the Du Pont Co., to round out the plant industry, which it established when it purchased the Harrison Co., of Philadelphia, two years ago.

At a meeting of the directors of the company, held in Flint, Mich., Lammot Du Pont resigned as director and as president of the corporation. The resigations of Mr. Sarvis and Mr. Nash were also accepted. These vacancies were filled by the election of Charles A. Meade, recently appointed vice-president in charge of the Du Pont Company's paint interest; C. W. Phellis, the general director of the Du Pont sales department, and W. F. Tiernan.

The new board organized as follows: President, F. W. Pickard, vice-president in charge of the Du Pont sales divisions; vice-president, W. J. Schlinger; treasurer, F. M. Howard; secretary, R. S. Nichols.

HEAVY INSECTICIDE SALES

John Irwin, managing director McArthur, Irwin, Ltd., Montreal, states that there is a tremendously heavy demand at this time for insecticides. It is a matter of endeavoring to cope with the orders these days, Mr. Irwin stated to HARDWARE AND METAL, and he believes that the potato bugs will be a particular pest this year, and that there will be a great deal of need to spray vines, bushes and fruit trees.

It should be a season, therefore, in which the hardware man will see that he secures a big share of the business that is offering, and which may be secured if closely followed.

THE ILLINOIS PURE SPONGE BILL

The "Pure Sponge Bill," which has received the support of the Chicago Paint Club, and is in the interest of honest business in this branch of the industry., has passed the Lower House of the Illinois Legislature by a small majority. This Bill is House Bill No. 152, and would prohibit the selling or possession with intent to sell of sponges artificially loaded with salt, sand, glucose, or any other substance. The penalty for violation of the proposed Act is to be not less than $50, nor more than $500 for the first offense, and not less than $500 or more than $1,000 for the second or other offenses.

Among the Chicago jobbing houses active in advocating its passage are: Peter Van Schaak, George E. Watson, Devoe & Raynolds, John E. Rockefellow, Remien & Kuhnert, Joseph Guggenheim, James H. Rhodes & Company, Fuller-Morrison Company.

The only known opposition comes from sponge importers, who apparently desire to continue old-fashioned methods of "loading" sponges.

SHINGLE STAINS; REAL SERVICE PRODUCERS

Continued from page 60

Looking farther into the possibilities for sales. There are something like 1,600,000 homes in Canada, every one of them with a roof, and the vast majority of these roofs are shingled. Taking a rough guess that each roof would average upwards of 1,200 square feet, and that the covering capacity of the average shingle stain brushed in, would be one gallon to every 300 square feet, one coat, for new shingles, there is at least an opportunity for 6,400,000 gallons. Also taking into consideration barns, churches, schools and other buildings, we could easily double this figure (12,800,000 gallons), and then be conservative. But making allowance for metal roofs, ready roofing, and other roofing materials, we will made a deduction of 40 per cent., which gives us a net total of approximately 7,680,000 gallons.

This quantity, at a wholesale price of, say $1.30 per gal., in five gallon cans, would mean $9,984,000.00, in shingle stain alone, or approximately equal to the total production and importation of paints, varnishes and similar products in Canada during the years 1911 or 1915.

Look Over The Field

This is only a rough and hurried estimate, and very approximate at the best, but it serves the purpose of giving some idea of what the roofs of Canada might produce in business for the paint trade of Canada with shingle stains. Nor is it even necessary to resort to figures to obtain some idea of what might be done in this direction. Just walk up one side of any street in any town, and observation will show to what extent we, as a nation, have neglected protecting our roofs, and saving money by prolonging their service.

Nor do roofs by any means represent all the possible opportunities for the sale of shingle stains. Shingle sidings, fences, many outbuildings, both in the city and country, might better be treated with shingle stain than to have received the neglect accorded them either through lack of paint or stain.

If all resources at your command have been exhausted in an effort to sell a farmer barn paint for his barn, sell him shingle stain, and sell him on the basis of found money, from the protective and preservative standpoint.

Summer Resort Business

Paint dealers at or near Summer resorts are in a fortunate position for advancing the sale of shingle stains. The writer recalls a sale some years back of eighty gallons of green shingle stain to one individual then building a cottage in Muskoka. Enquiry elicited the fact that the whole cottage was to be sided with shingles, and that the shingles were to be dipped full length. This sale, of course, was much above the average, but it reveals the fact that the business is there and there aplenty for those dealers who are willing to go after it.

"But," remarked a city dealer, totally dependent on city trade, "Summer cottage business doesn't interest me. It wouldn't pay me to bother with the stuff."

"Let's see," said the wide-awake salesman. "A good bulk of your trade goes away for the Summer holidays, doesn't it? And a good many of them own or can own a Summer cottage."

"Yes," repeated the dealer.

"And when they're building you send them up hardware and other stuff," persisted the salesman.

"Yes," repeated the dealer.

"Well, you go after them for shingle stains; turn the orders in to us, and we'll ship it direct, because our factory happens to be right where we can do this for you handily," suggested the salesman.

And the city dealer forthwith found that he could sell shingle stains to his trade for their Summer cottages, as well as paint for their city homes.

Business is There

Just at this time of the year the city folk are beginning to flock to their Summer cottages. Examine the freight baggage and express dumped off at any Summer resort station or dock. Amongst it will be found paint, hardware, boat varnishes and some shingle stain. Like all other property throughout the country, Summer cottages can stand more "save the surface" goods than they have been receiving. Shingle stains can be made of protective service to the owners here as elsewhere. It is up to the paint dealers to get after this business whether they are near the Summer resorts or not.

Shingle stains can be made of value in the efforts of the trade to save the surface, whether the surfaces be in the city or the country; on the roof or on the siding, in the woods or out of them. It is one of the phases of your paint department that can be developed with a profit. And there is plenty of room for development.

A NEW SOURCE OF TURPENTINE OIL AN ROSIN

A new source of turpentine oil and rosin has been found in an Indian frankincense, or olibanum, which is obtained from the bowellia serrata, a tree widely distributed through the forests of Central India, says the "Swedish Chamber of Commerce Journal." The rosinous substance which exudes from this tree contains a kind of turpentine, a rosin and a gum. Investigations as to methods of separation of these constituents and as to their marketable use have been made by the forest authorities in India.

The result of these investigations, which have been continued at the Imperial Institute, is that the turpentine oil is equal to good quality American oil, and could replace the latter in the preparation of paints and varnishes. The rosin would also be quite suitable for the same purpose.

TRADE AND BARTER FOR CANADIAN PRODUCTS IN EUROPE

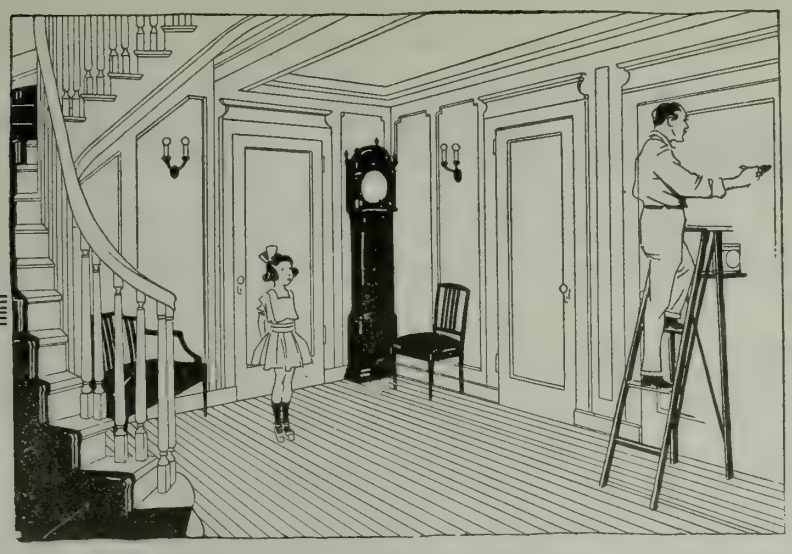
(Continued from page 46)

for their demobilized armies. He spoke well of the Roumanian market. The people there had to buy practically all their manufactured goods. Speaking of the line of credit given to Roumania he said that what the Government had done was only a drop in the bucket to what the Roumanians will really require. They needed railroad equipment, clothing, household utensils, agricultural implements and practically everything made in Canada. Next year, he thought, would see Roumania on an exporting basis.

A great opportunity was offered for Canadian goods in Greece, said Mr. Harris. Greece was in an exceptionally sound condition compared with other European countries. Canada would get every preference possible to be granted by Greece.

"We in Canada are unprepared, unfamiliar, and uneducated in questions of foreign trade," said Mr. Harris. European countries were willing and anxious to meet Canada more than half way. "It is up to the financial and commercial interests to maintain the reputation built up by our soldiers," said Mr. Harris.

SEES GREAT PROSPERITY NOW IN PROSPECT



"Once peace is signed I do not think we need to worry about business. It is just waiting, and there will be plenty of it once the peace treaty is completed."

This is the feeling of H. M. Bolger, sales manager of the McClary Mfg. Co., Montreal. Mr. Bolger is confident that business is "just around the corner" in a big way. That it will manifest itself in a marked way is his opinion, but there is some hesitancy just at the moment regarding a number of lines.

"The gas stove business has been very flourishing in Montreal," continued Mr. Bolger. "It is heavier than ever before, as a matter of fact, and if warm weather conditions continue to prevail it will be excellent for some time."

Mr. Bolger is optimistic regarding the future attitude of labor in the matter of strikes. "I do not look for any trouble of consequence in this respect," stated Mr. Bolger. "There may be a little uneasiness here and there, but the French-Canadian can be depended upon in a matter of this kind, and I do not think he will give any support to sympathetic strikes."

The general outlook for better business all around, and in some other countries besides Canada depended, Mr. Bolger stated upon an early settlement of difficulties in Europe. Greater strides were due in England particularly, he learned, in speaking with a recent business visitor from there, just as soon as peace was signed.

When Father Varnishes

Unskilled varnishers want Finishes that brush on easily and cover well. Berry Brothers' Varnishes, Enamels and Stains not only work smoothly, but produce a finish that satisfies completely both in appearance and wear. These features appeal to the amateur and professional painter alike. This is what makes the sales value of Berry Brothers' label such a good varnish selling asset. It is recognized by all classes of buyers as a guarantee of quality and dependability.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 12.—Decided firmness obtains in all paint commodities this week. Linseed oil is very scarce and the prices have been marked up. It may be that $2.50 per gallon will be reached in this market very soon. Turpentine has reached the high price of $1.55 per gallon, and is merrily speeding skyward, with small supplies in sight. Putty and white lead are both ruling firm with a strong tendency to revision upward evident in trade circles. Mixed paint, too, in view of the increased cost of oil and turpentine, and the somewhat firmer tone of pig lead, may have to be advanced, some of the trade think. The market is firmer, generally speaking, than it has been for some months.

Higher Oil Prices; May Go To $2.50

Montreal.

LINSEED OIL.—Another advanced market is obtaining here now on oil, and there is really no telling when the price will rest. It begins to look as though $2.50 oil will be a strong probability ere long. As a matter of plain fact, crushers and jobbers are decidedly averse to entertaining orders. Single barrel lots are going out steadily, for there is a big demand and a mighty curtailed supply. from $2.18 to $2.30 per gallon is being quoted, but no jobber or crusher will quote for future shipment. Some are even stipulating that oil will be invoiced at price ruling on date of shipment only.

Raw—	Imp. Gal.
1 to 4 barrels	$2 18 $2 30
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$2 20½ $2 32½
5 to 9 barrels	....
10 to 25 barrels	....

Turpentine Passed One-Fifty Mark

Montreal

TURPENTINE.—Advances were made during the week on turpentine, and the present range is $1.45 to $1.55 per gallon. This is in very definite line with the advices given in HARDWARE AND METAL last week, and when it was stated that, "it is quite probable that $1.50 may yet be reached." The commodity is decidedly scarce and the tendencies point to higher rates yet.

Turpentine—	Imp. Gal.
1 to 4 barrels	$1 45 $1 55
Small lots	....

(Packages extra.)

If Oil Keeps Up Watch Putty Price

Montreal

PUTTY.—There is no question of the fact that the putty market is a decidedly firm and stiffening one. Indeed, if there be any further advance for oil, which seems very probable, prices may be revised upward in the near future. The jobbers are not indicating that advances will be made at once, but they do say that such high oil prices are bound to affect, materially, the commodities in which oil is used. Quotations continue for the week as under:

Bulk, in barrels	**$5 00**	**$5 25**	**$5 60**
Do., ½ barrels	**5 15**	**5 40**	**5 75**
Do., 100 lbs.	**5 85**	**6 10**	**6 45**
Do., 25 lbs.	**6 10**	**6 35**	**6 70**
Do., 12½ lbs.	**6 35**	**6 60**	**6 95**
3 and 5 lb. tins	**8 10**	**8 35**	**8 70**
1 and 3 lb. tins	**8 60**	**8 85**	**9 20**
Do., in 100 lb. cases.	**7 15**	**7 40**	**7 75**

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Do Not Look For Low White Lead

Montreal.

WHITE LEAD IN OIL.—Prices for white lead in oil are not going to be less. Not if the opinion of one of the largest Canadian corroders is correct, and in view of the recent imposition of one cent per lb. on pig lead it is obvious that there will not be a reduction, as was somewhat anticipated a few weeks ago. The question now is whether advances can be avoided. There will, it is expected, be a larger outturn of Trail lead under the new protective tariff. Prices are ruling as follows: Five ton lots, per 100 lbs., $15.50; ton lots, $16; and small quantities, $16.35.

Higher Oil and Cans May Force Paint Up

Montreal

MIXED PAINT, SPECIALTIES. — With the higher tariff on tinplate it is expected that there may be a revision to higher levels for containers, and in fact that is almost a foregone conclusion. In addition to this, oil and turpentine prices will serve to stiffen the manufacturers' costs on mixed paint and some specialties, and one large manufacturer stated this week to HARDWARE AND METAL that he would not be at all surprised if advances are absolutely necessary soon. In the meantime there is a decidedly active market, and prices are very firm.

TORONTO

TORONTO, June 12.—Flax seed prices have shown an advance every day this week so far, and this is reflected in higher prices for linseed oil. The market is very strong and firm, with prospects that prices will go to higher levels. Following a steadily advancing market for some days there has been a slight reaction at primary points in the price of turpentine. This was not unexpected, but is regarded as only temporary. Stocks in the Southern port are increasing as the new crop is now coming in. Reports indicate, however, that there is not going to be anything like the production of last season and that it is likely there will not be more than enough to take care of ordinary requirements. With the demands from overseas increasing steadily, importers declare that there is not going to be any cheap turpentine for some time. Substantial increases have been made in plate glass prices, and one of the largest firms in the United States has withdrawn all quotations and notified its customers that it will figure only on specification.

Linseed Oil Prices Advancing Steadily

Toronto.

LINSEED OIL.—"There is nothing to bring down prices until the new crop comes in," is the way one crusher summarized the linseed oil situation. Prices of flax seed have been advancing every day, and at the present time linseed oil quotations range from $2.35 to $2.45, an advance of from 14 to 15 cents over last week's figures. Crushers state that it is impossible to buy the seed they want. If they place orders they are lucky if they get half of what they asked for. Little seed is being offered at Winnipeg, and the opinion is that most of the stock has been brought in. England is a very firm bidder on all supplies of seed from the Argentine. The Americans are dependent on this market also for supplies. "Buyers will not save anything by holding off buying now," said one crusher. "There will be no

Every Simms' Brush Sold Sells ANOTHER

The selling of Simms' Set-in-Rubber Paint and Varnish Brushes is like an endless chain. Each one used means another sold soon. They advertise themselves by solid merit. And there is a good profit on every brush you sell.

Turpentine Up Here; Primary Advance Halt

Toronto.

TURPENTINE. — Turpentine prices have halted to-day in their almost daily advance, following a reaction in the Southern markets. Whether this is temporary or not remains to be seen, but the reaction came after prices had advanced steadily for some days. This is the season when the new supplies are coming in in the South, and stocks jumped from 2,000 barrels in port at Savannah last week to from 7,000 to 8,000 this week. There has, however, been a brisk demand, in which overseas requirements play a prominent part. Many importers have only small supplies. Few believe that there will be any material reduction in turpentine prices again this season, while in many quarters the opinion is held that to-day's reaction is merely temporary, and that the market will not only quickly recover, but make further advances. In the meantime a good volume of business is being handled, although the effects of the strike in Winnipeg is being felt, and unsettled conditions in other places are lessening demands. Quotations range around $1.55 per gallon, an advance for the week.

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1 55
2 to 5 barrels (barrel included)	1 54
5 gallon lots	1 65

Paint Prices May Be Revised Upward

Toronto.

MIXED PAINTS.—The paint selling season usually takes on a new trend about July 1, and, taking into consideration the great advances that have taken place in the prices of linseed oil and turpentine, and higher costs of production generally, many manufacturers would not be surprised if an advance is made before long in paint prices. In the meantime they are still working overtime to take care of the rush of orders. "It has been a wonderful season," is the general verdict of the manufacturers, who express themselves as very, very well satisfied with the orders that have been pouring in ever since the middle of April.

White Lead in Oil May Go Higher Soon

Toronto.

WHITE LEAD IN OIL.—While no changes have occurred yet in white lead in oil, there are factors developing that are causing manufacturers to wonder how costs can be maintained at present levels. With the big advances that are being made in linseed oil, and changes that may follow with the new tariff on pig lead, those in the trade state that higher quotations for white lead in oil would occasion no surprise. In the meantime quotations are 5-ton lots, $15.80 per hundred pounds; 1-ton lots, $16.30, and in smaller quantities, $16.65.

Plate Glass Higher; Putty To Advance?

Toronto.

PLATE GLASS, PUTTY.—One of the largest plate-glass interests in Pittsburgh has withdrawn all its prices on glass and has notified customers that quotations will be made only on specifications. This firm manufactures about one-half of the plate glass made in the United States. Other manufacturers have sent out quotations, which show an average advance of twenty per cent. over former prices. As far as the Canadian trade is concerned, a fair volume of business is being handled, with some improvement noted in the outlook for prospective business. While no changes have as yet been made in prices of putty, the large increases in linseed oil are expected to affect putty. Quotations at the present time are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. iron	6 15	6 40	6 55
Do., 25 lb. irons	6 40	6 65	6 80
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 45

Pure putty advance $2 per 100 lbs. over above.

PITTSBURGH MARKETS

(Continued from page 59)

what the furnaces did in the fore part of 1916, plus allowance for the new furnaces since completed.

New Construction Appearing

The judgment of some iron and steel producers as to the future is seen by there being a number of new construction jobs just undertaken. For two or three months after the armistice was signed the iron and steel producers showed an indisposition even to make extensive repairs. They held that costs were too high and they were waiting for them to come down. Recently, however, there has been much repair work done, the producers concluding that there is not to be much decline in costs for quite a while. They have adopted the policy they were arguing their customers should adopt, that of not looking for any general deflation in prices. Now, in addition to much repair work, there is some new construction. There is the Weirton Steel Co., Weirton, W. Va., which has about 48 tin plate mills, distributed in three plants, also large mills producing hot and cold rolled strips, which has just undertaken the erection of a steel making plant of seven 100-ton basic open hearth furnaces, to supply the finishing mills. The company had just about completed a blast furnace, which may be blown in shortly. Then there are three new cases of new construction of sheet mills. The Mansfield, Ohio, Sheet & Tin Plate Co. is adding four sheet mills to its plant. The recently incorporated Falcon Steel Co. will erect a six or eight mill sheet plant at Niles, Ohio, while another company is being formed to build a mill of about that size, and has already secured its site at Newton Falls, Ohio.

New construction like that just mentioned does not indicate that there is a belief that the country as a whole needs a larger steel industry. As to the Weirton steel plant, that means that the company desires to make its steel instead of buying steel for its finishing mills. As to the sheet mills, the steel industry needs some rounding out. No doubt there is too much plate rolling capacity, so many plate mills having been built during the war, while, on the other hand, there has been practically no new construction of sheet mills during the war, and when steel making capacity has increased 40 per cent. since 1914 one would naturally assume that there ought to be an increased demand for sheets.

Pig Iron Declines

There is a confused situation in pig iron as to prices, there being competition between districts that do not usually compete. Thus the Pittsburgh market is normally supplied by the valley and scattered Western Pennsylvania furnaces, as they have the lowest freights to Pittsburgh. Of late, however, Southern Ohio furnaces have been quoting for deliveries in the Pittsburgh district, as have furnaces on the Lake Erie front. Even Buffalo, it is stated, has made some efforts to get into the Pittsburgh market. To penetrate this market the remote furnaces must absorb large freights, and thus cut the prices that became effective March 21, even should the valley furnaces adhere to those prices, for the March 21 prices simply represent a reduction of so much per ton all around from the war control prices, and under the war control Ironton, valley, Buffalo, etc., furnaces all got the same price f.o.b. furnace. These furnaces that have been going far afield to get orders, and absorbing freights, have been making more or less effort to maintain the old prices as to their own local trade. Thus a furnace might insist upon a certain price at furnace, for a regular and nearby customer, and at the same time quote a price to a consumer far off that would mean a much lower realized price f.o.b. furnace. It is what in international trade is called "dumping." The valley market is moderately well maintained, but it is understood that while the regular price on basic iron is $25.75, valley, a price of $25 could be done. Foundry iron is holding up somewhat better than basic, but the regular price of $26.75 at furnace can be shaded in a number of districts. The Birmingham market has dropped to about $23.75, Birmingham, for silicon 1.75 to 2.25 per cent., with $1 advance for the higher silicon. The Standard Sanitary Manufacturing Co. has just bought 3,500 tons of Birmingham iron, for June and July delivery to its Louisville plant, at five cents under these figures.

The Babbitt Metal that's at the Front in Efficiency and Economy

HARRIS HEAVY PRESSURE

The Aristocrat of Babbitts

St. Lawrence Paper Mills Co., Limited
Mille Roches, Ont.

The Canada Metal Co., Ltd., Fraser Ave., Toronto Ont.

Dear Sirs:

We feel like putting in a good word for your Heavy Pressure Babbitt. We installed a very heavy machine some time ago, which had all brass boxes. The shafts weigh six tons each with a top roll weighing four tons, also a lever pressure making a total pressure of about fourteen tons. The brass boxes wore out in four weeks. We then put in Heavy Pressure Babbitt and am pleased to say that we have no more trouble. We put in Heavy Pressure in a very heavy machine eighteeen months ago and there seems to be no perceptible wear.

We thank you for supplying us with a babbitt that gives such good results. Yours truly,

Per C. F. BUSS, Superintendent.

A SLOGAN AND A FACT

A Car Like New For A Dollar Or Two

A slogan, not for effect alone, but one founded on solid FACT.

You or your customers CAN have a "Car like new for a Dollar or Two."

Paint it with DOUGALL DA-COTE.

You don't have to push Da-Cote. It SELLS itself. Give it a fair display in your windows. Spread your Trade helps (free for the asking) around and—watch the result.

The usefulness of Da-Cote is not confined to Automobiles either. It gives good results on Buggies, Baby Carriages, Bicycles, Delivery Waggons, Velocipedes, etc.

Write to-day regarding Dealer Proposition in your town. Window display and display cards free on request.

Note the color range:

RED	**GREEN**	**CREAM**	**YELLOW**
	BROWN	**BLUE**	
GREY	**BLACK**	**WHITE**	**KHAKI**

"Save the surface and you save all" *Paint & Varnish*

Letting You Into A Secret

THEY were talking about things in general — Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakening up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly ready by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap-book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

The New Metal Worker Pattern Book

This is the most elaborate and complete work that has ever been brought out for the use of sheet metal pattern cutters. It is printed from new type with a new and improved arrangement, especially convenient for reference and study. Parts of a former edition, entitled The Metal Worker Pattern Book, which have been utilized in its preparation, have been re-written and simplified and later methods embodied, 218 problems are now given, 75 of which are entirely new. A Treatise on Pattern Cutting as applied to all Branches of Sheet Metal Work. By George W. Kittredge. 430 Pages; 744 illustrations; Size, 10 x 13 inches. Cloth bound, Price now $6.00. Sent postpaid only on receipt of price.

143-153 University Ave., Toronto

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

Paints, Oils, Varnishes, Glass, Etc.

Stephen House Paint Especially Adapted for Service In Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality, wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

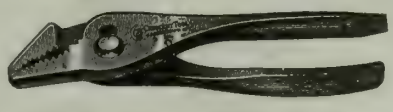
WHEN WRITING ADVERTISERS PLEASE MENTION THIS PAPER



Wrenches, Pliers, Screw Drivers

MEHASCO

On this line of goods we have built a reputation. We have taken care of the trade on Crescent Pliers and Wrenches particularly well, and at the present time are guaranteed deliveries by the manufacturers to the end of 1919. In addition to the well-known Crescent lines we handle the Bemis & Call Adjustable, the No. 80 Motor Wrench, the Carll Wrench, which is interchangeable, can be used as a nut or pipe wrench. The Bonney Stillson, the Special Auto Stillson, the Como Pipe, and Eagle Claw, the Imperial Angle, the Lane Set of Ratchet Wrenches and the Allen-Eureka Ford Ratchet Sets. In Screw Drivers we have the Crescent Hammer Handle, the No. 35 assortment with Oak Display Stand, and the small Screw Driver for hard-to-get-at-places. If your stock runs low on Pliers, Wrenches or Screw Drivers at any time we are the people to write.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND
A
ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Dealers!—If you are not already handling mower and binder cutting extras and repairs, you are passing up a big volume of profitable business

Contrary to the usual supposition, such repairs are not generally sold by distributors of agricultural implements but are usually marketed through hardware dealers.

The very high price of complete implements necessitates the repair of old machines, which ordinarily would be junked.

The principal parts classed as "Cutting Extras," are Sections, Rivets, Complete Knives, Knife Heads, Knife Backs, Guards, Guard Bolts, Leger or Guard Plates.

A dealer would not find it necessary to handle the complete line of "Cutting Extras" when first taking on the line, but only such items as apply to harvest machines alone, taking up the other items from year to year.

Give this line anything like the same attention as you do auto accessories and you will be surprised at the volume you can obtain.

1000 Washers A Week!

The lid is easy to lift because the Dolly can be lifted first to free it from the clothes.

There is no heavy work with the Red Star. The lightest push will start it.

The Red Star is certainly a mighty popular machine. During the first week of May we sold nearly a thousand of them.

Probably you are already handling them. If so, may we suggest giving them extra time and attention just now and a prominent place in your store.

If you have not yet sold the Red Star, do not delay ordering. Just now the demand is particularly brisk.

HELP IS SCARCE

As you know the end of the war has brought no relief to the housewife. Domestic help is extremely hard to get and for the most part unsatisfactory when it is obtained.

This alone creates a great demand for a good hand washer and dealers all over the country are doing profitable business in the Red Star.

The Red Star fills the bill. It does the work thoroughly and easily. The **machine cut gears** which cut out noise and rattle; **the two sets of ball bearings** and the **large flywheel** which make the machine easier than any other to start and operate; the **solid one-piece bed plate** on which all working parts depend, which keeps the washer always in perfect adjustment; and the valuable feature of being able to raise the dolly before raising or lowering the lid all make the Red Star an easy seller!

The Red Star is easy to sell. It makes pleased customers. It gives you high grade, profitable business and there is an extra big demand right now.

Are you getting your share of this business? Write us for circular in six colours illustrating the Red Star.

Canada's Bright Business Outlook

CANADA is on the eve of immense business development. In spite of the difficulties of the readjustment period involving labor's demands, high cost of production and of construction, tariff questions and their effects, and even the taint of Bolshevism in some directions, Canada is on the way towards unexampled activity, and prosperity which should go far towards squaring war debts. The war brought great chances to Canada. Peace is bringing still greater opportunities. But to take advantage of them Canadian business men must be ever on the alert. They must be informed.

THE FINANCIAL POST

is keeping many keen business men fully informed on every development affecting the Dominion

CONTENTS OF THE CURRENT ISSUE

No Indications of Any Sag in the Steel Market.
A Big Field for Canada's Products in Europe.
Steel Stocks Have Been in the Limelight.
Bigger Profits for Canada Chemical Company.
Dominion Steel Earns 17 Per Cent. on Common.
Outlook Now is Becoming More Settled.
No Enthusiasm Over the Budget Shown at Ottawa.
Tariff Views of Business and Financial Men.
Farmers' Advances Ignored by the C.M.A.
New Skyscraper for corner of King and Yonge, Toronto.
Bank Clearings are 18.4% Ahead of last year.
The St. Lawrence Power Problem a Difficult One.
Steel as a Factor in the War Campaign.
How Banks Are Co-operating in Foreign Trade.
Last Vestige of United States Faith in State Roads
Residence Space in Big Request in Saskatoon.
Production of Ontario's Mines Was Reduced.
High Prices for Municipals Having Effect.
Views Expressed on the Next Dominion Loan.
Western Wheat Crop Estimate 300,000,000 Bushels.

These are only a few of the contents of THE POST for June 7th, but they indicate to you clearly the value of POST business-building news service. There never was a time when POST service could do more for Canadian business men, more for **you.** POST information is PROFITABLE. Send this coupon to-day ordering your subscription to THE FINANCIAL POST. The cost is just $3.00 per year.

S-W Insecticides

As Dependable as S-W Paints and Varnishes

The Supply May Not Equal the Demand

Are you SURE you have a large enough stock of S-W Insecticides? We are anxious that every S-W agent should receive a timely warning of the possible shortage of materials. Prospects are that demand will be exceedingly heavy this season. Get stock while you are sure of deliveries.

S-W Dry Powdered Arsenate of Lead

Goes twice as far as the paste form. Your customers can keep it over from year to year—it does not freeze or become lumpy.

S-W New Process Arsenate of Lead (in paste)

Neutral—Will not burn the tenderst foliage.

S-W Dry Lime Sulphur

A powder to mix with water. Lasts for years. No freight to pay on water.

S-W Tuber Tonic

Kills bugs and fungus on potatoes. A Dry Insecticide.

S-W Calpoiso—Arsenate of Lime

Dry powder. Best to mix with Lime Sulphur or Bordeaux Mixture.

S-W Insecto

Arsenate of Lead combined with Bordeaux Mixture—to spray garden or orchard.

S-W Pure Paris Green

Sure death to potato bugs. Up to the Government standard in every way.

Send for spraying calendar and full information.

A Reminder on Boiled Linseed Oils

YOU CAN DISTINGUISH

Livingston Brand

"FIRE BOILED" AND "STEAM BOILED"

IN TWO WAYS

The STENCIL and the PREMIUM

Our "FIRE BOILED" Oil is known from Coast to Coast as "BADEN OIL" and for over fifty years has been the standard by test.

THE OUTWARD MARK OR STENCIL OF STEAM BOILED

THE OUTWARD MARK OR STENCIL OF FIRE BOILED

"STEAM BOILED" is the modern method designed to effect speed in manufacture.

The premium on Baden Boiled Oil over Raw is three cents.
The premium on Steam Boiled Oil over Raw is one cent.

REMEMBER THE DIFFERENCE.

The Dominion Linseed Oil Company
Limited

BADEN MONTREAL TORONTO WINNIPEG

"At All Dealers"

¶ Ask any dealer and he will supply you with a Dunlop Tire, or get one with the minimum of delay. Practically every dealer is a Dunlop man. He will take your order because we play no favorites—sell the big and small store or garage.

* * *

¶ The tires with the good reputation that lasts, the service that satisfies, and the dealer representation that settles the issue of emergency, as well as repair calls, are branded: Dunlop Cord—"Traction" and "Ribbed"; Dunlop Regular—"Traction," "Special," "Ribbed," "Clipper," "Plain."

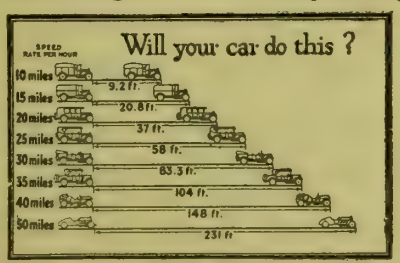
This difference means the safety of a car

Important facts that motorists should know about brake lining.

THE security that a brake lining gives depends on its gripping power. The gripping power depends on the texture. The closer, more compact the texture, the more uniform the gripping power. The looser the texture the more uneven and uncertain its gripping power. The photograph above shows the difference between the texture of Thermoid and ordinary woven lining.



Thermoid has a close, compact texture. This gives Thermoid the ideal gripping power. Because of this close texture it wears down slowly and ***evenly,*** and retains the same uniform gripping power until worn to wafer thinness.

Ordinary woven brake lining is loosely woven. It has gripping power when new but wears down quickly and ***unevenly.*** This uneven surface causes ordinary lining to slip, very often just when it is most needed.

There is much the same difference between the wearing qualities of Thermoid and ordinary woven lining as there is between oak and pine, fine steel and coarse pig iron. In all of these cases the wear depends on the texture, the closer the texture the longer the wear.

Why Thermoid has such a close compact texture

In each square inch of Thermoid Brake Lining there is ***40% more material*** than in ordinary brake lining. This additional body gives a closer texture which is made tight and compact by ***hydraulic compression*** under 2000 lbs pressure. In addition to this, Thermoid is ***Grapnalized,*** an exclusive process in manufacture which enables it to resist moisture, oil and gasoline.

This chart shows the distances in which a car should stop, at any given speed, if the brakes are efficient.

National advertising

Our big advertising campaign is educating motorists to the difference between the compact texture of Thermoid and the loosely woven texture of ordinary brake lining. Take advantage of this campaign by stocking Thermoid, the brake lining that motorists want.

Every foot of Thermoid is backed by ***Our Guarantee: Thermoid will make good—or WE WILL.***

Every Sale Brings—Repeat Sale—Profits

Show any customer how it works—right in your store—and the sale is made.

Then he becomes a steady customer of yours—for Patch-&-Heat units to use with this vulcanizer.

Dealers sold more than a million Shaler 5-Minute Vulcanizers last year—and over 11,557,000 Patch-&-Heat Units. This is repeat business—repeat profits—that comes to you without effort.

Every motorist should carry a Shaler 5-Minute Vulcanizer in his car for emergency use.

On the road—in the garage—or anywhere, it repairs tube punctures, cuts, etc., in 5 minutes—makes the tube as good as new, without delay—without trouble or annoyance.

Uses the combination Patch-&-Heat Units which include—the rubber patch—and the solid chemical fuel that burns without flame or blaze.

Our Big Advertising Campaign Makes It Easy to Sell

Just as you are now reading this ad, so Motorists will read the dominant, attention-compelling Full Page Advertisements that will run throughout the entire spring and summer in Saturday Evening Post, Leslie's Weekly, Literary Digest, Colliers, Popular Mechanics, and other national magazines—all motorists' publications, and a large number of farm journals.

Get These Quick-Repeat Sales Profits—

Order from your jobber now or write for full description and discount sheet if you are not familiar with this popular accessory.

5 Minute Vulcanizer

Champion

Dependable Spark Plugs

That's the Plug

that is standard equipment on four out of every five gasoline motors and engines in use;—
that guarantees the highest motor efficiency;
with the 3450 insulator that resists shock, vibration and temperature changes far in excess of regular service requirements;—
with the patented compression-proof asbestos lined gaskets;
which offers you the greatest sales possibilities, because those who know its dependability demand it for replacements;—
which means satisfied customers because its efficiency assures a "plus service";—
that is guaranteed to give "Absolute Satisfaction to the user, or full repair or replacement will be made";—
that brings business to you, not only in the sale of spark plugs, but in other accessories, because the man who uses Champions knows that the dealer who sells them must carry other dependable lines.

Stock Champion Plugs and capitalize these facts and our big promotion campaign in building a bigger business and more profits.

Order now from your jobber.

HARRINGTON & RICHARDSON ARMS COMPANY

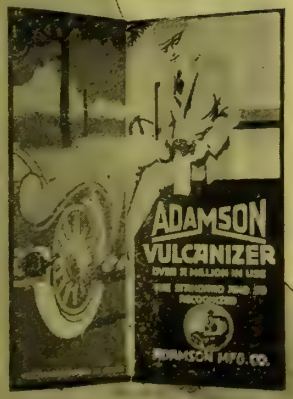
715 PARK AVENUE, WORCESTER, MASS., U.S.A.

ADAMSON

THE COMPLETE LINE OF

VULCANIZERS

Money Makers for the Dealer



MODEL "E" $1.50
5-Minute Vulcanizer
Uses Adamson Dry Fuel or gasoline. Repairs tube punctures permanently in 5 minutes.

MODEL "T" $2.50
For ordinary repairs on inner tubes.

MODEL "U" $3.50
Repairs tubes and cases. Mends tread cuts and small blow-outs.

Write for Adamson store displays and dealer helps

DEALERS:

There's an Adamson for every kind of tube and casing repair that a motorist can make. You needn't miss a single sale when you stock the Adamson line.

The high price of tires and tubes and the nation-wide demand for Conservation will practically double the number of Adamson users—now over a million.

To show Adamsons is to sell them. Every motorist knows they are easiest to use, quick and sure in results, and make the strongest possible repair.

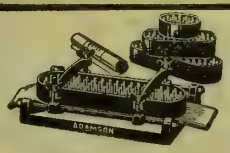
Adamsons cost least to buy and operate; any model will use common gasoline—always dependable and easy to get.

STOP THAT LEAK

Tread cuts and surface injuries admit moisture and sand into the fabric to rot and weaken it, causing blow-outs and short mileage.

—Sell Adamsons to repair such injuries in a few minutes time, while the tire remains on the wheel.

Practically every motorist wants an outfit to vulcanize his own tube punctures and blow-outs.—Sell him the dependable Adamson to make quick and lasting repairs—at home or on the road—without the use of cement.



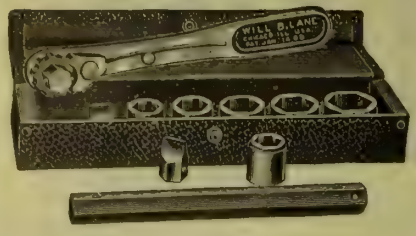
For quick sales and no dead stock carry Adamson Vulcanizers and Repair Gum.

Sold by all Jobbers

ADAMSON MANUFACTURING CO.
HAMILTON, CANADA

We also make, Adamson Brake Shoes, lined and unlined and Cut Outs for Ford Cars.

Money Savers for the Motorist



MODEL "S" $17.00
For private garages and repair shops. Mends cases and tubes.

ADAMSON REPAIR GUM
Essential for best results with any portable vulcanizer. Perfect adhesion without use of cement.

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight, 22 ounces.

Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.

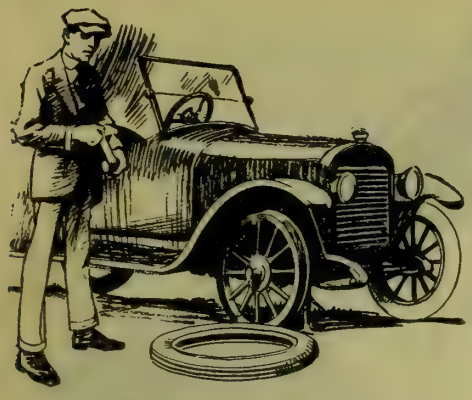
OFF-SET RATCHET SCREW DRIVER

Consists of—1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight, in paper box, five ounces.

STERNWEAR TUBES are actual money-savers. They last longer than other tubes and reduce blow-outs to a minimum. Actually the strongest and most serviceable part of a tire. Made in all standard sizes.

It's economy to buy them and profitable to sell them.

The Sterns Tire and Tube Company
of Canada Limited
944 Keele Street :-: Toronto, Ont.



Insist on Getting A Tallman Two Cylinder Double Action Pump

Easy on Your Back

Saves Your Tires

Tallman Brass & Metal Limited
HAMILTON, ONT.

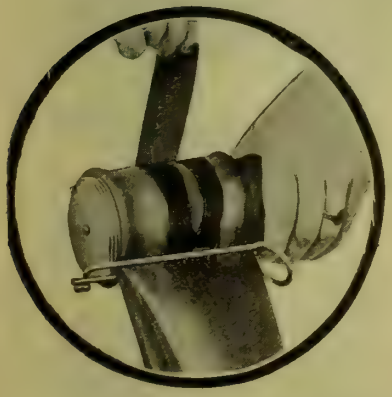
Every Auto Owner Needs The Locktite

Because it permanently seals a rip or hole in a tube absolutely tight—in a jiffy—with no waiting for the patch to set—

Because it is a complete tube repairing outfit—with cylinder and clamp for holding tube in place—emery-strong, canvas-back patching sheet—gasoline swab—tube buffer and cement—

That's why the Locktite Patcher is in great demand by all motorists.

And that's why Locktite offers you a money-making opportunity.



Requiring little shelf-room—selling over the counter like a spark-plug—requiring no service—the Locktite Patcher practically sells itself.

It is furnished in a special larger size for garages and repair shops.

Write for our dealer proposition to-day—this is the kind of article that makes quick and generous profits.

LOCKTITE PATCH CO., WINDSOR, ONT.

American Plant, Detroit, Mich.

How It Works

First place the tube around the container—as shown in the picture. Clean and roughen the surface around the hole with emery, apply cement. Then press on the patch firmly—and the tube is ready to go into the casing.

No waiting for the patch to set. The hotter the road, the tighter it holds.

LOCKTITE
AUTO-NEW-MATIC PATCHER

That's All That's Needed

THE Rie Nie Tube and Casing Patch, your two hands and a flat spot, and the repair is made. It is a permanent repair that never has to be touched again. It may also be used for effective repairs to casings.

Will mend anything made of rubber or rubberized fabric. See your dealer or mail the coupon below.

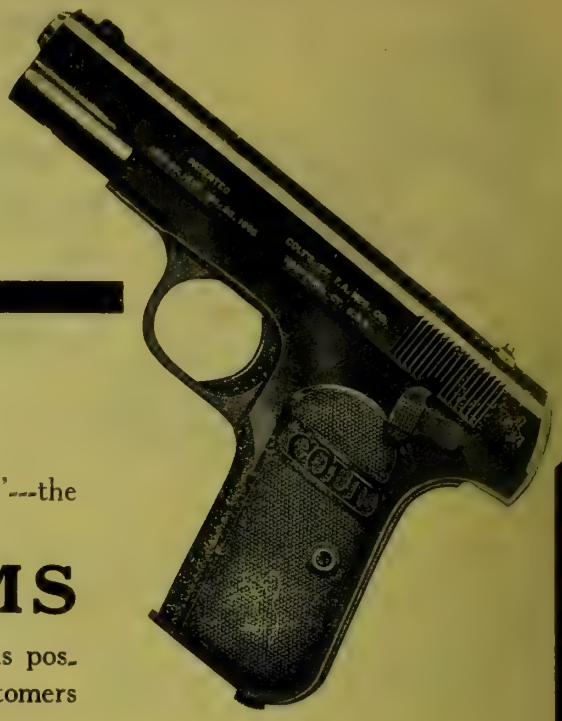
For Everything from a Pinhole to a Blowout

This for a Leak in the Radiator

Rie Nie Liquid Radiator Cement is a good, sensible, permanent repair that is easy to apply, sure in its effect and of benefit to the cooling system. Proved successful by thousands of car owners.

Permanently repairs all leaks in steam and hot water heating plants.

Auto Size (8-oz. can) each 75c.



Special Size (for trucks, tractors and boilers) each, $3.00

Sent No.	Sent By	Rec'd By	Time Sent	Time Filed	Check

Send the following night lettergram, without repeating, subject to the terms and conditions printed on the back hereof, which are hereby agreed to.

Toronto, May 23, 1919.

TO ALL DEALERS AND DISTRIBUTORS. -

An unprecedented service is now offered to the Automobile owner. Due to improved manufacturing facilities, and the excellent record of our tires this season, you are authorized to sell Royal Oak Tires as a six thousand mile tire, and Cloverleaf as a four thousand mile tire, with no increase in price, and we will adjust fairly on this basis.

This increased mileage takes effect at once. You now have a powerful sales argument. Make good use of it.

OAK TIRE AND RUBBER CO. LIMITED.

RWH/DL

INTRODUCING A NEW MILEAGE INCREASE

The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 15 publications is as follows:—

THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING of Can. (Est. 1910)
CANADIAN MOTOR, TRACTOR AND IMPLEMENT TRADE JOURNAL (Est. 1919)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 150-page publication of the size and type of this copy of HARDWARE AND METAL.

Our London Office, 88 Fleet Street, E.C.

Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG

For over 20 years the MacLean Publishing Company has maintained a fully-staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Threesherman, Mechanic or user.
A sure good sale and splendid profit.

WHY NOT ALLOW YOUR STAFF THE PRIVILEGE OF INCREASING YOUR SALES?

Making change takes time that might be used to better advantage in the selling of more good. And, too, it diverts the salesmen's mind from his real business. We have a cash carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps. They should not be forgotten.

Write for our four-page leaflet which tells how to obtain a double check on sales, and allow your salesmen in a greater degree, to display their selling ability.

All kinds of Cash and Parcel Carriers.

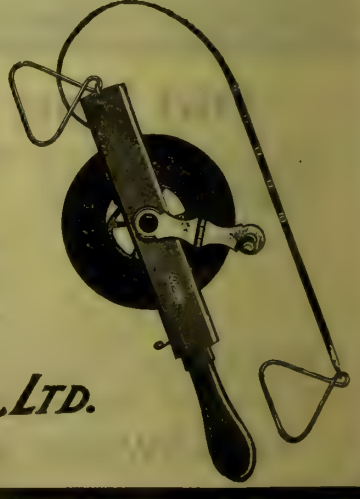
LUFKIN

MEASURING TAPES
ARE OF
SUPERIOR QUALITY
ACCURATE DURABLE



THEY HAVE *Instantaneous* READINGS
"Nubian" (dark) Finish Lines, Metal Lined Cases, etc.

MADE IN CANADA

The recognized standard for years in construction work, engineering and surveying.

Everybody knows the Brands—
"RELIABLE" "CHALLENGE" "RIVAL"

Carry the Tapes that sell.
Your jobber stocks them.

THE LUFKIN RULE CO. OF CANADA, LTD.
WINDSOR, ONT.

These Will Fix It

The first item is the "W & B" Auto Pliers—combining pliers, wrench and screw driver in one tool.

Next is the "W & B" Automobile Wrench with all-steel malleable jaws, opening to 2 1/8 inches.

Then the "W & B" Adjustable "S" Wrench for tight corners and shut-up places, — handy, easily and quickly operated.

Next a face-to-face view of the Automobile Wrench, and after that a real "W & B" Machinist's Ball Pein Hammer and an honest-to-goodness Screw Driver that will twist anything that has a slotted head.

These are good goods, made in Canada and equally satisfying to dealer or user. Look for "W & B" in the diamond—the sure sign of long manufacturing experience, highest quality and fine service.

PROFITS—HOW TO MAKE THEM BIGGER

Every merchant is in business for profit. His every business thought and act is directed toward bigger profits.

One merchant who has made a big success of his retail hardware business attributes this success to the fact that he plays up the "feature line."

"What do you mean by **feature line?**" he was asked.

"By feature lines, I mean those products in which I know the public have complete faith. There is, you know, one such product in every line. There is for instance, an outstanding gas range—I made it my business to get the agency for that range.

"There is a line of brushes that all Canada accepts as having highest quality—I play up that line in my windows and in my advertising.

"But above all, I have made it my business to be known as the man in my town who sells Quality Paint, for a hardware man is judged largely by the paint he handles.

"I have therefore linked up my store to the B-H line of Paints and Varnishes—and I play up the part that I'm the B-H Agent in my locality in every possible way."

Full particulars of our attractive agency proposition sent without any obligation on your part.

CLEVELAND GRINDSTONES

The CLEVELAND is a trade-marked grindstone. There is a great difference in grindstone quality, and this mark is your guarantee to the buyer that he has purchased a **genuine** Huron or Berea grindstone, which is the best quality of grindstones known to the manufacturing world and the standard for sharpening.

Do not be misled by the term "Berea Grit" into thinking you are getting BEREA STONE. Berea Grit is merely a geological name for stone of a certain age; it does not even refer to grinding qualities for agricultural and general uses which constitutes your grindstone market.

CLEVELAND TRADE MARK GRINDSTONES

We have the only Berea and Huron quarries. You can get this quality only through us. We can supply Cleveland Grindstones in power, hand or treadle.

There is profit for you in this Trade-mark.

TORONTO MONTREAL WINNIPEG

PLYMOUTH ROPE

is like pure Gold--- one quality only

Many dealers are in the habit of specifying for 100% pure Manila Rope, thus thinking to obtain the best that is made.

As a matter of fact there are hundreds of marks and grades of Manila fiber covering a wide range in quality and in price. Therefore, pure Manila rope is not necessarily high-grade rope, even though it may be made from all-Manila fiber.

The term "Pure Manila" does not indicate any particular standard of rope quality, and the buyer's only safeguard is his dependence upon the reputation of the manufacturer.

PLYMOUTH ROPE

"The Rope You Can Trust"

is everywhere known as the highest quality obtainable — like pure gold—one quality only—always the same.

Is this Display Working for You?

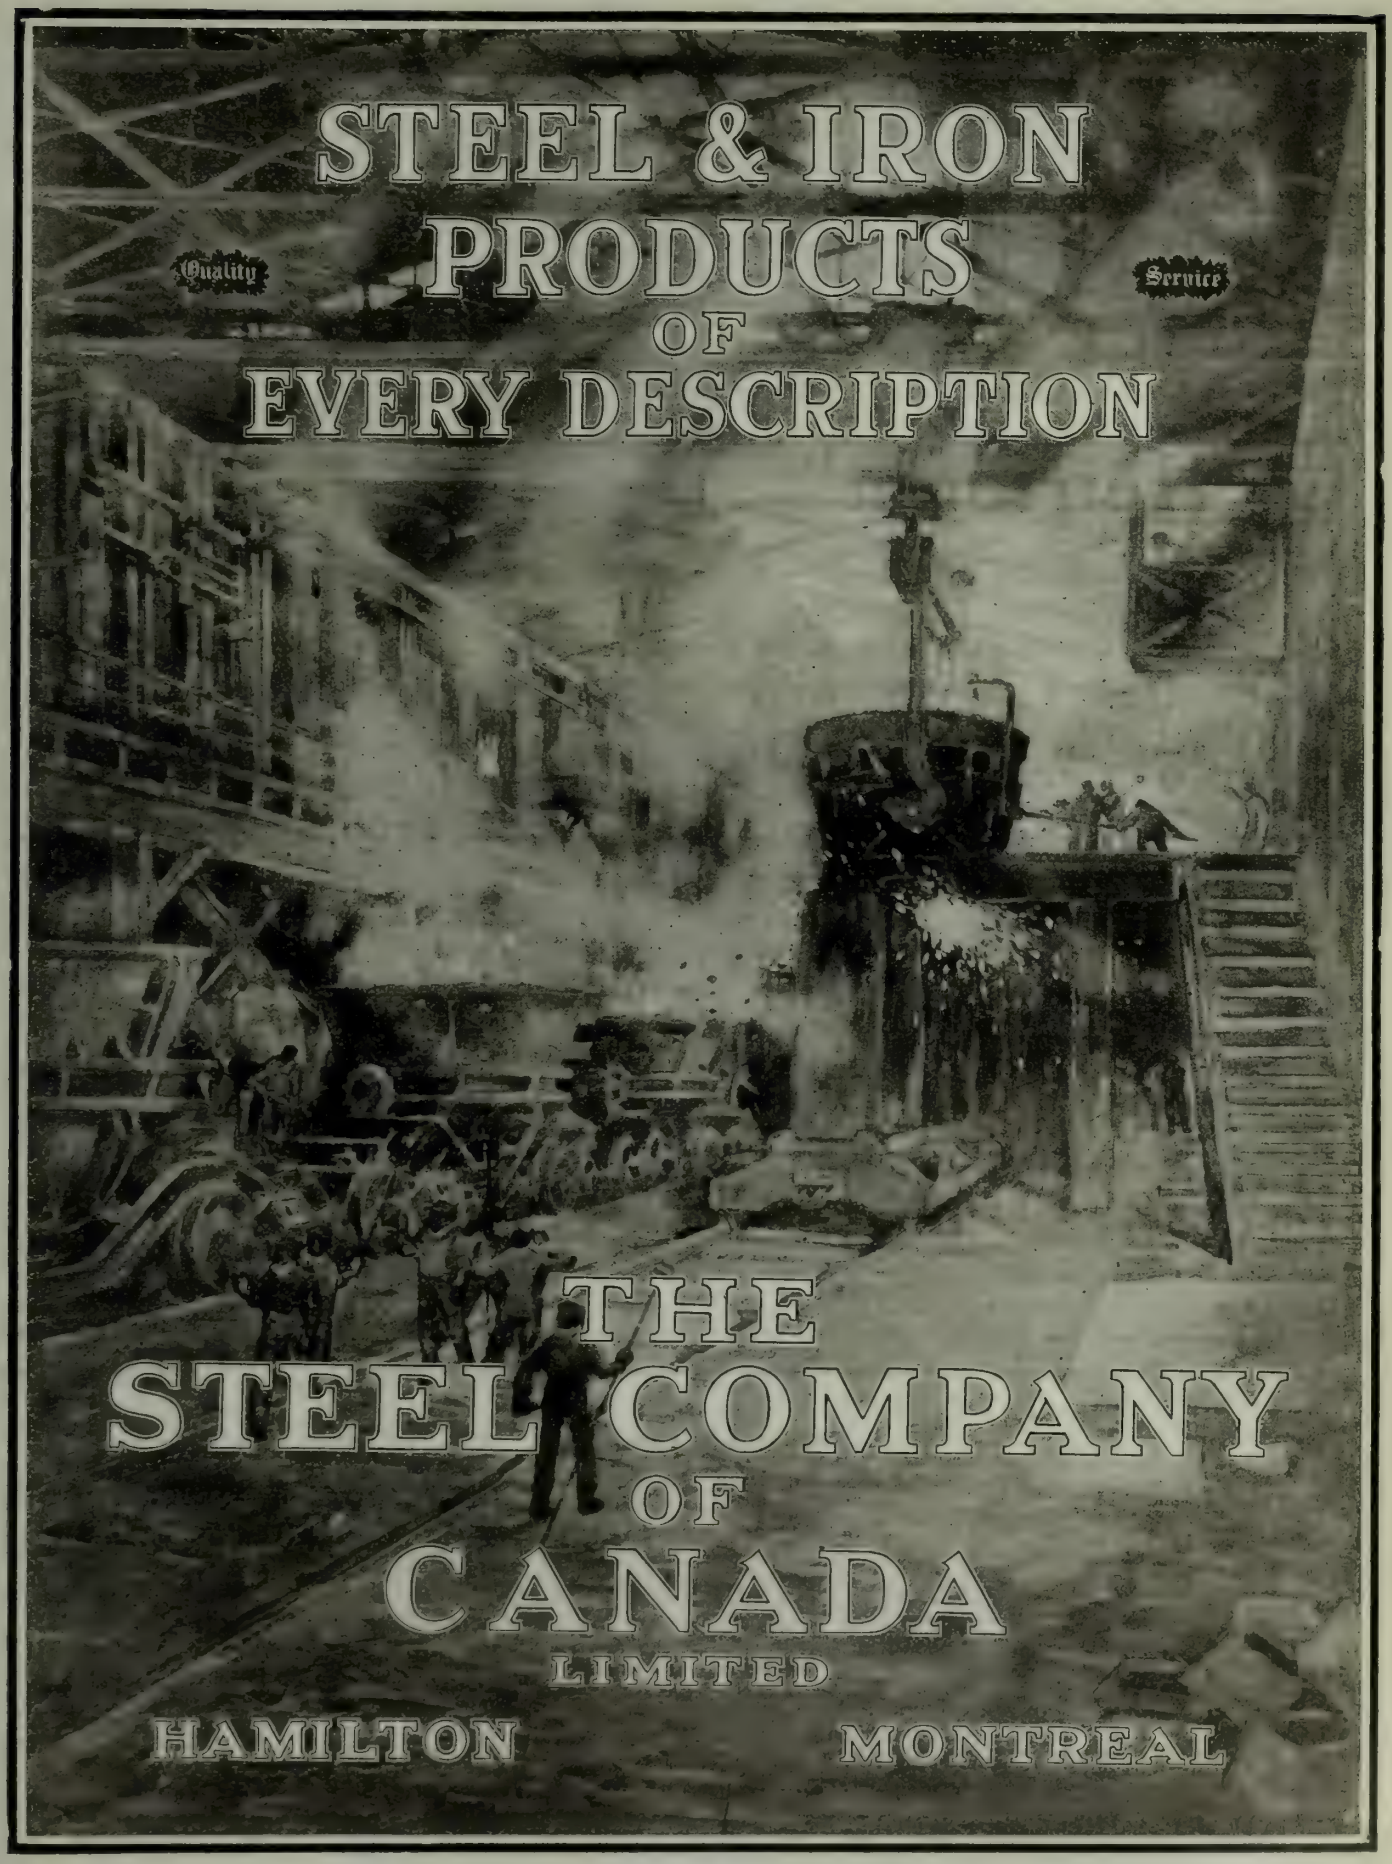
Here's a display stand that will sell braces for you because it shows our nationally advertised brace to best advantage and gives your customers all its selling points at a glance.

This 732 Brace is a big seller because it will do far more than the ordinary brace and this fact is "getting across" big in our national advertising.

Has a patent chuck that will hold twist drills as well as regular auger bit shanks. Bores wood, plaster, cement and metal.

With this stand on your counter or in your window you connect your store with our national advertising in the "Saturday Evening Post" and other mediums. The stand helps you sell this leading tool which is half sold already when your customer sees the brace in your store.

Stand is furnished free with small order of No. 732 Braces. Write for pocket catalog and our special offer to the trade.



Our Handbook, "How to Sell Tools," helps you cash in on our national advertising in your tool department. It is full of money-making ideas and selling suggestions that you can use. Write for your copy to-day.

"The SALESMAN'S JOY"

IS JUST ANOTHER NAME FOR

KRIBS WASHING MACHINES

It's a "Grand and Glorious Feeling!" to know that you have the real quality and workmanship behind the goods you show your customers!

To-day hundreds of salesmen find true pleasure in selling KRIBS MACHINES. They have the unreserved gratitude of scores of pleased users. Reports come to hand right along of one machine selling many others in the same neighborhood.

KRIBS MACHINES HAVE CHARACTER. They are designed by men of long experience and are made of selected wood. The tubs will not warp or crack or come apart. The castings are smooth and well fitted. The gears are clean cut and do not slip. Safety devices guard against carelessness. They operate easily and do their work thoroughly.

If you are not selling our lines you're missing both PLEASURE and PROFIT.

Ask your jobber about them to-day, or write us direct.

The QUALITY and FINISH in our high-priced machines will be found just as marked in the modest low-priced lines. The New Electric is the Climax of Efficiency.

Hardware dealers who now sell and who will ultimately sell "Kasement" Screen Doors

THANKS to a good door, backed by the dealers' co-operation, together with an aggressive advertising campaign, the demand for "Kasement" doors this year has been tremendous.

Our exhibit and demonstration each year at the Canadian National Exhibition has helped wonderfully and satisfied householders have, by telling their friends, greatly increased the demand.

As a vindication of our one-price policy we are receiving letters daily from all parts of Canada, complimenting us on our method of doing business, and hundreds of repeat orders are evidence to us that the hesitancy to handle a higher priced door has been overcome. The dealers are realizing that quality counts and that it pays them from the standpoint of profit to sell "Kasement" doors. This is what one dealer says:

"There is nothing that has created such a sensation in spring hardware at our store as the 'Kasement' screen door."

"Kasement" doors are really the cheapest in the long run for the householder and undoubtedly are the most profitable for the dealer. It is unnecessary to carry a wide range of patterns in stock or on display and and there's less chance of left-overs.

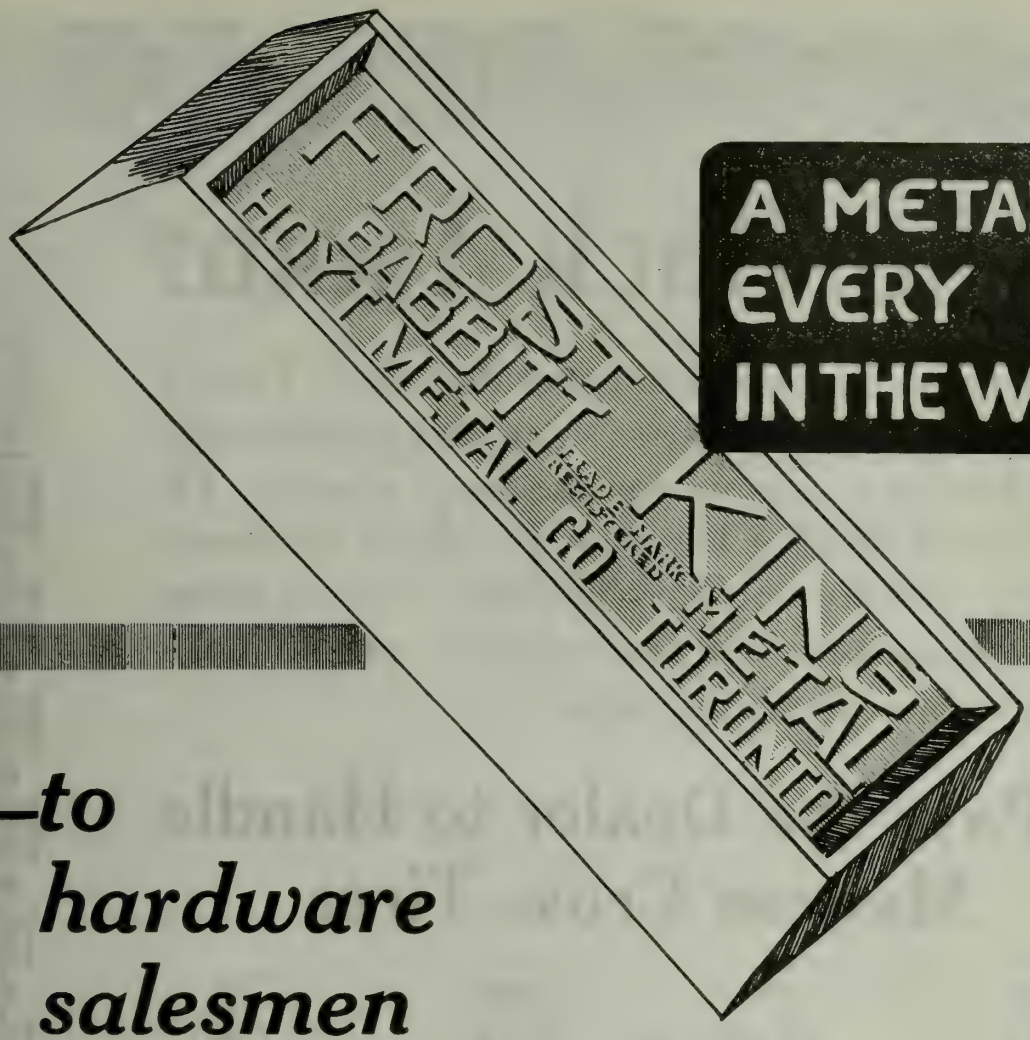
The new (patented) Kasement Extension Bottom which we put on the market this year has proven a big success; Toronto dealers especially have found it a great sales-getter, as it brings many doors into the stock screen door realm which it was heretofore impossible to fit except with 'made to order' doors.

As a result of this year's experience we are arranging to greatly increase our output for next season and hope to keep apace with the growing demand for 'Kasement' screen doors.

Yours very truly,

TORONTO,
JUNE 21, 1919

Kasement Skrene Dore Co.
183 Church Street, Toronto, Can.
W. H. Cunningham,
MANAGER



There's only one babbitt

and that is the one which exactly meets the needs of the individual requirements — the one which removes all friction and eliminates play where metal meets metal. ¶ In the Hoyt plant we make a specialty of alloying metals which meet every need of your customers—no matter what the use. ¶ We employ experts in every department whose long experience and interest in our products enables us to stand behind and guarantee every pound of metal turned out. ¶ Let us know your requirements and we will supply you with the "right" metal every time.

HOYT METAL CO., TORONTO

LONDON, ENG. NEW YORK, U.S.A. ST. LOUIS, MO., U.S.A.

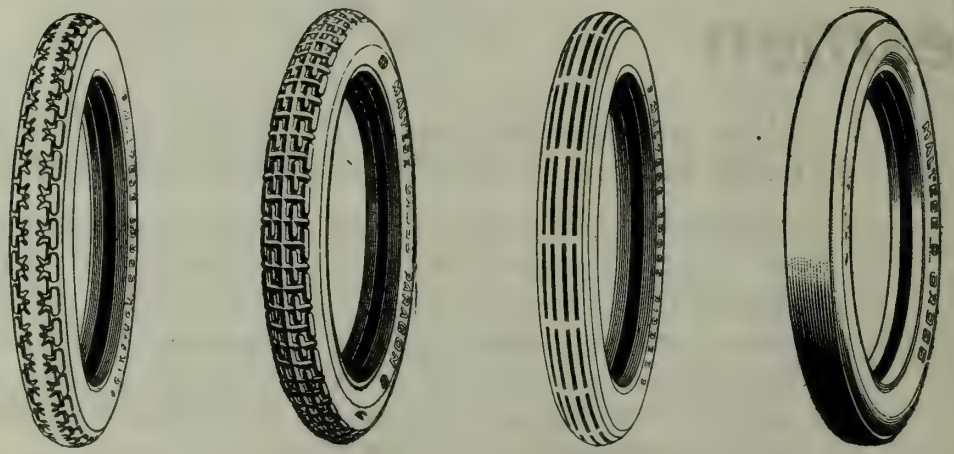
—to hardware salesmen

Have you ever stopped to think what a nice business you could work up in the mills and factories around your town.

A portion of this trade may come to your store anyway, but not nearly the portion which is possible if you put forth special effort to cultivate it. Don't wait for the foreman to come into your store, but drop in today and find out what his needs are in babbitt metals, beltings, pulleys, lubricants and the dozen and one articles needed around the plant or for the personal use of the Staff.

If an industry is worth having in a town its business is worth going after.

Sell the best money can buy.



HOYT METAL CO., TORONTO

LONDON, ENG. NEW YORK, U.S.A. ST. LOUIS, MO., U.S.A.

"Hello! Back Again?"

"Yes, those two Maltese Cross Non-Skid Tires I got for my rear wheels are so mighty satisfactory that I want two more for the front wheels. I'll take the Ribbed or Paragon Tread for the front, whichever kind you have in stock. Full Maltese Cross equipment—all four wheels—and no more tire trouble—that's my idea."

It Pays the Dealer to Handle Maltese Cross Tires

Cleaner Oil, Economically Handled
No Waste, More Profits.

This sums up the advantages of the dust and dirt-proof, leak and waste-proof battery of

GILBERT & BARKER

T-230-L Lubricating Oil Outfit

It replaces the fire risk, mess and waste of barrel storage, with safety, convenience and economy. The oil is kept absolutely clean and cannot evaporate. The modern hardware dealer is making additional profits catering to the automobile trade.

This outfit can be put in the rear of the store, quickly available to serve the auto trade with oil. A barrel track and chain hoist enables any man to drain a barrel with ease and despatch. It's such a good investment, making for such positive economy and additional profits from the handling of oils, that it soon pays for itself. At least this has been the experience of thousands of users.

Why not send for Bulletin 52 to-day.

NUMBER THREE

IN the year 1853, Cyrus W. Field believed that by means of a cable people could talk across an ocean three thousand miles wide. For thirteen years he concentrated on perfecting his means of communication. He made fifty voyages across the Atlantic. Many of his cables broke in mid-ocean. In August, 1866, the first message was successfully transmitted from New York to England. This grand achievement was the result of a man with an idea concentrating on one thing. The story is one of the noblest records of American enterprise.

The secret of Cyrus W. Field's success was

CONCENTRATION

No man ever achieved a worth while victory by accident. Fine achievments are always the result of exhaustive experiments, hard work and concentration. One of the greatest men who ever lived, whose influence has lasted for centuries, took this for his motto: "This one thing I do."

Victor Hack Saws have achieved their position of dominance because we make nothing but hack saws. For many years we have concentrated all our energies and resources on perfecting this one tool. As a result, the Victor Hack Saw Blade is recognized by good mechanics and foremost technicians in all parts of the world as the most efficient hack saw for every metal-cutting purpose.

QUALITY is another name for VALUE

The Steadily Increasing Demand for

WISS

Shears and Scissors

is due to a recognition on the part of intelligent consumers that real economy lies in buying the best---

that the VALUE of a thing is not based on its purchase price so much as upon its ability to make good.

To dealers who appreciate this fact the WISS line is particularly interesting.

In addition to its unmatchable quality, the WISS line is the most complete shear and scissor line made.

CARBORUNDUM NIAGARA GRINDERS

JUST TO REMIND YOU THAT YOU CAN SELL THEM

To the Carpenter

For grinding his chisels, plane, bits, gouges, etc. The No. 3 Niagara just suits him. It's big enough for bench work, small enough to pack in his tool kit.

To the Garage Man

For grinding parts, tools and fittings—for a dozen and one jobs about the shop. He will want the big No. 4, or, if he has power, the No. 28 Grinder Head.

To the Farmer

For grinding his scythes, grass hooks, mower sections, feed chopping knives—for edging spades and general farm tools, for grinding household knives, etc., the Niagara No. 14 is the machine for him.

To the Householder

For grinding household knives and tools —a little No. 1 machine.

The business is waiting for you—go after it with Carborundum Niagara Grinders. Carborundum displays and advertising will help you.

THE CARBORUNDUM COMPANY
NIAGARA FALLS, N. Y.

"*Lively and Lasting*"

Build Up Your Battery Business By Selling Reliable Flashlights

EVERY time you sell a Reliable Flashlight case you create a new customer for Reliable Batteries.

Every customer whom you can induce to buy "Reliable" Batteries can be reasonably expected to come back to you for his next supply. Your Reliable Flashlight sales are, therefore, a foundation for a *big* battery business.

Selling Reliable Flashlights should not be hard for you. Our extensive advertising campaign in leading magazines, farm papers, newspapers and motor journals pictures in a hundred ways the need and uses for a "Reliable Flashlight."

Your customers' homes are reached by this advertising.

Every sale of Reliable Products you make affords you a good, substantial profit, and every sale *fully* satisfies your customers.

The Reliable line *is a reliable line* for reliable dealers.

Ask your jobber to supply you with Reliable selling helps with your order.

Champion

"Minute" Spark Plug Cleaner

This is the article that sells on sight to every motorist and every owner of a gasoline engine.

It's the simplest, most effective and most economical spark plug cleaner on the market, eliminating dirty hands, soiled clothing and all the exasperation that goes with cleaning spark plugs by the old method.

There's no need to take your plugs apart—

A little gasoline in the tube—screw in the plug—shake one minute and the foulest plug is clean as new. The needles pick away the carbon from the most inaccessible spots and the gasoline does the rest.

Over half a million Spark Plug users in Canada offer a big market for this handy motor accessory. Practically everyone who sees the Champion "Minute" Cleaner will want one. Add it to your stock and suggest its use to your customers. It will mean quick and profitable sales.

It carries the same guarantee of satisfaction as Champion Dependable Spark Plugs.

Order from your Jobber to-day.

GRINDERS

The Mehasco Line—well and favorably known throughout the West. Stocked in 4, 5, 6 and 7-inch fine carborundum wheels, spiral steel cut gears completely enclosed and entirely noiseless; working parts run in a bath of oil, no wear and tear. **The Champion** is a cheaper line, but exceptional value. It is stocked in 4, 5 and 6-inch wheels.

The **No. 6 Tilting Grinder** runs in oil and on ball bearings, is offset from the handle, and is easily adjusted to any position without the use of set screws. The **No. 5 Sickle Grinder** has the gears completely enclosed, and is furnished with two grinding wheels, one for grinding sickles, and the other general purpose farm work. We also have the **No. 60 Power Grinder,** driven by belt. We have a special proposition of a display stand with a one-dozen assortment. Write us for information.

CALGARY

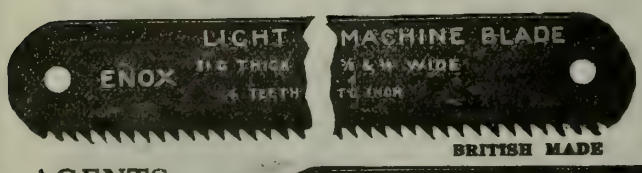
TRADE MARK "MORRISCA"

When you see the above Trade Mark on anything pertaining to Fishing Tackle you need have no hesitation in recommending it to your customers.

There is no possibility (except in a few articles) of prices for Fishing Tackle being reduced before next season, so that during the period of transition you would be well advised to place orders well ahead of your every-day requirements.

Orders for future delivery are now being booked, but owing to the great pressure we have had with Government work it will be some time yet before we are able to attain our pre-war output.

Our new General Catalogue is now in preparation, and we are placing on a Register the names of Fishing Tackle Dealers who will obtain a copy on publication. Have you sent in your name? If not, do so now.



In the meantime we invite and welcome your enquiries and will be pleased to quote you for anything we can supply. We are Wholesale only, and all enquiries from consumers direct are referred to the nearest retailer. We don't cut into his business.

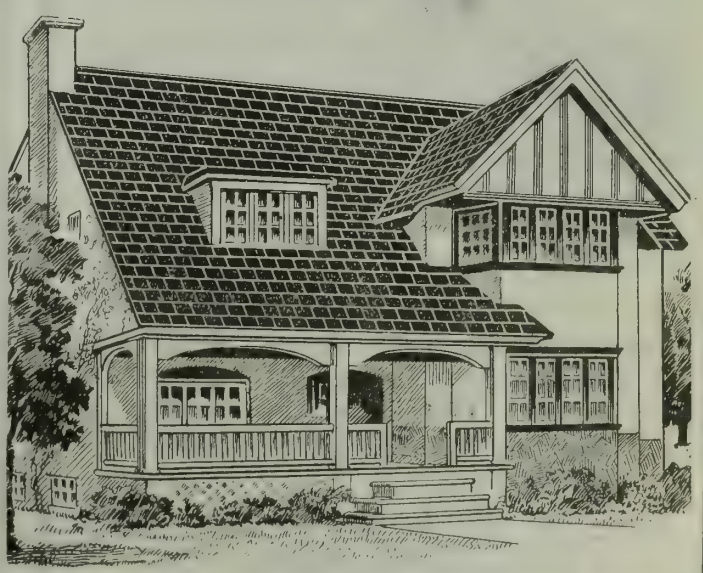
Brantford Asphalt Slates in big demand



The output of Brantford Asphalt Slates in 1917 was double 1916—1918 double 1917. This indicates that there is a big, growing market for this artistic, durable, fire-resistant roofing.

Progressive hardware dealers who push the sale of Brantford Asphalt Slates will find it a very profitable line. In fact, there are good profits to be made in the entire line of Brantford Roofing—

Asphalt, Rubber, Crystal, Leatheroid and Standard Mohawk in rolls—Asphalt Slates in individual size shingles, and the Asphalt Slab Slate, which is four shingles in one—and Climax Sheathing Paper, a big seller.

The hardware dealer can meet every roofing requirement with this line of nationally advertised, first quality roofing.

4 Good Reasons --READ 'EM !

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT — Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

New Idea Warm Air Furnace

MORE HEATING SURFACE on every NEW IDEA FURNACE than any other furnace. Ash pit large and roomy, less chance of ashes banking up and burning out grates.

FIRE POT one piece, with deep flanges adding one-third more heating surface. Very heavy. Guaranteed for FIVE YEARS.

RADIATOR large, giving more surface than found in other furnaces.

NEW IDEA DUPLEX GRATES (Patented) take care of any size clinker from either Hard or Soft Coal. They operate so easily a child can operate them. They work so well that there are never any ashes worth sifting, saving the dirtiest work necessary in attending old-style furnaces.

New Idea Furnace made in seven sizes. And every one Guaranteed.

Get the NEW IDEA FURNACE AGENCY for 1919 and see your furnace business grow. They sell themselves and others. Write now for Agency.

Goodyear Selling Points:

1. Built of pliable cords, embedded in rubber.

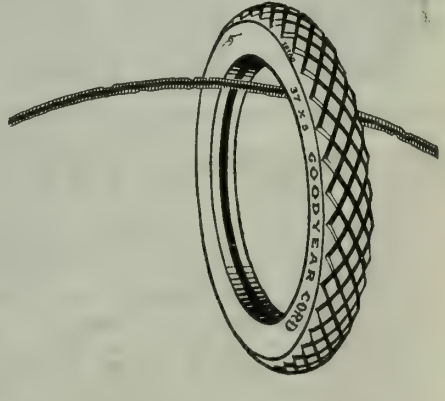
2. Oversize——gives a greater stream of water.

3. Seamlessly welded, crack-proof and leak-proof.

4. Economical, because of long life.

GOODYEAR

Hardware Men Appreciate this Better-Value Hose



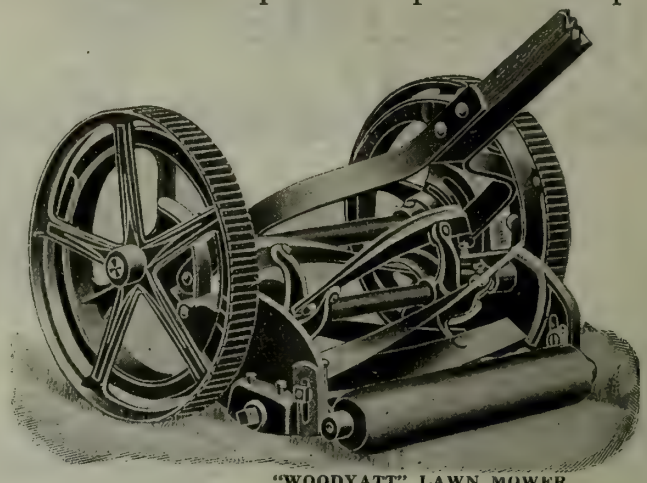
It is a hose they can highly recommend—as an economical, long-life hose—as a crack-proof, trouble-free hose.

Goodyear Cord Hose is constructed like the famous Goodyear Cord Tire—layers of strong, pliable cords embedded in good rubber. Welded without seams into one unit—with a smooth cover. It is over-size, giving a larger stream of water.

Goodyear Cord Hose is being advertised throughout Canada. It offers you a great opportunity to increase your sales. We will supply window displays, sales suggestions, advertisements for you to run in your local paper.

Take advantage of this opportunity. Order Goodyear Cord Hose from your wholesaler at once. Strengthen your customers' goodwill by selling them this better-value hose.

The Goodyear Tire & Rubber Company of Canada Limited



CORD HOSE

A SPLENDID RECORD

"Taylor-Forbes Lawn Mowers" have been in the service for forty-five years, a service in which all good Canadians take pride—a pride in keeping their lawns clean and neat.

In this the first peace summer in four years even greater interest will be taken in the lawns and this should mean more lawn mower sales for you.

You will have no difficulty selling your customer any of the T-F lawn mowers, when you show him the goods and the guarantee.

MEAKINS BRUSHES

ARE BUILT FOR SERVICE

The productive life of any brush depends on quality of material and methods of manufacturing.

Our policy of using nothing but high-grade materials, together with the extraordinary care and attention we give to the making of our Brushes, has put them in the front rank of **"serviceable products."**

Meakins' Brushes give unusual service to the user and return splendid profits to the Dealer.

The bristles "cannot loosen." They are Rubberset. A feature that makes them easy to sell.

Write us for catalogue. Order through your jobber.

Value of Trade-Mark as Sales Producer

Trade-Marked Goods, Back of Which Guarantee Stands, Good Foundation on Which to Build Increasing Sales—Act as Means of Establishing Confidence—Makes Selling Easy

"ONE thing we want to do, and particularly in connection with foreign trade, is to establish our own particular trade mark, our peculiar design recognizable everywhere as Canada's, and we want to be sure that everything which goes out of Canada with that trade mark on it shall be up to standard not only to secure the sale of the goods, but to uphold the reputation of the manufacturers of the country behind it."

In these words Mr. Lloyd Harris, of the Canadian Trade Commission, emphasized in his address on export trade to Canadian manufacturers on his return from Europe a truth that applies not only to them, but to every manufacturer, jobber and retailer soliciting business at home.

The retailer is realizing the importance of linking up his store and having it always recognized by buyers in his territory as the place where goods backed by a guarantee that means something are to be obtained. Such a sales policy has a value and importance that is far reaching in its effects upon trade building. The merchant whose store is known as the headquarters for the greatest number of well-known trade-marked goods has established a reputation for service and quality that will always cause the store to be associated with the best goods.

Give Him a Standing

Handling goods that are trade-marked and back of which the manufacturer stands, gives the store a standing that it could not obtain in any other way. The trade mark should stand for goods that give satisfactory service, and prospec-

These are just a few samples of retail advertising picked at r andom which illustrate how the retailer is linking up his store with trade marked goods. A wide range of goods is shown, and the retailer in many cas es points out advantages of the line he handles as he sees them and stands back of them.

tive buyers gain added confidence in the dealer handling them. The dealer who features such goods in his windows, in his store and in his advertising, can have no better ad. for his store. He can have no better ad. for his own business integrity. It means that he is prepared to stand behind the articles he sells. If the goods through some defect in material not always apparent in the manufacture, do not stand up and give the service expected of them, they can be replaced without question. Handling goods of this kind gives the dealer a status that is a sure foundation for wide and successful business dealing. It gives him a confidence that he will make his sales talk absolutely convincing because he is prepared to back the goods to the limit, knowing that behind his word stands the trade mark of the firm, which, perhaps, for years has meant a guarantee of all that is sound.

Establishes Confidence

The dealer who in his window displays nothing but trade-marked goods at once establishes in the minds of all who see them a bond of confidence. The man who looks in and sees a —— knife may never have owned one, but he knows from what he has heard his friends say that —— knives stand for quality. He knows from satisfied customers of the store and the retailers' advertising about the good service the goods give. Naturally the customer gets a good impression as to the kind of goods he may expect to get at this store. When he finds that every line the merchant shows him, no matter whether it is knives or paints or tools or any other goods, is trade marked and that the merchant is going to stand behind every article, and guarantee it to be satisfactory, he decides he has struck the store where it will pay him to deal.

Striking Contrast

Perhaps the best way to appreciate what this really means is to go into some store where they do not handle trade-marked goods, made by firms whose names are a guarantee of quality. The merchant will tell you that the paint he is offering you is all right, he thinks. No, he will not guarantee it, but he thinks it should be all right. He does not know why the maker does not put his name on the goods he manufactures or why he refuses to stand behind them or let people know who he is. If you don't like the paint or if it does not give you the service you might reasonably expect you have no redress. Contrast this with the man handling some well-known trade-marked line which he is ready to stand absolutely behind.

"Bring it back," he says, "if it is not absolutely all I say it is, and if it does not do everything we claim for it, I am here in business and the firm I got it from is in business to make it right. If you are not satisfied we will replace the goods or give you your money back."

Which Will Win?

Which merchant is building on the broad foundation that will establish a steadily growing and successful business? To which store would you go back when you want to make your next purchase?

Makes Selling Easy

Handling trade-marked goods makes selling easy. The prospective buyer is already familiar with the goods through having heard or read of them. He is favorably disposed towards them because all that he has heard about them has been good. Not only that, but there is a distinctly favorable impression created also about the store because it handles goods that are giving satisfaction. All this is invaluable from a sales standpoint. It happens very frequently that a salesman may find it necessary when he handles two or more lines of goods to sell the line that is not trade marked because it is a little cheaper; in many cases it has happened that a few days later the customer brought the goods back and stated that he would gladly pay the difference in price, but wanted the trade-marked article.

People Ask for Them

"I have found from experience that it is much easier to sell trade-marked goods that people know about and read about," said an Ontario dealer to HARDWARE AND METAL. "As an instance, I handle two lines of electric irons. One is trade-marked and sells at a considerably higher price than the other. Occasionally a customer decides that she wants the cheaper iron. In a great many cases, though, I have found that it is only a question of a few days before she brings it back and says she will gladly pay the difference and take the other iron. All my experience points to the wisdom of handling the trade-marked article that I can stand behind. I find that in many instances the sale is already half made. A customer comes in and asks to see some line. I show the line that is backed by advertising and that I can guarantee. In the great majority of cases he is satisfied right there. The mere fact that I am handling goods of that nature satisfies him that it means quality and when I state I stand behind it and that the firm that made it is prepared to stand behind it, the sale is easily completed. I got a good customer the other day in the shape of a man who had never been in the store before, because he lived nearer another dealer. The other dealer recently sold him a screw driver and charged him a dollar for it. As soon as the man took it home and started to use it, it twisted right around. He took it back to the dealer and wanted another, but the dealer would not make it good. He came to my store and did not tell me what had happened, but asked to look at my screw drivers. As soon as he saw the trade mark on them he selected one and then told me what had happened in the other store. I assured him that if the screw driver he had bought did not give every satisfaction he could bring it back and get another or his money back. He asked about

FORM LETTER ACHIEVES "PERSONAL TOUCH"

Interior of the hardware store operated by D. A. Sands, at Yorkton. Mr. Sands specializes in the sale of automobile tires. When this photograph was taken, in May, garden seeds were prominently displayed at the front of the store.

D. A. Sands, Yorkton, Saskatchewan, is a great believer in the form letter as a means of introducing some new line of goods. He has a mailing list of 500 of the best known farmers in this vicinity, and he believes that by sending each of them a letter he achieves the "personal touch" that he could not accomplish in any other way. Recently when he acquired the agency for a line of automobile tires advertised in HARDWARE AND METAL, he informed his farmer friends through the mails. He did the same thing in the case of a line of lubricating oil for which he was appointed agent in the Yorkton district. Always in the painting season he sends out his form letters as a reminder. He states that he has been able to trace results to this method beyond any doubt.

Mr. Sands is one of those who see in the common use of the automobile serious difficulties for the village merchants. He has observed that within the last two or three years as cars have become more numerous in the country that farmers and their wives drive long distances to larger centres in order to do their shopping. For one thing they believe they can do better, and again they enjoy the trip to new and what appears to them greener fields. One day during the last week in May three farmers drove their cars into Yorkton from a distance of 30 to 40 miles, and brought home $150 worth of lumber.

New Tariff is Affecting Prices

Lines of Copper and Brass Goods Have Been Advanced Approximately Three Per Cent.—Reductions in the Price of Gasoline and Lubricating Oils—No Change in Prices of Rolled Iron or Steel Sheets Likely

WHILE the tariff proposals made by Sir Thomas White have not yet been passed, it is generally believed in the trade that they will be accepted and several changes in prices have already been made on the basis of the new tariff. As stated in last week's issue of HARDWARE AND METAL, gasoline prices have gone down one cent per gallon. A reduction has also been made in the prices of lubricating oils These come as a result of the removal under the new tariff proposals of thhe 7½ per cent. war tax on crude petroleum.

With the addition of 1½ cents per pound to copper, one cent a pound to zinc spelter and one cent a pound to lead, a revision of prices upwards is being made and many lines of brass and copper goods will be affected. The advances so far made will average about three per cent. One dealer summarized the situation by saying that it simply means another addition to the already high cost of living in Canada.

Big Buyer of Lead

Canada has been a big buyer of lead from the United States. During the past four years Canadians have averaged nearly 30,000 tons of lead a year. Now that munitions making is at an end and with the levying of the new duty on lead, it is likely that the business will drop to insignificant proportions. The view has already been expressed by leading American handlers of Mexican lead that with a duty of one cent a pound it will be impossible for them to sell in the Canadian markets in competition with Canadian producers.

The imposition of the duties on lead, copper, and spelter will, it is expected, result in Canada refining enough of these materials to take care of her own requirements. Sheet copper prices have already advanced.

No Immediate Changes

The change in the duty on rolled iron or steel sheets and strips, Canada plates, Russia iron, terne plates and the other lines covered under number 384 of the new tariff, is not expected to result in any price changes. The duty under the new tariff is made to read 12½%, as against a former duty of 5% plus 7½% war tax. This amounts to the same thing as at present, but if at some time in the future the war tax should be removed the proposed duty will not be affected, and manufacturers of sheets are assured of the 12½% protection.

In the case of cement the war customs duty will be repealed and the general tariff rate will be reduced to eight cents per hundred pounds, or two cents lower than the former rate.

Farm Implements

Farm implements will perhaps be more largely affected than any other lines under the new tariff. Including the 7½% war duty reduction it will provide for a total reduction under the general tariff from 27½% to 15% on cultivators, horse rakes, harrows, seed drills, manure spreaders and weeders, and also on complete parts of these implements. On plows and windmills and complete parts of same, portable engines and trac-

345a. Zinc spelter and zinc in blocks, pigs, bars or rods, per pound	¼c	5%	1c	Free	1c	7½%
348. Copper, in blocks, ingots or pigs, per pound	1c	5%	1½c	Free	1½c	7½%
348b. Brass and copper scrap	Free	5%	Free	Free	Free	7½%

tion engines for farm purposes, horse-power threshing machines, separators and appliances for same, the tariff provides for a reduction of from 27½% to 17½%. On such lines as hay loaders, potato diggers, fodder or feed cutters, grain crushers, fanning mills, hay tedders, farm, road or field rollers, post-hole diggers, snaiths, and other agricultural implements, the duty is reduced from 32½% to 20%. The same rate of reduction applies also to farm wagons.

Expect Good Business

Any changes that are being made in the British preferential tariff will not, according to representatives of British firms, work any hardship on them. There are, they state, great numbers of inquiries being received for British-made goods, which British firms are not at present in a position to fill. It will, they expect, be only a question of time, though, before they will be in a position to look after orders.

Another factor in the tariff situation as it applies to trade between Canada and the United States is that as matters stand at present owing to the balance of trade being against Canada, there is a rate of exchange against Canada that amounts to no less than three per cent. This is an important item in figuring costs, especially on large shipments.

Some of the Figures

During the fiscal year ending March, 1919, Canada imported from England Portland cement valued at $2,749, and from the United States Portland cement worth $23,688. In the same period there was imported from the United States brass rods and bars valued at $211,735; copper bars and rods valued at $4,014,-210; copper sheets and plates valued at $404,456; copper tubing valued at $188,-779; copper wire worth $68,436. From England came bar iron, band iron, sheets and plates valued at $1,313,083, and from the United States similar materials valued at $10,059,372; also from the United States bar and sheet steel valued at $265,935. Tin plates and sheets from the United States were valued at $11,-263,164 as against $11,176 from England. Tinware imports from the United States totalled $1,645,450 and from England $46,470. Tin blocks, pigs and bars from England totalled $1,557,189, as against $144,347 from the United States. Total imports of zinc products from the United States were $1,180,349, of which spelter amounted to $700,792. Iron ore from the United States was valued at $5,048,456. During the year 2,824,542 gallons of gasoline valued at $738,6[illegible] came in from the United States, an 236,809,939 gallons of crude petroleum, valued at $13,661,429. From the United States came lubricating oils valued at $1,488,985.

Before the War

Just how the figures shown above compare with those before the war may be gained from the following: For the year ending March, 1915, Canada imported from the United States 177,879,-835 gallons of crude petroleum valued at $5,994,318; 27,469,397 gallons of gasoline valued at $4,466,986; zinc spelter valued at $598,398, of which $110,717 came from England, $89,671 from Belgium, $46,364 from Germany and $330,-497 from the United States. In the same period there came from the United Kingdom galvanized sheets valued at $2,054,438; rolled iron or steel and cast steel in bars, bands, sheets, etc., valued at $727,555; also rolled iron or steel

Emulating the 5, 10, 15, 20, 25-Cent Idea in Neepawa, Man.

THERE is a rather interesting and fairly successful experiment being tried by an old-time hardware merchant at Neepawa, Manitoba, that should be of interest to the trade, and which carried out along moderate lines might prove a money maker in conjunction with the regular system of merchandising.

Briefly, Jack Phillips, formerly of Phillips Bros, of Morris, Manitoba, has emulated the late Mr. Woolworth and opened a large 5, 10, 15, 20 and 25 cent store in one of the most prominent business locations along the main street of the town. He went into business in October last, and at present writing he is going strong. Nothing can be purchased in his store higher than twenty-five cents.

Mr. Phillips has made the discovery that the success of his business is due largely to the innate curiosity of both men and women customers, particularly the latter. There appears to be something fascinating, something of a gamble in making purchases from a stock of this kind. The buyer is possessed of the idea that he or she is getting a bargain, and in many instances such is the case.

The most striking result of this system of selling is that the customer who comes in to purchase a cake of soap or a lead pencil invariably goes away with the purchases amounting to anywhere from 50 cents to three or four dollars.

The points of this story as applied to the hardware trade are these:

1. A well advertised department of this kind would attract customers to the store, particularly farmers' wives.

2. It should prove a profitable investment, in itself.

3. It would result in heavily increasing sales of regular stock.

4. It would afford an opportunity for clearing up odds and ends.

Mr. Phillips has an open mind as to whether the scheme can be successful in a town of less than 2,000 population.

He was first attracted by the money-making possibilities of such a store by observing the business done by the Woolworth store in Lethbridge, Alberta. The manager of that store said that it should be quite easy to make a start in a small town with an initial stock costing about $2,000.

When Mr. Phillips set up business in Neepawa, he painted the entire front of his premises a brilliant red in keeping with the methods of the late multi-millionaire, but his purchases amounting to $2,000 made such a scanty display that, as he tells it, he had to space the articles out on the shelves in order to make a showing. His proposition very soon became known to the travellers in various lines, and his stock has been built up largely of the broken lines they offered him, and in which he secured exceptional values.

Both his great double windows and the interior of his store are dressed in the most attractive manner. Such articles as toys, sheet music gaudily lithographed, ribbons, fireworks, Japanese goods, notably Japanese lanterns festooned in long strings, brightly printed seed boxes and dry goods sundries, make an attractive color scheme that gives the effect of a bazaar. But the real basic stock of the store is hardware in all its smaller lines. Particularly in agateware are there some genuine bargains offered.

The shelves and counters on both sides of the store are marked off into sections in which the goods of one price are collected, while the whole centre of the store is taken up with great tables criss-crossed into pockets in which a vast assortment of goods are displayed. Immediately in front of the entrance is the finest fixture in the store, a "silent salesman" showcase filled with pretty articles of feminine ware.

Mr. Phillips states that his greatest difficulty in these days of soaring prices has been to secure goods selling at and under the 25 cent figure. He tried for a time to use a woman buyer in the large centres but without success. In recent months he has made many buying trips to Winnipeg and has also made heavy purchases across the line. In the months of February he tried special sales at values up to 15 cents and while they were successful for a while he found that the results did not justify the effort. He has been urged by wholesale men to raise his limit to 50 cents, but so far has refused to do so. A similar store is operated in Portage la Prairie with values up to 99 cents.

SHOW CARDS OF THE SMALLER TORONTO STORES

Many Show Preference for the Small, Neatly-Lettered Card of Quiet Coloring—Others Feature Color Schemes Artistically Worked Out With Pleasing Effects.

Written for Hardware and Metal by ROBERT T. D. EDWARDS

FOR the past six months or so we have been sounding the praises of the large department stores throughout America in regard to the show cards and show carding systems they use, and have showed many ways in which we could use their ideas in our smaller stores.

There is no doubt that many of the hints thrown out were put into practice and that benefit has been derived from them. However, to continue the style of article we wish to give a few ideas which the smaller Toronto stores use on their show cards.

It is surprising, after making a study of the better small stores, to find the good class of show cards they use. They all have their own ideas of what constitutes a good show card; some like the small, neatly lettered cards of quiet colorings, with the lettering in the centre of the card or at the upper left hand side; others want cards with the lettering much heavier, but showing an absence of gaudy colorings; still others use small, neatly lettered cards, but have color schemes artistically worked out on them, which makes a very pleasing effect.

Can Easily See Them

You have only to walk along Yonge Street and gaze at the neatly trimmed windows to see these show cards.

White cards with black letters are quite prominent. Light colored mat boards, such as grey, cream, etc., are all favored to a great extent.

Dark surfaces are also used with light colored letterings, white on black, cream on dark brown or dark green, cream or white on grey.

Of course, various color combinations are used with attractive effects. The outlining of letters is very much favored now instead of the old-fashioned shading of letters. This along with high lighting has come to the fore greatly within the last year, and a more detailed description of it will be gone into in future lessons.

Air Brush Work

Air brush work still appears, but not nearly so prominently as a few years ago. Both for sale and better class show cards, the red sable writer is found to be far superior to the air brush when used in a skilled hand. This has been proven beyond a doubt.

Air brush work, if not used very sparingly and in an artistic manner, will do more to cheapen a display than any other thing. The trouble with most writers in using an air brush is that they don't know when they have sufficient decorations on the card. They do not seem to know when to stop.

Much of the small lettering which is formed on dark cards seen in Toronto store windows is made with the music pen, although the small sable brush is used by some. The operation of this pen has been previously explained. It makes a splendid Roman letter and is especially adapted for lettering with heavy opaque show card color.

The lettering is of a pen stroke Roman formation, similar to forms previously used.

The card illustrated on the right shows how to make an exceedingly neat card very quickly. Here you will note that no color other than black is used. The border design is cut from magazine advertisements and cut down to suit the size of the show card.

You may not be able to get this exact design, but there are many others that will suit the purpose just as well.

Care should be taken in cutting out and pasting these borders on. Mark the position in which they are to be placed before doing the pasting. Wipe all paste and finger marks off after pasting with a clean moistened cloth.

SUGGESTIONS FOR SEASONABLE SHOW CARDS.

The Brides' month—the Brides' store.

Our electric toaster will add cheer to the morning meal.

One of our refrigerators saves many steps.

For the fishermen—the proper equipment to land the "big ones."

Campers' supplies that add much to the holiday.

Don't put off getting that coal oil stove any longer.

Our screen doors and windows keep out the flies. Get yours now.

Lunch kits for the picnic parties.

USES FOR PLATE GLASS

The Plate Glass Manufacturers of America have issued a booklet suggesting numerous uses to which plate glass may be put. It is illustrated throughout in colors, most attractively. Some of the uses suggested are wind shields for autos, show cases, shelves for show cases, bathrooms and furniture, headlights and

sidelights for autos, windows and doors in railway coaches and street cars, ornamental signs, push plates on doors in residences, desk tops, tops for tables, counters and other furniture, adding machines and display cases, aquariums, over doors in ranges, fronts for cracker and cookie cases, deck and port lights for boats, mixing slabs for bread and pastry making, mixing slabs for chemists and druggists, partition work of all kinds, window ventilators, rough glass for floors, sky lights, sidewalks, etc., mirrors of all kinds and modern store fronts. The economy, comfort and beauty of plate glass is emphasized.

NEW TARIFF AFFECTING PRICES

(Continued from page 72.)

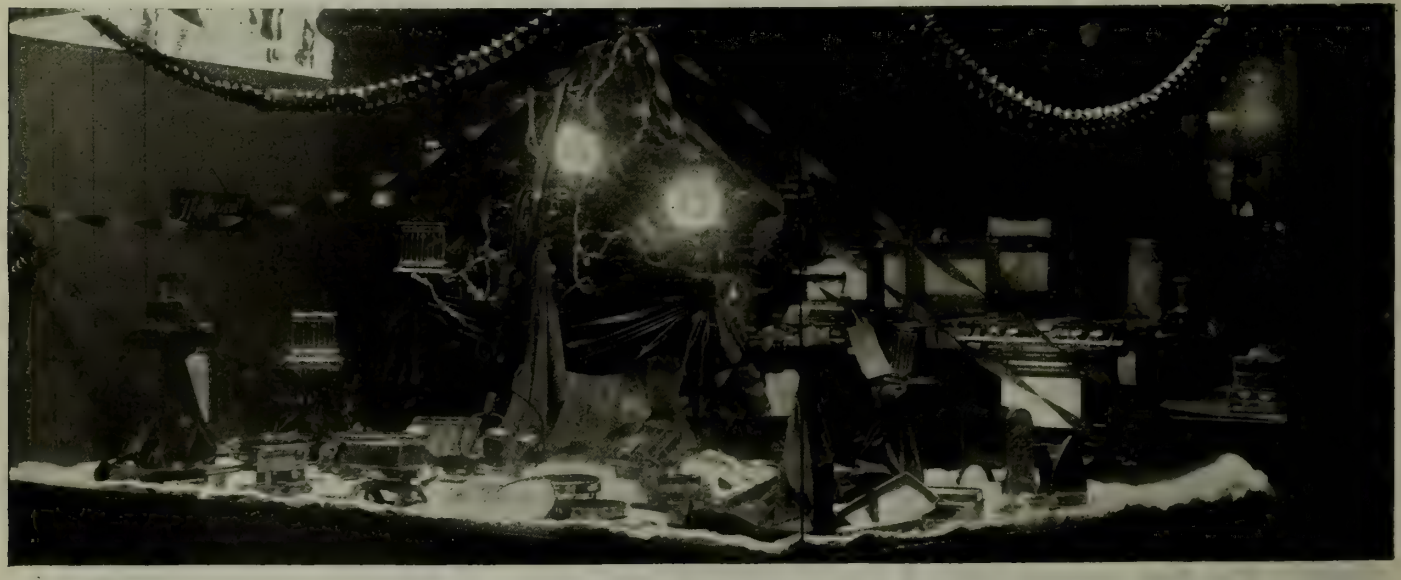
sheets in strips, valued at $771,104. Copper in blocks, pigs and ingots came in as follows: United Kingdom $6,636, Germany $8,131, United States $778,094, and copper in sheets, strips and plates, United Kingdom $5.890, Germany $323, United States $718,956. From the United Kingdom came Canada plates, Russian iron and terne plates and rolled sheets of iron and steel, valued at $498,631. Brass in blocks and pigs were imported as follows: Germany $2.367, United States $232.831. Brass tubing imports were as follows: United Kingdom $67,987, Belgium $6,595, Germany $29.923, United States $313,836. Copper tubing imports were United Kingdom $25,108, Germany $41,621, United States $120,490. From the United Kingdom came tin plates and sheets valued at $684,947, and from the United States at $2,859,061, and tin in blocks, pigs and bars as follows: United Kingdom, $782,-619; Straits Settlements, $338,193; Germany, $4,806; United States, $866,014.

Big Gains Showing in Electrical Business

Insistent Demand From All Over the Country for Electrical Labor-Saving Devices in the Home-Revival of Building Offers Splendid Opportunity for Hardwaremen to Sell Electrical Fixtures

THAT there is big business ahead for hardwaremen in electrical utilities and electrical fixtures is the opinion of those in close touch with the electrical development that is going on all over Canada. An absolutely legitimate field, in which many hardware men are already making good profits, is wide open to the trade, with a volume of business which is bound to increase every year. There is not only a lot of good business to be had now, but with the steady extension of electric lines into the rural districts, the purchase by farmers in outlying sections of their own power plants, and the general and insistent call for more and more labor saving appliances in the homes, the business has a future that is rosy indeed. Many American firms are predicting that the business in appliances and fixtures is going to rival that in motors and supplies, which runs into many millions annually. If this is true in the States it will be equally true in Canada, and is already apparent in the demands that are being made upon the electric power companies for more and still more power to take care of the increasing loads.

Demand for Fixtures



For the past four years, owing to conditions and restrictions, electrical development has been held back. It is still held back, but not because of restrictions. The situation at present revolves supplies of materials with which to fill around the inability to get sufficient orders for equipment. In Ontario there are a number of requests in for new power lines and extensions to power lines. Some of these will not be proceeded with for two reasons. One is the difficulty of obtaining equipment and another is the high prices, not only of equipment, but of the labor required to construct the lines. Some of the lines will go ahead this year. Others will be held back pending lower costs But they will be built sooner or later and in the meantime new projects are constantly being developed. Those who are in touch with the situation in those districts where it will be impracticable to build power lines declare that there is a noticeable increase in the sales of home power plants. People want electricity and they are going to have it, even if they have to put in their own plant. Every plant of this kind that is put in, and there are many of them being sold all the time, means just that many more prospects for the hardwaremen.

Farmers are Big Buyers

The farmers, all over the Dominion, are getting to be big buyers of electrical devices. Many of them now light their homes and their stables by electricity, and in addition have provided for their wives' taking advantage of the power by getting electric washers, electric cleaners and many other electrical appliances. The number of farmers enjoying these comforts is growing far faster than those not in touch with the sales have any idea. And those in the trade state that they will continue to grow because electricity has demonstrated beyond any question of doubt that it is a real servant, and does its work quickly and economically.

Tell One Another

Electrical devices very often sell themselves. They are obviously so efficient and so simple that anyone can see their value. And people have not been slow to appreciate the value of a helper of this kind, especially those who have been having trouble in getting hired help. No woman who has ever used an electric iron, or an electric washer or an electric vacuum cleaner ever wants to go back to the old methods. She is not only satisfied with her electric helpers but she is a tireless booster for them among her friends. This is perhaps one of the main reasons why electric goods are selling so fast. It is also one reason why so many hardwaremen have been quick to see the opportunity and take advantage of it. No merchants come into closer personal touch with the homes than the hardwaremen, and when they find a demand for goods that will render real service in the homes they are right there to look after all the business that is offering. Electricity has, perhaps, done more in the past ten years to make the homes of Canada better and more comfortable places than any other agency. It is also doing more to take the drudgery out of housework than any other agent. Not only this but it has shown people miles out in the country and away from power lines that they can have at small cost all the electrical conveniences that are to be found in the

An attractive window display of electrical goods always carries a wide appeal to the buying public, especially to all home-makers. Just now it has an especially seasonable value, as thousands of dollars' worth of electrical utilities are being purchased as gifts for June brides. The above display, which includes such lines as toasters, irons, grills, heaters and similar useful devices, offers many suggestions to a large number of prospective buyers interested in obtaining at moderate prices something not only useful and serviceable but attractive looking.

most expensive city homes. Is it any wonder then that the demand for electrical goods of all kinds is growing by leaps and bounds?

Sell Many Fixtures

Because building has been held back for nearly five years the hardwaremen have not been able to do anything like a normal trade in fixtures. Now, however, with the building all over Canada showing a steady increase there is going to be some splendid chances for business. Every home that is built, almost, offers more or less prospects for fixtures. Certainly every home that has electricity in it offers prospects for more and more business. The mail order firms have been making a big drive in the electrical business of all kinds, both fixtures and utilities, and they have got results. The hardware men, however, have been handling a big share of the trade, selling more in the aggregate, it is stated, than either the electrical dealers or the mail order firms. The hardwaremen now are one of the big factors in the distribution of electrical goods and they are steadily increasing their sales.

Sees Big Opportunity

"There are some splendid opportunities for the hardware dealers to develop electrical business," said C. H. Willson, president of McDonald & Willson, Toronto. "There is a big and steadily growing demand in all parts of the Dominion for electrical utilities such as washing machines, vacuum cleaners and so on, and also for electrical fixtures. Owing to conditions during the past four years there has been nothing like the opportunity for selling electrical fixtures that there will be from now on. With the revival of the building business there will be splendid chances for the hardwaremen to sell fixtures. They handle general supplies, sockets and so on, and handling electrical fixtures is a logical development. People all over the country who are building houses will require a lot of electrical fixtures and equipment, and there is a splendid opportunity for the hardwareman to get this business. It is a perfectly legitimate class of business for the hardwareman to go after. The mail order firms sell thousands of dollars' worth of fixtures every year to people all over the country, who buy from the mail order houses and then get a local electrician to put them up or put them up themselves. If the hardware dealers will go after this business it is theirs and they should go after it because it carries a good profit. it is a nice trade to handle and the fixtures make an attractive showing in the store.

People Demand Them

Mr. Willson continued, "Everywhere there is a steadily growing demand for electric utilities. This demand is bound to increase. Every home in which there is electricity is a prospect for an electric washer, a vacuum sweeper or some other device. The hardware man has an exceptional chance to get this business because he has a store and show windows and is usually very close to the people personally. Many dealers are not getting the results they should from electric appliances because they do not go after business the right way. For instance a farmer drops into a store to get a few pounds of nails, and while he is waiting for them perhaps he sees an electric washer out on the floor and says, "Nice-looking machine, that. Suppose it is a pretty good worker." The hardware man sometimes, instead of following up the interest aroused by the machine and showing the man how it works and what it will do, says, "Yes, that is a nice machine, it would cost you about $100." In saying this just that way, the dealer may cause the prospective customer to lose interest in the machine because he thinks it is out of his reach on account of the price. If the dealer had shown him that the machine would save hundreds of dollars in his home by the efficient service it would render, that it would save his wife endless drudgery and also that the machine was obtainable on a contract by which small payments could be made, he would have proceeded along lines that would in many cases result in a sale being made.

There is nothing the hardwareman has in his store that will prove of more real value in most homes than a first-class washing machine.

Sell Intelligently

"It is a business though, that must be handled in the proper way," said Mr. Willson. "The dealer should make the best use he can of his store and window displays. He should not be afraid to advertise and he should not be afraid to make use of every chance he has to let people know he is handling washers. One way to help get business is to put on demonstrations. Another is to send out literature to those who are likely to be interested. There is a lot of good business to be had in washing machines but it must be gone after. Some dealers could sell many more machines if they would extend credit to responsible people, of course. There need be no risk whatever in doing this provided the hardware dealer is satisfied about the party. Many people will buy machines if they are allowed to make small payments who would not care to pay the full amount down. They do not mind paying the additional per cent. which will more than take care of the extra cost of carrying the credit.

A Big Demand

"There is a big demand from the farmers," Mr. Willson stated, "for electrical labor saving equipment of all kinds, and it is going to be a lot bigger. In Ontario the electrical lines are being extended to all parts of the province. In the Northwest, where there is no such power available, we find a large increase in the sales of home power plants. This business is growing fast and it brings with it the sale of utilities as we supply connections and equipment by which the farmers who have their own power plants can connect up with the washing machine or other devices.

Will Boost Demand

"Never in the history of the business," Mr. Willson pointed out, "has there been such an advertising campaign as is now being put on by makers of washing machines and other appliances. In the big American magazines they are using pages of space each issue. This is bound to stir up an enormous interest on the part of the buying public and this is being reflected in Canada. We can notice more results now than were apparent a year ago. People know about a washing machine and what it will do where they didn't before. The more advertising that is done and the more machines that are sold will automatically increase the general interest. Those who have bought will tell others about the good results obtainable and thus an ever widening circle is created. The sooner the dealer takes advantage of

(Continued on page 77.)

DEVELOPING THE SPORTING INTEREST OF A TOWN

Out in the town of Souris, Manitoba, F. & J. Shields, an enterprising firm of hardware merchants, have taken the lead in the sale of sporting goods in the face of competition by several other stores by using aggressive methods.

Perhaps they have done more to establish themselves as the "official" sporting goods house of Souris by displaying schedules of athletic tournaments on their front windows, than by any other means. There is no sportier town in the West than this. It has its baseball and football leagues, its tennis tournaments, its lawn bowling and its aquatic sports in summer, to say nothing of its winter sports, and wherever possible the Shields hardware firm gives zest to the competition by pasting conspicuously against the inside of their windows a list of the winners in the play-down, together with a schedule of the events still to come. These lists are neatly typewritten, and are kept up-to-date, although there are constant changes to be made. The window in which these lists usually appear is most of the time dressed with sporting goods.

Importance of Trade Mark; History

What It Is—Fraudulent Infringement Criminal Offence—Means of Protection Provided —Recognition Being More Widely Given—Value Hard to Estimate

MORE and more the value of the trade mark is being recognized. This is brought home to the manufacturer and jobber by the retailer, who is demanding just something more than merchandise. The merchants of to-day are demanding goods which they can stand back of and guarantee. Manufacturers are coming to a greater realization of this, although there are many in Canada as yet fail to appreciate all that the trade mark might stand for.

What is a Trade Mark?

The term "trade mark" denotes a distinctive mark or device showing that the artiele to which it is affixed is manufactured or sold by a certain house or firm. Recent statutes read that a trade mark must consist of or contain at least one of the following essential particulars:—

1. A name of an individual or firm printed, impressed or woven in some particular and distinctive manner.
2. A written signature or copy of a written signature of the individual or firm applying for registration thereof as a trade mark.
3. A distinctive device, mark, brand, heading, label or ticket.
4. An invented word or words.
5. A word or words having no reference to the character or quality of the goods, and not being a geographical name.

Fraudulent Infringement Criminal Offence

There are many points of interest in connection with the use or misuse of a trade mark. It is significant that no action can be brought for the infringement of an unregistered trade mark. For an ordinary infringement the remedy consists in damages and an injunction. But fraudulent infringement is a criminal offence, punishable with fine and imprisonment, besides forfeiture of the goods in respect of which the offence has been committed. Foreign goods bearing a trade mark in use in the United Kingdom may not be imported unless the trade mark is accompanied with a definite indication of the country in which the goods were produced. As the right to a trade mark is always the exclusive right to use it in connection with a particular class of goods, it can be assigned or transmitted only in connection with the good-will of the business concerned in making those goods. It is determinable with that good-will.

Right Dates Back Only 50 Years

From the earliest times almost it has been the custom for merchants to distinguish the goods of their own manufacture from those of their competitors by affixing to them some special symbol or device, by way of trade mark. It is only since a comparatively recent date than an exclusive right to a particular trade mark has come to be recognized by the courts as property capable of being legally protected against infringement. It is only really within the last fifty years that this right has obtained statutory recognition and the use of trade marks been made the subject of legislative enactment.

This is perhaps all the more surprising in view of the early attention bestowed by the legislator upon two other important species of "intellectual" property, viz., patents and literary copyright. More than a hundred years after the famous Statute of Monopolies (1624) and eight years after the passing of the first Copyright Act (1734) we find Lord Hardwicke, the then Lord Chancellor of the United Kingdom, refusing to grant an injunction at the suit of a maker of playing cards to restrain the defendant from manufacturing and selling cards bearing the counterfeit of the plaintiff's work. He did so on the ground, among others, that he knew of no instance of the granting of an injunction to restrain one trader from using the same mark as another. He held that to impose such restraint would be fraught with mischievous consequences. This observation, however, he qualified by the remark that if it were done with fraudulent design or to draw away customers from the rival trader, whose mark is thus appropriated, that might be sufficient to maintain an action.

About the earliest authentic instance of a successful attempt to restrain trade mark piracy was the case of Sykes vs. Sykes in 1824; fraud was made the basis of the action. Deceit and fraudulent misrepresentation were causes of action well known to the common law. This was presumably the form of action most nearly suited to the circumstances of this case. If the merchant, despoiled of his trade mark, could not bring his grievance under the head of fraud, there was no other form of action available at common law.

A concurrent jurisdiction in cases of this kind was also exercised by the Courts of Chancery. Their ability to grant an injunction restraining the continuance of a fraud proved a very valuable supplement to the award of damages—the only form of redress obtainable at that time in the common law courts. However, it was shown that even the Chancery judges for a time retained the doctrine that fraudulent intention was a necessary ingredient in an action for infringement of trade mark, and unless the plaintiff first proved his case in the common law courts they refused to grant an injunction.

Toilsome Determination of Right

It has taken some time to come, but gradually the view has gained ground that the owner of a trade mark has a genuine proprietary interest in his mark, which he is entitled to have protected against invasion and infringement like any other right of property. A case which definitely established the principle that a trader has a good right of action against any person who wrongfully assumes his trade mark, even in the absence of proof of fraudulent intent, was that of Millington vs. Fox, decided in 1834. The decision in this case signalized the full recognition, at least in

POINTS IN REGISTERING A TRADE MARK AT OTTAWA

There are two kinds of registrations or copyright that apply to trade marks, the one for "special" lines, the other a "general" one.

A special trade mark is the exclusive right given to a firm to use that special name or brand or device of any kind for one line of goods.

A general trade mark is the right given to a firm to use its name or trade mark or brand exclusively for any number of goods which it may turn out or handle, and at the same time prevents any other firm from using this name.

Registering.—The cost of registering these trade marks with the Dominion Government under the Patent Branch of the Department of Agriculture is $35 for a special and $40 for a general. The Government cost is $25 and $30 respectively, a patent attorney usually being paid $10 for the clerical work. In the case of drawings being made an extra charge is made.

Priority.—As a rule priority decides which firm shall have the right to a certain trade mark. If a firm shows that they have been using a certain trade mark for a few years and have built up a business on the basis of that, but have omitted to have it registered, no other firm, even of it applied first, would be allowed to retain a copyright on this name. The firm that can prove priority in use can by issuing an injunction stop the use of their trade mark by the second firm.

Foreign Firms. — Where United States or British firms do not register their names in Canada and a Canadian firm appropriates the brand name, it is usually a simple matter for the outside firm to get an injunction by showing that their brand has become well known and that they would suffer a hardship by the use of it by a Canadian firm. There would be no objection in regard to making use, however, of a trade mark or brand that has been used for one line of goods and adapting it to another line.

Chancery courts, of trade marks as property capable of legal protection.

The fusion of the principles of common law and equity, effected by the Judicature Act of 1873, brought the common law courts into line with the Chancery. From that date the plaintiff was no longer required to prove fraud, but merely that the "get-up" of the defendant's goods actually did mislead or was calculated to mislead, the public into believing them to be the goods of the plaintiff's manufacture.

Means of Protection Provided

The Merchandise Marks Act of 1862, and later the Trade Marks Registration Act of 1875, were passed to provide adequate means for the protection of the trade mark. The Trade Marks Registration Act of 1875 introduced a new era in the history of trade mark law. The principles which it formulated have in the main been adhered to up to the present day. It was designed to afford protection to the trader on the one hand, and to the public on the other, against the abuse of trade mark rights.

A register of trade marks were established and placed under the control of the Commissioner, afterwards Comptroller, of Patents. Registration was not obligatory, but it was made a condition precedent to the bringing of an action for infringement of trade mark. After five years, registration was treated as conclusive evidence of the registered owner's title to his trade mark. In the interest of the public, on the other hand, the Act required the publication of all registered trade marks and their definite appropriation to certain classes of goods, so that any member of the public might know, by inspecting the register, the precise features and scope of any particular trade mark for which an exclusive right of use was claimed. The Patents, Designs and Trade Marks Act of 1883, expressly barred the use of geographical names and words describing or commending the quality of goods. "Bovril" was allowed to pass muster, but a word such as "Triticumina," as applied to wheat-meal bread and biscuits, was rejected as descriptive.

By the Trade Marks Act of 1905 a trade mark was defined by statute of the British Parliament as: "A mark used or proposed to be used upon or in connection with goods for the purpose of indicating that they are the goods of the proprietor of such trade mark by virtue of manufacture, selection, certification, dealing with or offering for sale."

A trade mark is not in any sense a guarantee of quality. It warrants neither excellence nor uniformity. But the manufacturer, ever mindful of the value of having a trade mark associated with these qualities, as a rule strives to have his goods known because of their excellence and uniformity.

Recognition Given

Towns, cities and provinces, etc., are all coming to a recognition of the trade mark. Whereas the mark which might be adopted by a city is strictly not a trade mark, however it indicates that the goods bearing it have come from a particular locality or made by certain people, and that is a point of interest. It was only last week in Toronto, in addressing the members of the Canadian Manufacturers' Association, that Lloyd Harris made reference to what he considered the necessity of Canadian manufacturers adopting a uniform trade mark for Made-in-Canada goods. It is more than likely that the suggestion will be followed up and some action taken in the near future.

Value Hard to Estimate.

The value of a trade mark is pretty difficult to estimate. Some captains of industry place more real value on a celebrated trade mark than they do on the dollars and cents in a plant. The feeling which these men have is that the trade mark represents their good name; that it stands for something besides just a stamp on a piece of merchandise. Back of the trade mark which this type of manufacturers utilize is more or less an ideal. They are building plants to turn out goods which will measure up to a standard and not down to a price. Therein is one of the greatest reasons for the adoption of a trade mark and making same stand for goods of highest quality.

The president of one corporation, in a speech at a celebration of its success, made the statement that each letter of one of its word marks was worth $1,000,000. The value of the trade marks of the American Tobacco Company, as shown by the dissolution proceedings in the United States Supreme Court, was estimated at $45,000,000. That represented one-fifth of the assets of this great corporation, which is most decidedly a big portion to be in trade marks unless the value is there. It is really not surprising that such a value was placed on its trade marks, for it had been the policy in the formation of that organization never to take in a competitor unless he had a valuable mark to identify his goods.

WHAT THE CANADIAN GOVERNMENT DEEMS TO BE TRADE MARKS

The following extracts from the Canadian Statutes bearing on trade marks from the "Act Respecting Trade Marks and Industrial Designs," is of interest from a Canadian standpoint.

"5. All marks, names, labels, brands, packages or other business devices which are adopted for use by any person in his trade, business, occupation or calling, for the purpose of distinguishing any manufacture, product or article of any description manufactured, produced, compounded, packed or offered for sale by him, applied in any manner whatever either to such manufacture, product or article, or to any package, parcel, case, box or other vessel or receptacle of any description whatsoever containing the same, shall, for the purposes of this Act, be considered and known as trade marks."

"16. A general trade mark once registered and destined to be the sign in trade of the proprietor thereof, shall endure without limitation."

"17. A specific trade mark, when registered, shall endure for the term of twenty-five years, but may be renewed before the expiration of the said term by the proprietor thereof, or by his legal representative, for another term of twenty-five years and so on from time to time; but every such renewal shall be registered before the expiration of the current term of twenty-five years."

BIG GAINS SHOWING IN ELECTRICAL BUSINESS

(Continued from page 75.)

this the sooner he is going to start his circle of sales which will widen steadily. The hardware dealer should realize what this means to him and make the most of his opportunity. It will show his customers that he is up to date and that is a thing that all people like about a store. If Mrs. Jones goes down town and sees a washer in Smith's hardware window she is almost sure to go and tell at least a dozen of her friends that Mr. Smith has one of those washers that were advertised in the magazines or newspapers last week. The general impression goes around that Smith is an up-to-date dealer and in this way he can cash in on an enormous lot of free advertising. Aside from all this though there is a splendid opportunity for the hardware man in handling all kinds of electrical supplies and fixtures as he has the show windows and store in which to show the goods. Just in this point alone the hardware man has a big advantage. If he will follow it up by aggressive sales work and constant sales talk of the right kind he can turn over a lot of goods. The scarcity of help and the need of labor saving devices in the homes presents an opportunity that is a real one. It is not temporary but is going to grow bigger all the time."

VALUE OF TRADE MARK AS SALES PRODUCER

(Continued from page 70.)

some paints, and I told him all about the line we handle and the guarantee that went with them. He bought some paint, too, and since then has been in for many other articles."

With the retailer himself lies very largely the building up of a business of a permanent nature on goods carrying a trade mark. Not just a mere name, but goods back of which your name can be linked with the manufacturer in a guarantee of absolute satisfaction. It is by handling merchandise of this nature that a solid foundation can be laid for your success. It is goods which tend towards permanence, which win the customers' approval, that the merchant should link up his sales program.

Protecting the Home Town Front

The Part That "Mud" Plays in the Success of a Town—The Four Important Factors in a Town's Growth—Measuring Miles by Minutes—Getting the Right Sort of People to the Town—The 100 Per Cent. Citizen

FRANK STOCKDALE, the noted authority on merchandising subjects, is becoming better known in Canada every year. He has delivered lectures in a vast number of communities in Canada during the past year, and a multitude of merchants are looking to him to throw some light on many vexed problems of merchandising. Among the places he lectured at recently was Regina, where he delivered a course of four lectures in connection with the convention of the Retail Merchants' Association, Saskatchewan branch. That many of those who were not able to be present at that convention, and have been unable to hear him at other places, might have some of the benefit of these addresses, HARDWARE AND METAL sent a special representative to this convention to take a report of these addresses. The first of these articles appeared in a recent issue of this paper. In succeeding issues we will publish the balance of this series.

The next lecture deals with the subject, "Salespeople of To-day and To-morrow." Mr. Stockdale in this lecture makes an interesting distinction between "selling" and merely "waiting on" a customer. The question of service, of viewing the sale from the other side of the counter, handling the difficult customer, are among the interesting questions that are dealt with in this lecture.

"IN my opinion the day has arrived in most places, and will arrive in all places, when the competition to which you must give your attention as a part of your business will take you outside of your own stores and hook you up in the ranks of the protectors of the home town front. Competition is no longer between individuals exclusively. in many places the main competition is not between individuals but between towns. The town problem is one you will be interested in when you know what it means.

"In the State of North Dakota is being carried on a campaign, and the object of that campaign is to promote the interests and the welfare of the communities of that state as a whole. In the United States there are at least 10,000 declining towns. In Illinois between 1900 and 1910 there were 357 incorporated cities and towns that actulaly went backward in that period. These centres had fewer people in 1910 than in 1900. That is an indication of an almost universal condition.

"The whole of Canada is going forward in population, but we have this problem on our hands. I like to compare the community of to-day with the family of yesterday. The family of yesterday had the spinning wheel in the home. Now we have in the community a man responsible for bringing clothing to the homes. Yesterday people raised and ground their own cereals, whereas to-day the retail grocer is responsible for supplying foodstuffs. Yesterday the man cut his wood or dug the mine, whereas to-day the coal man provides these fuels. Things that used to be done in the home are being done in the community by other people. The communities are the big families to which we belong, and the trouble is we do not recognize our relationship to that family. We look upon ourselves as individuals, but we have an inter-dependence with provincial and national life. A house divided against itself cannot stand. That is historical. A community divided against itself cannot prosper.

Fewer and Bigger Towns

"There are tendencies going on towards the centralization of population. In my opinion we are going to have fewer towns and bigger towns. Community building is a real problem.

"The greatest ally of the mail order house is spelled with three letters, "MUD." In your town two things are necessary to make good towns. Good roads and good stores. Good roads make a poor town, unless it has good stores in it. Good stores don't make a good town, unless there are good roads in an agricultural community. The town with the best roads and stores will be the best town.

"Things That Make a Good Town Internally"

"A town must be a good place to live in and a good place to make a living in. One of the problems of the Canadian Northwest is to make your towns a good place in which to live. The natural advantages of that country are unsurpassed."

The following four points were emphasized by Mr. Stockdale as being the essentials of a good town:

Production or manufacture.
Transportation.
Trade.
Civic Welfare.

"People are congregated in a town for trade," continued Mr. Stockdale. "If the prosperity growing out of that trade is not directed along the lines of civic welfare, the town is not much good. Water supply, sanitation, streets, sidewalks, schools, entertainment features are the essentials of civic welfare. In all new countries the problem is to make them good places to live in. People make values and the country wants people.

Town as Big as the Territory Served

"The single taxers say 60% of our values are social values or community values brought about by the coming together of people. There is a lot of truth in this. The average man does not realize what it means to bring people to his town, or what it means for people to go out of his town. The farmer opposes the interests of the farm, because of the imaginary Chinese wall built around the town. How big is your town? You will say 200, 300, or 1,000. Your town is as big as the trade territory that you supply. If you reach out fifty miles, that is the size of your town. You want to protect that town front. The fronts will overlap a great deal.

"One farmer thinks the town people are a nuisance and sends away for everything he wants. This farmer's land is worth $100 an acre, compared with $20 for better land in another section not so close to town facilities. He gave for his reason for not moving to the better and cheaper land the fact that he had had enough pioneering. This farmer's land was worth five times the price of better land, because it was near a town.

"You cannot pioneer in a crowd. The farmer's wife has social connections in town, the children attend the town schools, the son works in a store in town. These things enhance the value of the land located near the town, and the farmer owes the town something for increasing the value of his property.

"The bigger the town is, the farther

the influence on farm property extends. Some people vote down school improvements, but this is a serious matter. The town with good schools and churches draws people. This is the basis of community development.

Attracting the Right People

"How can you induce the greatest number of people to live in your community? There are two kinds of people that are attracted to communities; one is the old man who has made his money. The other is the young man who wants to make his money. One has fortune and the other has energy. These are the shifters. Communities of the East are losing to the communities of the West the men of this class. Old men go to California, because it is a better place to live in. The man who makes money in this country gets out of this country unless he gets good roads. There are 75,000 people from the State of Iowa in the Iowa Society of California. There are 125,000 Iowans in California. They are not there for the climate, as most people think. California has had its climate for a long time, but it is only recently that the people have got the habit of going out there in such numbers. One official of the railways, who investigated the matter, said people were going to California for good roads. One farmer in California stated that he spent most of his time motoring while in California, and that he spent $6,200 in five years on car expenses.

"The climate makers of California are the drawing card. The spirit of the people of California makes it what it is. They are real boosters in Los Angeles —the city advertising built. They back their boosting with their money too. The booster who does not back it with his money is a four-flusher.

"Good roads are needed to hold the people, and good roads are a factor that is developing and causing this evolution in our communities.

Measuring Miles by Minutes

"The way to measure distance is not by miles, but by minutes, between towns. Thirty-five miles may be forty-five minutes, or four hours. Good roads will develop the community, and these good roads are going to eliminate a lot of the small towns. There are just two things a small town can do—either grow into a big town, or get off the map. Small-town people get busy.

"If a town has good transportation it is a good retail town. The support of the town comes from the dollars that go over the retail counter. Thirty cents of every dollar goes to pay telephone, out of every dollar and goes into circulation.

"Retailers are the backbone of the community from an economic standpoint. It is not what a man earns—that is an individual asset, but what he spends—that is a community asset."

A 100 Per Cent. Citizen

At this point Mr. Stockdale outlined the following as a 100 per cent. citizen:

Man who works in community, 10 per cent.

Man who lives in community, 40 per cent.

Man who spends for all he needs in community, 50 per cent.

"Money must go over the retail counter before you can have civic welfare," said Mr. Stockdale, continuing. "The trouble with the average community is 'smugosity' (a word coined by Mr. Stockdale to express the self-centred composure of some communities). Smug meaning self-satisfied,and ossified meaning bone.

"Ignorance is shown in modern community building. We adhere too much to individuals. The price of co-operation is sacrifice. You have to sacrifice some of the things you would have as an individual to have the things you would have by co-operation.

"What is the great improvement in city government, which we have had in the last few years? The commission form of government. You cannot wipe out a town instantaneously, but it is the slow fire of competition which does the damage. The war shows the value of unity of command, purpose and action. That is the secret of community building.

"Some towns furnish everything to make a real organization, but nobody is willing to furnish the time and energy. We have to get all the interests of the community together. If you are going to have a good community you must get individual responsibility. This co-operative work is a part of your business, not as a community duty. You help to gain by helping the other fellow to gain.

"If you want to live in the kind of a town
Like the kind of a town you like,
You needn't slip your clothes in a grip
And start on a long, long hike.
You'll only find what you left behind,
For there's nothing that's really new.
It's a knock at yourself when you knock your town.
It isn't your town—it's you.

"Real towns are not made by men afraid
Lest somebody else gets ahead.
When everybody works and nobody shirks,
You can raise a town from the dead.
And if, when you make your personal stake
Your neighbor can make one, too,
Your town will be what you want to see,
It isn't your town—it's YOU."

LONDON, ONT., RETAILERS' OUTING ON AUGUST 6

London, Ont.—The members of the London Retail Hardware Association will hold their annual picnic on Wednesday afternoon, August 6. A splendid program of sports is being arranged and no pains will be spared to make the outing the splendid success it has always been in the past.

Higher Tinplate Increases Can Prices

Will Mean Early Advances for Tin Containers—Most Plate Comes From States Now—Manufacturer Does Not See Import From England Possible for Months—Packers at Disadvantage

FRED R. Whittall, managing director of the A. R. Whittall Can Co., Ltd., Montreal, in an interview this week stated that the new tariff on tinplate will work a considerable disadvantage to various packers and manufacturers.

"In the first place," said Mr. Whittall, "the increase of duty is equal to an advance of five per cent. net, the new tariff being 12½ per cent. In view of the fact that nearly all the tinplate used in Canada comes from the United States, it will be necessary to pay this increased duty on all requirements, for there will not be any English tinplate on this market for at least six months, and in the meantime practically all of the packing will be completed for the year. All Canadian packers will be at a disadvantage.

The greatest hardship will be that to the packer of fruits, soups, etc. In the first place, the duty has been increased to 12 ½ per cent., and in addition to this the removal of the war tax on foodstuffs will increase the disadvantage of the Canadian packer to this extent, making competition much keener on such lines as may be placed upon the Canadian market by the United States packer, who will be benefited. He will be in a position to place his product here on a much more favorable basis than before.

Mr. Whittall, as above stated, does not believe that tinplate from the United Kingdom will be available for some time in sufficient quantities to make much difference in the way of price advantage.

Of course the users of tin cans for any purpose will have to pay more for them new. This will mean that paint manufacturers will have to expend at least an additional five per cent. for their containers, and this will have a direct bearing, as is obvious, upon the price of paint, varnish, stains, etc. It will be a factor in the firming of markets generally on all products put up in tin, and in many lines the effect will be an early one.

EDITORIAL COMMENT

EDITORIAL BRIEFS

WAS it a market change or just the weather man who is responsible for the "advance to higher levels" in thermometers these days?

CANADIAN manufacturers need to get together and establish a Made-in-Canada trade mark, in the opinion of Lloyd Harris, trade commissioner.

"ABSOLUTELY too busy to write an ad," was the headline used in the newspaper space used by one retail firm a few days ago. They at least keep their name before the people with last-minute news.

THE VALUE OF THE TRADE MARK

A GREATER appreciation on the part of the retailer is daily being shown in the value of trade-marked goods. Back of the goods must first come the retailer, for he is directly in touch with the user, so it is right that the buyer be discerning in the goods he secures to be handed over the counter to the customer. Trade-marked goods, then, which carry the manufacturer's name and guarantee, are assets to the retail merchant. True it is that sometimes cheaper merchandise is procurable, but the retail merchant will probably lose in one sale of goods that are unsatisfactory a customer whose purchases will offset the little difference in his buying cost many times over. Farmer, laborer, householder are demanding good goods—they are willing to pay a fair price and the merchant who is linking up his store sales program with trade-marked goods turned out by creditable manufacturers can cash in on this demand for the better class of merchandise.

THE VERY FIRST QUESTION

THERE is a lesson for every retailer in what Lloyd Harris of the Canadian Trade Commission has been telling the manufacturers since his return from Europe. The Commission went over to do everything possible to sell all the Canadian goods it could and Mr. Harris says it was handicapped right from the very start by not being able to give prices. Thousands of letters were received asking about goods and always the first question asked was "How Much?" This question is a universal one no matter where business is done. It is the very first thing that comes into the mind of the man or woman in whose mind the desire to buy has been created. The importance of always giving the price of goods shown in the window, in the store or advertised has been pointed out before in HARDWARE AND METAL. Merchants who fill their windows with goods in which no prices are shown are working under a handicap. Any number of people would like to buy but simply will not go into the store to inquire the prices, because they think they may be high, or because they think they may be forced to buy or for some other reason. As Lloyd Harris told the manufacturers, the price is a most important consideration and because he was unable to tell people in Europe how much the goods they inquired about would cost, the chance was missed for closing up a lot of good business right there. Just in the same way the merchant who does not let people know his prices is constantly missing a lot of opportunities for good trade.

AN EVER EXPANDING FIELD

PEOPLE all over the Dominion are alive as never before to the possibilities electricity offers in taking the drudgery out of many tasks. While Ontario is perhaps leading the way by showing the scores of uses to which electrical power may be applied, many of the other Provinces are following rapidly. Many requests for more power and for extensions in to the rural districts of Ontario are being received by the Ontario Hydro Power Commission. Requests of a similar nature are being received by other power companies all over the country. It will be impossible to proceed with all the work that is required this year for the simple reason that the equivalent cannot be secured. In some instances the companies are advising those asking for extensions that the present is not a good time to proceed with the work because of the difficulties in getting equipment and also because of the high prices. All this, however, is merely incidental. It shows which way the wind blows. People everywhere are learning that electricity is an efficient, quick and economical servant and in the next few years many millions of dollars will be spent in providing equipment and transmission lines so that it can be made to serve more people. Every one of these people will be potential buyers of all sorts of equipment, washing machines, vacuum sweepers and so on. Every one who has once used equipment of this kind becomes forever a "booster" for electricity and the sales

possibilities are truly unlimited. The hardware men of Canada have been fully awake to their opportunity and each year sees them handling electrical goods in increasing quantities. They are developing just as fast as the electrical business develops and that is very rapidly. It is quite safe to say that the hardware men are now one of the principal factors in the distribution of electrical goods. In many places they are handling far more electrical goods than the regular electric stores and many of the manufacturers would rather have their distribution through the hardware stores because they know from experience that the business will be handled aggressively. Electricity is here to stay and its development opens immense opportunities to the hardware men.

BUSINESS OUTLOOK GOOD

REPORTS from the big steel centres in the United States are that the agricultural implement makers and the automobile manufacturers are placing large contracts for future deliveries, many of them into 1920. This is an indication that large business is in prospect and also that supplies are not too plentiful. Automobile firms never in their history have had so much trouble in getting supplies as in the past few months. As a result they are away behind with all deliveries, while in the meantime orders continue to accumulate. One of the lessons many individuals as well as dealers have had impressed upon them this season is that too cautious buying may result in having to go without the goods indefinitely. It is not only in the auto business that dealers are without stocks. All over the country hardware men are complaining that they have placed orders for this or for that and that they cannot get the goods. With lots of business offering they are unable to fill orders promptly. The dealers who some months ago decided that business was going to be good and bought accordingly have not been disappointed. In fact in most cases they have found it far better than they ever expected. The general opinion of those in close touch with conditions in Canada is that business is going to be good right along and that this country has before it a future that is not surpassed by any country in the world. The spring paint season which is now closing has been with many firms a record-breaker. Sales have far surpassed even those of the pre-war days. Some weeks ago there appeared in HARDWARE AND METAL the view that paint dealers who were basing the spring campaign on the idea that sales were going to be good would find them good. This has been amply proven in the past month. What applies to paint applies to other lines as well. The dealer who sizes up the needs of his district carefully and then stocks to meet those requirements will have no trouble in disposing of the goods.

HAVE YOU ADVERTISING SLACKERS?

IS your store getting all the advertising it should? Not only newspaper advertising, but all the advertising because this consists of a lot more than newspaper space, valuable as newspaper space is. There are at least twelve ways in which your store can be well advertised besides using the newspapers and unless you are using them you have some advertising "slackers." One of your very best ads. should be your store windows and you cannot pay too much attention to them because they will produce results just in proportion to the care they get. Another big ad. for your store is your store display. Goods attractively displayed will not only sell, but people will tell others about them. Your whole store appearance is constantly telling people whether you are a good merchant or not. If the floors are not kept clean, the show cases immaculate, your windows properly washed and the sidewalks clean and if unsoiled tags are not used for pricing, all these things are advertising against you. No store has a better ad. than courteous service. This is one thing that people always remember and tell others about. Your delivery truck should be a good ad. for your business. Your stationery should be another. Many firms get good advertising out of enclosures sent out with monthly statements. Many others get a lot of publicity out of enclosures in every parcel sent out. Some firms use special wrapping paper, stickers or advertising tape. The matter sent out by manufacturers will frequently help materially in advertising your store. Circular letters are an effective and inexpensive way by which many firms get a lot of good advertising and good business. Another means of advertising that is often neglected by merchants is their telephone. This can be made to produce a lot of business if properly handled. Although each of these suggestions may seem relatively unimportant, the cumulative effect of them all means a lot of extra advertising and good business.

DIMINISHING FIRE LOSSES

THE fire loss for the United States and Canada for the month of April shows a decline of 25 per cent. as compared with the corresponding month of last year. The total loss during the first four months of the year was $94,024,925 compared with a loss for the previous year during the same period of $98,646,135 and $102,139,655 for the same period in 1917.

It is to be hoped that these figures represent a real change in conditions, for the enormous wastage of fire has been the disgrace of this continent. Even with these improved figures, this continent has an unenviable place of prominence as the premier waster in this regard in the world.

EVENTS IN THE TRADE

Business Changes

Toronto.—David Gluckman has purchased the hardware business of Wm. E. Smythe.

Lougheed, Alta.—Lee O. Shrouse and Fred Newberry have registered partnership in the Lougheed Hardware Co.

Wetaskwin, Alta. — Roulston Bros. are reported to have succeeded G. D. Wallace, Ltd., hardware and furniture.

New Firms

The Globe Metal Specialty Co., 75 Duke Street, Toronto, will manufacture vulcanizers, metal frame mirrors, smokers' sets and other metal goods. W. Stampleman will be manager.

Fire Losses

The nitrogen plant at Trenton, Ont., owned by a Chicago firm and formerly operated by the Imperial Munitions Board under the name of the British Chemical Company, was completely destroyed by fire.

Laval Industrielle, Limitee, Montreal, manufacturers of sheet metals, sustained a loss by fire.

Obituaries

The plant of the Imperial Oil Co., at Sarnia, Ont., was closed down on Thursday, out of respect for Richard Robinson, the firm's oldest employee, whose funeral was held on that day.

The death occurred at London, Ont., of Wm. J. Element, aged 85, for many years with the Imperial Oil Co. at London, and later in the builders' supply business.

Following an operation for appendicitis, the death occurred at St. Michael's Hospital in Toronto, of George R. Drury, foreman at the factory of the Sheet Metal Products Co.

Trade Notes

Henry Brierly, Toronto, hardware, has sold out.

The Gendron Manufacturing Co., of Toronto, will commence work shortly on the erection of a new factory.

The Brant Glass Co. plans to equip a factory at Brantford, Ont., for the manufacture of plate glass.

Ivan Cook and Wilbert Lendon have been taken into the hardware business formerly conducted by H. Lendon, at Leamington, Ont., and the firm name is now Lendon & Cook.

The Readman Coal Grate Co. has been registered at Grand Mere, Quebec, by Chas. Levack and Onesime Readman.

The Commercial Construction Company, Limited, has been organized and will have its head office at Sudbury, Ont.

The Goderich Mercantile Co., Ltd., recently organized at Goderich, Ont., plans to manufacture go-carts, baby carriages and small wheel rigs.

Work will be commenced shortly on a new five-storey warehouse building, 100x200 feet, reinforced concrete and brick construction, for Wood, Alexander & James, of Hamilton, Ont.

The rebuilding of the factory of Wm. Cane & Sons, Ltd., which was wrecked by fire and explosion at Newmarket, Ont., will be commenced shortly. The bursting of a boiler caused damage that will amount to about $200,000, and the death of five persons.

Messrs. Baldwin, of Swansea, Wales, have completed negotiations by which they will establish a steel plate rolling mill on the site of the British Forgings plant. The estimated expenditure will be from $2,000,000 to $3,000,000.

The Quaker City Chemical Co., the Canadian branch of O. F. Zurm & Co., of Philadelphia, will be located in Hamilton, Ont.

The Board of Trade of St. Marys, Ont., is endeavoring to get M. D. Pendergast, of Sarnia, formerly of the Sarnia Woven Wire Fence Co., to locate a plant at St. Marys for making fencing.

The secretary general of Holland's Industries Fair, which will be held at Utrecht, is sending out literature to Canadian firms regarding the exhibition and is also offering the services of its comercial intelligence department for those who wish to obtain agencies.

Robert Horne, who has been in the hardware business at Sudbury, Ont., for twenty years, has disposed of his interests to O. Hickson, of Montreal, a former manager of the retail department of the Cochrane Hardware. Mr. Horne plans to visit his old home in Banffshire, Scotland, during the Summer.

Montreal News

Mr. Andrews, representing the Remington U-M-C Co. of Windsor, Ontario, called on the Montreal trade this week.

Colonel Robert Starke, of Starke-Seybold, Ltd., Montreal, was in Toronto for the semi-annual meeting of the Canadian Wholesale Hardware Association.

W. S. McLennan, general sales manager Brandram-Henderson, Limited, Montreal, was in New York on Wednesday and Thursday of this week.

W. S. Fallis, managing director of the Sherwin-Williams Co. of Canada, Ltd., was a visitor to Toronto over the week-end, returning to Montreal the first of the week.

George C. Davis, general manager Frothingham and Workman, Ltd., Montreal, was in Toronto for the meeting of the Canadian Wholesale Hardware Association, held this week.

Alex. Prudhomme, president of the Metal and Hardware Association, Montreal, attended the semi-annual meeting of the Canadian Wholesale Hardware Association at Toronto this week.

W. Beverley Robinson, president, and H. Kearns, managing director, B. & S. H. Thompson and Co., Ltd., Montreal, returned several days ago from an extended trip to the United Kingdom and European centres.

Jos. Dowling, manager Caverhill, Learmont and Co., Montreal, spent several days in Toronto this week. Mr. Dowling, as president, was in attendance at the meeting of the Canadian Wholesale Hardware Association.

The staff and employees of the Sherwin-Williams Co. of Canada, Ltd., Montreal, are holding their annual picnic this Saturday at Lavaltrie, down the St. Lawrence from Montreal. The picnicers reach the grounds by boat.

Winnipeg News

J. B. Stallwood, of Maryfield, Man., spent a few days in the city on business and reports business to be very good.

A. G. Irwin, of Swan Lake, Man., has sold out his hardware business and spent a few days in the city before leaving for Vancouver to visit his brother. He may later open up a store on the coast.

A. L. Stelck, of the Sutherland and Stelck Hardware and Implement Company, Dauphin, Man., spent the week in the city on business and reports crops in good condition and prospects bright for a good year's business.

C. E. Houlding, of Saskatoon, Sask., was a visitor in the city during the week, and reports that indications at the present point to good business. When asked about the strike Mr. Houlding stated that it had not affected business in the least and had gradually fizzled out.

Incorporations

Mills (Barton) Hardware, Limited, of Hamilton, Ont., has been granted an Ontario charter.

Dominion Stores Ltd., head office Toronto, capital $20,000, plans to deal in implements and machinery in connection with carrying on the business of general merchants.

General Combustion Co., of Canada, Ltd., head office Montreal, capital $100,000, plans to manufacture and deal in furnaces and heating apparatus, using electricity.

J. E. Fournier, Ltd., head office Montreal, capital $200,000, plans to manufacture and deal in leather goods of all kinds.

Canadian Safety Fuse Co., Ltd., head office Montreal, capital $300,000, plans to manufacture and deal in merchandise of all kinds.

Motor Mart, of Montreal, Ltd., capital $100,000, head office Montreal, plans to manufacture and repair motor vehicles of all kinds, and also to deal in accessories.

Olds Motor Works, of Canada, Ltd., capital $10,000, head office Oshawa, Ont., plans to manufacture and deal in trucks.

Pilot Steel & Tool Co., Ltd., head office Montreal, capital $15,000, plans to manufacture and deal in metals and minerals.

Gates Refractories, Ltd., head office Montreal, capital $250,000, plans to manufacture and deal in terra cotta, tile, stone and wood and metal products.

Hydro Chemical Co., Ltd., capital $200,000, head office Montreal, plans to manufacture and deal in polishes, lacquers, oils, varnishes, turpentine, etc.

Ames Holden Tire Co., Ltd., capital $3,000,000, head office Montreal, plans to manufacture and deal in automobile tires and accessories.

Galt Brass Co., Ltd., capital $500,000, head office Galt, Ont., plans to carry on a general business in brass products.

The British American Oil Co., Ltd., has been granted permission to increase its capital from $1,500,000 to $3,000,000.

The Redmond Co., head office Montreal, capital $600,000, plans to manufacture and deal in mitts, gloves and furs.

Independent Auto Service & Sales, Ltd., capital $15,000, head office Ottawa, plans to manufacture and deal in autos, motor trucks, tractors and accessories.

Paint & Varnish, Ltd., capital $100,000, head office Montreal, plans to manufacture and deal in paints, varnishes, glass and lead products.

BRUSH MAN WEDS

A wedding of interest was solemnized on June 11th at Trinity Church, St. John, N. B., when Roy C. Lewis, of T. S. Simms and Co., Limited, brush manufacturers, St. John, N.B., was married to Miss Elsie Jean Nevins, of the same city. Mr. and Mrs. Lewis, after receiving the congratulations of friends, entrained for Montreal and other points, and upon their return will take up residence in the Earle Apartments, Lancaster.

Appointed Director Dominion Coal Co.

George Caverhill, head of the firm of Caverhill, Learmont & Co., Montreal, wholesale hardware, was elected a director of the Dominion Coal Co., Ltd., Montreal, a few days ago. The choice of Mr. Caverhill was made to fill the vacancy on the board caused through the death of W. D. Matthews, of Toronto.

GEORGE CAVERHILL

President, Caverhill, Learmont and Co., Montreal, who was elected a Director of The Dominion Coal Co., Montreal, this week.

DOMINION SHEET METAL CORPORATION ADOPTS PROFIT SHARING PLAN

At a meeting of the board of directors of the Dominion Sheet Metal Corporation, Hamilton, Ont., a profit sharing scheme for the firm's employees was inaugurated.

It was decided to offer the employees preferred stock of the corporation at par, and also to give every employee who has been with the firm for six months a full week's vacation with pay. Hitherto vacations have been confined to the salary staff, but now all employees will enjoy the same privilege.

The offer of the 8 per cent. preferred stock is made on the following basis:

The number of shares allotted to each employee will be based on his earnings. This stock is at present selling in a limited way at 110 and 115, but the workers will be able to secure it at par, paying for it at the rate of two per cent. a month. They will be credited with the 8 per cent. dividend at the rate of two per cent. each quarter, and no charge will be made for interest on the unpaid balances. Further, they will be credited at the same rate as paid common stockholders on their holdings of common stock until the preferred stock is paid for, and thereafter at the option of the company. This will give the employees 14 per cent. per annum credit and no charge for interest.

Wapella Hardware Dealer Is a Real Bird Man

W. P. C. McDonald, hardware merchant at Wapella, Sask., is getting to be a real aviator. As stated in a previous issue of HARDWARE AND METAL, he purchased a Curtis biplane while in Toronto some weeks ago, and took it out to Saskatchewan. He has been making a number of trips between Wapella and adjoining towns while learning how to handle the machine, but last Sunday made his first long flight. Leaving Wapella at 10.15 a.m. he made a successful trip to Regina, arriving in that city at 12.10. The distance is 120 miles. On the return trip Mr. McDonald left at 5 o'clock and reached Wapella at 6.37. In returning Mr. McDonald made better time because he did not have to fly against a heavy west wind.

PRESIDENT WORKMAN LOOKS FOR REVIVAL

At the annual meeting of the Dominion Steel Corporation, held in Montreal, President Mark Workman spoke optimistically of the outlook for business. The low stocks which are general throughout the world, he pointed out, means that tremendous purchasing must be done, and although at the present time the attitude of buyers generally was inclined to be conservative he had every hope of a revival of business before long. It is not to be expected, he said, that the margin of profit will be so great as in the past year because production costs are remaining abnormally high, and at the same time there is keen competition.

The directors of the Dominion Steel Corporation were all re-elected, and at meetings of the Dominion Iron and Steel Co. and the Dominion Coal Co. the retiring directors of these firms were re-elected. The vacancy on the board of the Dominion Coal Co., created by the death of W. D. Matthews, was filled by appointing George Caverhill, of Caverhill, Learmont & Co., a director.

ELECTED DIRECTOR TORONTO GENERAL TRUSTS CORPORATION

Robert Hobson, president of the Steel Co. of Canada, Ltd., Hamilton, has been elected a director of the Toronto General Trusts Corporation, Toronto. His election, along with Lionel H. Clarke, chairman of the Toronto Harbor Commission, were to fill the vacancies left by the late Senator Peter McLaren and the late W. D. Matthews.

J. W. SMYTH RETIRES

J. W. Smyth, of Armstrong, Smyth & Dowswell, Limited, Regina, has sold his interests to the other members of the company. Mr. Smyth has been manager of the hardware business during the past thirteen years, and on account of ill health has been forced to retire.

British Restrictions On Autos Will Remain

The automobile section of the American Chamber of Commerce in London, England, has made representations to the British Board of Trade with a view to having the import restrictions on American motor cars further relaxed, if not entirely removed. At present the importation of motor vehicles and parts thereof is limited to 50 per cent. of the 1913 imports up to September 1, 1919, in proportionate monthly quantities.

Sir Auckland Geddes, now president of the Board of Trade, in place of Sir Albert Stanley, resigned, in informing the automobile importers that no increase in the ratio could be allowed at present, put practicallv the entire responsibility upon the present position of the exchanges, and necessity for guarding the future of sterling exchange on America.

Sir Auckland Geddes said that the Board of Trade could not consider any one trade or industry by itself, but must look at everything with a view to the best interests of the nation. From this point of view the matter of maintaining Great Britain's financial position and therefore the position of her exchanges was the essential consideration.

Although it is impossible to reconsider the ratio already fixed until September 1, at which time the Government has promised to review the entire import and export position, the Board of Trade has agreed to a concession in favor of importers not represented in 1913, but who have since established sizable businesses dependent on automobiles from America, whereby the Board of Trade will grant licenses up to the total quantity according to any plan of allocation among the importers concerned, which is unanimously agreed to by all members of the automobile section of the American Chamber.

The Board of Trade's only condition is that the total of the concession already granted is not to be exceeded up till September 1. This will leave the complete operation of the concession in the hands of the American Chamber of Commerce in London.

WORKING OUT SOLUTION OF BRITISH TRADE PROBLEMS

At the final meeting of the consultative council on imports, held at the Board of Trade, London, Eng., Sir Auckland Geddes thanked the council on behalf of the Government for the arduous work it had performed. He told them that, in the opinion of the Government, the work which they had done had proved to be of the greatest value to British trade, and had contributed substantially to securing employment throughout the country. He also informed them that, while they had been working at a transitional policy, other minds had been occupied in working out a permanent policy for the country, and that just as this was the concluding meeting of the council he hoped that, later in the day, he would attend the concluding meeting of those who had been working out in detail the proposals for a permanent policy. Sir Auckland said that it was obviously impossible for him at that time to indicate in any way the nature of the solution which had been arrived at of the many problems involved. He could, however, give them one indication of the complexity of the position. It was this: that the exchanges were now roughly capable of division into two classes, those that were heavily against us and those that were heavily in our favor, and that the difference was in some cases very great. Whatever policy was adopted would have to take full account of this great change in our economic position in comparison with what existed in 1914.

S. F. BOWSER FORMS CANADIAN COMPANY

S. F. Bowser Co., Ltd., Toronto, Ont., manufacturers of oil tanks, pumps and storage systems, has been organized as a Canadian company. S. F. Bowser Co., Ltd., has for a number of years been manufacturing and selling Bowser gasoline and oil pumps, tanks and storage systems under the control of the parent company at Fort Wayne, Ind., U.S.A.

H. C. Christie, who has been for a number of year connected with the Canadian factory of the Bowser Co., recently as sales manager, has been elected manager, with E. E. Cummings as factory manager. The other officers are: S. F. Bowser, president; S. B. Bechtel, vice-president; H. J. Grosvenor, secretary; W. G. Zahrt, treasurer.

COMPLETE NEW CANADIAN FACTORY

The Northwestern Chemical Company, of Marietta, Ohio, announce that their new Canadian factory is completed. This new addition to the manufacturing capacity of this firm is located at Ville St. Pierre, Montreal, Quebec.

F. R. Hall, general manager of the Northwestern Chemical Company, states that this will be distinctly a Canadian institution, employing only Canadian labor and selling throughout the Dominion.

All of the products will be manufactured in Canada and placed on the market in Imperial measure containers.

It is intimated that by making their line in Canada, jobbers, dealers and motorists will effect a saving in duty.

The Canadian branch will be managed by Prescott W. Robinson, of Montreal. Mr. Robinson will also have charge of sales in the Eastern Provinces, New Brunswick, Ontario, Quebec, Nova Scotia, and Prince Edward Island. The sales offices will be located in the Drummond Building, Montreal.

E. Victor Vallance will have charge of Manitoba, Saskatchewan and Alberta sales, with offices in the Confederation Life Building, Winnipeg.

I. D. Cross, with offices at 77 O'Farrell St., San Francisco, will have charge of British Columbia sales.

T. S. SIMMS & CO., LTD.

A catalogue of lather brushes, covering one of the lines of better brushes made by T. S. Simms & Co., Ltd., St. John, N.B., is just off the press. The catalogue, which was designed by S. D. Purdy, one of the directors of the firm, contains 31 pages, each 13½ by 10 in. The color work is excellently executed and the illustrations throughout most attractive. A feature of the listing is that as a guide to the trade the firm has marked with a star the lines it can recommend as being most serviceable for the price charged, and with two stars lines that are particularly recommended. In the catalogue are listed only the shaving brushes made by the firm. Readers of HARDWARE AND METAL may obtain copies upon request.

GLOBE ENGINEERING CO., LTD.

The Globe Engineering Co., Ltd., of Hamilton, Ont., has issued a catalogue of the lines of builders' hardware it manufactures, including inside mortise lock sets, mortise locks, mortise knobs, sash lifts, sash fasteners, rim lock sets, rim locks, rim knobs, hat and coat hooks. This catalogue is attractively illustrated. Readers of HARDWARE AND METAL who desire copies may obtain them on request.

MERCHANTS HARDWARE SPECIALTIES, LIMITED

The Merchants Hardware Specialties, Limited, 325 Tenth Avenue West, Calgary, have published a thirty-six page price list, in which are listed auto accessories, sporting goods, cutlery, tools, washing machines, tinware, aluminum ware, electrical goods, grinders, stoves and ranges and other hardware lines. The catalogue is attractively illustrated throughout, and on two of the pages a list is given of all tractor engines made in America, with the proper spark plugs that should be used in them. Readers of HARDWARE AND METAL may obtain copies of the price list upon request.

WILT COUNTER SIGN

The Wilt Twist Drill Co., of Canada, Limited, of Walkerville, Ont., is distributing to the trade a very handsome counter sign. It is so constructed that it may be used either as an easel or hung up on the wall. The counter sign is nine inches high and six inches in width. On a background of dark blue and surrounded by a neat gold border, is pictured in its natural color a Wilt drill. The firm's trade mark in flaming red is shown above, and at the top and bottom there is gold lettering. The finish is brilliant and striking, the whole effect being very attractive.

Additions To List For Early Closing

Ontario

SUDBURY.—Stores close Thursday at 12.30 during June, July and August. Stores closes each night at six o'clock except Saturday.

Manitoba

BOISSEVAIN. — Stores close at 12 o'clock on Thursdays during June and July. Stores close every evening except Saturday at six o'clock.

Nova Scotia

DIGBY.—Stores close at noon on Thursday during May, June, July, August and September.

DISCOVER NEW ALLOY

According to newspaper reports a magnesium alloy two-thirds the weight of aluminum and one-quarter the weight of cast iron has been discovered after tests at McGill University, Montreal. The alloy is being used, it is stated, in the manufacture of airplane engine piston rods for the machines of the Italian army by a concern in Shawinigan Falls, Quebec.

VANCOUVER MAN PRESIDENT OF PACIFIC COAST TRAVELLERS

The convention of the United Commercial Travellers' Association, jurisdiction of Washington, Oregon and British Columbia, which has been in progress at Vancouver recently, elected the following officers:

Past Grand Counsellor, A. R. Macfarlane, Vancouver.

Grand Counsellor, Percy Martin, Vancouver.

Grand Junior Counsellor, P. E. Arlett, Portland.

Grand Secretary, H. W. Thompson, Tacoma.

Grand Treasurer, G. R. Kerr, Seattle.

Grand Conductor, E. M. McConnan, Victoria.

Grand Page, C. W. Moore, Spokane.

Grand Sentinel, W. H. Rice, Seattle.

The next convention will be held at Portland, Oregon.

H. H. Kidd, manager of the Moose Jaw Branch of the Tees and Persse, has been appointed manager of Tees and Persse at Fort William and Port Arthur. Mr. Kidd has been in Moose Jaw over eight years. He is well known in musical circles and is a member of the Rotary Club.

THE CANADIAN CREDIT MEN'S ASSOCIATION, LTD., ELECT DIRECTORS

At the annual meeting held to-day, the following were elected:

President, A. G. Parker, of W. J. Gage & Co., Ltd.; vice-president, Thos. W. Learie, of W. R. Johnston & Co., Ltd.; secretary-treasurer and manager, A. S. Crighton; directors: H. E. Dane, of Dominion Rubber System (Ont.), Ltd.; George T. Dunn, of Canadian Steel and Wire Co., Ltd.; John B. Kirby, of Williams, Greene & Rome Co., Ltd.; Jas. A. Lamb, of Grant-Holden-Graham, Ltd.; E. A. Lye, of W. R. Brock Co., Ltd.; E. S. Little, of Robinson, Little & Co., Ltd.; C. Marriott, of Geo. Goulding & Sons; D. Marshall, of A. T. Reid Co., Ltd.; T. McMillan, of Ansley Dineen Hat & Fur Co., Ltd.; C. J. Purkis, of Caulfeild, Burns & Gibson, Ltd.; J. B. Ratcliffe, of John Northway & Sons, Ltd.; C. F. Richardson, of H. P. Eckardt & Co.; Mark Rowe, of Canada Furniture Mfrs., Ltd.

The Trade Mark and the Display Window

Not only is it apparent that retailers are linking up their newspaper advertising with trade-marked goods, but the same is true in that other link of the sales merchandising chain, the store window. Here is a window display of tools in which will be noted the hangers and goods of many manufacturers. A careful study of the window itself showed a wide variety of merchandise familiar to mechanics.

THE CLERKS DEPARTMENT

Preparing Copy for Advertising

Three Essentials for Effective Advertising—Study the Heading—Sub-Heads Almost Indispensable—Position of Introduction—Illustrations Valuable Addition —Making the Layout—Be Positive in Statements, But Truthful

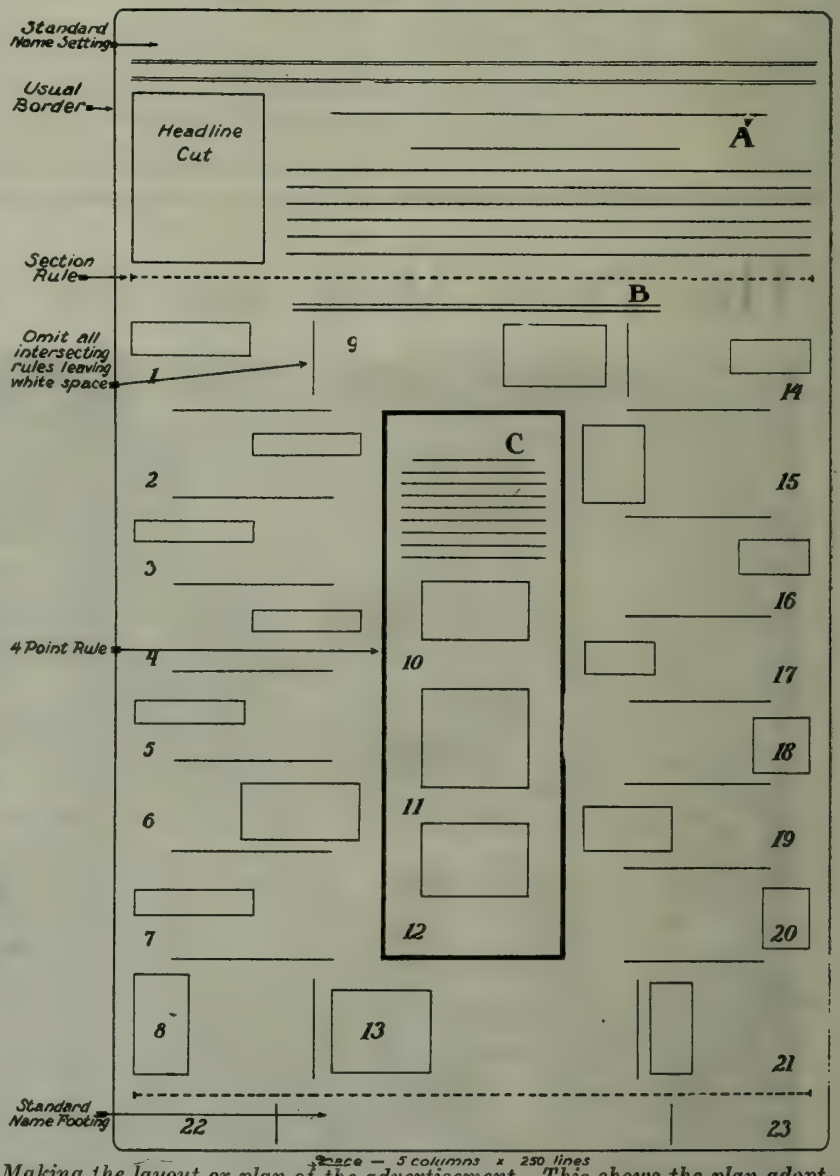
WHAT is advertising? The word is derived from the Latin word adverto, which means, turn towards, therefore advertising is turning the attention or interest towards some article or commodity and so create a desire for the possession of it.

In commercial usage advertising is defined as selling through publicity methods, in other words salesmanship in print.

The quick turnover of his stock, the goal for every merchant, can best be accomplished by pushing his leading profitable lines with intelligent advertising. To plan effective advertising, three things must be kept in mind: The advertisement must be seen; it must be read; and it must leave a convincing impression that will create a desire in the mind of the reader for that article.

In the first place, the space to be taken in the newspaper, whether it is intended for a large or small advertisement, should occupy, if possible, a prominent position, so that it will readily catch the eye of the reader.

The real strength in many ads. lies for the most part in ideas and their expressions, because it is here that the advertiser has the opportunity to change attention to interest after it is read. The selling force of every ad. lies in the first impressions which create the desire to buy.



Copy in advertising includes all matter and would make a lengthy article if dealt with in minute detail, so that here it will be dealt with as briefly as possible.

Study the Heading

The heading should be as concise as is consistent with clearness. A few short words that will be grasped at a glance, for instance, "Get Your Garden Tools Now." The heading should have a direct bearing on the articles that are included in the body of the ad.

Sub Headings Almost Indispensable

Sub headings are almost indispensable in large advertisements, as it is not possible that one person will be interested in all of the articles presented.

Making the layout or plan of the advertisement. This shows the plan adopted by Mr. Byford, and many other ad. writers in preparing copy. There is no chance of the printer going wrong and the study necessary in planning an ad. along these lines must lead to more convincing and attractive matter for your customers to read. The little squares indicate the position of the cuts; the figures where the reading matter should go. Where rules are used, attention is directed to them as will be seen marked on the above plan. A study of this layout with the completed ad. on the next page may help many merchants who claim to find difficulty in preparing newspaper advertising.

The use of sub headings provide a sort of index to the advertisement, the eye glancing over the page is drawn to that section containing the information that particularly interests the reader.

Position of Introduction

The position of the introduction is usually beneath the heading and serves as a connecting link between the heading and the remainder of the copy. This matter should be interesting and newsy, the public as a rule are too busy to read anything but that which appears interesting.

Descriptive Matter

Where an advertisement is to contain a number of articles it is necessary to write descriptive matter relating to that article. This can be termed "informing copy," inasmuch as it gives the information regarding the quality, durability, usefulness, etc.; it should also contain the chief selling point and the price beneath.

There is, however, an exception to this rule, if the article, for instance, is one with a cut price, then the price can be placed between the sub heading and the descriptive matter.

Sometimes no descriptive matter is used, simply the name of the article and the price with a one or two point rule around to form a box or panel.

When used in conjunction with descriptive matter illustrations or cuts, as they are termed, form a valuable addition to newspaper advertising. Line cuts are best suited for this purpose as they present a clear impression of the article. If the cut is a good representation of the article, or shows the results of using the article, it will usually present one or more selling points, better than many words of descriptive matter.

This shows the completed ad., the layout for which appears on the preceding page. Here is a mighty attractive ad. which carries real news value to proposed customers. The ad. is brightened up with cuts, the descriptive matter right to the point and the price is there. The same plan even on a smaller scale is as easily worked out and worthy of attention.

The following article written by Chas. Byford of the Mills Hardware Co., Hamilton, has in it many points of value not only to the junior clerk but to those who have stepped up higher: Mr. Byford has gone through all the preliminary steps in the hardware trade, working himself up to his present position in charge of advertising for the Mills Hardware Co. His success as a window dresser will be remembered through his association with the Bond Hardware Co. of Guelph, Ont., during which period he won many prizes in HARDWARE AND METAL *Window Dressing Contests. His early experience was gained in England. Whereas Mr. Byford has stepped out of the "clerks" class, his story has a distinct message to the retail clerks of Canada and consequently has been run in this department*—EDITOR'S NOTE.

Use Easily Read Type

Always use a plain, easily read type. For the average heading, Cheltenham Bold Italic is a good clear outstanding type; the size must, of course, be in accordance with the size of the advertisement.

For the introduction, 10 or 12 point type is suitable.

Descriptive matter is usually set in 8 point, occasionally 10 point. Some newspapers have machine-set type in 10 point light face italic, which makes a good variation and can be used for the introduction or news talks.

Much information can be gained from the printer in the sizes and styles of type. It is the co-operation between the ad. writer and printer that helps to make well-displayed advertisements.

Give Firm Name Some Attention

The style in which a name should take must be left to the merchant's good judgment. In a small town or city the style, "Brown's Hardware," would be sufficient, but in a large city a more definite location is sometimes necessary in order to prevent confusion with other stores. The name may be placed at the head or foot of the ad., or sometimes both in the case of large advertisements.

Making the Layout

After it has been decided what articles are to be advertised, it is a practical method to make a layout or plan of the advertisement, the size of the space to be taken.

This is where study is required in order to get the most effective, well displayed, evenly balanced ad.

To explain the method I use, refer to the drawing of the layout, which is re-

produced, the actual size being 5 columns wide by 250 lines.

The introduction written on a separate paper is marked A; the descriptive matter is done the same way, with a copy of the cut pasted on, each paper being marked with the corresponding number on the layout.

The position of cuts must be marked on the layout; this is important to a well-balanced advertisement and the printer may not place them to suit unless directed in this manner.

It will be noted on the sketch of layout that the thickness of rules is marked. This is necessary as the printer may not use the size to your liking.

The advertisement reproduced shows the finished ad. from the layout, thus showing how the details are worked out.

White space when used in a judicious form is often considered as valuable as display matter.

Neat borders are best for general use, for certain occasions or for particular purposes large striking borders may be in order.

In conclusion, write your copy to represent your store and be prepared with the quality of merchandise to back your selling points.

Be positive in your statements, but above all, be truthful.

ST. THOMAS, ONT., CLERKS START MOVE FOR EARLY CLOSING SATURDAY

The retail clerks and employees of local business houses gathered recently in the city hall for the purpose of obtaining an expression of opinion on the question of closing all stores not later than 6 o'clock on Saturday evenings.

Ask Public Co-operation

There were various expressions of opinion, and a number of merchants were present, but there was not a single dissenting voice when the early Saturday closing was discussed. The final decision was to conduct a publicity campaign, the general feeling being that as salespeople, the various clerks interested could sell an early Saturday closing just as easily as they could sell the goods over the counter.

Among other resolutions passed was one in which the large audience present called on all salespeople, store employees, assistants and their families in the city of St. Thomas to positively refrain from shopping or buying anything after the hour of 6 o'clock at night.

Officers Elected

Frank Shaw, of Clacott's, presided, and Omer Gray, a local grocery clerk, acted as secretary of the meeting. They were later elected as president and secretary, with the following as advisory board members: W. Richardson, J. McGregor, H. Penwarden, W. Silcox, J. Coombs, and A. J. Clarke. The executive board consists of the following: S. H. Pavey, Stan. Goldsmith, C. Trull, Ed. McElleroy and Misses Venning, N. Lordan and Pearl Morris.

WOULD ENLARGE CLERKS' UNION

An effort is being made to have all the retail clerks of Toronto, estimated at about 25,000 in numbers, enrolled in the Retail Clerks' Union. Organizer J. Hoop is at present in the city, endeavoring to bring this about. Only about 200 at present belong to the local.

A city-wide campaign is to be launched to get as many of the unorganized men into the union as possible, with the ultimate object of securing an 8-hour day and a minimum wage of $25 a week.

NEW CYCLING CLUB OFFICERS

The officers of the Toronto Wheelsmen's Association, recently organized, are: President, G. W. P. Hood; vice-president, Geo. Beattie; secretary, H. M. Alexander; treasurer, Geo. Mashinter; auditor, W. L. Overs; chairman racing board, Victor Levesque; membership, H. Haskin; championship, L. Fisher; finance, P. Blackmore.

Still Many June Brides to Please

Here is an example of an appeal by one retail hardware merchant on pleasing gifts for the June bride or brides of other months. This arrangement is very attractive and not only that, but distinctive. It is a layout which is not hard to duplicate even on a more moderate scale. Perhaps no one line has more appeal than real nice silver-plated flatware and hollowware from the hardwareman's stock. There are still many June brides for the hardwareman to cater to, and there are other months coming when these lines will be in demand—it should be a steady trade and only accentuated at certain seasons. This window display was made by the J. H. Ashdown Hardware Co., of Winnipeg, and shows up splendidly.

Fencing May Advance—Big Sales Made

Shorter Working Hours Will Mean Higher Production Cost, Says Fence Man—Has Been Revival of Buying Interest This Year

THAT there will be higher prices for woven fencing and probably for other lines of fencing made of wire is the opinion of A. G. Young, Montreal manager of the Ideal Fence and Spring Co. of Canada, Ltd. In speaking with Mr. Young, HARDWARE AND METAL was informed that if the present demands of workers are considered and granted, there is absolutely nothing ahead but an increase of price for these goods.

The average worker will not deliver as much work under the shorter hours, if they are decided upon, Mr. Young thinks, as he did under the former system of an eight or ten-hour day for the whole week. He, the worker, will have too many idle hours on his hands, and this idleness will be conducive to less production, and probably a poorer class of work. With the decreased production, the costs of commodities will increase, and, as always, the consumer will have to foot the bill and pay the price. The manufacturer will be governed in his selling, naturally, by his cost to produce. Asked as to the cost of raw material, Mr. Young stated that the same rules would apply as those outlined above. In the wire factory, shorter working hours would prevail and production would be cut down. Overhead charges will be higher at these mills, and when the manufacturer starts to turn out fencing it will be a product that has cost him more money than before.

An Excellent Season

Speaking of the present business which is coming to hand, Mr. Young said that the activity of recent weeks was splendid. "The farmers are doing more fencing, have more money to buy it, and are now protecting their crops from the stock. They are, in many cases, doing work which has been deferred for several seasons, and apparently realize that prices are not going to drop a great deal, if at all.

"There has been some difficulty in the matter of transportation," continued Mr. Young. "Various delays have existed regarding the movement of shipments. Not only so, but rates have advanced and this is an added reason for higher prices. Where we used to pay 2c per hundred pounds for getting shipments out we now have to pay as much as 6c."

Mr. Young stated that there had been so much business of late that delays had been encountered in filling orders, but this is gradually being overtaken. The season is turning out to be one of the best for some time, and results are much better than the prospect indicated some months ago. Difficulties have been experienced in getting shipments forward to Newfoundland, which market is developing nicely, Mr. Young concluded.

MANITOBA R.M.A. CONVENTION POSTPONED

Owing to the unsettled labor conditions in the West it has been thought advisable to postpone the Manitoba Retail Merchants' Association Convention which was to have been held in Brandon the middle of this month.

The Convention date has, therefore, been changed to August 12. There has been no change made in the programme, however, and it will be carried out as arranged.

SOURIS, MAN., TO HAVE MONTHLY SHOPPING DAY

Reviving a Scheme to Keep Money at Home. Inducements to Come to Town Not Only to Shop, but to Meet Other Shoppers

All the merchants in the town of Souris, Man., are combining this month to inaugurate what will be known as a monthly shopping day. Rather they are going to re-establish this plan which was in effect for several months up till one year ago. As this town is a divisional point on the C.P.R. this special shopping day will be fixed for the sixteenth of the month, or the day following pay day. All merchants will lay themselves out to have their stocks in excellent shape for this day, and bargain sales will be the rule in all lines.

Such a day is sure to put a serious check on the practice of sending pay-day money to the mail order houses, but it has another effect in that it draws country trade as well as town trade. In other words it adds another big "Saturday" to the month. To use a worn-out expression a peculiar psychological effect follows the institution of this monthly shopping day. When it is heralded from every advertisement in the weekly newspaper, and passed on by word of mouth, a desire is created to join the big throng that will be in town that day, and there is nothing the people on the lonely farms crave more than a jaunt to town to meet old friends and make needed purchases. This idea is accelerated by the offer of special values.

For the opening month it is planned to start with the old-fashioned "dollar-day," when the greatest possible assortment of goods will be marked at this figure.

MANITOBA TOWNS FIND CO-OPERATIVE DELIVERY SATISFACTORY

Merchants in at least two Manitoba towns are successfully carrying out the system of co-operative delivery. In the town of Souris this plan has been in force for the last two years, four of the largest merchants paying proportionately for the delivery of goods to their customers. In Carberry the delivery has only been in force a few months. In both towns the deliveries are made by motor truck, operated by its owner, and regular schedules are maintained of two deliveries in the morning and three in the afternoon, so that the merchant may promise his customer exactly when her purchases will be taken to her home. In this way not only is overhead expense reduced for each merchant, but there is an elimination of a duplicate delivery system.

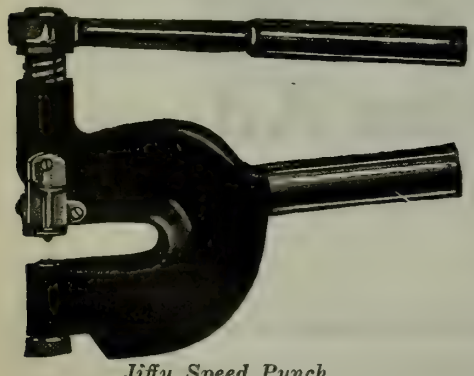
Absolutely too Busy to Write an Ad.

Never saw such business before—We have the goods you want; possibly that may explain.

True & Blanchard Co., - Newport

There is at least the merit in this use of newspaper space of keeping the firm's name before the public. Too often retailers when pressed with business omit their announcement altogether or leave in an ad. which is out of date, or list unseasonable merchandise. The customers of this firm's store must realize that the firm is right on the job and ready to take care of their requirements. It is an unusual use of space and it is often by getting in this variation that the retailer creates a greater interest and keeps the customers' attention focused on his offerings.

NEW HARDWARE GOODS



OFFERED TO CANADIAN HARDWAREMEN

JIFFY SPEED PUNCH

Paul W. Koch & Co., 19 South Willis Street, Chicago, Ill., are putting on the market what they call their Jiffy punch, a compact, portable and powerful speed punch, weighing but 4½ lbs., 9½ inches long, and is especially designed to meet all requirements of use in the shop or out on the job.

The Jiffy Speed Punch works in a small space. It punches holes of 5-32, 3-16 and ¼ in. thickness in metal up to 10 gauge, with such speed, that it is stated it can be operated all day with little fatigue to the mechanic. The reason given for this is because of the absence of long, clumsy handles, operator brought close to material, extreme light weight and quick, positive action, punch marks followed quickly and accurately.

The handle is placed a little above the centre of the tool and does not tip easily; therefore keeping it in an upright position ready for use. The deep throat and automatic stripper give clear view to punch mark for next operation. Only a half turn of lever, it is said, is required to drive punch through metal. The crowned punches of floating type will, it is stated, direct power to centre. Will not twist or turn in operation, practically eliminating punch breakage. Punches and dies are easily changed. Specially tempered dies are set rigidly in holders, which the manufacturers state not only adds strength but prevents breakage. The lever handle fits a hexagon nut and can instantly be changed to give operator greater or less leverage as desired. Other points the manufacturers enumerate are that there is nothing to wear out in a Jiffy Speed Punch. It is made throughout of the best grade of materials, is of

Jiffy Speed Punch.

rugged construction and is built for service. Requires little oiling and no adjusting and is a convenient size hand punch.

A NEW LAMP

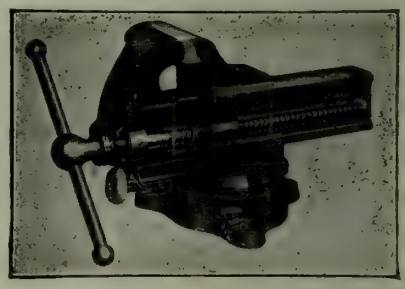
The Canadian Tungsten Lamp Co., of Hamilton, are introducing a new lamp called the "Ajax" to the hardware trade. It is made in vacuum and nitrogen types and is claimed by the makers to give excellent service. They claim to sell it

Ajax Lamp

under a 1,000-hour life performance guarantee.

PISTON RING

"No-Leak-O" piston rings, manufactured by the No-Leak-O Piston Ring Co., of Baltimore, Md., are made of cast iron, are individually cast concentric rings, and have a groove cut around the rings at a right angle to the face, sloping at an angle of about forty-five degrees. The groove is near one edge, it is stated, passing between the sliding face forming the lap joint and the side of the ring. The rings are made under a patented process by which, it is claimed, even bearing is secured on the cylinder wall, thereby wearing the cylinder perfectly round. The groove full of oil, it is stated, makes a perfect lubricant, insuring long life. The oil in the groove, it is claimed, formed a dam or seal that the gas cannot escape, and this also, it is stated, prevents the surplus oil working up. Perfect lubrication is secured, it is claimed, without any waste, resulting, it is stated, in mileage being almost doubled on lubricating oil and a big saving in gasoline.



CARBON DESTROYER

The "No Knocks" Carbon Destroyer Co., 102 Richmond Street West, Toronto, are now marketing what is said to be a positive solution for carbon troubles in the "No Knocks" carbon destroyer and gas saver. The manufacturer states that this is unconditionally guaranteed to stop engine knocking from carbon, give greater power and pep, prevent carbon accumulating on valves and plugs, eliminate already accumulated carbon and effect a large saving in gasoline cost. By introducing vaporized cool air into the manifold the manufacturer indicates that he produces at all times the effect of running the engine on a damp, cool night. All metal parts are made of solid brass polished and nickeled. The glass container is ¼ in. thick.

THE WEDG-LOK VISE

The Jahant Foundry and Heating Co., of Akron, O., have recently placed an entirely new type of vise on the market known as the Wedg-Lok vise. In looks it does not differ greatly from ordinary vises. It is very compact and sturdily built, being ample, it is indicated, to stand the strain of all ordinary demands. The vise proper sets into a turn-table base, which permits the upper part of the vise to be turned around in a complete circle. This, it is said, makes it possible for a workman to easily adjust his work to any desired angle.

The important point with this vise, the manufacturers state, is its locking feature, which is accomplished automatically when tightening the jaws; a slight turn of the main screw loosens the wedge lock sufficiently to permit the vise to be turned without removing work from the jaws. If it is desired to lock the vise in any one position for permanent work, it is said that a turn of the thumb screw quickly accomplishes this result; when the job needs to be turned turn the vise, not the job. This feature is one which it is claimed practically

Wedg-Lok Vise.

makes of the Wedg-Lok vise a dozen vises in one.

Robert Tulloch, manager of Bennett and Sons, hardware, Gananoque., Ont., was elected president of the Retail Merchants' Association which was organized. Clifford Syne was elected as secretary.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

MANY lines of brass and copper goods have been advanced as a result of the changes provided for in the revised tariff schedule. On the other hand, a revision to lower levels has been made in lubricating oils of from 1c to 3c per gallon, following on the removal of the 7½ per cent. war tax on crude petroleum.

Turpentine has undergone further revisions upward this week, following the registering at Southern points of the highest price on record for this commodity. The advances in the East range from 5c to 15c per gallon, with the West, which has shown little interest in market conditions the past few weeks, coming to life with a 25c per gallon increase. The revival of trade interest in the West is noticeable, too, in a sharp revision upward on linseed oil, amounting to 37c per gallon. Markets in the East have steadied down slightly with some markets showing an upward move and the range generally narrowing towards the highest figures.

Indications point to the probability of a change being made in the prices prevailing on ready-mixed paints. With the marked advances on linseed oil and turpentine, along with a revision now being made on containers as a result of tariff changes on tinplate, manufacturers cannot see any other way out.

A change has been recorded in wrought washers this week and the new discounts named provide for a slight decline from figures formerly in effect. A change to lower levels is also noticeable in one line of knife handle wrenches.

An advance has been recorded in one line of silver-plated flatware, amounting to about 5 per cent. This, the jobbers believe, is just the forerunner to a general revision upward in this class of merchandise.

A revision in cotton waste has occurred in some quarters, prices being lowered slightly to the extent of ¼c to ½c per pound. This is even in the face of an advance by the manufacturers of cotton thread. Business is along rather narrow lines and competition is keen.

Hammock chains, alarm clocks, hand pump oilers have advanced along with one line of saw sets and sweat pads. Curry combs are lower and horse-clippers have moved upward.

MONTREAL MARKETS

MONTREAL, June 19—Price changes for the week are several and include advances for old materials and rubbers as well as for iron, two or three lines of valves, and fruit presses. There is considerable strength to the ware market also, and advances will be made later, it is thought, for some of these lines. Copper sheets and bars are marked up, too.

Declines are announced for lubricating oils of from one to five cents per gallon, according to the grade. Lower prices are in effect for picks and mattocks, grub hoes and claw bars. Curry combs are down and also wrought washers. There has been a good deal of selling during the week and the jobbers are quite hopeful for the future.

Picks, Curry Combs, Wrought Washers Down

Montreal.

VARIOUS HARDWARE.—Clay and rock picks are reduced in price in this market. The new prices on 5-6 lb. weights, rock and clay patters is $11 per doz.; 6-7 lbs., $12, and 7-8 lbs., $13. Pick mattocks are reduced to $13, and grub hoes to $10 for 3-in., and $10.50 for 3½-in. Claw bars are quoted at $11.25 per dozen. Curry combs are quoted at list plus 15%, excepting No. 270, which is quoted at $2.25 per doz. net. Wrought washers are now on a discount basis of 50%.

Nail Tonnage Sold Is Satisfactory

Montreal.

NAILS AND WIRE.—While there is but a very limited amount of building, compared with a normal season before the war, the total tonnage of nails going out to dealers is large. Prices are steady and unchanged with $4.75 the base per keg for both wire and cut nails.

Wire fencing and other wire used in the erection of fences, etc., has been in great demand of late and it has been difficult, some assert, to procure supplies promptly. The base price for smooth galvanized wire number nine is $5 per 100 lbs.

Valves Up Again; Fruit Presses, Too

Montreal.

VALVES, PRESSES.—One jobber has advanced prices on Jenkins' "Globe" valves to 10 per cent. off list, and for "Gate" and "Straightway" to 12½ per cent. American or Henis fruit presses are also higher, the new price basis being $5.40 per dozen.

Stoves Are Booked; Wares Very Firm

Montreal.

STOVES AND WARES.—Now that dealers perceive the improbability of lower prices coming for stoves and ranges there is a real improvement in the matter of bookings, and orders are coming to hand readily. The undertone is firm and no declines are anticipated here. There is an excellent demand for general lines and various wares are firm. Advances seem likely to be made later for tinware, but the manufacturers are

not increasing the prices of made-up lines, in accordance with the higher prices for tinplate, until stocks in hand are fairly well liquidated. Later, new schedules will be issued, it is expected, and these will mean increases in the price basis.

Hay Rope To Move; Cordage is Held

Montreal.

ROPE, CORDAGE. — Manufacturers are now anticipating a heavy demand for hay rope, and the season promises to be a splendid one. The hay sections of Quebec will have a big yield, it is expected, and the crop will be ready for attention ere long. In a general way there is a fair amount of business and the basis is without change. Pure manila basis remains at 34c per lb.; British manila at 30c and sisal at 27½c.

Lubricating Oils Down 1 to 5 Cents

Montreal.

OILS, GASOLINE.—The feature of the week in oil markets is that of a decline of from one cent to five cents per gallon for various grades of paraffin, light oils, engine, machine and cylinder. There is a long list of special brands and this is effected in varying extent. On cylinder oils the average decline is two cents, on Gargoyle auto oil three cents, and on light machine and engine oils, about one cent. Harness oil is lower, too. There is no change on coal oil, which is quoted at twenty to twenty-three cents, while gasoline is selling at the reduced price of thirty-three cents, made effective last week.

Steady Sale For Iron and Steel

Montreal

IRON AND STEEL. — Midsummer selling of steel and iron bars is reported and there is a good outturn to country buyers. Stocks are now quite complete and buyers may get a good range to meet requirements. The basis is steady and unchanged.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Some Demand For Sheets and Plates

Montreal

SHEETS AND PLANTS.—Considerable movement is reported of various sheets, but large orders are not plentiful, the buying being in small lots for the most part. Prices are steadily held on a more even basis and the range for limited quantity enquiry is considered fairly close.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00
GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Products Are Firm; Lead May Go Up

Montreal.

LEAD PRODUCTS—Advances may be considered necessary later on some manufactured lines of lead, but there is no indication of this materializing for the next week or ten days. Demand is rather on the light order and this is a barrier to increases being made. There are no changes of price for the week.

Lead pipe	0 11½
Lead waste	0 12½
Lead traps and bends	15%
Lead wool, lb.	0 13
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 10¼
Lead sheets, 4 to 8 lbs, sq. ft.	0 09½

Cut sheets ¾c lb. extra, and cut sheets to size, 1c. lb. extra.

Solder, guaranteed, lb.	0 35½

Old Metals Up; A Better Market

Montreal.

OLD MATERIAL.—Prices have at last responded to a better feeling in the old metal market, and there are advanced quotations this week for brass, copper, old rubbers and wrought iron. The inquiry is better, though this can be improved and probably will be better from this time forward. The outlook is much improved.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00
Stove plate, ton	....	15 00
No. 2 busheling	....	5 00
Old rubbers, boots and shoes	0 07	0 07¼

Much Ingot Strength; Tin; Iron To Go Up

Montreal.

INGOT METALS.—A better and more buoyant feling pervades the ingot market than has existed for many weeks. Advances are probable for some lines and there has been a stimulated demand.

COPPER.—A slight advance of price makes the local quotation 21c per lb. There has been quite a little trading and the market is firm.

TIN.—An advance may be made in the price of tin as soon as the embargo in the United States is lifted against its import. This may be announced at an early date. It will mean more competi-

FLASHES FROM THE WEEK'S MARKETS

Winnipeg came back this week with an advance of 37c per gallon in linseed oil. It is some time since any change had been made, strike proceedings holding the floor against the flight of flax seed.

* * *

W. & B. knife handle wrenches underwent a decline of 10 per cent. in prices issued this week.

* * *

Wrought washers show a decline in a revision of the discount from 45 per cent. off the list to 50 per cent. off the list.

* * *

Rogers Bros. 1847 silver-plated flatware has been revised and present discounts provide for an advance of about 5 per cent.

* * *

Lubricating oils generally have undergone a revision to lower levels, following the removal of the war tax on crude petroleum.

Picks and mattocks have been revised downward in some quarters.

* * *

Turpentine aeroplaned in Winnipeg, going up 25c per gallon after a few weeks of inactivity.

* * *

Taintor saw sets registered an advance this week.

* * *

Bright wire goods, cap screws and set screws were among lists to decline out West.

* * *

Rosins showed a phenomenal advance at primary points of $5.00 per barrel this week.

* * *

A record high price for turpentine was reached last week at primary points. There has been a slight reaction in price.

* * *

An enormous demand for insecticides has sprung up and retailers are placing heavy orders with the manufacturers and jobbers.

tive trading. In the meantime prices hold at 56c per lb.

LEAD.—The market is steady and there has been some movement but no change of price, which holds at 7½c per lb.

ANTIMONY.—An advance for this metal may be made in the near future. In the meantime there is a steady market at 9½c per lb.

ALUMINUM.—Steadiness is the only feature. Price remains at 38c per lb.

SPELTER.—At the unchanged price of 8¾c per lb. there is a fair trading and ample stock to meet requirements.

PIG IRON.—A good inquiry obtains for forward shipment. The market is rather strong and advances are looked for. $48 per ton still is quoted.

TORONTO MARKETS

TORONTO, June 19.—Lower prices have been named on one line of knife handle wrenches and a decline is also apparent in curry combs. Some lines of brass valves are higher, with others slightly lower. Lubricating oils are under revision downward, with some automobile oils already changed. Silver-plated flat ware has advanced 5 per cent. in some quarters.

Electric fans and household appliances are active and a big sale of all summer lines is apparent, including screen doors, windows, wire cloth, lawn hose, etc.

Some Lines Valves Higher; Others Down

Toronto.

VALVES.—There has been an advance made in some quarters this week on Jenkins' Bros. globe, check and gate valves. This approximates an advance over the former figure of about 5 per cent. A further price revision has been made by the manufacturers of Penberthy valves, and quotations which the manufacturers name at Windsor, Ont., are for the compodisk valves, 15 per cent. and 5 per cent; gate, 25 per cent.; regrinding valves, 15 per cent. and 2½ per cent., and swing check valves 10 per cent. and 2½ per cent.

Silver Plated Flatware Higher

Toronto.

SILVER-PLATED WARE. — Higher prices are provided for in the new discounts which have been named on Roger Bros. 1847 silver-plated flat ware. These are now being quoted to the trade at 30 and 10 per cent. discount from list instead of 40 per cent. formerly in effect, which shows a net advance approximating 5 per cent. Whether this advance presages a similar move in other lines is not known, but jobbers indicate that they would not be surprised to see higher prices ruling all the way around.

10 *Per Cent. Drop Made in K. H. Wrenches*

Toronto.

WRENCHES.—There has been a decline reported this week in the price of Whitman and Barnes knife handle wrenches. The new prices which have been named provide for a drop of 10 per cent. On the new basis, the prices per doz. net are for the 6 in., $11.25; 8 in., $13.50; 10 in., $15.80; 12 in., $20.25; 15 in., $27, and 18 in., $36.

Decline Made in Curry Combs

Toronto.

CURRY COMBS.—There has been a revision made in the price of curry combs and the new prices that have been named provide for a drop from the former level. The present basis of quoting is shown by an advance on list of 15 per cent.

Cotton Twines in Firm Position

Toronto.

TWINES.—Mills in the United States are in some instances reporting fairly stiff advances in all grades of cotton twine. During the week there has been an advance made in one quarter of 4c per lb., applying all the way around. This has not extended to the Canadian field as yet, but this may be expected to have some bearing on the prices which will rule here.

Lubricating Oils Being Revised Down

Toronto.

OILS, GASOLINE.—The market on gasoline seems to have settled down to the change which was reported last week. This provided for a decline of 1c per gal., making the quotation to-day 32c. Refiners generally expect that present basis will be maintained for some little time. A new schedule of prices is being worked out on lubricating oils and it is indicated that with very few exceptions a decline will be put into effect approximating 1c per gal. This is in line with the removal of the war tax on crude oil coming into Canada to be refined. A definite change has been made in the list price of Gargoyle Mobiloil, which in barrels is now quoted at $1.30 per gal., list, as against $1.33 less 25 per cent.

Activity in Summer Lines; Stoves; Wares

Toronto.

STOVES, WARES.—There is little to be added to the report given last week on stoves. As far as the heavy stoves and ranges are concerned, business is still rather restricted in these. However, in regard to all Summer lines, there is lots of business to be had, but not always a sufficient stock to take care of same. Manufacturers and jobbers are both rushed with orders which they are finding it difficult to keep up with. Prices have been firmly maintained and there is no indication of any immediate change.

In regard to tinware and copper ware, there has been no stated change in either one of these lines as yet. However, the proposed tariff changes which are under discussion in Ottawa are such that both of these lines may be affected and any new prices which may be adopted will be advances. No immediate change is anticipated, however. There is a big business being done in the majority of these lines, along with the enamelware, and altogether manufacturers and jobbers are well satisfied with the trade which they are doing.

Revised Prices on Waste Coming

Toronto.

WASTE, OAKUM.—There is under way, in some quarters, a revision on cotton waste, which will result in a decline of from ½c to ¼c per lb. New prices have not definitely been settled as yet, but as soon as these are available the change will be given in detail. This is in line with information in these columns last week and has been made in spite of an advance in thread the past few days.

Oakum reveals no particularly interesting feature, prices being steady and business only fair.

Good Demand For Sheets, Plates Apparent

Toronto.

SHEETS, PLATES.—Activity marks the operations of jobbers on steel sheets, sales assuming very fair proportions, and being met from ample stocks. No revision is yet noticeable in prices and market seems to be fairly well settled on its present basis. Range of quotations prevailing to the trade this week are:

10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95

12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Orders Coming For Iron and Steel Bars

Toronto.

IRON AND STEEL.—There has been no change in market prices this week. Jobbers report a very fair volume of business coming to hand and stocks are in very fair shape to meet increased demands. Range of prices are given as follows:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Steady Tone Noted in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—There is a steady and well maintained market revealed in the situation on corrugated sheets. Business is reported as quite satisfactory and manufacturers are experiencing no difficulty in taking care of orders. Trade in eavetrough, conductor pipe and kindred lines is very fair and market firm. Prices shown in current market quotations are unchanged. Range of prices on corrugated sheets are as follows:

	Per 100 sq. ft.	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Wrought Pipe Firm; Boiler Tubes Too

Toronto.

WROUGHT IRON, BOILER TUBES.—The market on wrought pipe is very firm. Labor costs are mounting and will be a factor to at least maintain if not advance the present schedule. A fair volume of business is being handled and outlook generally is quite satisfactory. Prices are shown in current market quotations.

There have been no new developments in boiler tubes, the demand being only fair, with prices firmly held at following levels:

	Per 100 feet	
BOILER TUBES—	Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Range Boiler Prices Have Been Reduced

Toronto.

RANGE BOILERS.—As a result of prices having been reduced by American manufacturers, new and lower quotations are now in effect in range boilers. While business has been to some extent affected by unsettled conditions and labor troubles, it has, on the whole, been very good. Quotations are as follows:

Range boilers, 30-gallon, standard, $11.00; extra heavy, $12.50. 35-gallon, standard, $12.50; extra heavy, $14.50. 40-gallon, standard, $13.50; extra heavy, $15.50. 52-gallon, standard, $20.50; extra heavy, $25.00. 66-gallon, standard, $32.00; extra heavy. $38.00; 82-gallon, standard, $40.00; extra heavy, $47.00. 100-gallon, standard, $50.00; extra heavy, $58.00. 120-gallon, standard, $60.00; extra heavy, $67.00.

Solder Maintains Position; Lead Holds

Toronto.

LEAD AND ZINC PRODUCTS.—There has been no further revision in solder this week, prices noted last week being maintained. There is a fair volume of business passing and outlook seems very good.

Manufactured lead products retain a steady position with the undertone to the market generally firm. Range of prices this week are as follows:

Lead pipe, ib.		$0 11½
Lead waste pipe, lb.		0 12½
Lead traps and bends		15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 33	$0 37
Solder, strictly, lb.	0 31	0 35
Solder, commercial, lb.	0 28	0 31
Solder, wiping, lb.	0 27½	0 30
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.		0 17

Strong Buying Movement in Copper

Toronto.

OLD MATERIALS.—Better things have come to the metal dealers in the last few days and they are experiencing a strong buying movement in copper with conditions throughout the entire range looking up. Higher prices are being looked for within the next few days. Range of buying prices in effect to-day is:

Dealers' Buying Prices—		
Tea lead		0 03
Heavy lead pipe		0 04
Pipe scrap		8 00
Stove plate, per ton		10 00
No. 2 busheling		8 00
Yellow Brass		0 07
Red Brass		0 10
Light Brass		0 05½
Scrap zinc		0 04½
Heavy copper		0 15
Wrought iron, No. 1, per gr. ton		15 00
No. 1 machinery cast		14 00
Heavy melting steel		9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots		0 04½
Bicycle tires		0 04½
Automobile tires	0 03½	0 04

Lower Levels Reached in Washers

Toronto.

WROUGHT WASHERS.—Manufacturers announce a reduction in the price of wrought washers through a change in the discount. The discount of 45 per cent. which has been in effect has been replaced by one of 50 per cent. Lists and extras appear in current market quotations:

Nails Show No Revision; Wire

Toronto.

NAILS, WIRE.—The market on wire nails remains steady, and there is no indication of any immediate change. Jobbers report that orders are coming along fairly well, and advices from retailers would indicate that there appears to be a good deal of building activity. Prices show no change on those that have been ruling for some time past, the wire nails selling at a base of $4.70 per 100 lbs., and cut nails at $4.75.

Some activity is apparent in a few lines of wire, but this is not exceptionally heavy yet. The price for smooth steel wire is still held at $5 per 100 lbs. base, with the extras on other lines remaining unchanged.

Change For Better in Rope Movement

Toronto.

CORDAGE.—Manufacturers report that at last there is a change for the better in the amount of business which they are asked to handle. Retailers are again coming into the market and altogether the outlook is much brighter than it has been for some time past. Quotations show no change during the week, pure manila being quoted at 34c per lb. base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c, and sisal lath yarn, 27½c.

Metal Markets Holding Steadily

Toronto.

INGOT METAL.—The markets seem somewhat steadier this week and apparently await the outcome of the vote on the tariff, which if passed in its present basis may effect some changes in metals. There is a fair amount of activity and stocks available ample.

COPPER.—There is a strong undertone to the market on copper with a very good demand in evidence. Stocks are ample and outlook better, it is thought. Prices are unchanged for the week at 18½c per lb.

TIN.—The price of 58c per lb. has been held without change. Supplies are coming along in ample quantities to meet the demand and sales along rather narrow channels.

SPELTER. — Little interest attaches to this metal. The increase in duty on spelter is expected to result in a greater demand for the home product. Prices show no change, however, as yet, 8c per lb. being the figure generally in effect.

LEAD.—A stronger undertone to the market is shown on lead, although primary points seem to vary almost daily. The price here ranges around 6½c to 7c with a possibility of higher levels being reached.

ANTIMONY. — The market holds strong and quotations are well maintained around the 9c per lb. level. There is a fair demand reported.

ALUMINUM.—Trade is not very active as yet in this metal, but a slight improvement is apparent. Prices remain unchanged at 40c to 42c per lb.

LONDON MARKETS

LONDON, Ont., June 19.—Business has been very brisk and all summer lines are especially active. Throughout the whole district prospects for the future are excellent. Prices are firm. Linseed oil and turpentine again advance. Shipments of British goods, such as gauge glasses, door bolts, tools and a little cutlery, are now coming in. The prices on these lines are very firm.

Higher Prices For Pump Hand Oilers

London, Ont.

PUMP HAND OILERS—New and higher quotations are now effective on pump hand oilers. Prices are as follows: No. 402, coppered, $18.00 per doz.; No. 403, coppered, $21.00 per dozen; No. 404, coppered, $23.00 per dozen; No. 351, tin, $11.50 per dozen; No. 353, tin, $14.50 per dozen; No. 355, tin, $17.50 per dozen.

Advance is Made For Alarm Clock Prices

London, Ont.

ALARM CLOCKS—An advance has been made in the price of alarm clocks and quotations are on the following basis: Good Morning, $1.30 each; Lookout, $1.70 each; Sleepmetre, $1.80 each.

Hammock Chains Are Quoted Higher

London, Ont.

HAMMOCK CHAINS—New quotations, which are higher, are being made on hammock chains. Prices are as follows: 3 ft., $6.50 doz. pair; 4 ft., $8.50 doz. pair; 6 ft., $12.50 doz. pair.

Lower Prices Named For Wrought Washers

London, Ont.

WROUGHT WASHERS—New prices named on wrought washers show a reduction. The latest quotation is 50% off list, as against the old figure of 45%.

Higher Quotations on Taintor Hand Saw Sets

London, Ont.

TAINTOR HAND SAW SETS—A new and higher quotation of $15.00 per dozen is in effect on Taintor hand saw sets.

Curry Comb Prices Revised Downward

London, Ont.

CURRY COMBS—Prices of curry combs have been reduced and the new quotations are on the basis of list + 15%, as against the old figure of add 25%.

Brisk Demand For Lawn Hose, Sprinklers

London, Ont.

LAWN HOSE, SPRINKLERS—While no changes have been made in prices there is a brisk demand for lawn hose. Quotations are: 3 ply x ½ in., 11½c ft.; ⅝ in., 13½c ft.; ¾ in., 15½c ft. 4 ply x ½ in., 13c ft.; ⅝ in., 16c ft.; ¾ in., 17½c ft. 5 ply x ½ in., 14½c ft.; ⅝ in., 17½c ft.; ¾ in., 19½c ft.

Lawn hose, corrugated, has been a big seller. Prices are: ½ in., 17½c ft.; ⅝ in., 20½c ft.; ¾ in., 23½c ft., less 5% in full reels of 500 ft.

Hose nozzles are finding a big sale and supplies are not too plentiful. Prices are: Gem, $6.30 dozen.

Hose sprinklers are selling as follows: Ring, $10.80 dozen; Pluvius revolving, $24.50 dozen.

Hose reels are quoted as follows: Wood, with galvanized drum, $1.75 each; No. 10 McKinnon, $1.80 each; No. 20, McKinnon, $2.65 each.

Advance Made in Price of Sweat Pads

London, Ont.

SWEAT PADS—Prices of sweat pads show an advance and quotations are now: Old gold or yellow, $8.60 dozen.

Higher Price Named For English Clippers

London, Ont.

ENGLISH HAND HORSE CLIPPERS—Higher quotations are now being made on English hand horse clippers, as follows: Newmarket, $2.85 per pair; plates for same, top $1.00 each, bottom $1.50 each.

Screen Doors, Windows Remain Unchanged

London, Ont.

SCREEN DOORS, WINDOWS—There has been a splendid sale for screen doors and windows. No change has been made in quotations, which are as follows:

Doors—No. 1, plain grained only, $17.40 doz.; No. 2, with brackets, grained only, $21.50 doz.; No. 3, with brackets, grained, filled and varnished, $28.40; No. 21, Mission style, grained, filled and varnished, $26 doz.; No. 8, with panel, grained, filled and varnished, $30.65 doz.; No. 9, with panel and oval, grained, filled and varnished, $36.90 doz.

Screen Door Spring Hinges—No. 20, japanned, $19.50 gross pairs; No. 7/11, loose pin, $20.

Stocks Getting Low in Screen Wire Cloth

London, Ont.

SCREEN WIRE CLOTH, POULTRY NETTING—There has been an extra heavy sale of screen wire cloth and stocks are getting low. Prices show no change. Poultry netting is still selling well. Quotations are as follows:

Screen Wire Cloth—Painted black—100 ft. rolls, $3.25 per 100 sq. ft.; 50 ft. rolls, $3.30.

Bronze—14c sq. ft.

Poultry Netting—Canadian, 15% off list; American, 10% off list.

Prices of Nails Are Holding Steady

London, Ont.

NAILS—Nails are in steady demand at prices which show no change. Quotations are as follows: Wire, $4.70, base, per 100 pounds; cut $4.75, base.

Prices of Rope Remain Unchanged

London, Ont.

ROPE—With the approach of the harvest season the sale of rope is improving. Prices are unchanged as follows: Pure manila, 34c, base; British manila, 30c, base; New Zealand hemp, 30c; sisal, 27½c, base.

Further Advance is Shown in Turpentine

London, Ont.

TURPENTINE—There has been a good sale for turpentine. Quotations show an advance of 10 cents and are as follows: 1 barrel lots, $1.60 imperial gallon; 2 to 4 barrel lots, $1.59 imperial gallon; 5-gallon lots, $1.70 imperial gal.

Prices Are Firm For White Lead in Oil

London, Ont.

WHITE LEAD IN OIL—Prices of white lead in oil remain firm and very fair sales are being made. Quotations are as follows: Pure, tons, $16.30 per 100 lbs.; less tons, $16.65. Pure Elephant, tons, $16.90 per 100 lbs.; less tons, $17.25.

Putty Prices May Go Higher Shortly

London, Ont.

PUTTY—Putty prices are firm and may go higher shortly. Quotations are as follows: Standard, 100-lb. drums, $6.75 per 100 lbs; 25-lb. drums, $7.00 per 100 lbs; pure, 100-lb. drums, $8.75 per 100 lbs.; pure, 25-lb drums, $9.00 per 100 lbs.

Linseed Oil Shows a Steady Advance

London, Ont.

LINSEED OIL—Linseed oil is in steady demand and prices have been steadily advancing. Quotations are: 1

to 2 barrel lots, $2.45 gallon, $2.48; 3 to 5 barrel lots, $2.44 gallon, $2.47; 6 to 9 barrel lots, $2.42 gallon, $2.45; less barrels, add 10 cents gallon.

WINNIPEG MARKETS

WINNIPEG, June 19.—Price changes during the week are very numerous. The receipt of mails which have been undelivered for the past three weeks contained advices of many changes in the staple lines. Lower prices again predominate and include the following lines: brass butts, soldering coppers, night latches, gate hooks and eyes, screw hooks, screw eyes, cornice hooks, lamp and lantern burners, cap screws, set screws, shaft bolts and slip bolts, while solder, linseed oil and turpentine show advances.

The strike situation is daily improving, and many are breaking away from the unions and returning to work, and it is hoped that next week will see the end of it and the resumption of business in all lines.

Soldering Coppers Show a Reduction

Winnipeg.

SOLDERING COPPERS — Soldering coppers again show a reduction in price due to the raw material market, and declined 2c per lb. during the week, making to-day's selling price 40c base. Net prices on the various sizes are as follows: ¾ lb. to pair, 47c; 1 lb., 46c; 1½ lbs., 43c; 2 lbs., 42c; 2½ lbs., 41c; 3 lbs. and over, 40c lb.

Solder Moves Up One Cent Per Pound

Winnipeg.

SOLDER—The advancing market on block tin has had the effect of further advancing the price of solder, which moved up 1c per pound during the week, making to-day's price as follows: Half and half solder, full cases, 35c lb.; less than cases, 36c lb.

Brass Butts Show Substantial Reduction

Winnipeg.

BRASS BUTTS—Narrow, middle and broad brass butts show a substantial reduction during the week, amounting to about 25 or 30%, due to lower prices on raw material. These are selling to-day at net list. Net prices on the various sizes are as follows:

Brass Butts	Dozen Pairs Narrow	Middle	Broad
1 inch	.32	.38	.40
1¼ inch	.46	.48	.54
1½ inch	.52	.60	.68
1¾ inch	.68	.76	.84
2 inch	.80	.92	1.04
2¼ inch	1.12	1.30	1.50
2½ inch	1.40	1.70	2.00

Night Latches and Padlocks Are Lower

Winnipeg.

NIGHT LATCHES, PADLOCKS — Miller night latches and padlocks have undergone a revision during the week, with some lines showing advances and others declines, based on costs of material and labor. Prices on the night latches are given below: Miller night latches, No. 64, $7.55; No. 178C, $11.30; No. 170, $9.40; No. 137C, $15.00; No. 378 1B, $11.30; No. 4978, $18.85.

Decline Shown in Bright Wire Goods

Winnipeg.

BRIGHT WIRE GOODS—Bright wire goods register a decline of approximately 10% during the week, and include such lines as gate hooks and eyes, screw hooks, screw eyes and cornice hooks, all of which are now selling at 80% off list. Net prices are given herewith:

Screw Eyes, Suit "B"—1, 30c; 2, 30c; 3, 30c; 4, 34c; 5, 40c; 6, 50c; 7, 56c; 8, 66c; 9, 76c; 10, 90c; 12, $1.30; 14, $1.80 per gross.

Screw Hooks, Suit "M"—3, 46c; 4, 50c; 5, 56c; 6, 60c; 7, 70c; 8, 80c; 9, 90c; 10, $1.20; 11, $1.60; 12, $1.80; 13, $2; 14, $2.50; 15, $2.75; 16, $3 per gross.

Cornice Hooks—1¼ in., 50c; 1½ in., 56c; 1¾ in., 60c; 2 in., 70c; 2¼ in., 80c; 2½ in., 90c; 3 in., $1.60 per gross.

Gate Hooks and Eyes—1½ in., $1.30; 2 in., $1.60; 2½ in., $2; 3 in., $2.40; 3½ in., $2.90; 4 in., $3.40; 5 in., $4.80; 6 in., $6 per gross.

Lower Prices Named on Lamps, Lantern Burners

Winnipeg.

LAMPS, LANTERN BURNERS — Prices on lamp and lantern burners, which have been steadily advancing for the past four years, have been revised to lower levels during the week, based on new prices issued by the manufacturers, which show a reduction of from 10 to 15% per cent., making to-day's selling prices as follows: Lamp burners, Banner, A, $1.05; B, $1.30 doz. Security, A, $1.30; B, $1.70; Canada, 90c. Regal, D., $3.20. Lantern burners, Banner, No. 1, $1.05; No. 2, $1.75.

Cap and Set Screws Revised Downward

Winnipeg.

CAP SCREWS, SET SCREWS—Based on new prices from manufacturers, cap screws and set screws have been revised to lower levels during the week and are now selling at the following discounts: Cap screws, 33 1-3% off list; set screws, 40% off list.

Reduction Made in Shaft and Step Bolts

Winnipeg.

SHAFT BOLTS, STEP BOLTS.—Shaft bolts and step bolts also show a reduction in price during the week, based on latest factory quotations, and are selling to-day on the following basis: Shaft bolts, 20% off list; step bolts, 20% off list.

Twenty Five Cents Jump in Turpentine

Winnipeg.

TURPENTINE—Turpentine prices, as predicted in last week's issue of HARDWARE AND METAL, were expected to advance and show a rise of 25c per gallon on the local market, due to the shortage of the new crop and heavy demands in the South. New prices just issued show the highest figure reached in this commodity and are given as follows: Barrel lots, $1.60 gallon; half-barrel lots, $1.63 gallon; 5-gallon lots, $1.65 gallon; 1-gallon lots, $1.65 gallon, plus the usual extras for containers.

Linseed Oil Advances 37 Cents Per Gallon

Winnipeg.

LINSEED OIL.—As predicted in last issue of HARDWARE AND METAL, flax seed prices were expected to affect the selling price of linseed oil, and prices during the week fulfil this prediction, having advanced a total of 37c per gallon, reaching a new high level. No immediate change is looked for until the new flax crop is assured. To-day's prices are given as follows: Raw linseed oil, $2.30 gallon; boiled linseed oil, $2.33 gallon, in single-barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., June 19.—Production of steel ingots in May was at the rate of about 26,450,000 gross tons a year. This represented about 45 per cent. of capacity, against 65 per cent. in April, 77 per cent. in March, 85 per cent. in February and 87 per cent. in January. The improvement in the buying of steel began about the second week in May, and this improvement caused somewhat heavier production of steel, even before the end of May. The increase does not show in the monthly statistics because previously production had been declining so sharply. It is probable that at some time in May the rate was down to 50 per cent. of capacity, perhaps in the third week of the month, but with the heavier buying for more than a month past there has been a gradual gain and the rate at present may be estimated as being about 60 per

cent. Unless midsummer conditions cause a material slump in production, as the market is almost invariably dull in July and August, the low point in output in May, say 50 per cent. of capacity for a part of the month, will pass into history as the record low rate after the war. It is almost the universal opinion that there is a period of several years of great activity, say from five to ten years, ahead of the trade, the main difficulty being in getting started.

Steel Corporation Tonnage

The Steel Corporation's unfilled obligations at the end of May amounted to 4,282,310 tons, representing a decrease of 518,375 tons during the month, while the decreases in the preceding four months had averaged slightly more than 600,000 tons a month. The May decrease represented about 38 per cent. of the month's capacity, and as shipments were about 58 per cent. of capacity the new bookings appear to have been only about 20 per cent. of capacity, the smallest for a great many months.

Such a showing appears decidedly unfavorable, and certainly out of keeping with the universally admitted fact that the steel market began to grow more active before the middle of May. The difficulty lies with the Steel Corporation report, which includes contracts. Trade practice has been, as to many contracts, that the buyer could specify or not, as he chose, the mills usually cancelling unspecified quotas at the end of the quarter, and sometimes, in recent years, at the end of each month. The contract does not produce mill operation except as it is specified against. The Steel Corporation booked very little contract business in May, and only a very moderate amount of strictly new business in the form of shipping orders. On the other hand, it received specifications, or shipping orders, against contracts in much larger volume than in April. It is learned in well-posted quarters that the actual shipping orders received in May, in new orders and in specifications against contracts, amounted to fully 75 per cent. of the month's capacity. This enabled the Steel Corporation to increase its mill operations somewhat in the latter part of the month, and there has been a slight further increase this month. Yet the monthly report of "unfilled tonnage," which has been given out regularly for many years, made a very poor showing. Sometimes, on the other hand, it makes what appears to be a good showing when fundamental conditions are not nearly as good as is thus suggested.

Steel Prices

In some quarters it is claimed that there is less shading of steel prices than formerly, say a fortnight or a month ago, but these claims are to be doubted. There is probably about as much shading as formerly. The market, nevertheless, may be said to be on a safer foundation for this reason, that the price cutting does not precipitate a general decline. Earlier in the year many producers, if not all producers, had the idea, perhaps a correct one at the time, that if there were any price cutting it would precipitate a break and the whole bottom would fall out of the market. That was why they embraced Secretary Redfield's proposal, afterwards called "price stabilization" in February, because they hoped it would enable them to agree among themselves as to prices, but lost all interest in the matter when about April 1, the Attorney-General rendered an opinion that the whole procedure would be in violation of the Sherman law.

Price cutting, where it exists, rarely runs to $4 a ton, and is more commonly about $2 a ton. Claims are that the great bulk of the business is placed at regular or March 21 prices, but one should not feel too secure about this.

A marked improvement has occurred in the buying of merchant steel pipe, which has been one of the laggards among finished steel products. Since about the first of the year oil country goods have been in excellent demand, and now some of the mills are fully sold for two or three months, one or two being actually behind in deliveries. With the larger demand for merchant or ordinary standard steel pipe the pipe mill operations are much better rounded out.

Sheet Buying

While demand for sheets has been moderately good since the first of the year, averaging fully up to the general run of finished steel products, there has been a gradual further improvement since the fore part of May, when buying was rather light. The buying is more widespread in character. While the leading buying interest is still the automobile trade, some other classes of buyers are coming more to the front, particularly in black and blue annealed. Galvanized sheets continue to move very slowly. Despite the great campaign of road building that is supposed to be in progress the demand for galvanized corrugated culvert stock is conspicuously light. It is said that more than 80 per cent., and perhaps 90 per cent., of the sheets bought are at full prices, 4.35c for black, 6.70c for galvanized and 3.55c for blue annealed.

Pig Iron

Pig iron is perhaps a shade stronger. Of course there is no advancing tendency, but there is somewhat less disposition on the part of certain furnaces to cut prices. This cutting arose largely from furnaces going outside their regular districts in order to eke out on the limited demand from their regular trade, and with more buying by their regular customers these furnaces are less disposed to go outside their districts. The Cleveland furnaces, for instance, are now making few if any offers in the Pittsburgh market, which should normally be supplied by the valley and scattered Western Pennsylvania furnaces. It looks now as though the prices of March 21 would hold fairly well, with such declines as certain districts must have to make a regular price structure. The war time prices did not recognize the differentials that usually obtain between districts. Birmingham iron, for instance, has declined about $3 a ton, whereby it can now penetrate some northern markets in competition with northern furnaces.

MAKE GOOD ROADS—KEEP BUSINESS AT HOME

That the retail seller of auto equipment should be able to dispose of a larger amount of these is dependent upon the improvement of country roads, is the opinion of H. P. Seybold, of Starke-Seybold, Ltd., Montreal. In speaking to HARDWARE AND METAL, Mr. Seybold expressed his regret that Canadian roads were in such a deplorable condition. He believes that the amount of business that is lost through tourists and others being unable to take popular trips to the larger centres is very large every season.

"There are many who would gladly motor to Ottawa from Montreal, for instance," said Mr. Seybold. "The roads are not in a suitable condition, and this travel is almost impossible. On the other hand, the road between Montreal and Quebec is an excellent one, and there is, consequently, a big traffic between the two cities. Better roads between other large cities would make it possible for car owners to take other trips, for, naturally, one does not wish to take the same trip every time."

Mr. Seybold made the observation that the automobile dealers of Canada lost a great deal of good business through tourists having to plan trips that took them far out of their way. Some of them would, for instance, motor down into the Northern States, where roads were good. Many came in to Montreal via Rouse's Point through the States, whereas, if the road conditions were what they might be, other small towns between the larger centres would naturally secure a lot of business. "For," said Mr. Seybold, "the motorist breaks down away from home, or wants something after he has gone away from his home city. This business should be secured by the Canadian dealers."

There also was a big loss, Mr. Seybold thought, to the towns and cities through the overnight charges that would accrue to the hotels and stores. It was high time, in his opinion, for a big good roads campaign.

MOTOR TOURING POPULAR

That the present season is going to be a record breaker in every way, and that a larger number of motorists intend touring Eastern Canada is indicated by the out-of-town inquiries for routes and and road information received by the secretary of the Montreal Automobile Association. During the past week, a total of 45 inquiries came in by mail from all parts, asking for touring information.

The officers of the association are making efforts to make the membership 2,000 this season.

Trade with Schools and Churches

Now is the Time to Get After the Members of School Boards and Church Trustees and Show the Real Saving Property Painting Will Effect—Big Volume of Business to be Had

"GENTLEMEN, there is just one more item of business before we adjourn," remarked the chairman to the board of management of the Downsville Presbyterian Church. "Our church has not been painted for six years and it is high time that we make its appearance measure up to the place this congregation holds in the town. Furthermore, our trusteeship will not permit us to allow this property to go unprotected for lack of paint any longer."

"The first item of business before the board is the opening of tenders for the painting of the school building inside and out," began the chairman of the Bidwell Township Consolidated School Board, at the last meeting of that body before the closing of the school for the summer holidays.

"Say Jim, are you ready to go before the school board to-night and tell them how badly the schoolhouse needs painting and our terms for supplying the paint?" asked Jack Rogers of his partner in the Brownsville Hardware Co.

The above extracts of conversations are typical of many other and similar conversations that are taking place throughout the country at the present time. The approach of the summer holidays when school buildings are left free for repairs, renovation and repainting opens up an opportunity for the sale of various lines. House paint for the exterior, flat wall paints for the interior walls, floor varnishes for the floors and shingle stains for the roof.

During the summer there is less inconvenience caused to diminished church congregations through painting than at any other time of the year.

Keep After Them

The local influence of the paint dealers can also be brought to bear on both church and school boards not to neglect this most needful means of protection and upkeep wherever it is seen that it is necessary.

Whatever excuse the individual members of both church and school board may have for neglecting to repaint their own property, their trusteeship of the property of others should not permit them to neglect painting and re-painting with sufficient frequency to maintain the prolonged service of such properties.

None of these boards can overlook their duty in this regard if the local paint dealer and painter present the "Save the Surface" idea in a proper manner. Their obligations to the community which elected them to office is to maintain the value of the property given to their care. Once the necessity of painting has been brought to their attention they cannot wink at it as they might at their own private property.

Has Been Neglected

Travelling through the country one can readily see that the protection of such public property with paint has not been given the attention that it should. There is seen to be as much neglect in this as there has been with private property.

There are many paint dealers and painters who are in a position to counteract this neglect of they go about it with businesslike intent. The creation of a little public sentiment on the question of painting public property frequently enough to keep it protected will soon bring any governing board to a sense of its responsibility. It should be done on sound business basis as would be done with the private individual.

Destructive Forces

Weather, moisture and climatic conditions are no respecter of churches or schools or other public buildings. They attack these with deteriorating results that amount up to at least 2 per cent. per annum. If a few gallons of paint applied every four or five years will possibly reduce the percentage of loss to one-half of one per cent. per annum, the coffers of the public might as well benefit by the other one and a half per cent. Certainly, paint and painting every four or five years will not cost anything like the loss that arises from neglect.

Paint dealers can most decidedly confer a benefit on the community by advancing the sales of paint in this direction. Perhaps the volume of paint sales will not be so great as the moral influence it will have on the community at large. Every city, town and hamlet maintains a degree of local pride in whatever concerns its public welfare. The automobile now takes both friends and strangers through the main street of the town instead of just past the railway station on the outskirts. Each community is being given more of the "once over" than it has ever experienced before.

People Note These Things

The degree with which its schools, churches and other public buildings are maintained impresses such passersby

Mooramel

A PERFECT WHITE ENAMEL

Made in GLOSS and EGGSHELL White and produces a durable, rich, lustrous, porcelain-like finish that satisfactorily retains its whiteness for years.

MOORAMEL works easy, has perfect flowing properties, ENDURING whiteness and other qualities which make it the EXCELLING ENAMEL. It is without any question the most practical and also the most economical article of its kind ever manufactured.

MOORAMEL can be used with equal good results on either INTERIOR or EXTERIOR work and can be cleansed with soap and water as often as necessary without any injurious effects.

MOORAMEL SELLS AT A REASONABLE PRICE

MOORAMEL like all other MOORE PRODUCTS sells on its MERITS. We do not ask our Dealers to pay high prices to help pay the cost of EXPENSIVE and INEFFECTIVE advertising. We depend on QUALITY and PRICE to sell our products.

This is only one of the answers to the questions so often asked—

? HOW CAN MOORE'S SELL HIGH GRADE PAINTS AND VARNISHES AT PRICES SO MUCH LOWER THAN OTHER MANUFACTURERS. ?

Write us for details of our splendid agency proposition and we will give you further reasons why we can do it.

"Save the surface and you save all" *Paint & Varnish*

BENJAMIN MOORE & CO., LIMITED

One of the largest paint and varnish industries on the American Continent

TORONTO HALIFAX WINNIPEG

The Brush Department

Uses Flat Silent Salesmen for Brushes

Has Been a Winning Idea, Says F. J. Hogan, 280 Centre Street, Montreal—Get the Brushes Before Customers Early—Suggestion is Important

ON the back counter of F. J. Hogan, hardware merchant, 280 Centre street, Montreal, are several flat silent salesmen. The counter is not a high one and with the cases placed on its top, the height is fairly suitable for use as a counter. These cases have been employed to excellent purposes through the accommodation they afford for the brush stock of the store—particularly for the smaller flat and round wall brushes.

The cases occupy a space, lengthwise, of about twelve feet. This is sufficient accommodation for a large stock, and hundreds of brushes are on display. The cases are forward from the paint section, so that the customer, in passing along to select paint, does not require to ask for brushes—he is almost sure to see them. Even though brushes may not have been thought of the suggestion is there, and through suggestion many brushes are sold.

"That case was filled with brushes in the spring, and we have sold a great quantity this year," said Mr. Hogan to HARDWARE AND METAL. "This case is a splendid selling feature. The customer comes along and looks into the case and is enabled to select what is desired without trouble or delay. It has been a great seller for brushes."

Makes Early Displays

In his paint and brush department, Mr. Hogan is a strong advocate of the principle that "the early bird gets the worm." By adhering to this idea he has sold plenty of brushes and much paint weeks before the painting season can be said to have opened, he stated.

"We do a lot of business with the men in this district," continued Mr. Hogan. "The store is near the Lachine Canal and the men working about here like to get their work done early. They do quite a deal of painting while they have time, and before they get busy on other work there is a chance to do this. And when the canal opens and the boats begin to run there is better business generally."

It is apparently wisdom to always display well in advance the various wares that are classed as seasonable. The man of the house, the housewife, the boatman who has a canoe, a skiff, or motor boat, will all appreciate getting the odd painting or varnishing in hand early. Much lies with the hardware man to see that the season be started right. And brushes are unquestionably one of the lines that must be brought to the fore early.

Brush and Paint Sales

There is opportunity for connecting up one sale with another, when it comes to brushes and paint. Mr. Hogan has sold a great many brushes of what might be called the popular-priced variety. "Many buy brushes and when through with them, lay them aside. Then they need a new one. By having a good stock of brushes that can be sold at a price which most people will pay," Mr. Hogan stated, "they will usually throw the old one away and buy another."

While Mr. Hogan operates in a large paint manufacturing centre, his opening order for paint this spring amounted to about $1,100. "I sell more than one quality of mixed paint, but I sell more of the better and higher-priced paint. It is not much trouble to convince the customer to buy good paint. And when a man is starting new work, we often send over a quart of the best paint we have and ask him to try it out, and make no charge for it."

This latter idea is a good one, and has been satisfactory to this firm, Mr. Hogan says. It denotes the merchant's faith in the line and is also a liberal policy. Sales are usually made as a result of the introduction of the line thus made.

While Mr. Hogan operates in a large at this location for some years, he states that he established his business amid many others in the same district. By maintaining a close attention to service he has secured a nice business. "'Service' is our watchword," said Mr. Hogan. In furtherance of this plan, he had one man, for nearly a year, give close and careful attention to telephone orders and to soliciting them. And in addition, speedy delivery has been maintained. For some of this delivery an auto truck has been used successfully.

This illustrates how one Montreal firm, Lariviere Inc., link up their window displays of paints, varnishing and brushes. This is a splendid display recently used in the campaign to increase sales and was a factor in stimulating interest in the various products shown. Apart from the splendid arrangement of the various paints and varnishes, there is a good showing of brushes which links up the two lines. A good use is made of window cut-outs, color cards and paddles, the entire arrangement is one that gets the eye of the passer-by.

FOR OVER SIXTY YEARS the predominating principle that has governed us in all our business dealings and one that has helped us to win and hold the confidence of the general public and the trade, has been the policy of "Square Dealing." Absolute honesty of purpose and good service, backed by goods of merit, have combined to place us in the front rank as manufacturers of high-class brushware.

THE BOECKH TRADE MARK

the symbol of quality and dependability is zealously guarded by us, and any product that bears our imprint carries also with it a guarantee of the best workmanship, and the best of material.

Satisfactory service—quality—the best, and reasonable prices have created the demand for Boeckh's Brushes that dealers should make use of to their advantage.

Your enquiry regarding our products will receive our immediate and prompt attention. We will be pleased to supply you with display cards, advertising matter, etc. Write us in connection with your requirements.

THE BOECKH COMPANY, LTD.

TORONTO - CANADA

SUMMER TRADE WITH SCHOOLS AND CHURCHES

(Continued from page 98.)

or visitors favorably, or unfavorably as upkeep is maintained. The same may be said of the hotels, inns, and roadhouses that cater to the motorist. The rousing of local civic pride is bound to directly or indirectly influence the citizens of the community in the better upkeep and painting of their own private property as well. The necessity of maintaining the most perfect sanitary conditions in schools and churches also opens up other means of promoting paint sales. School floors should be treated, according to the nature of the floor, at every holiday session. Softwood floors should be given a coat of paint. Hardwood floors should be either oiled or varnished. The sealing up of the floors with whatever finish is required not only prevents much wear, but makes it easier for them to be kept clean and sanitary.

The study and scientific research in connection with the influence of color in the surroundings of the schoolhouse has been given a great deal of attention. Both from the decorative and sanitary standpoint the walls of school rooms should be treated with a washable flat tone paint in colors that will have a helpful, restful influence on both teachers and pupils. There is a great deal more in this subject than can be given in this article. Any dealer interested in the subject can obtain a mass of helpful information along this line from his supply house.

Permanent Oil Paint

School walls should not be left in the white. They should be treated with a permanent oil paint that can be easily washed or renewed. Considering the number of interior walls in every school building this will lead to paint sales of considerable volume. At the same time the decorative effects that can be made make impressions on children that are carried home and will quite likely lead to business in the private homes.

The same reasons for flat wall paints can also be advanced for their use in churches, Sunday school rooms and assembly halls.

Just now is the season of year to get after this business. School boards estimating the amount of repairs and renovation necessary for the summer are perhaps in a more receptive mood to receive paint arguments than at any time of the year. No one is in a better position to develop this business than the local paint man and painter whose interest is in such property, along with his fellow citizens. If the arousing of public opinion is necessary, no one is in a better position to do so than the local paint dealer who knows his community from A to Z.

Where to Start

Preaching the gospel of paint like other gospels, should begin first at Jerusalem, and the starting points should be the individual members of the boards that have such properties entrusted to them. If you are planning a "Clean Up and Paint Up" effort in your town no better examples than the public buildings in which all are interested could be selected.

Some idea of the business that can be developed on buildings of this kind may be gathered from the fact that in 1914, there were upwards of 26,000 public schools throughout Canada. In addition to these there are various normal schools, collegiate institutes, private academies, colleges and universities all requiring a greater or less volume of paint. Lacking any definite statistics the writer has been given an estimate of upwards of 12,000 church buildings. Probably this estimate is low, but there are few communities with less than two churches, in many cases more.

Both figures and casual observation indicate a large volume of business for the trade in protecting and maintaining the upkeep of these public service properties. Now is the time to get after it with all possible energy.

STEEL PRODUCERS AND AMERICAN COMPETITION

LONDON, ENG.—The views of Sir Robert Hadfield, the well-known authority on manganese steel and the head of the firm of Hadfield Steel Foundry Co., of Sheffield, find expression in the National News. He says: "A good deal of fuss has been made in certain newspaper quarters, and scare headlines used, because Birmingham recently placed an order for 1,000 tons of tram rails with an American firm instead of a British one. It is said that tenders were asked for from British firms, but that owing to the labor troubles they could not undertake the contract." Sir Robert went on to point out that the placing of this order in the United States was not, as declared by one newspaper, a "blow for Sheffield," as not a single ton of such rails was produced in Sheffield. It happens in every trade that one country, as it were, snatches orders from another. A little while ago it was America who was getting excited because the British were supplying armor piercing shells to the U.S. Navy. Now it chances to be their turn to score, and it ought to be remembered that a little competition now and then is beneficial, not harmful. In any case, we ought to be very thankful that any competition there is in the steel trade is coming from America and not from Germany, as it used to do a few years back. American competition is good because we know that our ally fights fair and square, and will not take a mean advantage of us. German competition was a very different matter, for in the past the German Government paid subsidies so that its iron manufacturers could afford to undercut us in the open market. This, of course, has been stopped by the war, and we have no unfair trickery to anticipate now. The friendly competition between Britain and America will only stimulate the turning our of first rate goods and be to our advantage rather than otherwise.

There is at present a world shortage of steel after four years of its manufacture for purposes of destruction and consequently there will be a very big demand as things settle down and war's destruction turns to peace's construction.

Strong Paint Tendencies—May Advance

Latest Advances for Lead and Turpentine Create Unexpected Situation—May be Deferred Action, But Increase Justified, Say the Manufacturers

THAT there will be an advance in the near future in the price of prepared paint is the strong tendency of the present market. It may even transpire before another week passes that manufacturers will raise their prices, and if this is done it will follow the steady increases that have been made for linseed oil and turpentine. Another factor is the increased cost of containers as a result of the revision in the tariff on tin plate.

HARDWARE AND METAL has been giving the market conditions close attention, and there is not a single tendency that can be discerned but what points to a firming of the market.

"Before the end of the week prepared paints may advance in price," said a Montreal manufacturer to HARDWARE AND METAL on Tuesday. "The market is very strong and it will be little surprise if the same advances."

This informant laid stress upon the high points reached for linseed oil and turpentine. It has been increasingly difficult to secure ample supplies of these, and then only at higher prices. If these prices advance any, or if they even hold as at present, this manufacturer believes that an advance is inevitable.

Another manufacturer stated his belief that linseed oil and turpentine will continue high for several months at least. In such event there is nothing in sight, he believes, but higher prices. Paint manufacturers generally have been giving the matter thought, he says, and the question of grinding new supplies on the basis of higher basic material costs has impressed them with the necessity of considering a revision of price schedules.

While there seems to be a determined desire to not interfere with prices as they exist, if this can be accomplished, it is clear that the matter will be considered from all angles. That there may be increases immediately effected is the opinion expressed by several of the large prepared paint makers in Montreal.

It Pays To Push "Berry" Brands

It's easy to sell any varnish once but a lucrative and growing varnish trade can only be built on quality. The wide reputation of Berry Brothers' Varnishes, Enamels and Stains for giving the utmost in quality values has caused "Berry" label to be known and trusted by all varnish buyers.

It pays to recommend and sell "Berry" Finishes, they create satisfied and permanent customers.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 19.—More than usual interest centres in paint circles this week in view of the strong markets that have developed. Manufacturers freely voice their opinions as to the likelihood of an early advance for mixed paint and this will come, if it does, through the higher oil and turpentine markets. A distinctly firm position has been reached and the matter is receiving consideration of the manufacturers this week.

Linseed oil and turpentine are again advanced, the former being quoted $2.25 to $2.35 per gallon, and the latter $1.55 to $1.70. Both lines are very scarce and hard to obtain. White lead in oil and putty are steadily firm. Rosin has advanced $4 per barrel.

Five to Seven Cents Added Linseed Oil

Montreal.

LINSEED OIL. — Creeping ever higher, linseed oil has reached a basis of $2.25 to $2.35 per gallon, and this means an increase of 5c to 7c over the quotations of last week. Jobbers are not anxious to quote prices at all and there is but a limited supply. Seed quotations were somewhat lower for a day or two, but reaction came and the basis to-day is around $4.80 for spot seed. Declines are not looked for, and if the trade secures what its requirements call for, there will be an advantage in this. Much strength pervades the market.

Raw—	Imp. Gal.	
1 to 4 barrels	$2 25	$2 35
5 to 9 barrels	....	....
10 to 25 barrels	....	....
Boiled—	**Imp. Gal.**	
1 to 4 barrels	$2 27½	$2 37½
5 to 9 barrels	....	....
10 to 25 barrels	....	....

One-fifty-five Low Turpentine Price

Montreal.

TURPENTINE. — Extremely high prices are expected to rule for turpentine for some time, and the advance of the week is ten to fifteen cents per gallon. No relief is in sight, apparently, and with very little stock to offer it is possible that it will be harder than ever to secure requisite stocks for distribution. The paint makers need much themselves and it is certain that they will make distribution as carefully as possible.

No Decline To Come In Putty Market

Montreal.

PUTTY.—Declines are not at all probable for putty and there is every reason to anticipate an advance if linseed oil keeps its upward course. Prices are unchanged for the week and a fair amount of business, seasonably speaking, is being transacted.

Bulk, in barrels	$5 00	$5 25	$5 60

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead Strong Advance Suggested

Montreal.

WHITE LEAD IN OIL.—While the corroders have not intimated definitely that there will be any immediate advance of lead prices, the grinders assert that high oil costs, as now prevailing, will serve to change the price basis very soon for white lead in oil, if these oil prices remain on the high pedestal. Sales are still made on the basis prevailing for some months, but the period for which these prices were named expires with the close of June. Changes might be made at any time to take effect July first. Five ton lots are selling on the basis of $15.50 per 100 lbs.; ton lots at $16; and smaller lots at $16.35.

Rosin Advances Four Dollars

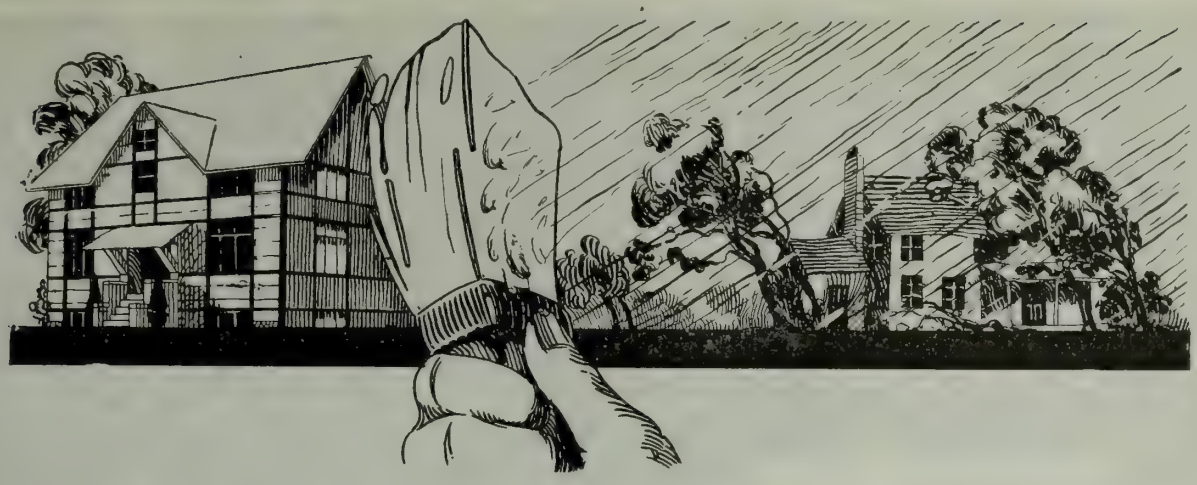
Montreal.

ROSIN—An advance of approximately four dollars per 280 lb. barrel is made for various grades of rosin. There has been an increased demand and supplies are none too heavy. Grades "E," "F." "G" and "H" are now quoted at $19.00 per barrel.

Mixed Paints May Be Advanced

Montreal.

MIXED PAINTS, ETC.—That there will be an early revision of prepared paint prices is not a remote possibility. Several manufacturers, in speaking with HARDWARE AND METAL, expressed their belief that an increase would have to be made. The outstanding factors tending to this are the higher prices for linseed oil and turpentine, and then the latest factor introduced is that of the increase of five per cent. in the duty on tinplate, which comes so largely from the United States at the present time, affecting prices of containers. Increases will be considered and they may come even before the week-end.



TORONTO

TORONTO, June 19.—Although flax seed prices have been very irregular this week, having advanced eight cents and then dropped back four, linseed oil prices have remained stationary. Further advances in linseed oil, however, are expected at any time, as Argentine shippers, who had contracts with American firms, are refusing to make deliveries and are willingly paying forfeitures for non-fulfilment of contracts in order to take advantage of the high prices overseas buyers are offering. During the week turpentine reached the highest prices ever paid at Savannah, but there has been a slight reaction and present quotations are 1¼ cents below the new high record at Savannah. Large shipments are being made overseas, but indications are that the export demands are being filled and that slightly easier prices may prevail. To-day's Toronto quotations show an advance of five cents. Owing to big demands, both at home and for overseas, rosin prices have advanced rapidly, and to-day's quotations are $5 per barrel higher than those of a week ago. As a result of the soaring prices of turpentine, linseed oil and other materials paint manufacturers are considering revising their quotations and there is every indication that advances will be made very shortly.

Linseed Oil Steady; Likely To Advance

Toronto.

LINSEED OIL.—While prices of linseed oil show no change from those of last week, advances are expected at any time. Some of the crushers have been making fairly substantial shipments to Liverpool. Shipments of seed are coming to hand slowly and, it is stated, that there is not half the seed in the elevators that was available at this time last year. Argentine seed is being steadily diverted to overseas points and

The Paint Brush Forms The Only Real Protection

IT is this thought—"Protection"—that furnishes the key-note of the co-operative campaign now under way, to increase the consumption of paints and varnishes throughout Canada.

Every firm or individual making or selling paint products, is expected to do his part to make this campaign a success.

You will share in the **profit** the campaign is bound to bring to the paint and varnish trade—you will naturally want to share in the **effort** to impress the public with the importance of "painting to protect."

In your windows and in your newspaper ads make constant use of the phrase that has been adopted in connection with this big co-operative campaign.

"Save the surface and you save all" *Paint & Varnish*

In order to get **maximum** benefit from this great movement you should make sure that you have the right **brand** of paints and varnishes to offer those people who are inspired by the educational advertising of the Paint and Varnish Association to do some painting. There are several reliable brands of paint, but only one B-H English Paint. Considering its advantages in quality and its equality in price, B-H "English" Paint is the logical line for you to handle. And, when you add the outstanding publicity done for B-H "English" Paint, the reasons become overwhelming.

If there is no B-H Agent in your town, here's your opportunity. Do not let it escape you! Write at once to our nearest Branch, and let us lay our attractive proposition before you.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG

MEDICINE HAT CALGARY EDMONTON VANCOUVER

many American firms who had contracted for large supplies are receiving instead forfeitures for non-fulfilment of contracts. No relief as far as Canadian supplies are concerned is expected until the new crop comes on the market in October. In the meantime prospects are for a steady demand and very firm prices. Quotations range from $2.40 to $2.45, as follows:

Linseed Oil—		Raw
1 to 2 barrels, gal.	$2 40	$2 45
3 to 5 barrels, gal.	2 39	2 44
10 barrels and over	2 37	2 42
		Boiled
1 to 2 barrels, gal.	....	2 48
3 to 5 barrels, gal.	....	2 47
1 bbls. and over	....	2 45

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Turpentine Reacting; Rosins Are Advancing

Toronto.

TURPENTINE, ROSIN.— Following an advance which smashed all previous price records at Savannah, turpentine has reacted slightly and quotations are now 1¼ cents lower at Southern ports. Nearly 10,000 barrels have moved out for overseas ports during the week and this had the effect of increasing prices. With the large shipments that have been made it is felt that a great deal of the export demand may have been met and that prices are likely to reach lower levels before long. The trade in general would welcome this, as it would make for a better business all round, many refusing to buy at the recent high quotations. Rosins are showing great activity and there is a big demand for supplies, both for home and overseas markets. Local quotations are $5 a barrel higher than those of last week, and even higher prices are looked for. Turpentine quotations are five cents in advance of last week, and are as follows:

Turpentine—		Imp. Gal.
1 barrel (barrel included)	....	$1 60
2 to 5 barrels (barrel included)	....	1 59
5 gallon lots	....	1 70

Paint Prices Seem Likely To Advance

Toronto.

MIXED PAINTS.—"Matters simply cannot go on as they are without prices being advanced shortly," was the way one manufacturer summarized the outlook in regard to mixed paints. With turpentine, linseed oil and other things needed in paint making steadily climbing, an advance in paint prices, it is stated, is inevitable. The matter will be discussed very shortly by the manufacturers. In the meantime, orders continue to pour in and one of the very best paint-selling seasons on record for many firms is drawing to a close. One manufacturer declared that for every ten-cent advance there has been in linseed oil, there should be an increase in paint prices of seven cents and on this basis, not considering higher costs of turpentine and other ingredients, there would be an advance of 35 cents a gallon.

White Lead in Oil Expected To Advance

Toronto.

WHITE LEAD IN OIL—While quotations on white lead in oil show no change there is every indication that prices may shortly be revised to higher levels. The change in the tariff by which lead prices advance will be one of the factors in determining future quotations, and the steady advances in the price of linseed oil is another. Quotations at present are: 5-ton lots, $15.80 per hundred pounds; 1-ton lots, $16.30, and in smaller quantities, $16.65.

Glass Prices Firm; Putty May Go Higher

Toronto.

PLATE GLASS, PUTTY.—Although American plate glass firms have advanced the prices in many cases as high as twenty per cent. Canadian prices have not yet been revised and will not, it is stated, until the present stocks purchased at the old basis are exhausted. These stocks are not large. A fair volume of business is being handled in both plate and window glass.

While putty prices show no change as yet, there is every indication that the higher prices of linseed oil will cause putty quotations to move up. Prices at present are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. iron	6 15	6 40	6 55
Do., 25 lb. irons	6 40	6 65	6 80
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 45

Pure putty advance $2 per 100 lbs. over above.

MOTOR TRUCK OWNERS TO ORGANIZE

Montreal—An organization to be called the Motor Truck Owners' Association of Eastern Canada is being formed, and it is the intention to use the influence of the combination to look after the interests of commercial car owners. The board of directors is now at work on the details. Truck agents and manufacturers will not be admitted to membership, as it is intended for proprietors only. The main object will be to solve the many questions of vital interest to commercial car owners.

Information has been obtained from various motor truck associations in the United States, and this will be taken advantage of by the local truck men.

DU PONTS FORM NEW $250,000,000 CORPORATION

The du Pont Securities Co., with a capital of $250,000,000, has been chartered at Dover by Pierre S. du Pont, Irene du Pont and John J. Raskob. With the filing of the charter, the charter of the old du Pont Securities Co. was amended to change the name to the General Industries Co.

The purpose of the new organization is set forth in a letter to stockholders of common stock of the E. I. du Pont de Nemours Co., in which they are offered a chance to exchange their stock for that of the new company. The new company has issued 2,500,000 shares of common stock at $100 par and all future investments, apart from those in the explosive and chemical industries, will be made through the new company.

The new organization, it is felt, will enter the motor field as well as other industries, and the move is taken to indicate that the du Ponts are planning to expand along broader lines in the industrial world.

Big Demand for Insecticides Following Unusually Hot June Weather

Potato Bugs in Many Sections Appeared so Thickly That Farmers Had Hard Time Saving the Crops—Circular From Government Department of Agriculture Gave Timely Hint to Dealers to Prepare

THE unusually hot weather that has prevailed all over the country for the past two weeks has resulted in an enormous demand for insecticides. The warm nights and hot days caused potato bugs, grubs, and all sorts of similar pests to appear in such numbers that really serious damage and heavy loss was threatened. The Dominion Department of Agriculture sent out a letter to manufacturers urging them to be prepared to meet heavy demands for Paris green, arsenate of lead and other poisons, and to advise their customers that it would be well to be prepared for calls for large quantities of insecticides.

Events have proven that this warning was timely, as dealers report heavy demands from all parts of the country. In many sections the potato bugs have been more numerous than in years before and only prompt spraying of the plants by the farmers kept the pests in check and prevented the loss of practically the whole crop. It is stated that there were ample stocks to take care of the heavy calls that have been made as manufacturers did not have large stocks on hand last season, and even prior to the Government warning had prepared for a fair volume of trade. To this was added what many of the retailers had left over from last season, and which came in very handy for use while additional quantities were being secured from the factories.

We Manufacture Wire Solder

We make wire solder of any desired composition or size (guaranteeing the mixture to be exactly as represented) and for any gauge or size. It is made by our improved hydraulic process, which not only insures absolute uniformity in composition, but makes the wire perfectly smooth and of an even size throughout its entire length.

When not otherwise specified we send No. 8 gauge.

C·C·M· Bicycles Easier to Sell

THE great advantage of selling a Well-Made, Well-Known and Well-Advertised Bicycle, such as the C.C.M., is excellently expressed by a well-known Ottawa dealer, who says:

"We find the people in many cases fully acquainted with the C.C.M., and what it stands for, so that in selling a wheel it is only necessary to state that it is a C.C.M. and half the selling is done.

"We wish to congratulate you on the splendid results of your street car and newspaper advertising campaign in this city. We have many concrete proofs of its efficiency and attribute to it a large share of the credit for our unprecedented sales this year."

A number of C.C.M. agencies are still available. For full particulars please write to Head Office or nearest Branch.

The Principal C.C.M. nameplates are:

The Simms' Trademark Stands for Supreme Quality

Hardware Salesmen of Canada! Do you know that when you sell Simms' Set-in-Rubber Shaving Brushes and Paint Brushes, you are selling Brushes of the highest quality made?

Do you know that the Simms' Set-in-Rubber Trademark represents 200 shapes and styles of Shaving Brushes, and *every one* of them a Better Brush —far superior to imported brands, yet lower-priced?

Do you know that painters throughout the length and breadth of Canada would rather have a Simms' Set-in-Rubber Paint Brush than any other, and that if you sell them Simms', they will come back to your store whenever they need a Brush?

It will pay you well to familiarize yourself with the Simms' Set-in-Rubber Quality. Write us—sit right down now and do it—and ask any questions you care to in regard to our goods.

We will take great pleasure in giving you the fullest information as to why Simms' Set-in-Rubber Brushes are in such great demand. This will help you to a high sales-record.

STOCK
DOUGALL UNIVERNISH

There isn't any question. It's the best all round varnish you ***can*** stock.

For Inside, for Outside, for Boats or Canoes, for furniture or woodwork, you can readily recommend UNIVERNISH.

Water will not affect UNIVERNISH—Neither will steam—UNIVERNISH NEVER TURNS WHITE.

For Pantries, Kitchens, Bathrooms where the woodwork is subjected to mighty hard wear—That's the place for UNIVERNISH. Where the Wear's hardest.

UNIVERNISH is furnished as a Clear Varnish and in the following transparent wood colors—

LIGHT OAK DARK OAK BOG OAK
MAHOGANY WALNUT GREEN

Write for Univernish Literature. Ask us about our Dealer Proposition. Window trim and display cards sent free on request.

Do householders remember WA-KO-VER Stain when they are in your store?

RIGHT now there should be a prominent counter display of Wa-Ko-Ver Stain where your customers cannot fail to see it. Nearly every householder is considering at this time of the year the best means of beautifying his home, and a well-placed display in your store would jog his memory at the right time and create sales for you. We can help you make your display effective and catchy. If you have not our latest counter display, write for one to-day.

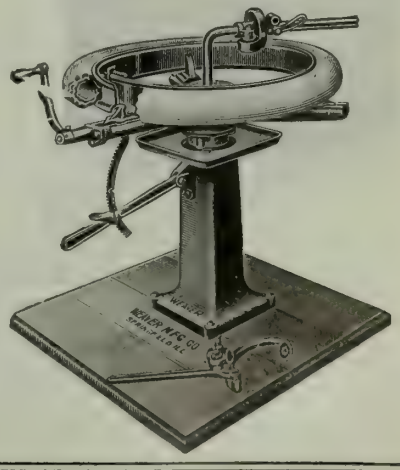
WEAVER GARAGE AND SHOP EQUIPMENT



The requirements of the garage and repair shop have been carefully studied and diagnosed by the manufacturers of this line with the result that the various difficulties and contingencies that arise in the handling and repairing of automobiles can now be disposed of

Quickly and Economically

and with a minimum of labor.

Each device in this very complete line is an article of real merit and a practical necessity to the garage or repair man.

Ask for a copy of the WEAVER BOOKLET and also a copy of our 1919 ACCESSORY CATALOGUE.

GREAT WEST ELECTRIC CO., LTD.

WINNIPEG

Distributors of LACO TUNGSTEN and NITRO LAMPS.

"Hillcrest" — on paint and varnish is the sign post which shows the way to a real satisfied-customer business

The "Hillcrest" line has achieved wonderful success for the merchants who are pushing this brand of paints, varnishes and paint and varnish specialties.

Don't hesitate to put your selling force behind the "Hillcrest" line. The goods are right and prices consistent.

When your present stock becomes broken, let us sort it from the "Hillcrest" line.

Try out the service which has made Sanderson Pearcy & Co. noted.

We have an excellent city truck service and can deliver on short notice to any part of the City of Toronto as enclosure. Send a trial order.

The DAYLO "out-of-doors" Campaign for June

The Eveready Three-Year Plan has been resumed with full force.

June will have a strong feature campaign—the outdoor uses of the Liberty Daylo will be boomed.

Snappy consumer advertising—the kind that has increased Daylo sales by leaps and bounds this year—will drive home the uses of the Liberty Daylo for hunting, fishing, boating—wherever light is needed in the out-of-doors.

Millions of people will see these advertisements—hundreds right in your town—and will want Daylos. Tungsten Batteries, galore, will be called for too.

The coming demand for Daylos will be tremendous. The Eveready Team-Work Dealers will be supplied with sales ideas and display material to link up with this campaign.

Theirs will be the opportunity to get the largest share of the Daylo and Tungsten Battery business.

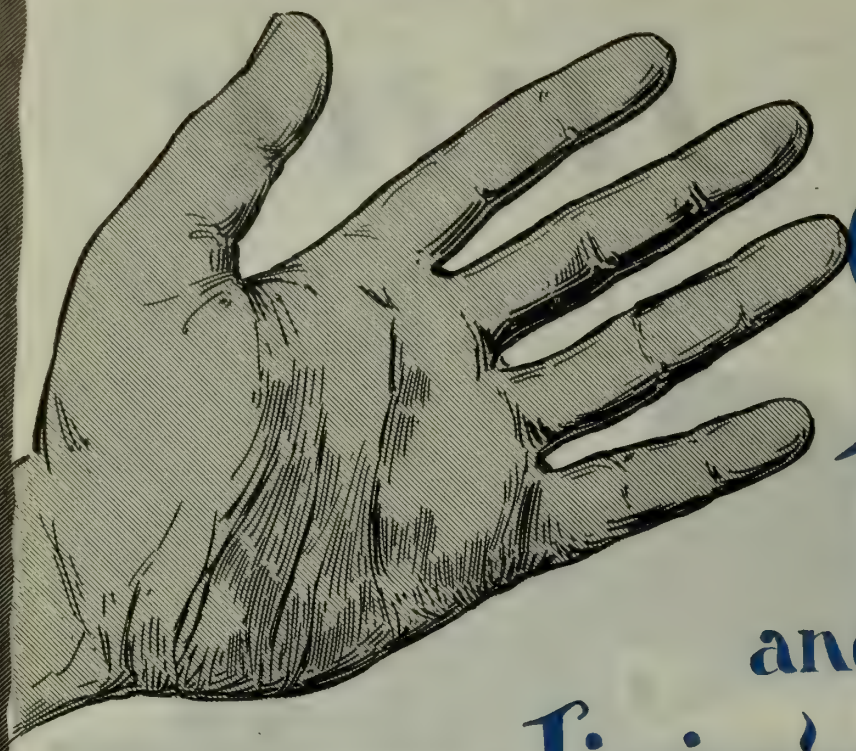
Other campaigns are being planned. If you haven't signed up as a Daylo Team-Worker find out now how you can boost your sales under the Eveready Plan of dealer-co-operation.

Send the coupon below for details. Do it today so as to get in early on these quick-profit campaigns.

Department 213

CANADIAN NATIONAL CARBON COMPANY, Limited

Toronto, Ontario



Attach this coupon to business card or letter head to insure correct name and address Canada—708

CANADIAN NATIONAL CARBON COMPANY, Limited, Dept. 213, Toronto, Ont.

Please send me full information regarding the Eveready Plan of Dealer Co-operation. I am_____already an Eveready Daylo Dealer.

The Open Hand is our Trade Mark and such is the "TRADE MARK" Livingston Policy

OUR aim from the start has been *Quality* and to-day the entire assets of our Company are behind each and every gallon of *Linseed Oil* manufactured.

We guarantee this *Policy* shall always be maintained.

The Dominion Linseed Oil Company, Limited

Baden Toronto Montreal Winnipeg

The positive guide to quality
Linseed Oil is the

Livingston Brand

which for over half a century has been the Standard by Test.

The name "Livingston" on the Barrels is the guarantee of quality and the "Blue Barrel" is the outward mark of the inward quality.

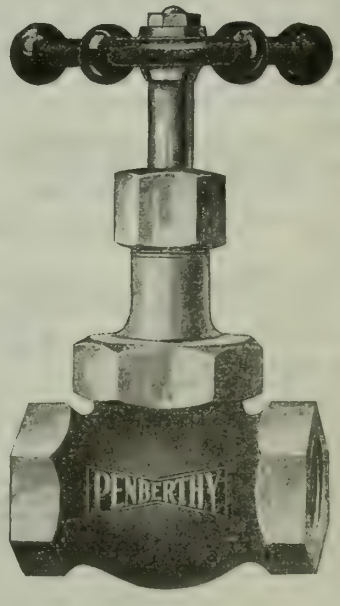
TRADE
PENBERTHY
MARK.

WHAT'S IN A NAME?

A whole lot if there is a reliable, dependable reputation behind it.



HERE IS A TRADE-MARK

that is known by every engineer and dealer of brass goods in Canada. It carries with it a reputation for high-grade quality and satisfactory service. It has won the confidence of the public by merit alone, and to-day it is recognized as representing the very best in engineers' brass goods.

WHEN YOU PURCHASE

Injectors - Ejectors
Globe and Angle Valves
Gate Valves - Check Valves
Oil and Grease Cups
Sight Feed Lubricators
Plain Engine Lubricators
Steam Whistles
Cellar Drainers
Etc., Etc.,

Make it a point to say

"PENBERTHY"

Every Hardware and Plumbing Supply Store can get our Catalog and Prices on request.

Why Not Write To-Day?

PENBERTHY INJECTOR CO., Ltd. : Windsor, Ont.

"Save the surface and you save all" *Paint & Varnish*

Maple Leaf Paints and Varnishes

stand between you and your customers as a guarantee which means absolute mutual satisfaction and thorough protection of the surface of property.

Protection and service are the best motives behind the sale of paint or varnish. Paint advertising is now teaching the public to buy for surface protection. Paint and protection will mean the same to each buyer.

Maple Leaf Paints and Varnishes are made for the prime economic purpose of protection. Selling **Maple Leaf** means selling protection as well as paint, which is the reason why **Maple Leaf** agents enjoy the permanent confidence of their trade.

TIME SAVER

Means:

A Washer that's easy to sell.

A Washer that satisfies every customer.

A Washer that makes friends for itself and for the store that sells it.

The "Time Saver" is just what its name implies. The washing can all be done and out on the line by nine or ten o'clock. These hot days are no time to be standing for hours over a steaming washtub, and your customers thoroughly realize that.

A beautifully finished "Time Saver" on the floor in the store will soon sell and will soon bring further sales.

In this small space we cannot tell you all about the patented features of the Time Saver, but we have prepared an eight-page circular in six colors which we should like to send you.

Drop us a card to-day for the circular and particulars of our plan to co-operate with you in selling.

The Washer with the "Time Saver" trade mark will make money for **YOU.**

Help him "get" those Potato Bugs

THE world requires of Canada this year a bumper potato crop. The big crop will undoubtedly be forthcoming if the potato grower can get the upper hand of his arch enemy, the potato bug. You can help him, and thereby earn his gratitude and good will (to say nothing of a nice profit), by selling him the insecticide that never fails to kill—

Munro's Pure Paris Green

(Government Standard)

Munro's Paris Green is not only the most deadly bug exterminator you can handle but also the most profitable. Everybody knows how effective it is, it doesn't need any introduction or try out. It is ***the*** certain-sure potato bug killer that every grower acknowledges the best on the market.

Pushing the sale of Munro's Paris Green is a real effort towards the production of a big potato crop. Keep your stock up.

Do High Prices of Machine Tools Hinder Sales?

THE question asked of a considerable dealer in Toronto by THE FINANCIAL POST is answered by him in THE POST of March 8th, in part, as follows:

> "New lists that are coming out do not show concessions in prices. As long as firms can sell at the present prices there is not much chance for a lower level of values."

The rest of that article in THE POST is interesting, and here are some other extracts worth noting from POST items of this week:

Implement Manufacturers May Unite for Export Trade

"Representatives of the implement manufacturers have been at Ottawa in consultation with the Canadian Trade Commission to arrange for the pushing of their export business. What is likely to be proposed to them is that they should work in concert, and their orders abroad should be placed through a central selling body, the expenses of conducting which should be maintained by a pro rata tax on each member of the association. They will provide their own credits from a common fund, which can be created by contributions gauged according to the respective interests involved."

Steel Market Is Still Unsettled

Big American Interests Co-operating in Secretary Redfield's Plan

The talk of lower prices for steel continues in the market. It is a fact that the "set prices" of the war period have, in many ways, spoiled the trade for what has followed. When prices were fixed, buyers and sellers knew their ground for the coming three months. Not only so, but they were quite certain that when changes would be made they would not be radical, and would be in keeping with the cost of material and labor entering into the output.

Last week a number of prominent steel producers were meeting in New York, and according to the authorized version they "discovered" that George N. Peek, recently named by Secretary Redfield as chairman of "The Industrial Board of the Department of Commerce" was in town, and accordingly they invited him in to explain Secretary Redfield's plan for the deflation of war-time prices. Indications are that the steel producers are going to make a show of resisting the movement, but will gracefully yield at the last moment.—"The Financial Post," March 8, 1919.

Above is part of a front-page news item in THE POST of March 8th.

Latest Activities of Steel and Iron Using Interests

Stove Manufacturers Out For Export Trade

"The Canadian stove and enamelled ware manufacturers are making an aggressive effort to develop export business and to secure orders from Europe, Australia, New Zealand and South Africa. A. M. Smith, sales manager of the McClary Manufacturing Company, will, on behalf of the manufacturers, make a personal investigation of European prospects."

New Ship Repair Plant For Vancouver

"Seattle men propose to build at Vancouver, B.C., a steel dock of 25,000 tons, capable of handling the largest ships which make the Port of Vancouver. Embraced in the enterprise will be a shipbuilding and repair plant, the whole to cost in the neighborhood of $4,000,000."

New Iron Industries For Border Cities

"Plans are being made for the location of a large malleable iron corporation with extensive connections in the United States, on the Windsor industrial site. Negotiations to this end have been pending for considerable time. Altogether, 12 large manufacturing firms with headquarters across the border are negotiating for sites in the Border Cities."

Business Building News Items Appear Each Week in *The Financial Post*

The above are only a few of the many subjects of real profit-making interest to Canadian men of affairs which have been dealt with by expert writers and editors in THE POST of March 8th. THE POST will keep you informed on Canadian business matters in a way unrivalled by any other publication. Send for a subscription to-day. The price is $3.00 per year, and you have only to fill in this form:

The MacLean Publishing Co.,

Sell roofings that have proved themselves

No dealer can afford to recommend or push "bargain" roofings if he expects to be in business five years from now. It is safest to tie up to a well-known line that has *made good.*

Barrett Everlastic Roofings have *proved* themselves. They sell for a fair and honest price, and when you sell them you can have the comfortable knowledge that your customers will find them wonderfully satisfactory and that they will continue to be good customers, year in and year out.

Everlastic "Rubber" Roofing

Thousands upon thousands of buildings are protected from wind and weather by Everlastic "Rubber" Roofing. It is made of high-grade waterproofing materials and is tough, pliable, elastic and very durable. It can be sold with perfect confidence that it will give satisfaction.

Made in 1, 2, and 3-ply weights, each roll containing enough to cover 100 square feet of roofing surface. Complete with nails and cement for laps will weigh about as follows: Light (1-ply) 35 lbs.; Medium (2-ply) 45lbs.; Heavy (3-ply) 55 lbs. per roll.

Everlastic Slate-Surfaced Roofing

The most beautiful and durable roll roofing made. Surfaced with real crushed slate in soft shades of red or green. The slate not only makes a very handsome roof, but one that is fire-resisting.

Remind your customers that this roofing requires no painting. The colors are fast. Comes in rolls 32 inches wide, weighing about 80 lbs. Nails and cement included in each roll.

Write nearest office for prices and further details.

THE "WANT" AD.

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

Hardware and Metal

Classified Advertising Section

143-153 University Ave., Toronto

When writing to advertisers kindly mention this paper.

Which Separator Did John Johnson Buy?

Suppose you were Farmer John Johnson and you wanted to buy a separator. You asked several separator manufacturers to send you a ten-word telegram stating in the most convincing way, why their separator was the one you should buy. Sharples would only need **five** words: "It skims clean at any speed," and you would not have to ask for anything further.

No other separator manufacturer could put into five words or **fifty** words, as convincing an argument as "Skims clean at any speed." They would tell you about the durability of their separator, that it was well known, that it cost less and everything else **but** the **one** big reason why you need a separator—to get **all** the butterfat out of your milk. Sharples also has the exclusive advantage of no discs in the bowl; knee-low tank; once a month oiling system; durable construction and besides, it is the pioneer North American Separator.

AND FOR THE SAME REASONS DEALERS SHOULD

look closely into the matter of their Separator Contract. Will the separator you are now handling stand the telegram tests? If you are fortunate enough to be a Sharples Dealer, you have the answer. If not, you are going against the tide. Hundreds of thousands of times each month the words "Sharples Skims Clean at Any Speed" are being put into the minds of American dairymen through Sharples National Advertising. Why not put this **positive** selling force at work in your territory for you? Write nearest branch.

LLOYD HARRIS

Chairman of the Canadian Trade Mission in London, on his return from Europe last week, gave at the Annual Meeting of the C.M.A. an immensely interesting address with valuable, practical pointers closely detailed on

THE RIGHT METHODS FOR SECURING FOREIGN TRADE FOR CANADIAN FACTORIES

The only full stenographic report published of this splendid address appears in the June 14th issue of

THE FINANCIAL POST

Send for your copy of THE POST to-day and secure with the Lloyd Harris address THE POST'S usual splendid service of information of big value in the development of Canadian business. Here are a few of the contents of THE POST for June 14th:

Prospects for Steel Orders Are Increasing.
Rallying Union Forces to Support of White Budget.
Bolshevism at Last Arousing Ottawa.
Toronto Rails Faces Serious Strike Problem.
Incorporation of New Oil Companies Breaks Record
May Building Permits Show Good Increase.
Saguenay Pulp Has Bond Issue of $5,500,000.
Maritimes Charge Discrimination.
Bond Market Develops More Life and Action.

These are just a few jottings from THE POST contents list of June 14th, and the contents list gives only a few of the leading articles. You will find far more of interest, and perhaps of actual cash value to your business in THE POST'S big service of factful news and shrewd comment on commercial affairs.

When you "get down to business" you want the plain facts —all of them—without frills—and quickly. You get them like that in THE POST. THE FINANCIAL POST will keep you informed on Canadian business matters in a way unrivalled by any other publication. Send for a subscription to-day. The price is $3.00 per year, and you have only to fill in this form:

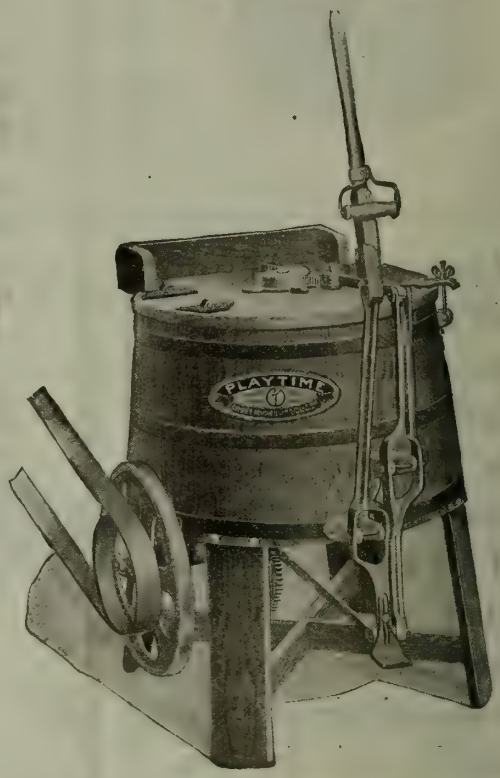
Send me THE FINANCIAL POST every week till further ordered. I will pay subscription price, $3.00 per year, on receipt of bill, or you may draw on me for this.



Name .....

Address .....

The Playtime

is a dolly-type washer which meets every demand for a combination hand and engine drive machine.

It especially appeals to up-to-date farmers who are not yet prepared to invest in the higher-priced "seafoam" washing and wringing outfit.

Without alteration it can be belted to the flange fitted on fly-wheel. Should the power stop at any time it is ready for hand use.

The cover can be raised and lowered without removing the belt.

Tub is made of Cypress, corrugated and waterproofed inside, heavily hooped and durably finished. Its reputation has been established for some years.

Remarkably low in price.

Descriptive folder on request.

It is a Pleasure to Sell *The* Apex Electric Vacuum Cleaner

You feel you are really doing your customer a kindness by selling her one—it is so wonderfully efficient — so simple, flexible and powerful in operation—so strikingly handsome in appearance. Its superiority over every other cleaner is at once apparent. A valuable and exclusive feature, a very strong and convincing selling point, is its sloping nozzle, which gets under radiators and low, heavy furniture, cleans away into corners not reachable by any other cleaner. This wonderful nozzle is 13 inches wide and has uniform suction throughout its entire width. The APEX brush is self-cleaning and picks up all kinds of dirt that defies brooms and ordinary cleaners.

The APEX is easy to sell. Write for prices, exclusive territory and full particulars.

McDonald & Willson, Limited
347 Yonge Street, Toronto

Why Not Stock Them?

WE are Washing Machine specialists. For twenty years we have been manufacturing home laundry equipment exclusively. Our "1900" Cataract and "1900" Agitator Electric Machines are the best designed Washers on the market. They are mechanically perfect and give wonderful satisfaction.

A liberal profit is allowed on all "1900" Washers and Wringers. Our complete line includes washers that operate by Hand, Water Power, Engine Power and Electric Motor. We also have a full assortment of sizes and grades of superior, beautifully finished hand and power wringers. The profit made by carrying the "1900" line is limited only by the "prospects" within your reach.

"1900" Agitator Electric

"1900" Cataract Electric.

Extensively Advertised And the Dealer Gets the Benefit

Every dealer who proves his worth is handed all the inquiries from his territory resulting from our twice-a-year advertising campaigns.

If, at the present time, you do not carry a line of washing machines, or are looking for "something better," you will profit by writing our "Wholesale Department."

THE "1900" WASHER COMPANY
537 Yonge St. - Toronto

Concerning Trade Marks

A trade-mark on an article is the manufacturer's bond that he is willing to stand behind his product.

Trade-marks are of vital importance to the dealer. They safeguard him against dissatisfied customers. They are the symbol of uniformity and quality.

In handling C.G.E. goods the one predominating feature which stands out above all others is consistency. People now-a-days are impatient of men or commodities that work well, to-day, and not quite so well to-morrow.

It is an ever-increasing source of satisfaction to the dealer, no matter whether it be Electric Labor-Saving Devices, Automobile Accessories, Electric Lamps, Electric Cooking or Wiring Devices, to know that in selling his customers C.G.E. Products, he is building up a good-will that eventually will be one of his greatest assets.

Dealers everywhere sell C.G.E. Products.

TRY US AND BE CONVINCED

Letting You Into A Secret

THEY were talking about things in general — Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakening up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly ready by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap-book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

PEERLESS ORNAMENTAL FENCING

Is the last word in fencing, beautifies, protects and enhances the value of your property. It safeguards your children, keeps out marauding dogs, animals and destructive chickens, protects the lawn, shrubs and flowers and prevents trespassing. It wears well, too.

Beautify Your Home with

Peerless Ornamental Fencing. It is built of strong, stiff wire, heavily galvanized and coated with zinc enamel to prevent rust. In style, durability, service and every feature combined to insure absolute satisfaction, the Peerless fencing is true to its name. It will not sag and cannot break down with ordinary use.

Send for Catalog. Shows many beautiful designs of fencing for lawns, parks, schools, churches cemeteries, etc. **Dealers nearly everywhere.**

BOWSER

PAINT OIL STORAGE

enables workmen to handle paint oils without loss. They prevent leakage, evaporation and gumming of oils. The pumps deliver accurate quantities, no over-running cans or other containers —no loss through dripping faucets — no oils left in barrels.

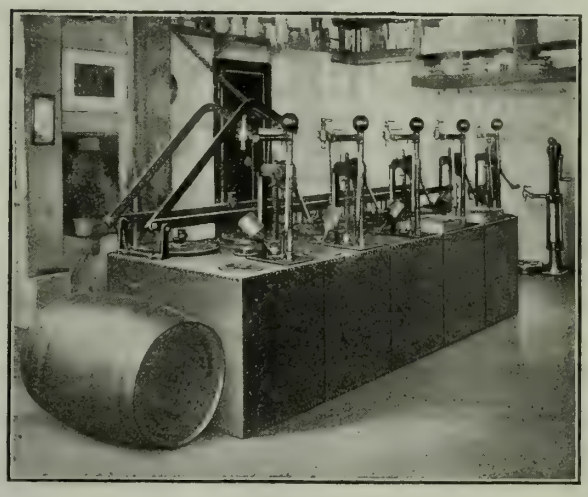

Illustration shows a Battery of Bowser Figure 109 First Floor Paint Oil Outfits with one Bowser Long Distance Paint Oil Pump, Figure 41.

There is no fire hazard from such oil storage. All oils are kept in a uniform consistency which means better results in the Finishing Room.

There are Bowser Systems suitable for all requirements in storing and handling paint oils as well as gasoline, lubricating and other oils.

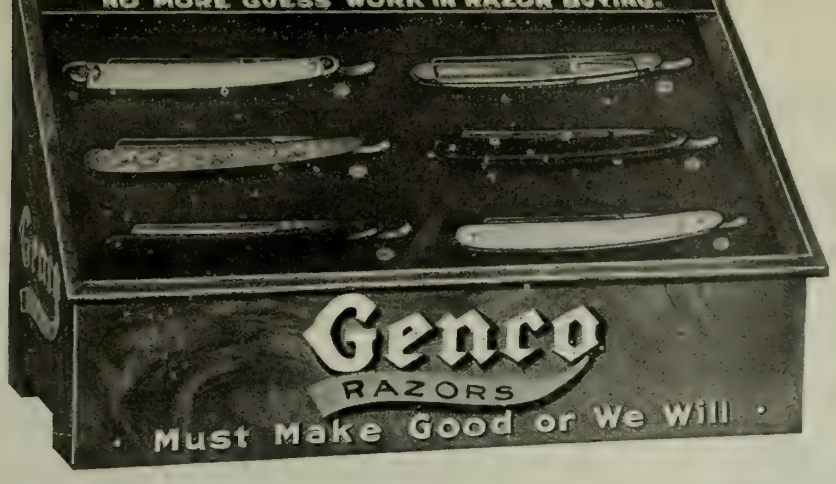
Tapes and Rules

Made in Canada



Familiarly and Favourably Known

Embody Many Improved, New and Exclusive Features.

Accurate THE LUFKIN RULE CO. OF CANADA, LTD. *Reliable*

WINDSOR, ONT.

Interest in razors is aroused by advertising and display. You change razors into coin of the realm by using just the right selling talk.

The GENCO Display Cabinet makes a man think of razors who came in only to buy a box of tacks. You use the right-to-the-point selling talk appearing in our advertising and —Bingo! you ring up a good profit.

Every barber uses a blade like the blade on all GENCO Razors. These professional shavers would certainly turn to a better blade if there were a better one. The Safege is a professional blade with a guard. With this guard flipped back or removed entirely, the razor can be stropped and cleaned just like a professional razor.

Anybody can strop a GENCO Razor. It is made with a heavy back and is hollow ground and beveled, and lies against the strop at just the correct angle to bring up a perfect edge for a lifetime of shaves.

You can have this handsome GENCO Display Cabinet with your first order ***Free.***

It will stop and interest many a man in razors who came to your store to buy something else. "Let me look at that razor?" It helps sell and it saves your time.

RAZORS

Must Make Good or We Will

Anticipate Their Needs

THE hardware dealers and the garage man who anticipates their patrons' needs is the man who gets the business.

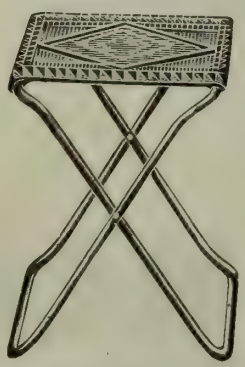
It gets you goodwill which can be counted into many hundreds of dollars by the end of the year.

Your customers are going to experience a number of unexpected wants this Spring and Summer.

If you are equipped to fill those needs when the articles are needed, you are the man who is going to hold that customer's trade.

He may be fond of gardening and take great delight in keeping his garden in shape.

His hose-reel may be somewhat worn.



If you have one that appeals to him he will buy it. A hose-reel would make an attractive feature of your Spring Display.

Our hose-reels are unusually simple in construction, yet are very durable. They are built for utility and permanence.

Camp stools, chairs, etc., are also in demand just now. You should have a good variety on hand.

We make every kind of camp chair, folding chair for motor cars, boat seats, child seats, etc.

Be ready to show your customers these most attractive lines.

We invite correspondence. Mark your communication "General Sales Department."

THE MACLEAN PUBLISHING COMPANY, LIMITED
PUBLICATION OFFICE: TORONTO, CANADA

THE SPHINX IS BRITISH.

BRITISH in the sterling quality of material and of workmanship, Sphinx Spark Plugs are made specifically —not just adapted—to meet the requirements of American engines.

Sphinx Plugs are sparking on British behalf in every theater of war. Every part is perfect. There's a standing guarantee to replace *at any time,* free and promptly, any Sphinx Plug not found flawless in workmanship or material.

The Sphinx solves every plug problem—is without rival for reliability —is indifferent to high speed or low, to engines over-oiled or overheated—has insulator of Sphinx-made steatite—is easily detached for cleaning.

To push Sphinx Plugs is to win the goodwill of customers —and the dealer's profit is generous.

Sole Agent for the Dominion:
W. T. EVANS, 1684, ST. URBAIN STREET, MONTREAL.

SPHINX

Turn the Buying Impulse *into* SALES

It is a woman's instinct to want her home bright — a natural woman's impulse to accept whatever she believes will enable her to keep her home interior attractive and her furniture looking like new.

It is one of her greatest expressions of domestic pride to have her floors and furniture clean and shining.

Along comes our newspaper advertising to tell her of a Polish that enables her to get better polishing results—and as she reads those truthful, forceful advertisements the buying impulse becomes firmly implanted in her mind.

All that is needed to turn this impulse into an active sale is **directive effort** on your part and by your clerks.

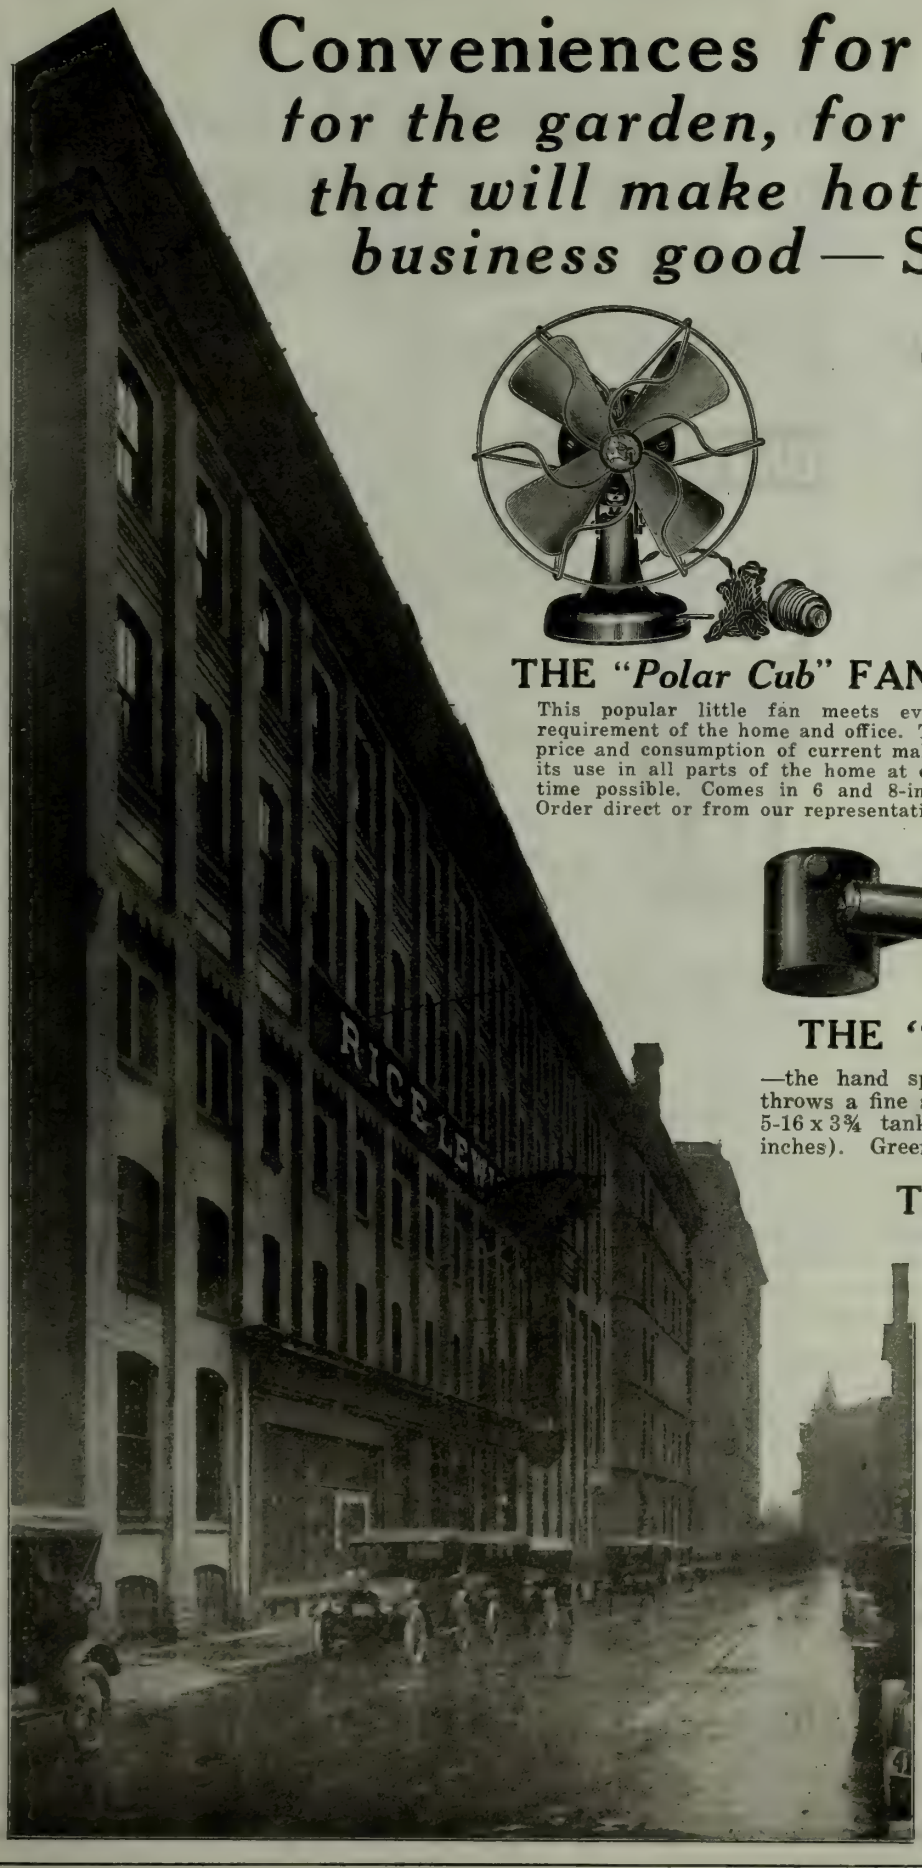
Make your O-Cedar Display—in the window and inside the store—in a manner calculated to allow O-Cedar Products full scope as an active sales force.

Use our attractive cards and signs to feature O-Cedar Polish and O-Cedar Polish Mop so that your customers will unfailingly **see** these goods every time they enter your store.

Thus can you sell two packages of the Polish for every one you now sell —thus can you double your Mop Sales.

The occasional mention of O-Cedar Polish, the query "Have you tried it?" will also help to get new users of this profitable line.

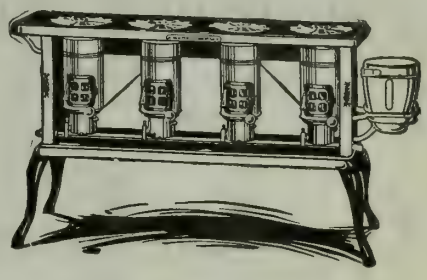
And invariably the customers to whom you thus introduce O-Cedar Products will be grateful to you.



Their appreciation will take the form of orders for "more O-Cedar" —once they find by experience that your recommendation of it was warranted by its great merit.

O-Cedar Polish

CHANNELL CHEMICAL CO., LIMITED, TORONTO



HARDWARE AND METAL, June 28th, 1919. Volume XXXI., No. 26. Published every Saturday at Toronto. Yearly subscription price, $3.00. Conveniences *for the home, for the garden, for the car, that will make hot weather business good* — Stock up now

THE *"Polar Cub"* FAN

This popular little fan meets every requirement of the home and office. The price and consumption of current makes its use in all parts of the home at one time possible. Comes in 6 and 8-inch. Order direct or from our representative.

THE *"Perfection"* OIL STOVE

Needs no introduction, a great convenience in homes where there is no gas or where gas is expensive. Made in 2, 3 and 4 burners.

THE *"Deluge"* SPRAYER

—the hand sprayer that is remarkably efficient, throws a fine spray over a wide area. Sizes 01 (2 5-16 x 3¾ tank, 11 inches long); 1 (4⅛ x 4⅛ x 15 inches). Green japan finish.

THE *"New Perfection"* COMPRESSED AIR SPRAYER

is a tank sprayer, size suitable for carrying, for spraying in garden, orchard, stable and pens, for whitewashing, floor oiling, disinfecting and for washing windows, wagons, autos, etc., has a hundred uses. Order your stock now.

THE *"Johnson"* AUTO PRODUCTS

Chief among the Johnson line are the following: Johnson's Carbon Remover; Johnson's Cleaner; Johnson's Liquid and Paste Prepared Wax; Johnson's Stop Squeak Oil; Johnson's Hastee Patch; Johnson's Radiator Cement.

RICE LEWIS & SON

LIMITED

Victoria Street, Toronto

Go! to your UNIVERSAL Jobber and order a stock of UNIVERSAL BREAD MAKERS which give quick turnover and good profits.

The Trade Mark Known

UNIVERSAL

in Every Home

—THE BREAD MAKERS ALL HOMES NEED—

For Small Families
No. 2, per doz. $33.00
Depth of Pail 7½ in.
Capacity 2 Loaves.

Regular Family Size.
No. 4, per doz. $45.00.
Depth of Pail 9 in.
Capacity 2 to 6 Loaves.

Large Family Size.
No. 8, per doz. $54.00.
Depth of Pail 11¾ in.
Capacity 4 to 10 Loaves.

—EVERY THRIFTY WOMAN IS A PROSPECT—

With the price of flour reduced and substitutes abolished, home bread making again is coming back strong.

The opening here for sales of bread makers is apparent. Unquestionably the best bread is most cheaply made at home and the bread maker is an economizer of time which allows the housewife to attend other household duties and pleasures.

There is no guesswork, no waste of materials, time or labor. There is nothing to do but put in the ingredients, turn the crank for three minutes, and the dough is thoroughly mixed.

By using the UNIVERSAL Bread Maker you do away with the bread raiser and the bread board, as the raising of the dough takes place in the bread maker.

Show women the saving accomplished by using the UNIVERSAL Bread Maker and you will sell a device that will stay sold, sell more, and make money for you.

Ask your jobber how to get UNIVERSAL window trims, cut outs, showcards that will connect your store with our national advertising, or write direct to us.

Hammers for Every Hand

The primitive savage took a chunk of stone and used his arm for a handle as he hammered out his crude needs. The modern mechanic wants his tools just right and picks the particular tool for the job in hand.

As to Hammers, there are thirty kinds in the "W & B" line—a Hammer for every trade and every use—light Hammers and heavy Hammers—Hammers with claws and Hammers with peins,—double-faced Hammers and chipping or cutting Hammers—Hammers for every hand.

All Right

Every "W & B" Hammer is drop forged steel of the proper grade for a long useful life; every one is accurately balanced, finely finished, and where handles are supplied, the handles are straight grained white hickory.

When you need a good Hammer, say "W & B."

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

TORONTO MONTREAL WINNIPEG

Be Prepared For This Rush

The dealer, sold out at the beginning of the season, cannot afford to lose the time it takes to re-stock. Other dealers are ready to supply the trade.

Be prepared with a complete stock of McClary's enamel ware this season.

Preserving kettles! The big rush starts with the strawberry crop and keeps up until pickling season is over. With every new crop of fruit or vegetables to be canned, some housewives find the need for a new kettle.

Cooking utensils of all kinds! The ready supply of green vegetables taxes the boilers and sauce pans to the utmost. Every year there are pots and pans to replace in nearly every household.

Garbage cans! The waste from fruits and vegetables calls for large garbage cans. The ones that will last through rain and hard knocks are the ones that are in demand.

Don't give your customers a chance to think you are out of the things they need and want. Keep McClary's enamel ware, and plenty of it, on display.

It will sell itself. Like all McClary's products it is made for convenience and durability.

There are many features about every one of the different lines of cooking utensils, kettles and other enamelled ware, that make them desirable to the trade.

Order from our nearest branch.

Write for our booklets and catalogues.

SIMONDS SAWS

Simonds Crescent Ground Cross-Cut Saws are the fastest cutters known. Not only do they saw fast, but they also run easy and wear exceptionally well.

Supported by an exceptionally tough steel, manufactured in our own mills, they hold their cutting edge and temper longer than the ordinary saw. Simonds cross-cut saws do not bind in the kerf.

Most lumbermen know that a Simonds Crescent Ground Cross-Cut Saw will cut 10 per cent more timber than other brands.

Of Course You Want *All* the Profits in Your Gasoline Sales

This Gilbert & Barker T-235 Five-Gallon Quick-return pump in front of your store attracts customers day and night.

Painted in a brilliant red, baked on, it acts as an eloquent salesman pointing out your establishment for blocks away.

It is quick, accurate, efficient. Only 20 seconds are required for discharging five gallons under normal operation.

One and three gallons may be measured by means of quantity stops which are securely fastened, and cannot slip and give over-measure.

Discharge is made from overhead through a ten-foot length of one-inch metallic hose. The filter automatically separates all the water or foreign matter from the gasoline.

THE SAVING WITH THIS UP-TO-DATE G. & B. PUMP IS SO POSITIVE THAT IT SOON PAYS FOR ITSELF.

Our Bulletin 52 will bring full particulars.

Collette Manufacturing Company, Collingwood, Ontario

Introducing Williams' "Agrippa" Turning-Tool Holders Set Screw Pattern

TO provide increased and abundant variety of selection in Williams' "Agrippa" line of Tool Holders, we offer this Set Screw pattern of Turning-tools primarily for those who use Cutters made of steel which has been hammered or rolled with a greater variation in size than is common to usual mill practice. But for the majority of users who purchase Cutters of accurate size, we recommend the original "Agrippa" Turning-tool of Cam Pattern as being stronger, more reliable and more generally satisfactory than any other method of Cutter-fastening. Both patterns are illustrated above.

The Screws, made of a fine grade of Alloy Steel, are accurately machined and carefully heat-treated and hardened. They are unusually tough and strong and give the maximum efficiency obtainable from this extra type of Cutter-fastening.

Right and Left Hand Offset and Straight Shanks in stock at same prices as Cam Pattern of corresponding size.

Our Machinists' Tools Booklet will be sent on request.

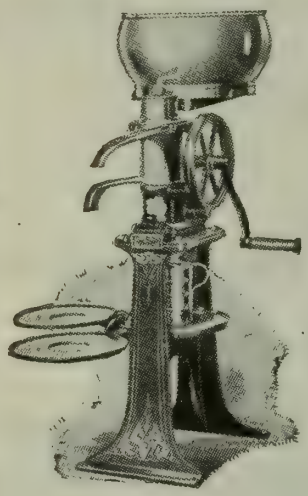
4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:



BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

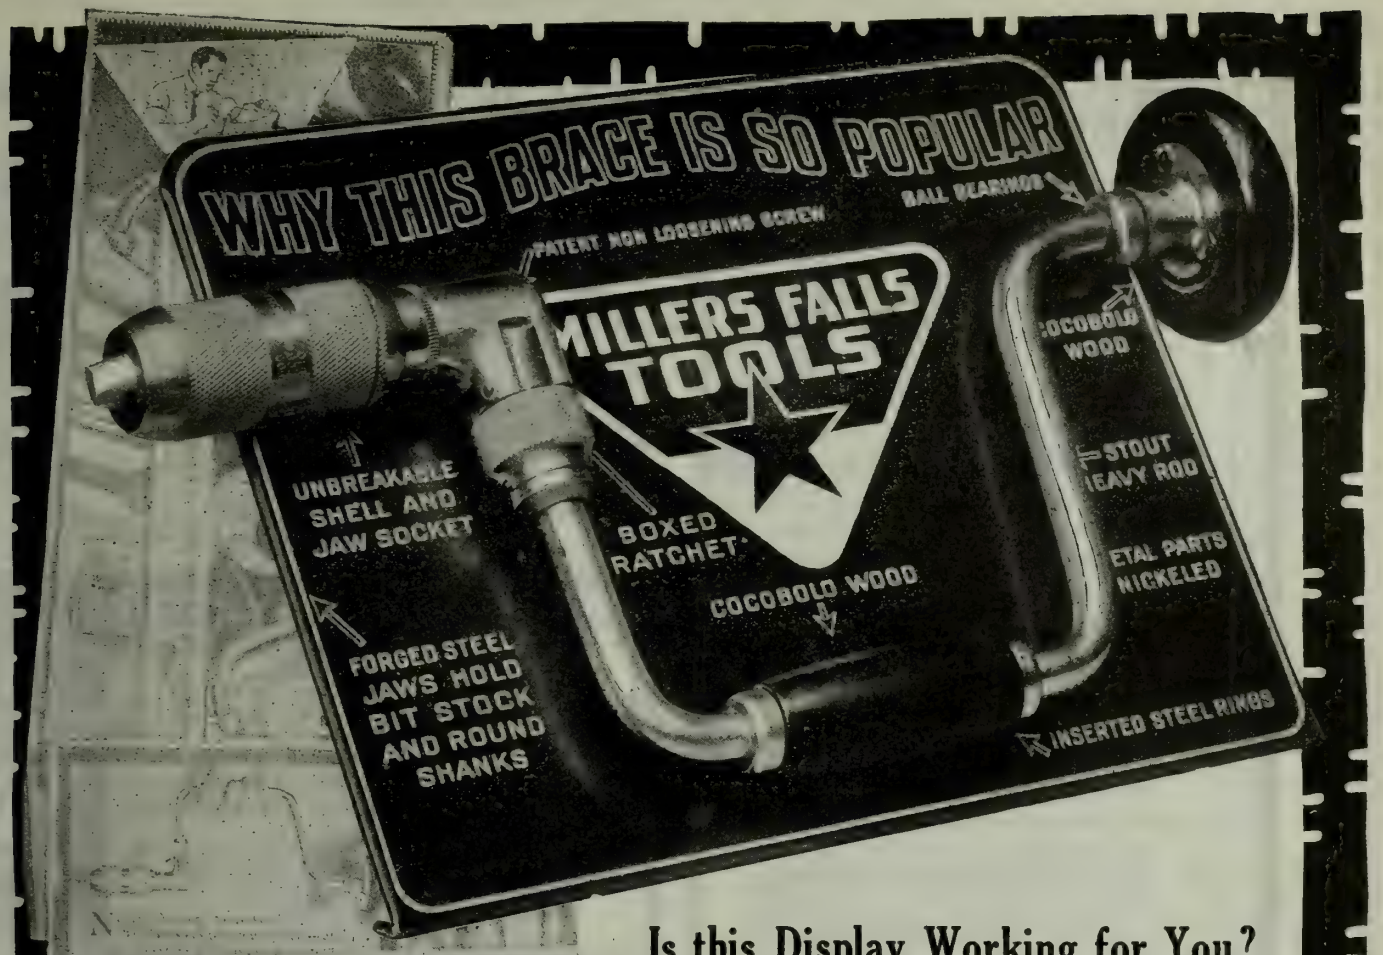
The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 15 publications is as follows:—

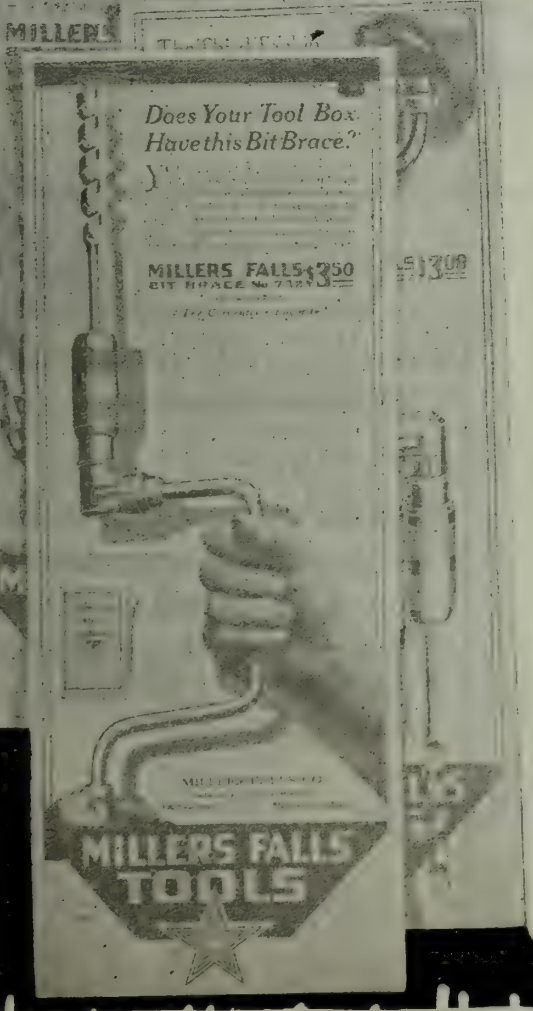
THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING of Can. (Est. 1910)
CANADIAN MOTOR, TRACTOR AND IMPLEMENT TRADE JOURNAL (Est. 1919)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 150-page publication of the size and type of this copy of HARDWARE AND METAL.

Our London Office, 88 Fleet Street, E.C.



Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG



For over 30 years the MacLean Publishing Company has maintained a fully-staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

The MacLean Publishing Company, Limited

143-153 University Avenue **Toronto, Canada**

Is this Display Working for You?

Here's a display stand that will sell braces for you because it shows our nationally advertised brace to best advantage and gives your customers all its selling points at a glance.

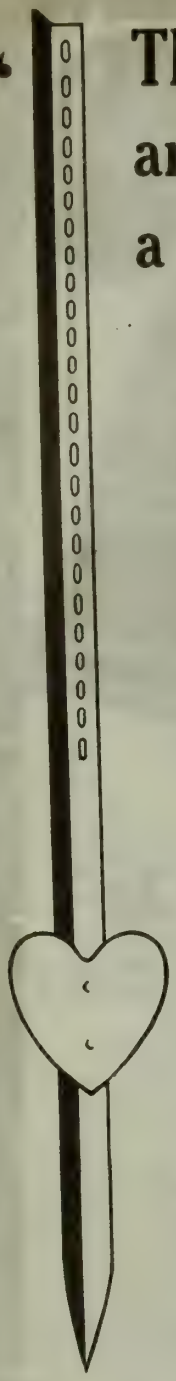
This 732 Brace is a big seller because it will do far more than the ordinary brace and this fact is "getting across" big in our national advertising.

Has a patent chuck that will hold twist drills as well as regular auger bit shanks. Bores wood, plaster, cement and metal.

With this stand on your counter or in your window you connect your store with our national advertising in the "Saturday Evening Post" and other mediums. The stand helps you sell this leading tool which is half sold already when your customer sees the brace in your store.

Stand is furnished free with small order of No. 732 Braces. Write for pocket catalog and our special offer to the trade.

Our Handbook, "How to Sell Tools," helps you cash in on our national advertising in your tool department. It is full of money-making ideas and selling suggestions that you can use. Write for your copy to-day.



MILLERS FALLS CO.

"Toolmaker to the Master Mechanic"

100 River Street **Millers Falls, Mass.**

MILLERS FALLS TOOLS

They'll Sell Well and They'll Pay a Good Profit

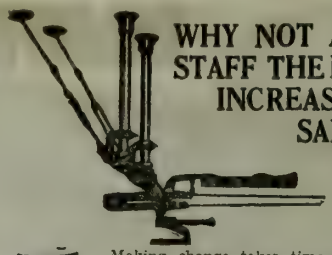
We offer the Hardware Trade an opportunity of adding a new line on which good money may be made—our Steel Fence Posts have many evident advantages—and our list prices for them are in most localities such that they can easily be sold in competition with Cedar Posts.

Besides, we can furnish you with plenty of arguments whereby it may be shown conclusively that the Cedar Post is as much of a "back number" as a snake-fence.

There's a good dealer discount on

PRESTON Steel Posts

you can make satisfactory profit on every sale—and the sales will be easily made and numerous.



Your customers will not be able to resist these features:

1. **Easy to drive**—which means a great saving over cedar posts, in cost of installation.
2. **Never rot, break, burn or buckle**—therefore, economical as to cost of upkeep—cheapest of all posts in the long run.
3. **Lightning proof** — because the steel "grounds" the wire —therefore, safest for stock.
4. **Neat in appearance** — and never out of alignment — adding greatly to the value of property.

Write for particulars and prices; and we will explain how this can be made one of the most profitable lines in your store.

WHY NOT ALLOW YOUR STAFF THE PRIVILEGE OF INCREASING YOUR SALES?

Making change takes time that might be used to better advantage in the selling of more good. And, too, it diverts the salesmen's mind from his real business. We have a cash carrier to assist you, and there is no better investment than the purchase of a carrier system. It affords more time for salesmen to remain with customers, and in this way increases the efficiency and selling capacity of an entire staff. And the saving of steps. They should not be forgotten.

Write for our four-page leaflet which tells how to obtain a double check on sales, and allow your salesmen in a greater degree, to display their selling ability.

All kinds of Cash and Parcel Carriers.

"Use Ball Bearing Butts for Permanence"

TRADE S.W. MARK

STANLEY FEATURES

BALL BEARINGS—The wearing surfaces of Stanley Ball Bearing Butts do not grind together when the door swings—they roll over their bearings easily and quietly.

Between the joints of these butts are ball bearings set in raceways of case-hardened steel. Due to the downward pressure of the weight of the door, each raceway moves or remains stationary with the joint next to it. This shifts the wear and friction upon the bearings, which means that both are reduced to the mechanical minimum. Each bearing is tested to carry a weight of one-half ton.

Ball bearings are only one of the many features which have been built into Stanley Ball Bearing Butts in our effort to make them the very best butts you can offer your customers.

In Auto Accessory Business to Stay

"We Are Glad We Went In," Says G. V. White, of the Sumner Company, Moncton, N.B., in Telling of the Manner in Which Business Has Been Growing Steadily—Says Average Car Owner is a Good Buyer

"WE are glad that we went into this business. In fact, it was hardly possible for us to keep out of it even if we had wanted to. We are in it to stay though now, and this year we consider that we have one of the largest and best assorted stocks in the Maritime Provinces."

This was the statement made to HARDWARE AND METAL by G. V. White, of the Sumner Company, Moncton, New Brunswick, in discussing the development of the firm's auto accessory business.

"Our start," he said, "was very small. During the first year or so we only bought the goods for which we had the most demand. We soon found, however, that the business was growing so rapidly that the best way to get the results we aimed for was to carry a complete stock.

Had to Meet Demand

"Like many other dealers, it was not until the demand had convinced us of the possibilities in handling auto accessories," continued Mr. White, "that we decided to add them to our already large and assorted stock. I think, perhaps, our experience in this respect is very similar to that of most dealers. We quickly realized, though, that the hardware dealer is the logical distributor of automobile accessories.

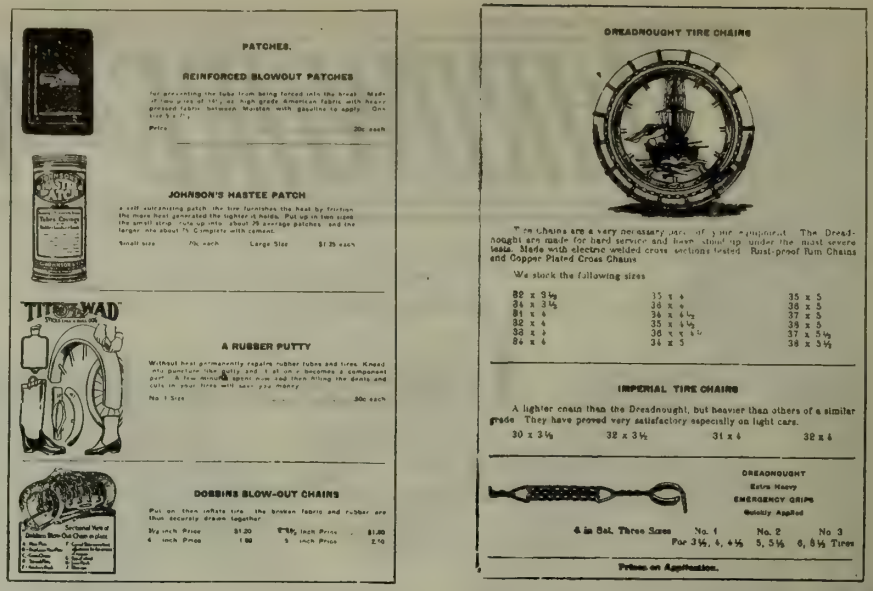
"We have found that catering to auto owners is a nice, clean business that carries with it a good profit. It brings to our store a class of customers whose trade we like to cultivate. The average car owner is a good buyer. If you have a good stock and can show him things that are going to be of service to him he seldom considers the price. If he wants the goods he wants them, and he is usually easy to sell.

Has Developed Rapidly

"We have found, since going into the auto accessory trade, that the department has been one of the fastest growing departments in our whole store," Mr. White went on, "not only from the new lines being added all the time, but as well from the increased volume of business. We, of course, have always carried wrenches, pliers, machinists' hammers, spark plugs, and other items which, though general stock, can also be classed as auto accessories. We found, however, that owners of automobiles, when they came in to buy these, almost invariably asked for other things which at first we did not have. There was such an insistent demand of this kind that we began to see the possibilities, and the business has developed far beyond even our expectations. We have found that the larger our stock is the larger the business we are able to do."

Get Good Advertising

An important feature in connection with the firm's auto accessory business is the prestige it has obtained all over the Province.



Display case used in the store of Sumner Co., Moncton, N.B., to show auto accessories. This company carry a complete stock and state they are getting splendid advertising from satisfied customers. That is the kind that keeps the customers coming and it's on the man who keeps returning that the money is to be made.

"We have found," said Mr. White, "that our auto accessory department is one of the very best advertisements for our store that we have, as the trade of out-of-town people who are drawn to our store and given satisfactory service, talk about the Sumner Company far and wide. It is not an unusual thing during the season to have people, not only from St. John, but from the Eastern states, stop and enquire for certain goods, with the remark that they have been told they could get them from the Sumner Company at Moncton if they were to be had anywhere. These people naturally tell other tourists, friends of theirs, and if they are ever in our part of the country and need anything, they are sure to come to our store."

Uses Window Displays

The firm has always appreciated the value of attractive window displays as business boosters, and when it went into the handling of auto accessories it was not long before a special auto accessory display window was a feature. As will be seen from the accompanying illustration, a great deal of careful consideration is given to the dressing of the Sumner Company's window. While a lot of goods are shown there is no suggestion of overcrowding or of the goods having been "thrown in." A big Union Jack makes an effective background, while the general arrangement creates entire harmony. The display is one that is not only striking enough to attract the attention of everyone who owns a car but to hold and augment his interest and send him into the store to buy.

Photograph of two pages from the catalogue issued by the Sumner Co., Moncton, N.B. From a 4-page leaflet last year, this firm has branched out to a 35-page catalogue for 1919.

Excellent Results

"We have always found," said Mr. White, "that we get excellent results from all our window displays. We aim, during the season, to arrange several attractive auto display windows. They back up effectively the extensive advertising that we do in the local papers. Both the newspaper ads. and the windows have produced splendid results. We go even further. Last year we issued a large four-page circular with supplement. This year we have a thirty-five page catalogue on the press. That will give a fair indication of how the business is expanding. Our stock includes casings, inner tubes, valves, valve cores, valve tools, tire covers and carriers, inner linings, spot lights, patches of all kinds, paints and wax, cleaners

Window display put in by the Sumner Co., Moncton, N.B. A wide range of goods is carried and shown, but there is no indication of overcrowding. This company finds the window a great business getter and changes the displays frequently.

Operating Expenses in Retail Stores

Average Figure for Total Expenses During 1917-1918 Revealed as 20.6% of Sales — Average Rate of Stock Turn 1.8 Times a Year

Issued by Bureau of Business Research of Harvard University, Cambridge, Mass., on results of investigation of operating expenses and profits in the retail hardware trade in Canada and the United States.

THE results of an investigation of operating expenses and profits in the retail hardware trade have been announced by the Bureau of Business Research of Harvard University. Proprietors of 218 retail hardware stores, in 39 states and Canada, have given the Bureau information regarding their cost of doing business. The report that the Bureau has just published covers the war years—1917 and 1918. The average figure for total expense in retail hardware stores during this period was found to be 20.6 per cent. of the sales. The average net profit was 6 per cent. of the sales. The average rate of stock-turn was 1.8 times a year. Similar figures are given in the report for each item of profit and expense.

"These figures can be used by any retail hardware store as a guide with which to compare his own results," was the opinion expressed by Melvin T. Copeland, Director of the Bureau of Business Research. "All the statements have been adjusted to the uniform accounting system that is being introduced in the trade, so that they tally with each other."

This inquiry has brought out the fact that the average investment in merchandise, owing primarily to higher prices, was about 5 per cent. greater in retail hardware stores in January, 1919, than in January, 1918. It has shown, furthermore, that in stores with an annual volume of business of $50,000, the ratio of expense to sales is generally as low as in stores with sales amounting to over $100,000 a year.

These are, of course, only the first results of the Bureau's study of the retail hardware business. This research will be continued for some time, in order to follow the course of operating expenses from year to year, and also to obtain information regarding the best methods of store management. This is part of their general plan of scientific study of retail and wholesale business in connection with the work of the Harvard Business School. —EDITOR'S NOTE.

OPERATING EXPENSES IN RETAIL HARDWARE STORES

THE common figures for operating expenses in 218 retail hardware stores are summarized in this bulletin. The stores from which reports were received are located in thirty-nine states and Canada. The reports were received by mail. Each was carefully checked to make sure that it tallied with the uniform accounting system that is used as the standard. Figures that could not be relied upon have been omitted in the compilation of the tables.

This study of the retail hardware trade was undertaken by the Bureau as part of its general plan for gathering reliable information on operating expenses and management problems in retail and wholesale businesses. The uniform accounting system that was published in 1918 constitutes the basis for the work. It is very similar to the uniform accounting systems that the Bureau has issued for other retail trades.

A lack of reliable accounting methods is common in the retail hardware trade, as elsewhere. The Bureau has found through its correspondence that in numerous retail hardware stores no inventory is ever taken. In numerous cases also, a merchant's accounts are so incomplete as to give him little information that can be relied upon. There is, however, evidence of a tendency toward a more widespread introduction of better accounting methods. As these methods are improved, the work of the Bureau in gathering these figures will, of course, be facilitated. While the figures given in this bulletin are necessarily subject to revision as more data are received in the future, nevertheless they serve as an approximate guide to the costs of operating a retail hardware business.

The stores covered by these reports vary in volume of business from $11,000 to $292,000 a year. In one-half of these stores the annual sales are from $16,000 to $54,000. In one-fourth, the annual sales are from $55,000 to $89,000, and in one-fifth from $90,000 to $178,000. All the reports are for 1917 and 1918, about two-thirds of them for the latter year. Comparisons indicate that the relation of expenses to sales was about the same each year. The average investment in merchandise, owing primarily to higher prices, was about 5 per cent. greater in January, 1919, than in January, 1918.

For each item of profit and expense, and for stock-turn, the table on page 5 shows the lowest figure found in any store, the highest figure, and the common figure. The common figure is the one which is found in the largest number of stores. It is the predominant, typical, and most frequent figure. This is the standard used for purposes of comparison.

All the percentages are based on net sales. Profit and loss might be figured either on cost or on sales, of course, provided both were on the same basis. If a merchant figures his expense on sales, however, and his profit on cost, he is likely to delude himself as to the amount of net profit that he is making. If the gross profit on merchandise sold were 25 per cent. of the cost, for example, and if the expenses were 20 per cent. of the sales, the merchant would come out at the end of the year without any net profit because 25 per cent. of the cost equals 20 per cent. of the selling price. The practical difficulty in using cost as a basis is that many retailers wish to compare their total expenses with their total sales rather than with their total cost of the goods sold. If expense is figured as a percentage of sales, of course

profit should be figured on the same basis for ready comparison. The best course, in the Bureau's experience, is to use sales as the basis, and therefore in all its compilations the net sales are taken as 100 per cent.

TOTAL EXPENSE

Total expense is the sum of all the individual items of expense. It includes not only expenditures for such items as wages, office supplies, and taxes, but also a fair salary for the proprietor or partners, rent for the store whether leased or owned, and interest both on borrowed money and on the proprietor's net investment in the business. The lowest figure for total expense in the reports that have been received is 15.74 per cent., and the highest figure 38.2 per cent. The percentage of total expense shows about the same range and the same common figure in stores in which the annual sales are over $100,000 as in those with sales below that amount. The common figure for total expense in all the stores that reported is 20.6 per cent. of the net sales. This is what it costs to operate a typical retail hardware store.

WAGES OF SALESFORCE

The largest item among the expenses of hardware retailers, ordinarily, is the wages of the salesforce.. This includes the amount paid to the salesforce, and also a part of the salary of the proprietor according to the time that he spends in selling. The expense for wages of salesforce ranges from 3.36 per cent. to 10.8 per cent. of the sales. The common figure is 5.8 per cent. A substantial group of stores, however, are spending only 5 per cent. for wages of salesforce, so that this may be taken as a standard of efficiency above the average, but clearly within the reach of most retail hardware stores.

OTHER SELLING EXPENSES

Such items as payments for advertising, wrapping paper, twine, crates, and packing boxes are included in other selling expense. This varies from 0.1 per cent. to 3.2 per cent. The common figure is 0.4 per cent.

TOTAL SELLING EXPENSE

This is the sum of Wages of Salesforce and Other Selling Expense. The common figure is 6.5 per cent. This is somewhat higher than the figure for Total Selling Expense in retail grocery stores, but it is less than the Total Selling Expense in retail shoe stores where the fitting of customers takes more time than the serving of customers in retail hardware stores.

DELIVERY EXPENSE

Delivery expense is generally small. The common figure is 0.9 per cent. This includes the wages of drivers, and also all the items of expense for the use and maintenance of the delivery equipment and of the stable or garage. There is less uniformity in delivery expense than in most of the other items. One group of stores shows a delivery expense of 0.25 per cent., another group 1.4 per cent., and there are several stores spending over 2 per cent. of their sales for delivery. These variations are probably due not only to the differences in the policies of the stores, but also to differences in the location and distances that it is necessary for the delivery equipment to cover. Delivery expense is a little higher in the retail hardware trade than in the retail shoe trade, but it is small in comparison with the retail grocery business.

MANAGEMENT AND OFFICE SALARIES

The Bureau has found, in the course of its inquiries, that in many cases the proprietors and partners in retail hardware stores are not charging salaries for themselves as an expense of their business. A special inquiry has been made in each case to determine the amount which should be properly included, and also to divide this between management, buying, and selling according to the part of his time that the proprietor spends for each of these purposes. The common figure for management and office salaries, which is 2.5 per cent., appears to be a fair average for the trade.

RENT

In order to obtain figures that may be compared, the Bureau has found it necessary to include rent for the store, whether leased or owned, in the expenses of the business. From the business standpoint also, it is desirable that the rent of the store when owned should be taken into account in figuring expenses of the business. The common figure for rent is 2.4 per cent. of the sales. Wide variations are shown in the expense for rent. The lowest figure is 0.38 per cent., and the highest 7.3 per cent. While the largest number centre around 2.4 per cent., one group spends less than 1.5 per cent., and another substantial group shows an expense of over 3 per cent. for rent. Few stores with annual sales of over $100,000 show a rent figure that is less than 2.3 per cent.

TOTAL INTEREST

In the uniform accounting system for hardware retailers, interest on borrowed capital and interest on the net investment of the owners of the business are included in the expenses. Real estate is omitted in determining this net investment, for the return for the use of real estate is covered by the rent charged. The net investment, or owned capital, on which interest is charged, is the average net worth of the business for the period for which the statement is made out. It is the sum of the assets (not including real estate) less the sum of the liabilities to outsiders (not including capital stock or surplus of a corporation, or undivided profits). The assets include cash, merchandise on hand, equipment at depreciated value, notes and accounts receivable, and any prepayments such as prepaid insurance. The liabilities include notes and accounts payable and accrued items such as unpaid taxes (not mortgage on real estate). The interest is figured at the current rate for reasonably secure, long-time investments in the locality in which the business is situated. This interest charge, therefore, represents the amount which the capital would be expected to earn if it were invested elsewhere.

The common figure for total interest is 3.0 per cent. of the net sales.

REPAIRS OF STORE EQUIPMENT

This is a small item. The common figure is 0.17 per cent., and many stores reported no expense for this purpose.

DEPRECIATION OF STORE EQUIPMENT

This is also small, the common figure being 0.3

per cent. of the sales. About one-half of the stores from which reports were received did not include any charge for the depreciation of their equipment. Although small, this is an item which cannot safely be omitted if the accounts of a store are to be a reliable guide to sound management.

LOSSES FROM BAD DEBTS

Apparently there is a tendency for hardware retailers to carry on their books bad accounts of which there is little hope of collection. This conclusion is based upon the number of reports which showed no expense for losses from bad debts, or only nominal amounts. The common figure is 0.5 per cent. of the net sales. This is somewhat larger than in the retail shoe trade where the common figure for losses from bad debts is about 0.2 per cent., and the same as in the retail grocery trade before the war.

NET PROFIT OR LOSS

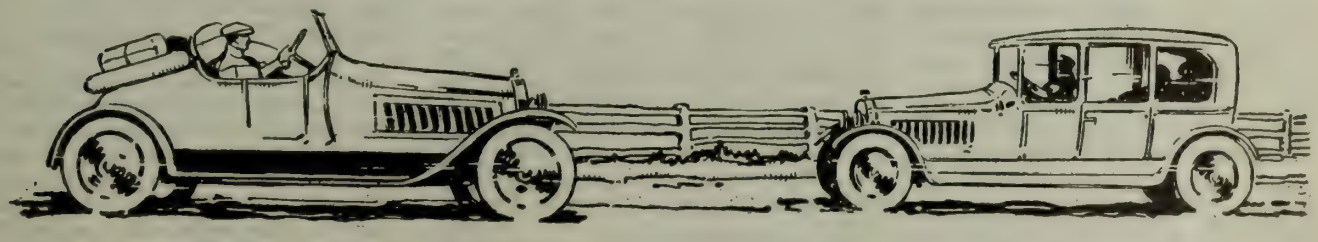
The most unprofitable business from which a report was received showed a loss of 10.2 per cent. of the sales. The most profitable business showed a net profit of 11.1 per cent. The common figure for net profit for the years 1917 and 1918 was 6 per cent. of the net sales.

This net profit is the amount which remains after all the expenses, including proprietor's or partner's salaries, rent for the store whether leased or owned, and total interest have been deducted from the gross profit. It is the amount which the business earns over and above expense charges of every sort. It is not to be confused with interest, or considered as a return upon the investment. In the long run, it is the result of good management. Net profit that the business shows is due to the keen foresight, the sound judgment, and the personal leadership of those in charge. Occasionally it may be due to chance, or good fortune, but this is rare. It is careful, farsighted, well-balanced management that counts most. Employees may also help largely in the creation of the net profit under inspiring leadership of the management. It is to these factors, not to the capital, that the net profit of any business is to be attributed.

STOCK-TURN

The rapidity with which the stock is turned is generally a good index to the management of a retail business. The common figure for stock-turn in the retail hardware trade is 1.8 times a year. This common figure apparently holds good for stores with small, medium, and large volume of sales. The lowest figure for the number of stock-turns is 0.85 times a year, and there are several other stores from which the Bureau has received reports that show a stock-turn of less than once a year. In ordinary times this would almost inevitably lead to disaster because of the extra expense of carrying such an excess stock and because of losses eventually through depreciation and obsolescence. The highest figure for stock-turn is 5.75 times a year, and enough stores turn their stock at least 2.5 times to indicate that that is a fairly attainable goal.

Stock-turn is measured for this compilation by dividing the average of the inventories at the beginning and end of the year into the *cost* of goods sold, not into the *sales*. For the purpose of figuring stock-turn, it is obviously desirable to have figures for the amount of stock on hand at more frequent intervals. That would give a more accurate average for the stock carried, but such records are seldom kept in the trade. Since the stock on hand in retail hardware stores is likely to be somewhat less than normal at the inventory period, the figure for stock-turn probably should be somewhat lower than stated above. Since more frequent inventories cannot be generally secured at the present time, the figures that are given here may be considered as approximately correct for purposes of comparison.



The rate of stock-turn is much lower in the retail hardware trade than in the retail grocery trade, but the range and the common figure are approximately the same as in retail shoe stores.

Operating Expenses in Retail Hardware Stores, 1917-18
Net Sales = 100%

Item	Lowest	Highest	Common
	%	%	%
Wages of salesforce	3.36	10.8	5.8

Great Paint Activity Says President

Despite Drawbacks, Canadian Paint Industry Enjoyed Increased Output—Some Big Increases in Western Territory—Expects a Big Fall Business This Year

UNDOUBTED and splendid success is attending the "Save the Surface Campaign" of the Canadian Paint, Oil, and Varnish Association, according to the president of the association, Mr. George Henderson, also president and general manager of Brandram-Henderson Limited, Montreal. In the course of a recent tour of the Western Provinces, covering several weeks, Mr. Henderson was enabled to observe actual business conditions throughout the provinces of British Columbia, Alberta, Saskatchewan, Manitoba, and later, in Ontario. He is highly pleased with conditions, and especially with the prospect for a continuance of heavy business. To HARDWARE AND METAL, Mr. Henderson had the following to say:

Helped Business

"It would be idle not to acknowledge that this campaign was largely responsible for the better business that exists. It has undoubtedly helped greatly, although some of the advertising plans did not synchronize as they should have. Notwithstanding this, the results have been good.

"There is one thing that I would like to make perfectly clear, and that is that, had the strikes and labor troubles in some sections of Canada not occurred, the business that would have come to the various manufacturers would have been simply enormous. Notwithstanding this, there has been an excellent volume of business and a big increased demand throughout the country."

Canadian Value Paint

Asked for an expression as to whether the average property owner in Canada understands the advantages of paint as a preserver, Mr. Henderson expressed himself as convinced that there was a wide appreciation of the benefits to be derived from the use of paint and varnish. The substance of the slogan adopted by the Canadian Paint, Oil, and Varnish Association, "Save the Surface and You Save All," seems to have sunk in. Realizing that preservation of his property is a vital thing, many an owner has painted this year, carrying out work which has been deferred for several seasons at least.

"In such centres as Winnipeg, Regina, Saskatoon, Calgary, Lethbridge, and even in other cities where there was a somewhat modified unrest upon the part of labor, the citizens have been improving the time, and local business has therefore been good in spite of the disturbances. Much 'over-the-counter' business was done, and a great deal of this for 'spot cash,'" said Mr. Henderson.

Results of Strike

This has been one of the indirect results of strike disturbances, and it is obvious that, with a temporary absence from one's chosen work, by choice or through force of accompanying circumstances, the hardware store has secured a considerable business that just such conditions created, or which, in any event, they helped to improve.

Another observation made by Mr. Henderson, was that, had the war not stopped there might not have been so much painting as has already been undertaken, for there would have been even a higher price basis in all probability if hostilities had been continued. With the war stopped many have come to realize that it is as good a time to paint now as later, and the work is already in hand.

Are Differences

While the condition of business throughout the country has been excellent, Mr. Henderson states that there are differences of a local or provincial nature which are not always taken into account. "In Alberta, for instance, there is a great deal of painting done in the fall of the year, and in this respect this province is different from some of the others. Each province has its own peculiarities."

In the Far Western province of British Columbia, Mr. Henderson sees much scope for a more general painting campaign, and this will come, doubtless, with a more stable and settled condition, free from excessive dealing in reality, and which, in some places, has served to temporarily prove a set-back. "The Okanagan fruit district, of course, is prosperous while Vancouver is not altogether settled as to the future of her shipbuilding industry. There is no city where paint can be used to better purpose than in the city of Vancouver itself. It needs a great deal of it."

Whatever the need may be, Mr. Henderson is satisfied that the Canadian manufacture will be able to take care of much greater business with the facilities now at his disposal. "With the plants that we have in Montreal, Halifax, Toronto and Medicine Hat, we could even take care of $2,00,000 to $3,000,000 more business than we have to-day," he stated.

Shortage Overcome

In spite of the loss of such special business as obtained before the close of the war, such as that for shipbuilding paints, shellacs, varnishes and other materials used in war work, Mr. Henderson said that it was gratifying to see these losses fully offset through the increase of purely regular business. Asked by HARDWARE AND METAL as to the increases, that is, as to whether these were actual or attributable to high prices which are now obtaining, Mr. Henderson said, "The tonnage and gallonage have been much heavier and show a big increase."

That there will be a big business for several months yet is undoubted by Mr Henderson. It is just off to a good start, so to speak.

To Meet Difficulties

In the matter of some raw materials there has been more or less anxiety. This particularly has applied to linseed oil and to some other commodities, notably to turpentine.

"Will there be enough material to supply the trade requirements if business continues brisk?"

"That is rather a difficult question, particularly when one speaks of oil, but in a general way I do not look for any shortage. There is a scarcity of flax and the same is very high in price, but there is plenty of white lead and colors, and other raw materials are in good supply. There are also good supplies of cans now for the product, and plenty of tinplate is available.

"Last year there was difficulty in getting the necessary supplies of flax, but there is promise at the present time for a satisfactory yield in the West this fall. The Western yield, if large, or even normal, will go far toward relieving the situation."

West is Prosperous

Mr. Henderson, speaking of general conditions in the West, stated that these were much improved and that there was a good deal of money in the hands of the people. There have been good crops on the prairies in many sections, while, of course there are points where more moisture would have served to increase yields. Cash being paid over the counter for immediate requirements is one of the best indications, and this being the case very largely, it is a most welcome condition. During his visit in the West, Mr. Henderson had an opportunity of meeting many retailers, and in all cases, he reports, the conditions were excellent in a business way.

The Westerner is an optimist, and there is great scope for trade expansion in that country. Mr. Henderson believes it will continue to develop greatly.

SAYS ENGLAND WANTS CANADIAN FLAX

John Rae, representing Cox, McEuen & Co., of London, England, who was in Canada for some time to investigate exportable conditions from Canada for Canadian flax, intimated, before sailing from Montreal on the "Melita," that Great Britain will take much of the production, if she has the same to offer.

Russia, Holland and Belgium, before the war, supplied much of the flax used in England, Mr. Rae stated. Russia is now out of the market and the other two countries have very little flax to offer. He believed that Canada could secure an immensely better market than ever if she is prepared to seed the area and produce a good grade of flax.

Thriving Hardware Business in Dauphin

Manitoba Town Experiencing Remarkable Activity—Building Brisk — Farmers Buying Electric Lighting Plants—Big Paint Sales—Civic Pride in Evidence

By E. H. SCOTT, Western Correspondent Hardware and Metal

BUSINESS in hardware and in all the side lines that have become a part of the trade is fairly whooping along in Dauphin, Manitoba. Merchants in that town have never known such an extraordinary period of prosperity. The farmers in the vicinity after a succession of bumper crops are rolling in wealth, and spending money like the proverbial "drunken sailor."

Many Tractors in Use

There is scarcely a farmer of the better class in the whole district who is not operating a tractor on his land, and the agriculturist in that section is sadly out of it if he is not the possessor of an automobile. A. H. F. Stelck of the hardware and implement firm of Sutherland & Stelck, Ltd., predicts that all the work on the surrounding farms will be done with gas machines within ten years. The streets of Dauphin are so congested with automobiles on Saturdays that a policeman now directs traffic on the main corner

Building Active

Even with lumber prices advanced 50 per cent. over pre-war rates, the farmers in the vicinity are putting up many new homes this year at a cost of approximately $5,000 apiece. Last year they went heavily into the enterprise of building barns, most of them running about 36x70 ft. in size. There are seven brick veneer houses going up this spring on farms within eight or ten miles of Dauphin, also a dozen frame houses and half a dozen barns. In addition to these there are four large houses being erected in town.

What Hardware Men are Doing.

As an illustration of what hardware merchants are doing Mr. Stelck said that the average cost of equipping a barn with steel stanchions is about $500. In taking the orders of farmers they are offered a five per cent. discount for cash, and in 90 per cent. of the sales they accept this offer although they will not receive delivery for upwards of two months.

The farmers are equipping new and old homes with lighting and electric pressure water systems. Farm mothers are using electric toasters and irons, an electric machine does the weekly wash, and churning is no longer a drudge with the faithful motor whipping the rich cream into butter. Hardwood floors are the rule.

Now the Daily Dip

With the installation of plumbing many a farmer has now substituted the Saturday night tub bath for a daily dip in his enamelled bath tub into which he turns running hot and cold water. His stock in the barn is automatically watered. Farm homes are now being supplied with hot water heating systems of the most expensive kind, and both plumbers and tinsmiths in Dauphin are so busy that they are putting in long hours of overtime in order to cope with the work.

This is not a dream, it is a reality, and what applies to Dauphin applies to the greater part of Northwestern Manitoba. There is great building activity everywhere. H. S. Stead, a plumber of Neepawa told the representative of HARDWARE AND METAL that he had put in seven lighting plants this year at a cost of from $700 to $1,000 a piece, and he has four more orders on hand at the present time. He has also sold three electric pumps this year, one of them a high pressure pneumatic. At Dauphin, A. H. Feldman, who handles a well-known lighting plant, presented a list of 13 farmers who had already installed this system in the Dauphin district, six of these plants having been put in during 1917 and six during last year. The names were shown of seven farmers at Gilbert Plains, and six at Grand View who had installed similar systems, the initial cost of which runs from $585 to $685. They expect to place many more orders this year.

In Dauphin there are two hardware firms, one of them Sutherland & Stelck, Ltd., operating two stores about three blocks apart. One of these stores specializes in auto accessories and has the agency for a line of motor cars of which 53 were sold last year and 35 this year to date. Mr. Stelck said they could place 25 more cars if they could secure the delivery of them. This store also handles an extensive line of farm implements and tractors. The other hardware store is operated by McDonald and Oliphant.

THRIVING HARDWARE BUSINESS IN DAUPHIN

What a large part the marketing of a good crop at high prices has in the business of the Western town is shown in this story of Dauphin, Man. This is the district where the farmers had big crops last year—said to be the best in the West. Whereas there was a crop failure in other parts of Manitoba, in the North they were splendid which accounts in no small measure for the prosperity of the towns up there—EDITOR'S NOTE.

The extensive building movement has resulted in a brisk business in heavy hardware. They are selling great quantities of nails, etc., and there is a heavy run on carpenters' tools, particularly saws.

Big Paint Business

Aside from this both firms are doing a larger paint business than ever before. There is perhaps no town in the West where civic pride is so pronounced as in Dauphin, hence the clean-up, paint-up movement has caught on big. "People here have not been doing much painting since the war began," said one merchant, "but the time has come when they must get busy if they wish to preserve their homes."

By the way, as indicating the brand of Dauphin civic pride, all but two of 900 vacant lots were converted into war gardens while the great struggle was on, including two or three tennis courts which were sacrificed. The town maintains a rest room with a paid matron. Here the farmer's wife may make her headquarters while in town instead of being forced to go to the home of friends, or to the hotels. Here she may make herself a cup of tea to drink with the luncheon brought to town, and here she will find comfortable rockers and magazines for her use.

The town has a steam plant for the generation of electricity, which supplies both light and power, and is operated at a profit. Its water supply is received by a gravity pipe line from a chain of lakes in the Riding Mountains, nine miles distant. The installation of these modern systems means continued business for the hardware man.

The Housing Scheme

Another source of revenue for hardware merchants will be provided by the town taking advantage of the Dominion Government housing scheme to make $100,000 available for building purposes. On new buildings, fully modern, an advance will be made up to 65 per cent. of the value of the property and cost of the building, the money to be repayable in quarterly instalments spread over 20 years. For the improvement of old buildings grants will be made up to 50 per cent. of their value.

Stoves and Washing Machines Sell

Dauphin hardware merchants are experiencing the result of farming prosperity in other ways. Messrs. Sutherland and Stelck say they have never sold so many ranges as in recent months. The farmers are purchasing the highest price steel ranges and paying cash for them. There is also a considerable demand for washing machines. One type of machine operated by water pressure is popular with the townspeople for their gravity system gives a constant water pressure of 97 pounds to the square inch. For this reason electric washers are not as yet in much demand.

Says It Would Be Dangerous to Try and Sell German Goods in England Now

Managing Director of British Firm Says That Good Trade Should Develop Between England and Canada. Britishers Are Looking For Huge Export Trade.

MR. ARCHIBALD COUSINS, managing director of the firm of C. D. Monninger, Ltd., London, England, manufacturers of saws, machine knives, files and tools, stated to HARDWARE AND METAL when he was in Toronto this week, that there is a strong feeling in England in favor of Canadian products, and that he looks for a splendid trade to develop. Mr. Cousins is also looking for a great expansion of the Imperial preference trade idea, whereby much closer trade relations will be established between Britain and all her colonies.

"There are tremendous markets open as a result of the war," he said, "and British firms are going after their share of the business. I have met with a most cordial reception in Canada and am expecting to lay the foundation on this trip for considerable future business. Our business in South America and in Australia has increased steadily, and now that the war is over I am expecting we will be able to capture a lot of the Italian business which was formerly dominated by Germans.

Would be Dangerous

"I do not know," he said, "what the feeling in Canada is, but it would be positively dangerous for any man to try and offer German-made goods at home now. It would be as much as his life was worth. There are too many homes in England that have lost sons or fathers to ever forget, at least in this generation, what has happened.

The war has made the working men in England tremendously prosperous. Both men and women have been making wages they never dreamed of before, and this has made for a lot of extravagance. The Government made a big mistake in making the arrangement of paying women 24 shillings a week and men 29 shillings a week if they could not get work. It has worked out that this is simply an encouragement for them not to look for work, and there are thousands who are content to live on this Government money rather than look for something better."

Increasing Plants

Mr. Cousins pointed out that another result of the war has been to make British firms increase their efficiency. At the present time, he stated, owing to the great shortage of skilled workers, many of whom laid down their lives in France, firms are spending large sums of money installing machinery which will do the work formerly done by men. All over England, he says, the spirit of the manufacturing world is one of optimism, and the firms are looking for the development of enormous export business.

"I do not think," he said, "that there will be any change in England's free trade policy. Free trade is too deeply ingrained in the English people. We made our money out of it and are not likely to change. We do not fear competition at home, and one of the things I have learned is not to believe anything the American newspapers print about the state of British trade. I was in the States recently, and if the tariff there was removed we could simply flood that country with saws, and the American firms could not compete."

Need Wooden Products

Mr. Cousins stated that there is a great shortage in England of wooden products, handles, clothes pins, and other lines and that there is an excellent chance for Canadian firms to sell these goods.

Speaking of the taxes the British Government levied to help pay the war expenses, Mr. Cousins said that it had been very severe on many manufacturers. In many cases as high as eighty per cent. of the profits were taken, and in many cases this left firms without the capital they needed for the expansion of their business. Asked if the manufacturers expected to be recouped in any way through the pyaments of the German indemnity, Mr. Cousins stated that no one was looking for any of that money to find its way to them.

A SEASONABLE WINDOW DISPLAY

A well arranged display of electrical goods will always stimulate sales. Electrical stoves and utilities make ideal presents for brides, and many dealers have been doing a splendid business in them. An electrical display is easily arranged and will arouse real interest not only in the goods shown, but in the store.

Dates of Ontario Fall Fairs, 1919

The following list of Fall Fairs in the Province of Ontario has been issued by the Agricultural Societies Branch of the Ontario Department of Agriculture, Toronto, J. Lockie Wilson, Superintendent:

Aberfoyle—October 7.
Abingdon—October 3 and 4.
Acton—Sept. 23 and 24.
Agincourt (Scarboro)—Sept. 23 and 24.
Ailsa Craig——Sept. 23 and 24.
Alexandria—Sept. 10 and 11.
Alfred—Sept. 23.
Alliston—October 2 and 3.
Almonte—Sept. 23 and 25.
Alvinston—October 7 and 8.
Amherstburg—Sept. 29 and 30.
Ancaster—Sept. 23 and 24.
Arden—October 7.
Arnprior—Sept. 16-18.
Arthur—October 7 and 8.
Ashworth—September 26.
Atwood—Sept. 22 and 23.
Avonmore—Sept. 16 and 17.
Aylmer—Sept. 25 and 26.
Ayton—Sept. 16 and 17.
Bancroft—October 2 and 3.
Barrie—September 22-24.
Baysville—October 3.
Beachburg—September 22-24.
Beamsville—September 19 and 20.
Beaverton—September 22-24.
Beeton—October 7 and 8.
Belleville—September 1 and 2.
Berwick—September 4 and 5.
Binbrook—October 6 and 7.
Blackstock—September 23 and 24.
Blenheim—October 2 and 3.
Blyth—September 22 and 23.
Bobcaygeon—September 26 and 27.
Bolton—October 3 and 4.
Bonfield—September 30.
Bothwell's Corners—Sept. 30 and October 1.
Bowmanville—September 16 and 17.
Bradford—October 14 and 15.
Bracebridge—September 25 and 26.
Brampton—September 19 and 20.
Brigden—September 30.
Brighton—September 11 and 12.
Brockville—August 25-28.
Bruce Mines—September 24.
Brussels—September 16 and 17.
Burk's Falls—September 25 and 26.
Burford—September 30 and October 1.
Burlington—September 30 and October 1.
Caledon—September 23 and 24.
Caledonia—October 9 and 10.
Campbellford—September 23 and 24.
Carp—September 30 and October 1.
Castleton—September 30 and October 1.
Cayuga—September 25 and 26.
Centreville—September 20.
Charlton—September 17.
Chatham—September 16-18.
Chatsworth—October 9 and 10.
Chelmsford—October 1 and 2.
Chesley—October 8 and 9.
Clarence Creek—September 23.
Clarksburg—September 16 and 17.
Cobden—September 25 and 26.
Cobourg—September 17 and 18.
Cochrane—September 25 and 26.
Colborne—September 25 and 26.
Coldwater—September 25 and 26.
Collingwood—September 16-19.
Comber—September 26 and 27.
Cookstown—September 30 and October 1.
Cooksville—October 1.
Cornwall—September 3-6.
Delaware—October 8.
Delta—September 15-17.
Demorestville—September 27.
Desboro—September 18 and 19.
Dorchester Station—October 1.
Drayton—September 30 and October 1.
Dresden—October 2 and 3.
Drumbo—September 23 and 24.
Dryden—September 25 and 26.
Dunchurch—October 2 and 3.
Dundalk—October 1 and 2.
Dungannon—October 2 and 3.
Dunnville—September 18 and 19.
Durham—September 30 and October 1.
Elmira—September 19 and 20.
Elmvale—October 1-3.
Embro—October 2.
Emo—September 16 and 17.
Emsdale—September 23 and 24.
Englehart—September 18 and 19.
Erin—October 8 and 9.
Essex—October 9 and 10.
Exeter—September 15 and 16.
Fairground—October 7.
Fenelon Falls—September 12 and 13.
Fenwick—September 23 and 24.
Fergus—September 25 and 26.
Feversham—September 30 and October 1.
Flesherton—September 25 and 26.
Florence—October 2 and 3.
Forest—October 1 and 2.
Fort Erie—September 24 and 25.
Fort William—September 9-11.
Frankford——September 18 and 19.
Frankville—September 25 and 26.
Freelton—October 4.
Galetta—September 24 and 25.
Galt—September 18 and 19.
Georgetown—October 1 and 2.
Glencoe—September 30 and October 1.
Goderich—September 15-17.
Gooderham—October 2.
Gordon Lake—September 26.
Gore Bay—September 30 and October 1.
Gorrie—October 4.
Grand Valley—September 18 and 19.
Gravenhurst—October 2 and 3.
Haliburton—September 25.
Hanover—September 25 and 26.
Harriston—September 25 and 26.
Harrow—October 7 and 8.
Harrowsmith—September 18 and 19.
Hepworth—September 16 and 17.
Highgate—October 13 and 14.
Holstein—September 23 and 24.
Huntsville—September 23 and 24.
Hymers—September 23.
Ingersoll—September 29 and 30.
Iron Bridge—October 7.
Jarvis—October 2.
Kagawong—October 2 and 3.
Keene—October 7 and 8.
Kemble—September 25 and 26.
Kemptville—September 4 and 5.
Kenora—August 28 and 29.
Kilsyth—October 2 and 3.
Kincardine—September 18 and 19.
Kingston—September 23-27.
Kirktown—October 2 and 3.
Lakefield—September 23 and 24.
Lakeside—September 25.
Lambeth—September 24.
Langton—October 11.
Lansdowne—September 18 and 19.
Leamington——October 1-3.
Lindsay—September 18-20.
Lion's Head—October 6 and 7.
Listowel—September 18 and 19.
Lombardy—September 13.
Loring—September 27.
London (Western Fair)—September 6-13.
Lucknow—September 25 and 26.
Maberly—September 25 and 26.
Madoc—October 7 and 8.
Magnetawan—September 24 and 25.
Manitowaning—September 25 and 26.
Markdale—October 7 and 8.
Markham—October ——.
Marmora—September 30.
Massey—October 1 and 2.
Matheson—September 23 and 24.
Mattawa—September 24 and 25.
Maxville—September 18 and 19.
Maynooth—September 25.
McDonald's Corners—September 26.
McKellar—September 18 and 19.
Meaford—September 25 and 26.
Merlin—September 22 and 23.
Merrickville—September 16 and 17.
Metcalfe—September 23 and 24.
Middleville—October 3.
Midland—September 29-October 1.
Mildmay—September 15 and 16.
Millbrook—October 2 and 3.
Milton—October 7 and 8.
Milverton—September 25 and 26.
Minden—September 30.
Mitchell—September 23 and 24.
Morrisburg—Aug. 12-14.
Mount Brydges—October 3.
Mount Forest—September 17 and 18.
Muncey (United Indian)—October 1.
Murillo—September 30 and October 1.
Napanee—September 9 and 10.
New Hamburg—September 11 and 12.
Newington—September 23 and 24.
New Liskeard—September 11 and 12.
Newmarket—September 24-26.
Niagara-on-the-Lake—September 25 and 26.
Noelville—September 17.
North Bay—September 16 and 17.
Norwich—September 23 and 24.
Norwood—October 14 and 15.
Oakville—September 18-20.
Odessa—October 3.
Ohswekin—October 1-3.
Onondaga—September 29 and 30.
Orangeville—September 16 and 17.
Orillia—September 16 and 17.
Oro—September 19.
Orono—September 25 and 26.
Orrville—September 23.
Oshawa—September 8-10.
Ottawa (Central Canada)—September 6-15.
Otterville—October 3 and 4.
Owen Sound—September 9-11.
Paisley—September 23 and 24.
Pakenham—September 22 and 23.
Palmerston—October 7 and 8.
Paris—September 25 and 26.
Parham—September 16 and 17.
Parkhill—September 18 and 19.
Parry Sound—September 24-26.
Perth—September 3-5.
Peterboro—September 15-17.
Petrolia—September 18 and 19.
Picton—September 16-18.
Pinkerton—September 26.
Porquis Jct.—September 24.
Port Carling—September 23 and 24.
Port Elgin—October 2 and 3.
Port Hope—September 23 and 24.
Port Perry—September 11 and 12.
Powassan—September 24 and 25.
Priceville—October 2 and 3.
Providence Bay—October 6 and 7.
Queensville—October 7 and 8.
Rainham Centre—September 16 and 17
Rainy River—September 23 and 24.
Renfrew—September 17-19.
Riceville—September 24.
Richmond—Sept.
Ridgetown—October 7-9.
Ripley—September 23 and 24.
Roblin's Mills—September 23 and 24.
Rocklyn—October 2 and 3.
Rockton—October 14 and 15.
Rockwood—October 2 and 3.
Rodney—September 29 and 30.
Roseneath—September 25 and 26.
Rosseau—September 17 and 18.
Russell—September 25 and 26.
St. Mary's—September 18 and 19.
Sarnia—September 23 and 24.
Sarnia Reserve—October 1 and 2.
Sault Ste. Marie—October 1-3.
Schomberg—October 9 and 10.
Seaforth—October 18 and 19.
Shannonville—September 13.
Shedden—September 17.
Sheguiandah—October 1 and 2.
Shelburne—September 23 and 24.
Simcoe—October 6-8.
Smithville—September 17 and 18.
South Mountain—September 11 and 12.
South River—September 30 and October 1.
Spencerville—September 23 and 24.
Springfield—September 18 and 19.
Sprucedale—September 18 and 19.
Stella—September 30.
Stirling—September 25 and 26.
Straffordville—September 17.
Stratford—September 15-17.
Strathroy—September 15-17.
Streetsville—September 25.
Sturgeon Falls—September 23 and 24.
Sunderland—September 16 and 17.
Sundridge—September 29 and 30.
Tara—September 30, October 1.
Tavistock—September 29 and 30.
Teeswater—September 30, October 1.
Thamesville—September 30, October 1.
Thedford—September 24 and 25.
Thessalon—September 30.
Thorndale—September 29 and 30.
Thorold—September 16 and 17.
Tillsonburg—September 15 and 16.
Tiverton—October 7.
Toronto (Canadian National)—Aug. 23-Sept.
Tweed—October 2 and 3.
Underwood—October 14.
Utterson—October 1 and 2.
Vankleek Hill—September 16 and 17.
Verner—September 23 and 24.
Wallaceburg—October 1.
Wallacetown—October 2 and 3.
Walsh—October 18.
Walter's Falls—September 23 and 24.
Warkworth—October 2 and 3.
Warren—September 24 and 25.
Waterdown—October 7.
Waterford—September 25.
Watford—October 9 and 10.
Welland—September 30, October 2.
Wellesley—September 9 and 10.
West McGillivray—October 2.
Weston—September 12 and 13.
Wheatley—September 29 and 30.
Wiarton—September 23 and 24.
Wilkesport—September 25.
Williamstown—September 10 and 11.
Winchester—September 2 and 3.
Windham—September 30.
Windsor—September 15-20.
Wingham—October 8 and 9.
Wolfe Island—September 16 and 17.
Woodbridge—October 10 and 11.
Woodstock—September 17-19.
Woodville—September 11 and 12.
Wyoming—September 25 and 26.
Zephyr—September 30.
Zurich—September 17 and 18.

EDITORIAL COMMENT

THE SIGNING OF PEACE

NOT since the armistice has anything occurred which has so affected the markets of the world as unconditional acceptance by Germany of the terms of peace laid down by the Allies. The effects though are vastly different. The signing of the armistice brought to a sudden stop months of ceaseless activity and many looked out on the reconstruction period with no little misgiving. So far Canada has come through the after the war period splendidly. All over the country hardware men report that business has been excellent and that it gives every promise of remaining so. In spite of strikes and labor troubles business in general has been good. Behind everything though there was always the doubt as to what Germany was going to do in regard to the armistice. This was reflected perhaps more in British and American circles than in Canadian business, and caused a great many projects to be held up until it was certain that there was to be no resumption of hostilities. Possibly one of the great factors in deciding the Germans was the firm stand taken by the Allies. The Hun knew that if he attempted any of his old tricks and did not sign at the time specified several powerful Allied armies in command of Marshal Foch would at once occupy German territory. The final surrender is as complete as that indicated by the armistice. The results will be immediate and far-reaching in business. The commercial world will feel free to go ahead unhampered by any more shadows of war. No country on the globe has a brighter future than Canada and big men all over the country are looking for a period of steady development that will last for many years.

KEEP WELL POSTED

NO man can know too much about the business in which he is engaged. The greatest prizes in the commercial world to-day are going to the men who know. These men, because they have the energy necessary to become posted on all sorts of details which the average man passes up as unimportant, get a wider vision which gives them a tremendous advantage. They study most carefully the needs of the buying public which they serve and not only supply them but by judicious management create new needs. They are posted thoroughly on time-saving and labor-saving methods because these things under present day conditions mean either a big saving or a big loss. By using the general knowledge which they are constantly seeking they develop the faculty of being able to think and what is equally important to act quickly. This naturally develops in them an aggressiveness in business that can be obtained in no other way. It makes them keen merchants and keen does not in any way mean that they are ready to stoop to methods of unfair dealing, but that they are quick to see the chances for trade and quick to take advantage of them. Most persons who have come in contact with the outstanding figures in the retail trade to-day are astonished at the wide knowledge they have. These men would be expected to know all about their own stores, but they frequently surprise people by the grasp they have of numerous details, most of which when analyzed will be found to have a bearing of some kind on the business in which they are engaged. There is nothing superficial about this knowledge. It is based on actual facts, because accuracy is a vital element in successful business building. Small mistakes will often wreck a business quicker than anything else and no one knows this better than the keen retailer.

SHORTER WORKING HOURS

IN view of the continued and successful demands on the part of employees for shorter working hours the experiences of some of the large British firms is somewhat interesting. These firms feared that shortening the hours of labor would greatly affect production and also decrease the efficiency of the capital required to carry on the business. In one case, two twelve-hour shifts were changed to three eight-hour shifts and it was found that the output increased. Then Lord Leverhulme, the British soapmaker, tried out the plan of having four six-hour shifts at some of his numerous factories. It is stated, that the management is confident that the men work harder per hour than under the old system and that in this way the output is increased and the working efficiency of the capital made greater. The latest British advocate of the shorter working week is Lord Northcliffe, who, it is stated, may try out a plan for a five-day week for all brain workers in his employ. Retailers all over the world are particularly interested in the move for shorter hours, as thousands of their employees are watching what is happening and are making their demands from time to time

Would Fix Profits to Protect Consumer

Manager of Merchants Consolidated at Winnipeg Urges the Formation of an Inland Trade Commission Along Somewhat Similar Lines to the Railway Commission—Interesting Evidence Given at Session in Ottawa

By T. M. FRASER, Special Representative of the MacLean Publications at Ottawa

OTTAWA. — Interesting evidence was given before the Cost of Living Commissioner by Mr. Montgomery, manager of the Merchants Consolidated, Winnipeg, composed of 300 dealers, who buy directly from manufacturers—when they can. The wholesaler opposes the idea. The first order they placed was for $50,000 worth of rubber footwear. At first they had no trouble in gettings goods, but later the wholesalers began to object. They have a fixed price at which they must sell the goods. They buy, for example, from the Consolidated Rubber Company. The first season they sold cheap, and saved money to their customers, but that got the jobbers into trouble with the wholesalers. There is a set discount of 15 per cent. off the list, which is their profit. The rubber footwear is handled on a close margin.

Has Advanced Greatly

Footwear has advanced greatly since the war. The advance on the wholesaler up to a few weeks ago was 45 to 65 per cent. There has been a further advance of 25 to 40 per cent. during the past four weeks. Before that, the wholesaler paid for good elk boots for the farm trade, $3.40, and retailed at $4.05, plus freight to Winnipeg. The retailer got about $5.25 for the same goods. The ordinary wholesale price would be about $4.50, and the retailer gets 45 cents less. The association was formed largely to compete with mail-order houses and hope to stabilize prices. Their turnover is about one million dollars a year.

Stopped by Guild

The manufacturers are willing to sell them, but in groceries the Grocers' Guild in Winnipeg stops them. If they could secure all the lines they want they could sell 17 million dollars' worth a year. Their authorized capital is $150,000, $137.000 paid up. He did not think the wholesaler could be abolished. They give ten days' credit, and their losses in two years were .012. They have not had much trouble in buying ladies' wear, underwear, socks, etc.

Mr. Montgomery urged the formation of an Inland Trade Commission, somewhat the same as the Railroad Commission. He thought some scheme of profit fixing might be effected, and they hoped to do that in their company so as to protect the consumer. They tried to see that their members kept profits low to keep the people from patronizing the mail-order houses. He said very often they could not get goods except through devious ways. The wholesaler cannot be eliminated, but his profits should be cut down. There are many lines which only the wholesaler could handle.

Is Opposed to It

He expressed opposition to what he called co-operative locals, where four or five men join together to buy goods. He said there were too many small stores in small places, and are not anxious to sell to more than one in a place. Mr. Stevens pointed out to him that he was on dangerous ground as he also was discriminating.

Three Times a Year

Mr. Montgomery held that you could not carry on a good general store with less than twenty or twenty-five thousand dollars capital, and it must be turned over three times a year to make money. When these locals are formed they buy a few lines and the storekeeper eventually finds he must reduce his stock. Then he cannot serve the community, so the locals really put the storekeeper out of business.

Says It Does Not Pay

Speaking about the parcel post, he said he understood it was not paying, and this was due to the mail-order business, which it was supposed to be carrying at a loss. The rates should be doubled so that the mail-order houses would pay a proper share. They would then make less profit and would have to make a price the local retailer could meet.

IN AUTO ACCESSORY BUSINESS ..

Continued from page 35

and finishers of all kinds, jacks, pumps, tire savers, wrench sets, etc., and we are adding new lines from time to time.

Rehse in New York "World."

Susie: Stop right here, Jamesy. We don't want to stop in front of a store in a automobile. They always charge 'em more.

Do a Cash Trade

"We find that the bulk of our trade in these lines is cash," stated Mr. White, "as some lines of auto accessories are considered to a certain extent luxuries, and the expenses incurred with a car should be paid at the time."

Besides its attractive window display, the Sumner Company has, right near the front of the store, a handsome silent salesman. As may be seen from the accompanying photograph, this enables the firm to show a lot of goods in the store and also adds to the general attractiveness of both the stock and the interior. By showing such lines, for instance, as robes, both on the case and in the windows, the Sumner Company has been able to largely increase its sales. The same applies to such lines as the auto finishes, and Mr. White states that each year sees a nice increase in the sales of finishes. The firm not only sells the finishes, but gives car owners all the advice and general information it can about the best methods of doing the work, the best brushes to use, and so on. Help of this kind is always welcome, and when the car owner sees the results he has been able to obtain by a little effort on his own part, it means that the next time he has any similar work to do or needs anything for his car, he is going to get it at Sumner's. It is the old story that always holds good, that a satisfied customer is one of the best advertisements any firm can have.

Uses Good Space

As previously stated, the firm is a consistent believer in the use of newspaper space. Its policy is to use frequently special half pages, in which are advertised auto accessories only. In all such advertisements a free use is made of attractive illustrations. In opening the automobile season this year the Sumner Company did not fail to let the people all through its territory know in good, large type, that it was carrying for 1919 the largest and most complete stock of auto accessories it had ever had. The announcement was pleasingly worded, and included a cordial invitation to every car owner to visit the store and become familiar with the large stock.

The firm's enterprise in going ahead and developing the auto accessory field has been fully justified by the way the business has expanded. It is still growing steadily, and Mr. White is looking for it to become one of the most important in the store and rival many of the departments that have been established a great deal longer.

EVENTS IN THE TRADE

Business Changes

VULCAN, Alberta.—McPherson Bros., have purchased the hardware business of George Pettmen.

VULCAN, Alberta.—The Vulcan Supply Co., formed by C. S. Hall and G. C. Collier, will stock hardware, harness and implements.

Obituary

George Reed, Jr., of Montreal, died in Quebec City. Mr. Reed was the proprietor of George Reed & Co., Ltd., 572 Ontario St., Maisonneuve, and had been ill for several years, although he attended to business until shortly before his death. He was buried in Montreal.

The death occurred at his home in Toronto, from the effects of a paralytic stroke, of Augustus D. Ellis, aged 72. For many years Mr. Ellis was engaged in the hardware business in Simcoe, Ont., first as a member of the firm of Gordon and Ellis, and later by himself.

Fire Losses

The plant of the Richards Manufacturing Co., Ltd., Kedgwick, New Brunswick, manufacturers of lumber and shingles, was destroyed by fire.

Slight damage was done to the premises of the Canada Decalcomania Co., Toronto, in a fire which caused a loss of $8,000 to the building in which they are located.

Fire which was started by lightning caused a loss of about $2,000 at the Anthes Foundry in Toronto. While attempting to rescue his auto, John Bibby, manager of the firm, was burned about the arms.

Fire which may have been caused by defective wiring started in the premises of the High Grade Oil Company, Toronto, and destroyed oil valued at $35,000 and caused $1,500 damage to the building.

An early morning fire in the foundry and store of Tereau & Racine, Quebec, manufacturers and jobbers of stoves, furnaces, hardware and paints, caused a loss that is estimated at half a million dollars. When discovered the flames were sweeping through the buildings and had made such headway that little could be done to check them. Four firemen were injured by falling walls.

Fire which started in a storehouse of the R. McDougall Co. at Galt Ont., manufacturers of pumps and tools, spread to the pattern shop, destroying both buildings and causing a loss of $50,000. Lt.-Col. A. W. Oliver stated to HARDWARE AND METAL that work has been commenced on new patterns, and as the firm had a good stock of pumps and tools in the factory, which was not touched by the fire, it is in a position to promptly look after all the requirements of its customers.

Personals

Miss Lenore Demeray has taken a position as bookkeeper in the hardware store of E. Miller, at Aylmer, Ontario.

Mr. F. G. Echols, for many years general manager of the small tools department of Pratt & Whitney Co., of Hartford, Conn., has accepted a position as vice-president of the Greenfield Tap & Die Corporation, of Greenfield, Mass.

Fred Sterling, of Vancouver, has left for England on a buying trip. On his way East he spent a few days in Galt and vicinity visiting relatives, and with his parents at New Hamburg, Ont.

Mr. Ross, of Ross & Dennison, Smilie, Sask., spent the week in Winnipeg on business and reports prospects in his district are very favorable and all dealers are looking forward to a big year's business.

Prior for his departure to Toronto, where he will manage a new store being opened by Benson Johnson, Limited, H. P. Nichols, assistant to the general manager of the American Can Co., Hamliton, Ont., was presented with a handsome gold watch. Mr. Nichols has been with the firm for 21 years.

Flight-Lieutenant A. T. Simons, R.A.F., has returned from overseas and joined the sales department of the E. T. Wright Co., Ltd., Hamilton, Ont. Mr. Simons formerly represented the firm in Western Ontario. He was wounded and taken prisoner and spent six months in Germany.

Mr. F. S. Corrigan has been recently appointed vice-president of the Sheet Metal Products Co. of Canada, Ltd., and president of the Macdonald Manufacturing Co., Ltd., Toronto. Mr. Corrigan has been connected with the above companies for over twenty years, the last seven of which as general manager.

BULL-McLAIN

The engagement of Louis McLain, president of the Louis McLain Company, Ltd., Winnipeg, to Miss Evelyn Ray Bull, daughter of A. H. Bull, millionaire steamship owner of New York City, has been announced. The wedding took place on Wednesday, June 25, at the home of the bride-elect's parents, Elizabeth, N.J. After the wedding tour they will return to Winnipeg and take up residence at the Fort Garry Hotel.

Montreal News

Thomas Mortimer, manufacturers' agent, Toronto, was in Montreal during the week.

Mr. Stone, of the Stanley Rule and Level Co., New Britain, Conn., was in Montreal this week.

F. C. Hatch, of Whitby, Ontario, was in Montreal this week in the interests of the Hatch Manfg. Co.

Ernest Bureau visited Ottawa this week in the interests of his firm, Richardson and Bureau.

W. W. Anderson, in the interests of the Nicholson File Company, Port Hope, was in Montreal this week.

L. M. Croft, in the interests of S. C. Johnson & Son, Racine, Wis., was a visitor to Montreal this week.

John Irwin, managing director of McArthur, Irwin, Ltd., Montreal, was a New York visitor on Tuesday of this week.

R. M. Dunton, sales manager of Connor-McNeal Co., makers of skates, Kokomo, Indiana, was in Montreal this week.

The friends of A. W. Poole, of McArthur Irwin Ltd., will be sorry to learn of the loss of Mr. Poole's little daughter, after a brief illness.

John Milne, of Auckland, New Zealand, a former Montrealer, but now general manager of John Chambers & Sons, Auckland, was in Montreal this week on a business trip.

Capt. F. E. Fraser, D.S.C., late of the R.A.F., has returned from overseas and is locating in Montreal as Canadian representative of the Birmingham Small Arms Co. Captain Fraser was a visitor to the Montreal offices of HARDWARE AND METAL.

George Boisvert has joined the staff of Lewis Bros., Ltd., as inside salesman, to succeed Victor Gagne, promoted to Charlie Dufresne's desk. Mr. Boisvert spent seven years with the Durand Hardware Co., and was, for nine years previous to this, with Caverhill, Learmont and Co.

Trade Notes

The Domestic Specialty Company has changed its name to Canadian Polishes Limited.

The Robeson Preservo Company, of Port Huron, Michigan, has been granted an Ontario charter.

The Kindel Bed Co., Stratford, Ont., is preparing plans for an addition to its factory to cost $100,000.

The Berlin Engine and Thresher Company, Limited, has changed its name to the Tuerk Engine and Tool Co., Limited.

The Gendron Manufacturing Co., Toronto, have purchased a site on which a large new factory will be erected.

R. Chestnut & Sons, Ltd., Fredericton, New Brunswick, plan to erect a new three-story building containing 12,500 square feet of floor space for warehouse purposes.

McPherson Bros., who purchased the hardware business of George Pettmen, have leased new premises, and will move to them shortly.

R. Brady, of Chatham, Ont., dealer in tinware, and J. H. Glassco, of Chatham, sheet metal, have removed to Windsor, Ont., and formed the firm of Glassco and Brady.

Pressed Metals Co., of Canada, Ltd., Toronto, Ont., will shortly commence the erection of an American branch plant at Port Huron, Mich.

Work will be commenced shortly on the Canadian branch factory of the Republic Motor Truck Co., at London, Ont. The Canadian company is capitalized at $2,000,000.

C. H. Lee and W. S. Wills, formerly with the Ford Motor Co., have secured sites in Port Huron, Mich., and at Sarnia, Ont., on which will be erected plants for the manufacture of automobiles. Work on the Canadian plant will, it is stated, begin about April 1, 1920.

The Hanover Portland Cement Co., of Hanover, Ont., has purchased additional property near Walkerton, Ont., and contemplates increasing the capacity of its plant.

Arthur J. Hayes, for several years assistant manager of the London, Ont., branch of the Ford Motor Co., has resigned and left this week for Windsor where he becomes sales manager for Canada, for the Champion Spark Plug Co.

The Glidden Varnish Co., Toronto, has just completed extensions to its plant, which will give it six thousand feet of additional floor space.

The Scotia Steel Company's furnaces at Sydney Mines, Nova Scotia, will, according to press despatches, close down indefinitely next month owing to business being quiet.

Incorporations

C. E. Johansson, Inc., capital $24,000, head office Toronto, plans to manufacture and deal in hardware, tools and implements.

Satimo Co., of Canada, Ltd., head office Montreal, capital $100,000, plans to manufacture and deal in razor blades, hair cutters and blades.

Kumfort Specialties, Ltd., head office Montreal, capital $50,000, plans to manufacture and deal in varnish, shellac, soaps, candles and toilet articles.

Premier Paint & Varnish Co., Ltd., head office Montreal, capital $30,000, plans to manufacture and deal in white lead, paints, oils and varnishes.

Driver "Reg" Adam Beck After 4 Years' Service

Rriver R. S. Adam, son of J. M. Adam, hardware, St. Marys, Ont., arrived home from overseas this week, and intends going into the business again with his father. He gave up his position in the

DRIVER R. S. ADAM

Of St. Marys, Ont., who has returned after four years' service overseas and is going into the hardware business again with his father J. M. Adam.

store in 1915, and went overseas as paymaster sergeant of the 110th overseas battalion, from Perth county. In England he reverted to private to get to France quickly, and, as he knew a good deal about automobiles signed up with the motor transport. He was through many of the big shows, and, although he was kept exceedingly busy and was in some hot corners, came through without a scratch. He estimates that he drove his motor truck more than 25,000 miles.

The Ker & Goodwin Machinery Co., Ltd., head office Brantford, Ont., capital $500,000, plans to manufacture and deal in machinery, machine tools and supplies.

Booth Coulter Coppersmithing Co., Ltd., head office Montreal, capital $100,000, plans to manufacture and deal in brass, copper, zinc and other metal goods.

National Hide Co., capital $99,000, head office Montreal, plans to deal in hides, greases, oils and tallow.

Patricia Irwin, Ltd., head office Montreal, capital $100,000, plans to manufacture and deal in articles required for building, painting and furnishing houses and public buildings.

The Stand Sure Stone Co., Ltd., head office Montreal, capital $100,000, plans to carry on the business of contractors and deal in stone.

The Advance Glass Co., Ltd., capital $40,000, head office Toronto, plans to manufacture and deal in glass and glassware.

Detroit Canadian Oil and Gas Co., Ltd., head office Markdale, Ont., capital $60,000, plans to prospect for, refine and manufacture petroleum.

NEW PAINT COMPANY IN THE EAST

The agency for Eastern Canada of the Imperial Varnish & Color Co., Ltd., Toronto, is being taken over by Paint and Varnish Limited, a new company, capitalized at $100,000, a federal charter for which has just been issued. The Eastern representative was formerly Harry Hart, and, while it is understood that the management of the new company will remain with him, Montreal capital will own and control the new corporation. The Eastern Canadian business of the Imperial Varnish and Color Co., Ltd., has grown rapidly during the past few years, and the Montreal parties interested are sanguine as to receiving good returns from the capital invested.

BIRMINGHAM SMALL ARMS CO. OPENS OFICES IN MONTREAL

With a view to greater expansion in the Canadian field, the Birmingham Small Arms Co., Ltd., Birmingham, England, has opened offices in Montreal at 241 Beaver Hall Hill, under the management of F. E. Fraser, their Canadian representative, and who, until recently, was connected as Captain with the Royal Air Force.

Mr. Fraser stated to HARDWARE AND METAL that present plans will embrace the carrying of stocks in Montreal. This will be accomplished as soon as manufacturing in Birmingham will permit, and some lines will be available within the next few weeks, among them several styles of "twenty-two" and air rifles.

"The Birmingham Small Arms Co.,who controlled the output of Lewis machine guns in England during the war," said Mr. Fraser, "is doing its utmost to resume peace-time production of sporting rifles and shot guns. They will be able to make deliveries in July, from the factory, of some lines."

Mr. Fraser was located in Winnipeg for several years and has made a study of Canadian trade conditions as they relate to the sporting goods trade, having been a member of the firm of Sherwood & Fraser, Ltd. He anticipates a great demand for small arms and believes that the Canadian market will be served better than ever before, once manufacturing has been resumed normally on these various products.

RUMOR OF ANOTHER PAINT AND VARNISH FIRM FOR CANADA

Boston Company Said to be Interested in Canadian Market

Reports are current in the neighborhood of Boston that Wadsworth, Howland & Co., Inc., Boston, Mass., manufacturers of paints, varnishes and artists' materials, etc., are planning to establish a Canadian factory with headquarters at an Eastern Canada point. Inquiry by HARDWARE AND METAL has so far failed to secure an official confirmation of the report, but it is significant that no denial has been made.

Says Canadian Firms Seeking Export Trade Should Send Their Own Representatives

F. H. Fotheringham Returns After Business Trip to England And France. He Also Spent Some Time in Australia And New Zealand And Says There is Lots of Good Business to be Had.

"THERE is lots of good export business for Canadian firms who go after it, but they must be prepared to go after it in the right way," said F. M. Fotheringham, export sales manager of the Reg. N. Boxer Co., Ltd., of Toronto, manufacturers of wall paper, on his return this week from a business trip to England and France. Prior to going to Europe, Mr. Fotheringham spent a couple of months in Australia and New Zealand in the interests of his firm.

"It is not good policy for Canadian firms wanting export trade to depend upon other people to get it for them," said Mr. Fotheringham. "They must have their own representatives on the ground prepared to quote prices and tell about the goods. Those wanting business in England should thoroughly familiarize themselves with conditions or they are likely to get into trouble.

Like Canadian Goods

"Canadian goods are very popular in England, and there will be a steady call for them, but firms who try to get business and do not go through the regular channels are not likely to get results. They must study the situation and get in touch with the proper organizations. In England at the present time various combinations practically control the trade in many lines, and these combinations can either make it very easy or very hard for the Canadian who is wanting business.

"Conditions in England are much more settled than in France, and they will be more settled when the time expires for the Government stopping the pay that is now being given to soldiers out of work. A great many of the men are making no effort to find work and are content to take the Government money. In France there has not yet been any demobilization, but with the signing of the peace terms, that will take place, and it will help them to get back to normal business conditions."

Will Make Effort

Mr. Fotheringham is convinced that the Germans will make every possible effort to build up their lost trade, especially in South America. In the meantime, he says, the British firms are organizing rapidly and are going keenly after business.

Discussing the situation in Australia and New Zealand, he stated that in New Zealand there is a preferential tariff for goods made in the British Empire, and that Canadian made goods are much favored by the people.

Are Keen Buyers

"In Australia though," said Mr. Fotheringham, "they are keen buyers. While there is a sentiment in favor of Canada, the whole thing from a trade standpoint centres around price. If Canadian firms make the price they will get the business. Some Canadian firms who are favored at home by high protective tariffs forget when they enter the Australian markets that they have to compete with American and British goods. Here, as in England, the firms which have their own representatives are those which will get the best results. I know of one case in Australia where a man has agencies for at least seventy lines of goods. He cannot do justice to the firms he is representing. In other cases Canadian firms are trying to do business through New York houses. It seems to me that New York firms will naturally favor American goods if it comes to choice."

Business is Growing

Mr. Fotheringham, since 1902, has made nine trips to Australia and New Zealand, and states that business has been growing steadily. Canadian goods generally, he says, have a good reputation, and if prices are equal will find a market. There is a good opening, he says, for hardware goods, but the Canadians must be fully prepared to compete with British and American firms. Both England and the United States, he says, are going after trade very aggressively.

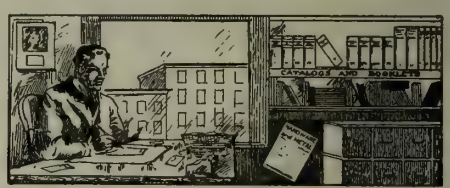
A steady business has been developing in South and Central America, but Mr. Fotheringham says the Germans will make every effort to recover the trade they have lost there. Asked if the Germans were ever a factor in the wall paper business in Canada, he stated that the only trade they ever attempted to get was in the cheaper lines.

DENIES MERGER RUMOR

Newspaper reports in Toronto that negotiations were under way with a view of merging the Steel Company of Canada and the Dominion Steel Corporation were officially denied at the head office of the Steel Company of Canada. It was stated that negotiations which commenced some time ago had been abandoned.

MAKING GOOD PROGRESS

Mr. George A. Simpson, sales manager of the Steel Company of Canada, Hamilton, who recently underwent an operation for the removal of his tonsils, is making good progress toward recovery. He is recuperating at Cambridge Springs, Pennsylvania.



NO RESTRICTIONS

W. H. Goodhue, Ridgetown, Ont.—Would you kindly advise us if there are any restrictions regarding selling arsenate of lead, in dry powder, over the counter in bulk, in a general hardware store?

There are no restrictions but each package must be labelled "Poison" and the goods must conform with the Government standard, that is, contain thirty-one per cent. of arsenical oxide.—Editor.

Meraw Brothers, Zealandia, Sask.—Will you please advise us who manufactures Genco Electric Lighting Plants?

The General Electric Co., of Schenectady, N.Y.—Editor.

Hurley Machine Company

A catalogue just issued by the Hurley Machine Company, of Chicago, with Canadian branch at 413 Yonge street, Toronto, lists the Thor electric washing machines, ironing machines, and vacuum cleaners, manufactured by the firm. It contains forty-eight pages and goes thoroughly into the question of electrical labor savers in the home in connection with washing, ironing and cleaning. The catalogue is profusely and very attractively illustrated, and features throughout the efficiency and reliability of electrical equipment. Readers of HARDWARE AND METAL may obtain copies upon request.

D. H. Howden & Company

"Howden's Stimulator" summer number issued by D. H. Howden & Company, Limited, London, Ont., contains sixty pages, nine by twelve inches. The catalogue is profusely illustrated and is very attractively printed, containing a complete index. Readers of HARDWARE AND METAL who desire copies may obtain same upon request.

Clayton & Lambert

Bulletin No. 4, issued by the Clayton & Lambert Manufacturing Company, Detroit, lists the oil burning machines made by the firm. The bulletin contains twelve pages and is attractively illustrated. It contains a great deal of data regarding equipment which will burn crude, fuel oil, kerosene, gasoline, alcohol or distillate. Copies of the bulletin will be sent to readers of HARDWARE AND METAL upon request.

THE CLERKS DEPARTMENT

World-Famous After Many Defeats

How Penniless Inventor Became Captain of Industry and Benefactor of Race.

By C. B. FORBES in "Forbes' Magazine."

A POORLY-EDUCATED youth told a famous Pittsburgh scientist that he wanted to learn industrial chemistry. "You would only waste your time. There is nothing in it. Drop it." was the discouraging reply.

Undaunted, the young man later went to New York, tramped up and down Broadway, into side streets and long avenues, knocked in vain for admittance to some establishment where he could follow his bent. Nobody wanted him at any salary or even at no salary. Today he is bracketed in chemical circles with Faraday and Crookes.

He has invented, or created, an absolutely new substance now used throughout the whole world, his sales of it reaching millions of dollars a year.

Another entirely new material created by him is being used to the extent of almost 50,000,000 pounds a year, notwithstanding that its price is in the neighborhood of only $240 a ton contrasted with the price of $880,000 a ton paid for it when first created.

By another stroke of his wizardry he produced artificially a material which was so scarce that specimens of it were found as a rule only in museums, its cost being $2,500 a pound. It now is in wide demand at ten or twelve cents a pound.

He has plants of his own on the Continent of Europe, in Britain and in America.

The tax gatherer this year will tap him on the shoulder and ask him to hand over perhaps a million dollars.

Without his inventions, the General Electric Company, the Westinghouse Electric Company and similar enterprises manufacturing tungsten lamps would have had to close down during the war.

Without one of his inventions this country could not have produced poisonous gases to outdo the Germans.

One of the first German aeroplanes shot down in England was found to be using one of the substances brought into being by him, the Huns having captured his Belgium plant and installed his German agents to run it.

A Modern Wizard

He can take a speck of soot and split it into approximately a billion particles—every one of which, it is astounding to the layman to learn, although utterly invisible to the naked eye, can be seen to be constantly moving, apparently alive, when examined under an ultra microscope.

He can suspend these particles permanently in liquids, they being so small as to defy the law of gravity.

His magical particles have enabled him to produce a lubricant far superior to any oil that ever came from a refinery.

There was a notable gathering at the Society of Chemical Industry, New York section, the other day when the portrait of the recipient of the highest honor awarded in the United States for chemical research was unveiled. It was the portrait of the young man who trudged the streets of New York looking for a job.

To-day he is perfecting an appliance which, at the cost of only a few dollars, will insure absolutely pure water for every family using it in the country.

Finally, his activities have given no fewer than seven new words to the Century Dictionary.

This man is Edward G. Acheson, of Acheson-Graphite, Carborundum, Oildag, Aquadag, Silixicon, and Egyptianized Clay fame, chemist, scientist, inventor, manufacturer, recipient of titles, honors and tribute on both sides of the Atlantic.

Romance?

Dr. Acheson's life story is a fact-romance not evolved in a novelist's brain, but romance formed of reality.

Why He Has Succeeded

When a boy he heard of the Rumford Medal, awarded by the American Academy of Arts and Sciences for the most notable contribution to the science of heat or light, and he said to himself, "I mean to win the Rumford Medal some day." Years passed. He stood before a great gathering of the Academy, told the assembled scientists of his boyhood ambition, and, pointing to what he held in his hand, added: "And now you have just handed me the Rumford Medal."

The secret of this meagre-schooled youth? Stick-to-itiveness, never-say-dieness. Incessant industry. Refusal to remain defeated. Physical, mental and visual alertness; constant eagerness to discern effects and to ascertain causes. Patience infinite. An insatiable desire to accomplish something of benefit to the world.

"If your purpose is a worthy one it is possible of accomplishment." That is the guiding and sustaining maxim of Dr. Acheson. He believes that the unseen moving powers of the universe are on the side of right and that, "there is a divinity that shapes our ends, rough hew them as we will." The accomplishing of a purpose, however, may, usually does, cost sacrifice.

"If the young man could only assimilate very early in his life the fact that merely to live and eat and drink and sleep and then die is not enough, but that he must rob himself of many of the pleasures usually taken up by young men, if he means to make his life of the highest possible use to the world, he would set his foot on the pathway to accomplish something worth while. There is no harm in billiards or pool or in dancing, baseball or card playing, or any one of the scores of different diversions and recreations open to young men. The natural inclination usually is to devote a large part of the leisure hours of young manhoood to such pleasures. But the youth who is really earnest in his ambition to do something worth-while will discipline himself to resist such temptations during his early formative years, for the whole fate of a man is largely determined by how he utilizes his plastic years. He may be restricted by circumstances, by environment, by family ties in his selection of his daily work, but every young man, particularly nowadays, has many hours that he can call his own, and it is how he chooses to use these hours that counts most and tells most.

"Why should I forego a generous round of amusement and pleasure and recreation? What's the use? What is there in it? What difference does it make in the end? There are no rewards, are there, to compensate a fellow for denying himself a pretty good time when he is young? These questions, very naturally and pardonably, may be asked—indeed, they are often asked—by young men. Now, as a matter of fact, the rewards are well worth-while. There are three main rewards for meritorious achievement, namely, money, the appreciation of one's fellow men, and the satisfaction that comes from the sense of having done one's best to advance the well-being of your fellow-men.

"The chief value of the financial reward consists in enabling a man to build and develop and expand and multiply his activities and thus serve a greater and greater number of his fellow-men. I say 'serve' because every legitimate form of activity is a form of service. Therefore, money honorably earned in a useful pursuit, is to be regarded as a reward, since it enables you to enlarge your usefulness.

Patience Important Asset

"On this point may I say that I believe every youth should strive, even in his boyhood days, to set up for himself some goal. He should try early to fix for himself a set purpose. He should endeavor to map

---

TO YOUNG MEN

Dr. Acheson's advice to young men: "You should be inspired to add, through your own efforts, to the rapidly accumulating mass of human knowledge. You should be ambitious to assist in some capacity in the great work of the world. You should go forth from school or college prepared for, and with the determination to take such part in the affairs of the world, that all men will be better off, either morally, intellectually or materially, for your having lived. You have a real mission to perform. Should your chosen pursuit be farmer, merchant, manufacturer, engineer, scientist, lawyer, physician, educator, statesman, or whatever it be, have the determination, and work to the end of excelling. Leave, it if be possible, a record of accomplishment that will remain after you have gone, and that may be an inspiration and example to the young men who come after you. Realize your responsibilities, and do not disappoint those who are expecting much from you."

out a career. His guiding principle—this is not preaching; it is sound business sense—should be, not how can I make the most money, but what is the greatest service I can render to the world, how can I accomplish most for the benefit of my fellow-men? If a young man's dominating thought is how he can put most into the world, he will, in time, by adhering unfalteringly to his worthy purpose, and refusing to give up no matter how often failure overtakes him, get out of the world probably far more than he ever dreamed. If the putting in part is attended to with all the energy and enthusiasm and strength and determination he can muster, the taking-out part will take care of itself. In other words, if he tills, sows and cultivates the ground intelligently, industriously and with

WOULDN'T STAY LICKED

Most men have had to overcome some big difficulty before reaching the open highway to success. Edward G. Acheson ran into difficulty and defeat a dozen times—but he refused to stay licked. Penniless, his health impaired, his friends deserters, he began all over again time after time. Finally, victory came. His guiding, sustaining motto has been: "If your purpose is a worthy one, it is possible of accomplishment." His achievements have bracketed him with Faraday and Crookes.

everlasting patience, in time the right kind of a crop will be raised.

"The patience part is tremendously important. History records few great careers which were not marked in their earlier stages by inordinate, almost superhuman difficulties and trials, calling for immeasurable courage and faith. Every victory costs."

The youth Acheson used to lie awake at night pondering what he could do for the world. Something told him that his field and forte lay in industrial chemistry, in applying science to accomplishing useful results. And as showing the stuff of which he was made, it should be recorded that he gave up a salary of $2,000 a year for a weekly wage of $7.50 in order that he might adhere to the principle he had laid down for himself. Later on he refused much larger salaries because the duties would take him away from experimentation, from expanding his knowledge, from following his Holy Grail. Having resolved to steer his course by the Star of Usefulness, he refused to be allured away by mere money.

Yet, the life stories of successful Americans contain few which parallel the discouragements, the disappointments, the hardships, both physical and financial, Edward Goodrich Acheson encountered not only as a youth, but even through his thirties and into his forties. Let us now trace briefly his checkered career.

Humble enough was the birthplace, in 1856, of Edward G. Acheson—at the back of the parental grocery store at Washington, Pa., where his father, of an ancient Scottish family that came to America via Ireland, had been raised. There was little money in storekeeping, and the Achesons moved to Monticello, Pa., where the father was made manager of a furnace, in which an uncle was interested. A crude school was conducted by a neighboring farmer, and after desultory tuition there, Edward proceeded to a more pretentious scholastic institution. Before he was sixteen he had formed some conception of what he wanted to do and be. His ability as a methematician won him local fame when he calculated with exactitude what length of cable would be required for a new ferry rope across a river.

He had visions of a well-rounded college education, when crash! The memorable panic of 1873 hit the Achesons, as it hit thousands of others, and though he had had only three years' real schooling, Edward, now over sixteen, was called home to earn his living.

He was installed as timekeeper at the furnace. But his mind and heart reached out to things mathematical and mechanical. His father pointed out to him the need of an improved means of boring holes for blasting, and Edward set to work with such effect that before his seventeenth birthday the United States Patent Office contained an application for a patent on "improvements in Process of Mining Coal, Ore, Clay, etc., etc." The machine worked, but was cumbersome to handle and did not, therefore, cause any furore. Yet years later, he ran across his invention doing efficient work as a drilling machine in a machine shop. His father died before the panic had run its course and his wife and six children were left in poor circumstances. The new and strange and weird thing known as electricity fascinated this young mechanic of a mathematical and inventive turn of mind. He rigged up galvanic batteries, silver-plated cheap yellow metal watches, and sold them at a modest profit.

Fate now buffeted him from pillar to post, from clerking in a country store to assisting a railway construction gang. While on this last job he met a man who was interested in a patented apparatus for regulating the supply of water for steam boilers and for giving an alarm by whistle when the water became dangerously low in the boiler. Young Acheson was enthusiastic over it. He induced a relative to join him in buying the right to the patent for Allegheny County, Pa., for a thousand dollars, the relative lending Edward his half. Full of dreams, the youth rented an upstairs room in Pittsburgh and on the glass door painted prominently the name of the firm, Acheson & Allison. After infinite work, worry and discouragement, the total sales reached only two machines, he fell into arrears at the cheap restaurant where he took his extremely frugal meals, and was finally forced to rub the bright sign off the door, the contents of the office-bedroom going to the restaurant keeper.

A stool behind a ticket window on the Allegheny Valley Railroad was his next post. Here his already acute powers of observation enabled him to note intelligently what was going on in the then active petroleum developments. All this time he was the opposite of idle. Early and late he applied himself to mathematics, to engineering problems and to the study of railroading. When only twenty-one he moved from his ticket-selling stool to the position of resident engineer of the division of a narrow gauge railroad then under construction from Bradford, Pa., to Olean, N.Y. The life was rough but healthy. His boarding-house and headquarters were in a forest shanty; his bed consisted of a large box filled with straw; on winter mornings he often found an extra cover over his bed—a cover of snow—all ablutions had to be done outside, often after a thick coat of ice had been broken to get at the water; and the food was not of Delmonico variety.

The railroad building over, he got a job as tank gauger with a Standard Oil subsidiary. The only man who could work out, from the measurements supplied, the exact contents of a tank was the superintendent, but Ed. Acheson decided that he was mathematician enough and had industry enough not only to figure out the capacity of one or a few tanks, but to compile a sort of ready reckoner, a set of tables from which the capacity of any size or shape or construction of tank could be rapidly and easily computed. He sent to New York, had a very strong leather-covered book of 600 pages made, with this printed title, "Tank Gaugers' Pocket Tables, Circumference and Diameter of Circles, Barrels per Inch, Deadwood Tables, etc., E. G. Acheson, Bradford, Pa., August, 1887." I have seen this unique book. It contains a staggering mass of figures representing incalculable labor. When the superintendent discovered what his ambitious lieutenant was doing he promptly discharged him!

Undismayed by this condemnable exhibition of jealousy, Acheson quickly found another engineering post, but his dismissal and the circumstances had come to the ears of higher-ups in the Standard Oil subsidiary and he was reinstated—on condition, however, that he turn over to the narrow-minded superintendent the offending volume while in the company's employ. But justice was not asleep; some time later the superintendent's figuring was found inaccurate when compared with Acheson's and this time it was the superintendent who was dismissed.

Meanwhile, electricity continued to cast its spell over the young man. He read everything written on the subject, experimented extensively and devised plans for a small dynamo, which, however, was not an unqualified success. When twenty-four he resolved to get into the electrical field by hook or by crook. It was then that he came to New York and without result canvassed every electrical establishment he could locate.

Off to Menlo Park, the scene of Edison's labors, he went, determined to get a job there even if he had to work at office-boy's wages. Somehow he contrived to get through the outer barriers and straight to the presence of the great inventor. Placing one hand to his ear to indicate his deafness, Edison asked, "What do you wish?" The young man replied, "Work." Somewhat impatiently, for he did not relish being interrupted by an out-of-work youth, the famous inventor replied, "Go out to the machine shop and see Krussi," resuming at once the work which absorbed his attention. Although his work consisted of drafting, Acheson worked laboriously at night in the machine shop to build an improved type of his original dynamo. Edison oftener than once stopped to watch the enterprising young man, and one night, after inspection, told him that he would find a similar dynamo, designed by Siemens, described in a book which Edison told him he could get from the company's library. To his amazement Acheson found an almost exact reproduction of the invention into which he had put so much brain work and hand work.

Promotion came. Acheson was continually experimenting. On one occasion he submitted to Mr. Edison a drawing of an electric meter for use in connection with Central Station distribution, a problem on which Edison and his associates were hard at work. After examining it, Edison, appar-

ROUGH AND SMOOTH

The ancients rubbed stones against other stones or trees to form their battle-axes and other implements. Grinding was then all-important. Dr. Acheson created the best abrasive the world knows, carborundum; it can even scratch and cut diamonds, although its widest field of usefulness is not in the jewelry but the industrial world.

To-day transportation, and, consequently, lubrication, are paramount. Dr. Acheson, having produced the best means of causing friction, turned round and invented the finest substance for eliminating friction, Oildag, a lubricant twice or three times as effective and efficient as the finest of lubricating oils. It is composed of Acheson Graphite (another of his wonderful creations) and oil. His inventions, scientists declare, will enable the wheels of the world to go round all right after the earth's supplies of oil have been exhausted. Already the saving of oil through the use of Acheson's creations is well under way.

ently annoyed, said, "I do not pay you to make suggestions to me. You do not know but I already had that idea. And now if I use it you will think I took it from you." Acheson replied that he considered anything he produced while in Edison's employ and pertaining to the latter's interests, belonged to Edison. Mollified, Edison consented to test the meter scheme; but it proved a failure. However, Acheson was shortly placed in the original experimental department, the one spot above all others in the world where he desired to work, notwithstanding that his

pay, although he was now twenty-five years of age—and, as Edison once remarked, a "thinker"—was only $7.50 a week.

Attracted Edison's Notice

Edison began to take note of his gifted assistant and before long turned him loose in the lamp factory to study that end of the business from beginning to end with a view to seeking a solution of several annoying problems which must need be overcome before the business could be developed extensively and successfully. The prize of $100 offered by Edison for the solution of one problem was quickly won by Acheson. Every phase of electric incandescent lamp manufacturing he eagerly absorbed. Moreover, at night he sweated over problems of electrical distribution, measurement and other matters about which very scant knowledge existed.

When twenty-six Edward Acheson sailed for Europe as first assistant to Edison's chief engineer on the highly important mission of supervising the Edison exhibit at the International Electrical Exposition in Paris. Here Acheson met William Crookes and the other foremost electrical scientists of the day. So rapidly had Acheson made his mark that Edison chose him for the epochal work of installing electrical lights in the great Scala Theatre of Milan, Italy, the first innovation of its kind in Europe, Brussels, Antwerp, Amsterdam and other European cities became the scenes of similarly important activities. Competition developed for Acheson's services and in one instance his salary jumped from $150 to $300 a month; but the jealousies thus aroused among the different Edison companies in Europe impelled the young engineer to resign.

His health impaired by his strenuous labors and incessant travels, Acheson opened a modest laboratory and shop in Paris, but within six months had to give it up. He was stranded financially. Proceeding to London, he contracted a serious case of jaundice and underwent most trying experiences. He was edged out of the hotel and into a boarding-house. He had no money to engage a doctor. His physical condition became worse. He suffered as acutely mentally as physically, for he was homeless, penniless, wrecked in health, stranded among strangers with no silvery lining within sight. Happily, an ex-machinist from Menlo Park espied the invalid Acheson sitting, a picture of misery, in front of the boarding-house, took him home, called in a doctor and the effect was magical. After further experiences and vicissitudes in Europe, a cable came from Edison requesting Acheson to return at once to New York. So bereft of money was he that when he arrived at the pier he hadn't a cent to pay the cabman for taking him to a hotel. With courage born of self-reliance, he borrowed $5 from the man in charge of the carriage stand at the pier, explained to him that he had no American money in his pocket, but would return the $5 immediately when he reached his hotel—which he did, borrowing from the hotel clerk on the same plea which had worked before.

The Turning Point

One day, when Acheson was a very young man, he heard the famous Dr. Kunz, of Tiffany & Company, remark that the world badly needed a good abrasive. Acheson decided that he would strive to supply it. His theory was that by impregnating clay with carbon under the influence of electric heat some valuable results might be attained. What occurred let Dr. Acheson tell in his own words, because the incident has made history:

"An iron bowl, such as plumbers use for holding their melted solder, was attached to one lead from a dynamo and filled with a mixture of clay and powdered coke; the end of an arc light carbon attached to the other lead was inserted into the mixture. The percentage of coke was high enough to carry a current, and a good strong one was passed through the mixture between the lamp carbon and bowl until the clay in the centre was melted and heated to a very high temperature. When cold, the mass was examined. It did not fill my expectations, but I, by sheer chance, happened to notice a few bright specks on the end of the arc carbon that had been in the mixture. I placed one on the end of a lead pencil and drew it across a pane of glass. It cut the glass like a diamond. I repeated the experiment and collected enough of the material to test its abrasive qualities. I mounted an iron disc in a lathe, and oiling its surface, applied the material which adhered, and with this revolving disc I cut the polished face off the diamond in a finger ring still owned and worn by me.

"I now made a small furnace of bricks, and after much patient work, had what I considered enough to take to the lapidaries in New York City. A friend by the name of W. C. McCallister, a druggist, of Monongahela, and I started for New York.

"On the way we coined a name for my new and, as yet, unnamed material. Under the impression, without any chemical analysis, that it was composed of carbon and corundum, I called it 'Carborundum.'"

He brought a little vial containing some of the product, had a diamond cutter use some of it to repolish the injured diamond in the ring; so astounding were the results that the diamond cutter immediately purchased the vial at the rate of 40c per carat, or about $800 per pound. Badly as he needed the money for other purposes, it was characteristic of this searcher after new knowledge that he spent every penny of it buying a microscope.

Inventing a product is one thing; inducing people to use it is another. Acheson knew that he had the best abrasive the world had ever known, that it could be used profitably for a thousand purposes; yet everybody seemed too content to jog along using routine methods and appliances. Luckily, Westinghouse had a job which carborundum wheels could perform rapidly and economically, and he gave Acheson an order for 60,000 of them. Every wheel Acheson made with his own hands, toiling night and day. The proceeds netted him over $7,000. This enabled the Carborundum Company to launch out. By means of two small kilns, a high grade vitrified wheel was produced which was ideal for dental purposes, and these made a great hit at the Chicago Exposition—so much so that an Austrian visitor paid him $20,000 for the patents for Austria-Hungary alone.

Later, Acheson received $60,000 cash for other European territory.

Some time ago Dr. Acheson was made very happy by being able to locate the old machinist who befriended him in London. Thereafter the machinist did not have to worry over matters financial.

All his success and all his honors have not turned Dr. Acheson's head one iota. He is as democratic to-day as when he was sleeping in the box filled with straw.

Kamsack, Sask., Store Model of Neat Arrangement

ALL commercial men who visit the hardware store of A. Bay, at Kamsack, declare it to be one of the finest in the West. The store has a frontage of 40 feet and a depth of 65 feet, and its most striking feature is its mezzanine floor which is devoted exclusively to the display and sale of furniture. A broad stairway leads to this floor from the centre rear of the premises.

The furniture galleries on either side come to within fifteen feet of the front store windows.

This store was acquired only last fall by Mr. Bay, who had had no former experience in the business. Its real success is due to its youthful manager, A. D. McArthur, who has been connected with the store for the past five years, serving previously under J. G. Hallson, the former proprietor, who passed away a few months ago.

Mr. Bay is standing to the right of the picture, Mr. McArthur on the left.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

TURNING TOOLS

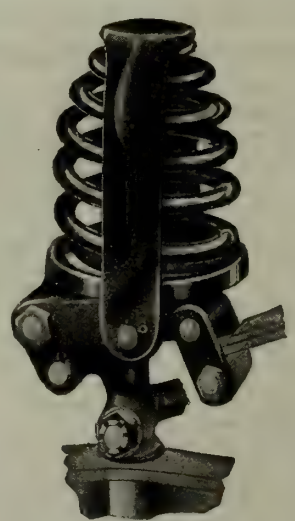
J. H. Williams Co., manufacturers of drop-forgings and drop-forged tools, with plants at Brooklyn and Buffalo, N.Y., have added a line of set screw pattern turning tools, with right and left hand offset and straight shanks, to their "Agrippa" tool holders. These include a full line on wide range of sizes for all

Turning Tool

regular machining operations: turning, boring, planing, threading, knurling, cutting-off and side work. Several of these styles, among them turning tools, are fitted, it is stated, with a cutter-fastening device in the shape of a cam instead of the conventional set screw. The cams are furnished either of the hex head or headless type.

The nose of the holders, or shanks, of both cam and set screw turning tools is beveled, it is stated, to permit their convenient use in close quarters. The tools, it is claimed, are all drop-forged from a strong, tough grade of carefully selected steel, and are submitted, after forging, to a special heat treatment or refining process, which develops not only resistance to all wears but also the great strength necessary to overcome the pushing thrust imposed upon the cutters. The cutter-holding channel, it is stated, is carefully broached to accurate size in special machines and provides an absolutely rigid seat for the cutter, a fundamental requirement in tool holder efficiency.

For those who purchase cutters made of a steel rolled to the variation in size common to usual mill practice, the makers recommend turning tools of the cam-fastening pattern as giving the



Turning Tool

greatest economy, strength and efficiency. It is rapid and positive, they claim, the greater the pressure the tighter the lock. But the gradual rise of the cam, while providing great power, obviously limits its range of contact, consequently, where the size of steel used in cutters which are not ground to bearing size, as in turning tools varies beyond established limits, the makers offer this new line of set screw pattern turning tools at the same price as for corresponding sizes of the cam pattern

The screws, made, it is stated, of a fine grade of alloy steel, are accurately machined and carefully heat-treated and hardened. They are unusually tough and strong, it is claimed, and give the maximum efficiency obtainable from this type of cutter-fastening.

SHOCK ABSORBER

Halladay shock absorbers, manufactured by the Halladay Company, Streator, Illinois, will, it is claimed, directly suspend the car on sensitive springs of sufficient capacity to absorb the vibration and prevent rebound. It is stated that they have no frictional bearings to interfere with spring action and will last the lifetime of a car if ordinary lubrication is given. The spring is what is known as the bee hive type and will, it is claimed, accomplish more in every way than any other shock absorber ever made. It is stated that it has no light break-

Shock Absorber

able parts, or parts to be lost and that the springs are larger than any others ever used for a similar purpose, will absorb all jolts and jars and thereby remove the cause of rebound. In action it is claimed that the Halladay will absorb over 2½ inches of the movement, leaving only a small amount of spring displacement from which the recoil is too slight to be noticed.

GARAGE TOOL CHEST

The "Union" garage tool chest, manufactured by the Union Tool Chest Co., Inc., of Rochester,N.Y., has, it is claimed, a maximum capacity and is very conveniently arranged. Two small top drawers, it is stated, have movable partitions for small parts and for deli-

Garage Tool Chest

cate instruments like battery gauges, etc. The third drawer is designed to hold a complete set of socket wrenches. The bottom compartment, it is stated, is a tray made of solid oak throughout and is fitted with a handle which drops down into the drawer when not in use. The tray corners, it is stated, are lock cornered and the bottom protected by metal corners. The backs of the chests, it is stated, are rabbited or shouldered to the frame as well as glued and nailed. The chests, it is claimed, are finished on the outside with ebony stain, black filler, black first coater and two coats of black varnish and, it is stated, will not show finger prints. The inside of the frame and the inside of all drawers and tray, it is stated, are finished black with a special oil and waterproof preparation.

ASH SIFTER

The Burrowes Manufacturing Co., 607 King Street West, Toronto, is putting on the market a new style ash sifter, a feature of which is double screens. It is stated that by using two screens a great saving of coal can be effected. The sifter, it is claimed, is the only sifter made with a closed scuttle. Cinders, it is stated, may be transferred without dust.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A FEATURE of the markets this week is an advance of twenty-five cents per gallon on all oil paints. This is a direct result of the soaring prices of linseed oil and turpentine. Owing to a change in freight rates between Montreal and Toronto, white lead in oil and putty have advanced five cents in Toronto, and pure putty quotations have moved from $2 per 100 pounds up to $2.50.

Further reductions have been made in lubricating oils as a result of the removal of the war tax, black oil (summer) being down 2½ cents, black oil (winter) 2 cents, Imperial kerosene tractor one cent, Capital cylinder 3 cents, regular grades of machine oil 1½ cents, Standard gas engine oil 2½ cents, and paraffine one cent.

The recent advances that have been made in the prices of hides and leather are showing in higher quotations for side lace leather and cut lace leather.

Sheet copper has advanced one cent a pound, lead ten cents per hundred and spelter half a cent. The markets in these lines are very firm.

If the needs of overseas buyers for turpentine have been met and there is every indication that they have sufficient supplies for some time, a decided reaction is expected in the turpentine market. At Savannah, prices are already 8¼ cents lower and this reduction is being reflected in easier prices in other markets. Linseed oil continues to soar and it looks as if there is little doubt that the $2.50 figure which some dealers have been prophesying will shortly arrive.

There has been such an exceptional movement in oil stoves, ice cream freezers, and tinware and enamelware, that many firms are finding it hard to get the goods to fill orders. With a bumper harvest in prospect all over the country, harvest tools are also beginning to move rapidly and a big demand is expected. Business is reported as unusually good, with prospects of remaining so.

In Montreal an advance of fifty cents per gross has been made in fruit jars. Higher quotations are effective in both Montreal and Toronto on lantern globes.

MONTREAL MARKETS

MONTREAL, June 28—Some advances have been made this week, among those of interest being fruit jars which are up 50c per gross on the various makes. Lantern globes, too, are up 10c per dozen and this applies to the various makes and styles. Horse clippers of Newmarket make are advanced to $3 per pair, and Wescott wrenches are advanced in the lists. Common, regular and knife handle wrenches, on the other hand, are lower. Stove pipe and pipe elbows are down slightly. The jute markets are decidedly firm. Old, heavy copper is on a one cent higher buying basis and the old metal market is much more active. Ingot metals are selling more freely, with an advance made for spelter.

The hot weather increased sales of hot weather goods materially, and ice cream freezers of the popular sizes have been hard to obtain, so great is the demand. Lawn hose, mowers, clippers, watering cans, garden rakes and hoes all have been moving briskly. There is a good undertone to business and reports from the jobbers are satisfactory. There will be an immense hay crop in this province—one of the most important crops of Quebec.

Lantern Globes Up; Fruit Jars Higher

Montreal.

LANTERN GLOBES, JARS. — Advanced prices are in effect for lantern globes. This applies to C. B.; short and long; R. R.; and Crown or extra heavy. The increase is 10c per dozen. Fruit jar prices are advanced 50c per gross, the new schedules being as follows: Crown and Imperial Gem, wine measure, small, per gross, $12; medium, $12.50; and large, $15.50. The Crown in Imperial measure size are, respectively, $12.50; $13.50, and $17.50, while Perfect Seal prices are correspondingly, $13; $13.50, and $17.70 per gross.

Horse Clippers Up; Wrenches Reduced

Montreal.

CLIPPERS, WRENCHES.—Advances have been made for Newmarket horse clippers, which are now selling at $3 per pair, the former quotation being $2.85. Knife handle wrenches of W. & B. manufacture are reduced about 10 per cent., and it is expected that lower prices will be effective within a day or two on the common "regular" line of wrenches, the discount to be about 40 per cent. On the other hand, Westcott wrenches are advanced, the new list on 12 inch being up from $15 to $13 per dozen, and that for 14 in. from $21 to $24. The net prices are not now available.

No Complaint on Nails; Wire Active

Montreal.

WIRE AND NAILS.—Jobbers are getting good orders for rails from week to week in view of the fact that there is not a great deal of house building. Schools and other buildings are being erected here and there throughout the province, and in the aggregate quite a tonnage of nails is sold. Prices for

standard wire and cut nails remain at $4.75 per keg, base. The sale of wire has continued to be very active, fencing, poultry netting, lawn fencing and barb wire being big sellers. Standard galvanized smooth wire is still selling at $5 per 100 pounds.

Elbows and Pipes Down; Stoves Sell

Montreal.

STOVES AND WARES.—Not a great deal of interest has been transpiring in the stove markets excepting that bookings for fall are coming to hand well. There is likely to be a revision on stove pipes and elbows, and one firm has already made a slight change, quoting 7 inch pipe at $22.50 per 100 lengths, $21 for 6 inch, and $2.15 and $2 per dozen for light stove pipes in 7 inch and 6 inch respectively.

Gasoline Active; Coal Oil Held

Montreal.

OILS, GASOLINE.—A year ago at this time there was a very active and large business owing to war activity. This removed, the oil refiners are naturally not so busy as they were, and it is now a matter of taking on domestic business. This is seasonably good at the present time and a large gallonage of gasoline goes out at the unchanged price of 33c. Coal oil, too, is quite a seller at the range of 20c to 23c per gallon.

Jute is Higher; Cordage Holding

Montreal.

ROPE CORDAGE.—Advances of considerable extent have been made in the prices of soft fibres in United States markets, and the jute market is very strong. Advances may be made ere long for products of this nature. Hemp markets are unsettled somewhat, and the manufacturers do not anticipate declines on rope. There is an active demand now from the consumer for hay rope. Prices on pure manila hold still at 34c; British manila 30c, and sisal 27½c per pound.

Many Sheets Sold; Imports Arrived

Montreal.

SHEETS AND PLATES.—Firmness is characteristic of the market on galvanized sheets, and one importer feels that there may be a firming of the price basis. Considerable quantities of sheets from Great Britain have been coming through and there has been quite a large distribution. Jobbers report sales of three and four-ton quantities, and there is more activity than for some time.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 25	$6 25
12 gauge	5 30	6 30
14 gauge	5 35	6 35
16 gauge	5 45	6 50
18-20 gauge	6 00	6 35
22-24 gauge	6 05	6 40
26 gauge	6 10	6 50
28 gauge	6 40	7 00
GALVANIZED SHEETS—		
10¾ oz.	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Steel and Iron Keep Moving

Montreal.

STEEL AND IRON.—Jobbers report a satisfactory demand for these products and the market, generally speaking, is steady and rather firm, but without price change of any kind.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Active Scrap Market; Copper is Higher

Montreal.

OLD MATERIAL.—Heavy copper has materially firmed in price with new quotations 16c to 17c per pound. This follows the stronger feeling in the market for heavy new copper. There are no other price changes, but much firmness characterizes the markets, and there is a big sale for supplies taken from dismantled munition plants. The outlook for business is much improved, though buying prices are still low for securing supplies in the country through peddlers.

Dealers' Buying Prices—		
Pipe scrap, ton	7 00	8 00

FLASHES FROM THE WEEK'S MARKETS

The soaring prices of hides and leather have affected lace leather and cut laces and advances in these lines became effective this week.

* * *

Lead is showing considerable strength and a further advance of ten cents per hundred pounds has been made.

* * *

M.R.M. horse nails have been revised downward, the new prices for Nos. 5, 6, 7, 8, 9, and 10 being twenty-five cents lower than the old quotations.

* * *

Cold blast lantern globes and short globes have been advanced to slightly higher levels.

* * *

Quotations on spelter show an advance of half a cent a pound. The market for all ingot metals is very firm.

* * *

As a result of changes in freight rates between Montreal and Toronto white lead in oil and putty have been advanced five cents in Toronto. Pure putty is now quoted at $2.50 per 100 pounds instead of $2 as formerly.

* * *

An advance of one cent a pound has been made in sheet copper. All lines of copper goods are very firm and revisions to higher levels are expected on many of them.

* * *

All regular grades of machine oils, black oils, Imperial kerosene tractor oil, Capital cylinder oil, Standard gas engine oil and paraffine have been lowered owing to the removal of the war tax of 7½ per cent.

* * *

An advance of fifty cents per gross on fruit jars has been made in Montreal.

* * *

An exceptional business is reported by manufacturers of oil stoves, refrigerators and other summer lines. Many of them, owing to low production, are unable to fill orders promptly.

Solder wire (8 gauge)—		
40-60	....	0 35
45-55	....	0 37½
50-50	....	0 40¼
Zinc sheets, casks	....	0 17
Do., broken lots	....	0 18

Better Selling Tone; Spelter Goes to 9¼c

Montreal.

INGOT METALS.—The undertone is better on most ingot metals, and some nice business has been taken on. Aluminum is reduced 2c per pound, while spelter is higher, and copper is advanced 1 cent.

COPPER.—A 1 cent advance in this metal makes the market price 22 cents. There has been some good business recently.

TIN.—Much freer trading is now reported, and Straits tin is beginning to arrive on the market. There is more competition in the United States market and interest created is having a good effect on the market. Price 56 cents.

LEAD.—Quantities of lead have been disposed of, and the price remains without change at 7½ cents.

ANTIMONY.—No feature presents itself of unchanged interest, and the basis is still held at 9½ cents per pound.

ALUMINUM.—Two cents has been the reduction of the week on aluminum, which is in rather limited demand at 36 cents.

SPELTER.—An advance in this metal has been made to 9¼ cents per pound. There is a better movement, and the undertone is firm.

PIG IRON.—Notwithstanding the fact that no advance is made, the undertone of the market is very firm and the price remains at $48 per ton.

TORONTO MARKETS

TORONTO, June 26—As a result of the removal of the war tax under the proposed new tariff, lower prices become effective to-day on black oils, tractor, cylinder, gas engine oil, paraffine and the regular grades of machine oils. Reductions have also been made in iron washers and horse nails. As a result of the recent heavy advance in prices of hides and leather, quotations on lace leather and cut laces have been revised upward. While there has been price cutting in some quarters on iron and steel this has not been general and quotations are holding firm. Higher prices have been named on oak dash churns. In the scrap metal markets higher prices are looked for very shortly in lead, copper and brass. Lantern globes are also higher.

Business all over the country is reported as exceptionally good with a very heavy movement of all summer lines. Increased activity in building is reported with a steady demand for builders' hardware.

Lace, Leather and Cut Laces Advancing

Toronto.

LACE LEATHER, CUT LACES.—Steadily advancing prices of hides and leather are being reflected in higher quotations for lace leather and cut laces, with prospects for a very firm market. Lace leather, sides, are now selling at $1.95 per pound, and the same quotation is made on cut lace leather.

Higher Prices Named For Lantern Globes

Toronto.

LANTERN GLOBES.—Slightly higher quotations have gone into effect on lantern globes as follows: Cold Blast, in paper cartons, per dozen, $1.15; in three dozen lots, $1; Short globes, per dozen, $1.10, in three dozen lots $1.

Higher Quotations on Oak Dash Churns

Toronto.

OAK DASH CHURNS.—Prices of oak dash churns have been revised upwards, and the new quotations are as follows: No. 1, five gallon, $2.65 each; No. 2, seven gallon $3 each; No. 3, ten gallon $3 35 each.

M.R.M. Horse Nails Have Been Reduced

Toronto.

HORSE NAILS.—Prices of M. R. M. horse nails have been revised to lower levels, and the following quotations are now effective in boxes of 25 pounds each: No. 5, $4.75; No. 6, $4.50; No. 7, $4.25; No. 8, $4.25; No. 9, $4; No. 10, $4.

Iron Washers Have Been Revised Downward

Toronto.

IRON WASHERS.—Lower quotations have been named on iron washers, and per 100 pounds net prices are as follows: ¼ in. $16; 5-16 in. $14.20; ⅜ in. $13.40; 7-16 in. $12.50; ½ in. $11.80; 9-16 in. $11.40; ⅝ in. $11.30; 11-16 in. $11.20; 13-16 in. $11.10; 15-16 in. $11; 1 in. $11; 17-16 in. $11.

Steady Demand For Sheets and Plates

Toronto.

SHEETS, PLATES.—No changes have been made in prices on these lines and no immediate revision of quotations is expected. It is generally expected that the market will hold firmly. In the meantime a very fair volume of business is being handled. The range of quotations is as follows:

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$4 75	$5 45
12 gauge	4 80	5 50
14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	....	5 80
22-24 gauge	....	5 85
26 gauge	....	5 90
28 gauge	....	6 00
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$7 80	$8 10
U.S. 28	7 40	7 70
U.S. 26	7 10	7 40
22 and 24	6 95	7 25
18 and 20	6 80	7 10
16	6 65	6 95
12 and 14	6 50	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 8 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Splendid Business in Stoves and Wares

Toronto.

STOVES, WARES. — Business has been pouring in so fast that many of the manufacturers, owing to low production, are finding it difficult to get the goods with which to fill orders. Such lines as summer stoves, wares, and so on have been moving very rapidly. Prices are firm, and in some cases a revision to higher levels would occasion no surprise, especially in tinware and copper ware. Strikes and labor troubles in various parts of the Dominion are having an effect in holding back placing of orders for fall goods, but manufacturers declare that if these are settled within a reasonably short time there will not be enough stoves to meet the demands. Production has been below normal all season, and while considerable stock was carried over the outlook is for good business.

Iron and Steel Bars Are Holding Steady

Toronto.

IRON AND STEEL.—In many quarters it is expected that the signing of peace will have the effect of sending prices of iron and steel slightly higher. Certainly quotations will be no lower, those in the trade say. In the meantime there have been some cases of price cutting, but this has not affected business generally and quotations are holding firm as follows:

Common bar steel	4 25	4 50
Common bar iron	$4 25	$4 50
Refined iron	4 65	4 90
Angle base	4 50	4 75
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk steel	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel, No. 10	4 50	4 75
Do., No. 12	4 75	5 00
Spring steel	9 50	11 50

Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Lower Prices Named For Lubricating Oils

Toronto.

OILS, GASOLINE.—As a result of the removal of the war tax of 7½ per cent. under the new tariff, further reductions in the prices of oils are now in effect. The price changes include a reduction of 2½ cents in black oil (summer), of 2 cents in black oil (winter), 1 cent per gallon off Imperial kerosene tractor, 3 cents off Capital cylinder oil, 1½ cents off the regular grades of machine oil, 2½ cents off Standard gas engine oil, and 1 cent off paraffine. These reductions, together with those announced last week, are expected to hold for some time. A splendid volume of business is reported in all lines. Gasoline is quoted at 32 cents a gallon.

Boiler Tubes and Wrought Pipe Steady

Toronto.

WROUGHT IRON, BOILER TUBES.—Higher prices for wrought pipe are likely as a result of increased production costs. There has been a big demand and many of the stocks are getting low, in fact difficulty is being found in some cases in filling orders already. Prices are shown in the current market quotations. A very fair volume of business is being handled in boiler tubes in spite of the fact that labor troubles in various centres are interfering with trade. Prices are holding firmly as follows:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Lead and Solder Are Holding Firmly

Toronto.

LEAD, ZINC PRODUCTS.—While no changes are noted this week in quotations, the outlook is for a very firm market, and a good volume of business is being handled. The range of prices is as follows:

Lead pipe, lb.	....	$0 11½
Lead waste pipe, lb.	....	0 12½
Lead traps and bends	....	15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 11	0 12½
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 33	$0 37
Solder, strictly, lb.	0 31	0 35
Solder, commercial, lb.	0 28	0 31
Solder, wiping, lb.	0 27½	0 30
Solder, wire, lb.	0 34	0 40
Zinc sheets, per lb.	....	0 17

Sheet Copper is Up One Cent a Pound

Toronto.

SHEET COPPER. — Sheet copper prices have advanced a cent a pound, and with a very firm market it is not unlikely to go even higher. The move to higher levels centres around the increase of the duty under the new tariff, which will sooner or later affect all lines of copper. There has been a steady demand.

Corrugated Sheets Show No Changes

Toronto.

CORRUGATED SHEETS.—With a good volume of business offering, prices are holding steady. Manufacturers are looking for the signing of peace to stabilize conditions and increase the demand for these goods. There has been a steady demand for eavestrough, conductor pipe and similar lines. Prices in these goods are steady. The range of quotations on corrugated sheets is as follows:

Corrugated Sheets—	Per 100 sq. ft. Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Firmer Market For Scrap Copper, Lead

Toronto.

OLD MATERIALS.—Firmer prices for scrap lead, copper and brass are expected. There has been a steady improvement recently in the situation as far as lead and the yellow metals are concerned. Rubber remains weak, with no immediate prospect of advances. Quotations are as follows:

Dealers' Buying Prices—		
Tea lead	....	0 03
Heavy lead pipe	....	0 04
Pipe scrap	....	8 00
Stove plate, per ton	....	10 00
No. 2 busheling	....	8 00
Yellow Brass	....	0 07
Red Brass	....	0 10
Light Brass	....	0 05½
Scrap zinc	....	0 04½
Heavy copper	....	0 15
Wrought iron, No. 1, per gr. ton	....	15 00
No. 1 machinery cast	....	14 00
Heavy melting steel	....	9 00
Old rubbers, boots and shoes	0 06	0 06¼
Overshoes, lumbermen's rubber boots	....	0 04½
Bicycle tires	....	0 04½
Automobile tires	0 03½	0 04

—Briggs in Chicago "Tribune."

WHEN A FELLER NEEDS A FRIEND

When your father takes you to the circus, and, just as you get to the entrance and you hear the band playing for the grand opening pageant, father meets an old-time friend.

Prices of Nails and Wire Remaining Firm

Toronto.

NAILS, WIRE.—As the building season gets under way a steady improvement is noted in the demand for nails and this is expected to increase. Prices show no change, wire nails selling at a base of $4.70 per hundred pounds, and cut nails at $4.75.

A fair volume of business is being handled in wire. Prices show no change.

Very Firm Markets For All Ingot Metals

Toronto.

INGOT METALS. — Very firm markets for all ingot metals are reported with indications that prices in some lines are likely to show advances. Lead, which advanced last week, took another slight jump this week and quotations are 10c per hundred higher. Spelter has advanced half a cent. Tin is unchanged and antimony is holding firm. Copper is very firm.

COPPER.—There has been a steady demand for copper and the market is holding firmly. Quotations are in the vicinity of 18½c per lb.

TIN.—With a fair volume of business offering supplies are coming in in sufficient quantity to more than meet all demands. Quotations are unchanged at 58c per lb.

SPELTER.—An advance of half a cent per lb. has been made in spelter. Only a fair volume of business is offering. Quotations now are 8½c per lb.

LEAD.—Owing to tariff changes lead is showing considerable strength and a further advance of ten cents per hundred was made this week. Prospects are for a firm market.

ANTIMONY. — No change has been made in antimony prices. A fair demand is reported and quotations range around nine cents.

ALUMINUM. — Prices are holding firm at forty to forty-two cents. Only a fair volume of business is being handled.

LONDON MARKETS

LONDON, June 26—Agricultural wrenches and knife handle machinists' wrenches have been revised and lower prices are now in effect. Plated flatware shows an advance of five per cent. Business in London and surrounding district continues good. Summer goods trade is still in full swing. Many lines are scarce, but on the whole the trade is very well supplied. There has been a big demand for insecticides, owing to the ravages of pests, particularly potato bugs. Harvest tools are moving well and there is a steadily increasing demand for builders' hardware.

Nails in Demand as Building Increases

London, Ont.

NAILS.—There is an increasing demand for builders' hardware, such as locks, butts, building papers, asbestos paper, sash weights, sash card, nails, etc. Prices remain firm as follows: Nails: wire, $4.70 base; cut, $4.75 base.

Asbestos paper is selling locally at $13.50 per 100 lbs.

Brisk Demand For Spraying Materials

London, Ont.

SPRAYING MATERIALS. — There has been an unusual demand for spraying materials. Prices are as follows:

Paris Green—½ lb. pkgs., 54c lb.; 1 lb. pkgs., 52c lb.; 25-lb. drums, 50c lb.; 50-lb. drums, 49c lb.; 100-lb. drums, 49c lb.; 250-lb. kegs, 48½c lb.; 600-lb. barrels, 48c lb.

Dry Arsenate of Lead—½ lb., 43¾c lb.; 1 lb., 39¾c; 5 lbs., 36¼c lb.; 25 lbs., 35¼c lb.; 50 lbs., 34¼c lb.

Sprayers—Sturdy Compressed Air, $6.15 each; Brown's No. 1, compressed air, $7.00 each; Eureka No. 110, compressed air, $7.50 each; tin well, No. 112, $5.50 dozen; glass jar, No. 113, $8.00 dozen.

Dry Paris Green blowers and bellows, $9.00 doz.

Bug Finish—Big sale—Barrels, $8.25 each; 5-lb. pkgs., $5.50 case of 20 packages; 1-lb. pkgs., $6.70 case of 80 1-lb. packages.

Agricultural Wrenches Are a Little Lower

London, Ont.

WRENCHES.—Agricultural wrenches are a little lower. The new prices are as follows:

6 in., $6.25; 8 in., $7.50; 10 in., $8.75; 12 in., $11.25; 15 in., $15.

Knife handle machinist wrenches are also down, the quotations being:

6 in., $11.25; 8 in., $13.50; 10 in., $15.80; 12 in., $20.25; 15 in., $27; 18 in., $36.

Brisk Demand For Fly Oil For Cattle

London, Ont.

FLY OIL.—Big sales of fly oil for cattle are being made. Quotations are as follows: Dr. Williams, ½ gal. cans, $8 doz.; 1 gal. cans, $12 doz.; Crenoid, ½ gals., $7.75 doz.; 1 gals., $11 doz.

Plated Flatware Advances 5 Per Cent.

London, Ont.

PLATED FLATWARE. — Prices of 1847 plated flatware have been advanced 5 per cent., the new discount being 30 10 per cent., instead of the old figure of 40 per cent. Net prices on some of the best sellers are:

Tea spoons, $4.10 dozen; dessert spoons, $7.31 dozen; table spoons, $8.20 dozen; coffee spoons, plain, $4.10 dozen; dessert forks, $7.31 dozen; medium forks, $8.20 dozen; cold meat forks, plain, $1.00 each; berry spoons, plain, $1.58 each; sugar shells, plain, 74c each; pickle forks, 74c each; butter knives, 84c each.

Scythes Sell Well; Snaths in Demand

London, Ont.

SCYTHES, SNATHS. — There is a steady demand for scythes, also for snaths. Prices are as follows:

SCYTHES.—Cast steel, $15; Clipper, $16; Little Giant, $17.

SNATHS.—Patent No. 1, $13.20; No. 2, $12.65; No. 3, $11.55.

Carborundum files, No. 57, are selling at $10.20 per doz.

Ice Cream Dishers Are in Brisk Demand

London, Ont.

ICE CREAM DISHERS.—The hot spell has created a steady demand for ice cream dishers. Prices are as follows: Gilchrist, 16 to qt., 20 to qt., 24 to qt., 40 to qt., $2.10 each.

Harvest Tools Are Selling Readily

London, Ont.

HARVEST TOOLS, ROPE.—Dealers are finding a ready sale for harvest tools, and with prospects bright for a banner harvest, business is expected to be very brisk. Quotations are at 17½ per cent. off list.

ROPE.—Prices are firm. The volume of business is increasing with harvest season near. Prices are as follows:

Pure manila, 34c lb. base; British manila, 30c; New Zealand hemp, 30c; sisal, 27½c.

Electric Fans, Toasters and Washers Brisk

London, Ont.

ELECTRICAL GOODS.—There has been a splendid trade in electrical fans, toasters, irons and washers. Prices are as follows:

Canadian Beauty—Electric iron, new style, $4.50 each. Upright electric toaster, $4.50 each.

Polar Cub Fans—6 in., $6.25 each; 9 in., $9.00 each.

Washing machines show no change from 30/10% off list. Kribs' Electric are quoted at $75.00 each net.

Linseed Oil is Holding Firmly

London, Ont.

LINSEED OIL.—With a good volume of business offering and prospects for a continued demand linseed oil prices are holding firmly. Quotations are as follows: 1 to 2 bbls., raw, $2.45 gal., boiled, $2.48; 3 to 5 bbls., raw, $2.44, boiled, $2.47; 6 to 9 bbls., raw, $2.42, boiled, $2.45, less bbls. add 10c gal.

No Changes Shown in White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—Prices are steady with an increasing volume of business noted. Quotations are as follows: pure, tons, $16.30 per 100 lbs., less tons, $16.65; pure Elephant, tons, $16.90, less tons, $17.25.

Prepared Paints Go to Higher Levels

London, Ont.

PREPARED PAINTS.—Exceptionally good sales of prepared paints are general. The new prices, which show an increase of 25c per gal. on all lines except flat wall and barn paints, will go into effect at once, it is expected.

PUTTY.—Prices remain firm as follows: Standard, 100 lb. drums, $6.75 per 100 lbs.; 25 lb. drums, $7; Pure, 100 lb. drums, $8.75; 25 lb. drums, $9.

Higher Prices Are Named For Turpentine

London, Ont.

TURPENTINE. — Higher quotations for turpentine are as follows: bbl. lots, $1.70 Imp. gal.; 2 to 4 bbl. lots, $1.69 Imp. gal.; 5 gal. lots, $1.80 Imp. gal.

WINNIPEG MARKETS

WINNIPEG, June 26—Price changes on the local market have again been numerous during the week, in which declines are again predominant and include such lines as Stillson and Trimo pipe wrenches and parts, wood screws, Nicholson files, Heller's horse rasps, cotter pins and wagon hardware. Among the lines to advance appears turpentine, linseed oil and chisels.

Business is gradually working back to a normal basis again, but the addition of the switchmen to those already on strike has held up shipments for a few days until the railways can reorganize their staffs to take care of those on strike and expect to be able to accept all shipments in the next few days.

Higher Prices For Socket Firmer Chisels

Winnipeg.

SOCKET FIRMER CHISELS.—Increased cost of production is the leading factor in the advanced prices on Gilmour's socket firmer chisels which advanced during the week to 55 per cent. off the list, making net prices as follows:

Socket firmer chisels: 1-4 in., $6.25; 5-16 in., $6.25; 3-8 in., $6.25; 7-16 in., $6.70; 1-2 in., $6.70; 5-8 in., $7.15; 3-4 in., $7.15; 7-8, $7.60; 1 in., $8.05; 1 1-4 in., $8.50; 1 1-2 in., $8.95; 2 in., $9.85 doz.

Reduction is Made In Stillson Wrenches

Winnipeg.

STILLSON WRENCHES. — Revised factory prices on Stillson wrenches and parts show a further reduction of approximately 5 per cent. below former quotations based on reductions in raw material. To-day's ruling discount on wrenches is 52½ per cent. off list, and parts 47½ per cent. off list. Net prices on the various sizes are as follows:

Stillson Pipe Wrenches.—6 in., 95c each; 8 in., $1.10; 1 0in., $1.20; 14 in., $1.65; 18 in., $2.40; 24 in., $3.45; 36 in., $6.40.

Extra Jaws—6 in., 40c; 8 in., 42c; 10 in., 45c; 14 in., 60c; 18 in., 91c; 24 in., $1.18; 36 in., $2.28.

Extra Nuts—6 in., 6c; 8 in., 8c; 10 in., 10c; 14 in., 16c; 18 in., 18c; 24 in., 29c; 36 in., 37c.

Extra Frames—6 in., 20c; 8 in., 22c; 10 in., 26c; 14 in., 31c; 14 in., 31c; 18 in., 39c; 24 in., 50c; 36 in., 89c.

Decline Registered on Trimo Pipe Wrenches

Winnipeg.

PIPE WRENCHES. — Trimo pipe wrenches and parts are also revised to lower levels following the decline on Stillson wrenches. To-day's discounts are as follows: Wrenches, 45 per cent., and parts, 40 per cent. Net prices are as follows:

Trimo Pipe Wrenches—8 in., $1.25 each; 10 in., $1.38 ;14 in., $1.95; 18 in., $2.75; 24 in., $4.

Movable Jaws—14 in., 70c; 18 in., $1.05; 24 in., $1.35.

Extra Nuts—14 in., 18c; 18 in., 21c; 24 in., 33c.

Extra Frames—14 in., 36c; 18 inch, 45c; 24 in., 57c.

Slight Reduction In Nicholson Files

Winnipeg.

NICHOLSON FILES.—A slight decline is recorded during the week on Genuine Nicholson files, this being the first change on this line in the past year. To-day's ruling discount is 25 per cent. off the standard list.

Wood Screws Are Down 10 Per Cent.

Winnipeg.

WOOD SCREWS.—Based on lower factory quotations on wood screws. The Winnipeg markets show a decline of 10 per cent. during the week, and are now selling on the following basis:

Flat head bright screws, 72½ per cent. off list.

Round head bright screws, 70 per cent. off list.

Oval head bright screws, 70 per cent. off list.

Flat head brass screws, 50 per cent. off list.

Round head brass screws, 47½ per cent. off list.

Lower Prices Named For Heller's Horse Rasps

Winnipeg.

HORSE RASPS.—Heller's horse rasps have been reduced to lower levels following the reduction in the United States, new prices just issued being as follows:

Heller's horse rasps: Chain, 14 in., $7.10; 15 in., $8.35 doz. Tanged, 14 in., $9.25; 15 in., $10.90 doz.

Horse tooth rasps, No. 1, $10.15; No. 2, $14.25; No. 4, $16.25 doz.

Extra floats for same, No. 7, $2.45 doz.

Ten Per Cent. Drop in Price of Cotter Pins

Winnipeg.

COTTER PINS.—Prices on cotter pins show a decline during the week of approximately 10 per cent. and are now selling in packages of 1,000 at 85 per cent. off the list and for packages of 100 at 85 per cent. off. Plus 10c per 1,000. Net prices on the various sizes are as follows:

	¾"	1"	1¼"	1½"	1¾"	2"	2½"
3-32 x ...	...	.82	.92	1.02	...	...	...
1-8 x ...	...	1.10	1.25	1.35	...	...	...
5132 x ...	...	1.50	1.65	1.85	...	...	..
3-16 x ...	1.75	2.00	2.30	2.55	2.80	3.05	3.55
1-4 x ...	...	3.10	...	4.15	4.70	5.20	6.25

Per M.

Linseed Oil And Turpentine Advance

Winnipeg.

LINSEED OIL, TURPENTINE. — With the price of flax seed around $5.50 per bushel, linseed oil continues to soar in price, having advanced 10c per gallon in the past week, making a total advance of 47c per gallon in the last month and is now selling at the following prices:

Raw linseed oil, $2.40 gal.; boiled linseed oil, $2.43 gal.

Turpentine is also advancing rapidly in price, rising another 5c per gallon during the week, and reports would indicate still higher prices in the near future. To-day's market price is given herewith: Barrel lots, $1.65 gal.; ½ barrel lots, $1.68; 5 gal. lots, $1.70 gal.; 1 gal lots, $1.70 gal., plus the usual extras for containers

Wagon Hardware Goes to Lower Levels

Winnipeg.

WAGON HARDWARE. — Lower prices were announced during the week on a number of lines of wagon hardware, the decline being in the neighborhood of 10 per cent. based on new lists just issued by the manufacturers. Net prices now prevailing on a few of the more familiar lines are given below:

Centre clips and rings: 3520 A, $3.45; 3520 B, $2.30; 3520 C, $2.15 doz.

Neckyoke centre irons: 3600 A, $3.75.

Whiffletree hooks: 3550 C, $1.65; D, $1.90; E, $2.20; F, $2.35 doz; 3555 C, $1.90; D, $2.25; E, $2.40; F, $2.80.

Neckyoke end irons: 3605 B, $1.40; D, $1.85; F, $2.05.

PITTSBURGH MARKETS

PITTSBURGH, Pa., June 26.—On the whole there has been a further improvement in the demand for finished steel products. The indication is that buyers want more material for current consumption rather than being desirous of covering ahead. This gives the market a strong position as the demand does not rest upon mere "confidence" in the future, so much spoken of, but rather upon the actual current consumption of steel being larger.

In one line, however, the heavy buying of the past few weeks has resulted in the purchases being for forward deliveries even though the buyers would prefer early deliveries. That line is "oil country goods" and particularly the larger sizes of lap weld pipe. Several of the mills have fallen behind in deliveries and have to enter their customers' orders as for forward delivery when prompt delivery would be preferred. One large interest has such an accumulation of orders that its lap weld departments would be kept busy to the end of the year even if there were a considerable falling off in the rate of buying, while such falling off is not expected.

In sheets there is a little banking up of orders and deliveries of some classes of sheets are deferred. The mills could meet this situation by operating at heavier rates as the average sheet mill operations are now about 70 per cent., but they do not wish to do this, since, if the market follows precedents, there will be a slackening in demand for July and August, and it is well to have a reserve of orders and maintain a uniform pace.

Wire products show a demand that is altogether satisfactory to the mills, and is larger than some mills counted upon. One large independent interest, for instance, figured on a certain demand through the summer and concluded it could spare one of its two-rod mills for a rebuilding operation. It now finds itself crowded to get out its orders with the other rod mill.

In bars, plates and tin plates, there is no material improvement in demand. The plate demand is far below capacity, which was increased so much during the war, and it is doubtful whether plate mills as a whole are operating at anything like a 50 per cent. of capacity.

Structural Demand

Starting with practically nothing a

few months ago there has been a progressive improvement in building operations involving skeleton steel structure and in bridges. The activity in new construction of this general class is still very light compared with the activity in ordinary everyday consumption of steel, but it is on the increase. The fabricated steel jobs being let are all small, with an occasional exception, but as reported for some time past a large amount of work has been designed and figured upon, so that when investors are ready to give the word there will be little delay in starting the actual work and specifying the shapes for the mills to roll.

The reports of the Bridge Builders' and Structural Society show that up to date, the amount of fabricated steel work placed is light, but also that there has been a constant, and of late, a rapid increase in the volume of business. These reports show, in fabricated steel jobs let relative to the capacity of the fabricating shops, the following: January, 12 per cent.; February, 12½ per cent.; March, 17 per cent.; April, 24½ per cent.; May, 49 per cent. The doubling from April to May is particularly significant.

Pig Iron Irregular

There are many irregularities in the pig iron market but they are ascribable in large part to the fact that the pig iron market started out on a false basis, there being simply horizontal reductions of $3 a ton in December and $4.25 a ton effective March 21, the latter being the reduction recommended by the Industrial Board, afterwards defunct. This left it that the March 21 prices were based upon the basings adopted for the war control. That was necessary in the circumstances but it was not the logical structure or the structure the market had maintained prior to the war, when prices were reached through competition. Pig iron f.o.b. Birmingham furnaces, for instance, should not be as high as f.o.b. Chicago or valley furnaces. Again, the war control allowed eastern Pennsylvania furnaces to base prices at Pittsburgh, while Buffalo had to take the same price f.o.b. furnace. Accordingly, Birmingham prices declined while the eastern Pennsylvania furnaces had to get on an f.o.b. furnace basis, which involved a decline. It might be supposed that Buffalo would have been able to maintain the price, but such was not the case as Buffalo furnaces have lately sold at $25.50 to $26 at furnace, No. 2 foundry with silicon 1.75 to 2.25 per cent., on which the Industrial Board price was $26.75, furnace, a price which the valley furnaces are still making an effort to maintain. On silicon, 2.25 to 2.75 per cent., on which the War Industries Board allowed an extra of $1.25, differentials of 50c to $1 are now more common.

The pig iron markets cannot be quoted closely for the reason that in many cases the furnaces will quote f.o.b. furnace price for iron to go out of the district rather than to customers in their own districts. They are doing what in International trade is called "dumping," and there is greater competition between districts than usually obtains.

Generally speaking, however, pig iron has declined very little, and there is not much prospect of its declining in future. This does not mean that it is going to advance shortly, though there are some predictions along that line. Pig iron is always sluggish about starting advances, though it sometimes moves fast once it gets going. When there is a large number of idle furnaces, as at present, prospects of better demand tends to bring the furnaces in. They expect higher prices but they are willing to sell a limited tonnage as "backlog" at current prices, or even at cut prices. This occurred in the first half of 1915, when pig iron demand continually increased, but as one furnace after another came in it acted as a drag on the market. Furnaces would not cut prices much, however, as they could not afford to do so. No furnace would take orders at a loss just for the sake of getting into operation again.

Connellsville Coke

This is the usual period for semi-annual contracts for Connellsville furnace coke. A few weeks ago there was talk of flat prices for the half year but coke operators wanted considerably more than furnaces would pay, and as the operators expected pig iron to advance and furnaces were not so sure about that, there was little difficulty in arranging sliding scale contracts, the price of coke delivered each month being fixed by the prevailing price of pig iron. These ratio contracts are practically all on the basis of 6¼ to 1, i.e., if basic pig iron is $25, valley, which is about the market now, the coke will be billed at $4 per net ton at ovens. Every change of 25c in pig iron would mean a change of 4c in the billing price of coke. Foundry coke has sold rather freely for second half at $5 to $5.50, depending on grade.

REVIVAL OF GLASS INDUSTRY IN ENGLAND

Strong efforts are being made to revive the glass industry of Great Britain and licenses for imports of glass are being issued with great care, the quantities being limited to one twenty-sixth part of the 1916 supply. To firms using glass as raw material for other trades, however, licenses are being freely issued. The great difficulty confronting glass manufacturers is naturally the high prices of ingredients. Pearl ash, which gives the brilliancy and ring to glass, is now £200 (about $1,000) a ton, compared with £35 ($170) in 1914; and the same proportionate advance applies to other materials. Machinery, which is playing a great part in the revival of this trade, has also increased in price by something like 200 per cent.

The entire time of English factories is occupied in making glass for the home trade, and they are said to have orders in hand for the next 12 months. Manufacturers are concentrating on certain articles, such as bulbs, which formerly came from Germany and Austria. Two thousand five hundred blowers and thousands of women are said to be employed on this work alone in Walthamstow, Birmingham, and other centres of the glass industry.

WHO IS BLIND?

Will every person who reads this notice, and knows a blind man or woman anywhere in Canada, kindly send the name and address of that blind one to the Canadian National Institute for the Blind, 36 King Street East, Toronto.

The Institute is conducting work for the blind along the most modern scientific lines, and desires that each blind resident of Canada should have the opportunity of availing himself or herself of the benefits represented by this work.

The immense task of registering every case of blindness can only be accomplished successfully by the earnest co-operation of the public generally. That is why we ask you to send the names and addresses of blind people you may know.

The following departments of work are being actively prosecuted by the Institute:

Industrial department for men.

Industrial department for women.

Department of field work.

Department of home teaching.

Department of prevention of blindness.

Library department.

Department of after care.

Residence and vocational training centre for blinded soldiers.

To send information or to obtain information address the general secretary, Canadian National Institution for the Blind, 36 King Street East, Toronto.

TRUSTS CONTROL TRADE

LONDON, England.—Business rings, combinations and trusts, perfected during the war, are controlling Great Britain's industries, according to the findings of a Government committee appointed by Sir Auckland Geddes, Minister of Reconstruction. The report, which is to be made public soon, was submitted to Sir Auckland and is now under consideration by the Government. The committee does not suggest what the Government's attitude toward trusts should be, the only proposal made in the report for dealing with the situation being that the Board of Trade should set up a tribunal to investigate cases of abuse caused by combinations and report to the president of that body.

How to deal with huge trade combinations is one of the big problems of the near future, it is said, in Government circles. Almost every big industry in the country, with the exception of shipbuilding, is said to be controlled by a combination.

Women Are Big Buyers of Paint

Jimmy, the Truck Driver, Keeps His Eyes and Ears Open While Making Deliveries, and Finds Out a Lot of Useful Pointers Which He Later Turns to Advantage in the Sale of Paints

"IF the boss 'ud only lay off his front door manners and get wise to some of the back door lingo I get from his women customers, he sure would get an earful," muttered Jimmy, the truck driver for the Swanson Hardware Co.

This conclusion punctuates only the middle of the story we are relating on Jimmy's behalf regarding his experience in the paint business.

To some paint men the story will be worth while; so we shall begin at the beginning of the soliloquy Jimmy held with himself in the garage while cleaning up his engine.

But first, a warning: Most paint men do not need to read it. Others, again, need it badly. Since it is about women and paint, those who do not need to read it, and those who do may get a tip on the feminine viewpoint that will lead to better service in their paint departments.

Here is the most of what was overheard as Jimmy plied the monkey wrench and wiping rag:

Spoiling Business

"Gee! I wonder when the boss is goin' to get his wires uncrossed and stop short-circuitin' business with the women folks?"

"I'm gettin' paid for deliverin' his goods, but I'm not drawin' down nothin' for takin' back a whole load of back talk and women's gab about the way he's treatin' them."

"This here makin' me a muffler for back-firin' complaints 's beginnin' to get my goat."

"If I had a wad o' dough, I'd set up shop next door to him in the paint business and bank on makin' money by doin' what the boss don't do for the women folks' business."

"Take it from me, boy, you've got ter put on a little fixin's to get 'em, but when you get 'em coming your way they sure do come."

"Runnin' a business crossways of what the women fancies is like tryin' to trot this old bus around on a hard tire, instead of on an oversize, under eighty pounds of pressure—you're bound to get your bumps."

The Final Judge

"There ain't hardly a thing I totes up to the back door but what the woman's had somethin' to say about gettin' it. If her royal highness says it's O.K., why it is; but if she puts down her foot and gives it the stony stare, you might as well cart it back, Jimmy, with a lot of abuse to boot. I ain't the boss, but I get a lot of tongue lashin' the boss ought to get for lettin' it out of the shop."

"As soon as the boss gets through makin' bone-head plays as to who's the payin' teller in most of the nuptial corporations I know of, the sooner he'll be on Easy street."

"It's alright to be a pullin' strings with the main gazaboes up in the lodge, or the town council, but me for gettin' next to the hand that rocks the boat at home and looks to shellin' out the simoleons for makin' her home what she wants it to be."

Spends the Money

"Most guys work from sun to sun alright, alright, providin' cash for the party of the second part, whose work's never done till it's spent pretty much as she wants it spent."

"I ain't never been no merchandiser, still I've got my own ideas as to how a store ought to be run to meet the women's notions of where to spend her hubby's hard earned."

"Storekeepin' ain't no longer the business it used to be. When the boss gets through with the notion that the store's the place for settlin' arm-chair politics and discussin' baseball, or prize fights, and makes it a place the women 'll be glad to come into, the sooner he'll be makin' the cash register earn its keep."

"Women's got their fancies to a fare ye well, and don't I know it from the back-door con they shoot at me when things ain't right."

"The feller that plays up his store to them fancies get their business; but the feller that don't don't, and misses whole wads of perfectly good coin that's just naturally bound to wander off somewhere's else."

"Take the boss's paint business. Gosh, if I steered old Buzzy Izzy here the same's some of those store chaps steer the women about paints and how to use 'em, we'd a been ditched long ago."

Gets the Kicks

"I've been a long time gettin' next to why I'm wise to more of all the paint tricks than all the guys in the store. Guess it's cause I'm the first one comes handy and knows more back-door confidences 'bout the boss and his store than all the rest."

"But I sure am learnin' what not to do about sellin'

"Save the surface and you save all" *Paint & Varnish*

SANI-FLAT

A SANITARY FLAT OIL PAINT

FOR ALL INTERIOR PAINTING

Produces the Ideal Soft Velvet Finish

For walls, ceilings, woodwork and other INTERIOR decoration where a durable, non-fading flat paint is needed, there is none "just as good" as SANI-FLAT.

It is easy to apply, has remarkable covering and hiding qualities, and does not show lap or brush marks. It can be cleaned with soap and water without injury.

White Sani-Flat makes a perfect undercoating for enamel.

Made in White and twenty beautiful shades

Offers Prizes for Best Painted Houses

Canora, Sask., Hardware Merchant Stimulates Local Pride by Offer of First and Second Prizes to Best Painted House in Town and District—Details of the Plan—Working Out Successfully—Sends Out Monthly Pamphlet to Selected Mailing List

D. HALL SUTHERLAND

A UNIQUE method of creating a demand for house paint in a small town, while at the same time doing an excellent service for the community, has been instituted by D. Hall Sutherland, an enterprising hardware merchant of Canora, Sask.

In a large display advertisement in the weekly newspaper of his town he makes the announcement that he will give $50 in prizes for the best painted houses in the town and district, with the proviso that the paint used has been purchased at his store. Of this amount $30 is to go to the winner, and a second prize of $20 to what is adjudged the second best job.

The result in the first week was a rush of inquiries, and some orders. Mr. Sutherland states that a genuine interest has been started in a paint-up campaign, and he believes that the inevitable result will follow, that where one cottage or dwelling house is made to look like new with bright colors, the adjoining homes will be made to appear so shabby in contrast that the neighbors will soon enter the competition. Canora has a population of 1,200.

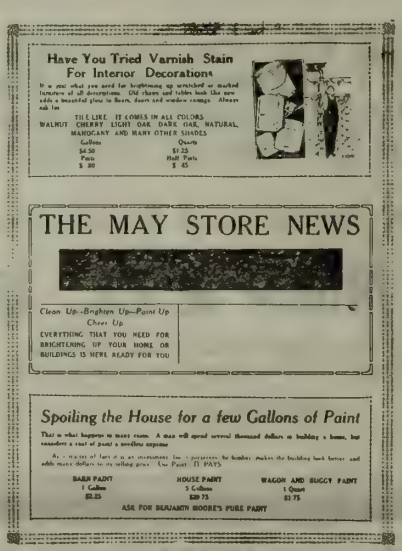
Mr. Sutherland has been in business in Canora since 1904, and in addition to the ordinary run of hardware, handles phonographs, auto accessories, beds, mattresses, rugs, trunks, suit cases and handbags. He has had excellent results in the sale of phonographs, and states that his sales of records is very extensive each month. He takes the monthly service of the company whom he represents. He is also the agent for a line of motor cars, but only disposed of ten this spring for the reason that he cannot secure deliveries from the factory.

Mr. Sutherland is a shareholder in a co-operative wholesale concern controlled by retail hardware men. Each month they send to him for distribution among his customers a four-page pamphlet measuring 8 by 10 inches, and printed in two colors, usually red and black. The service costs $12 a month, and over 200 copies are distributed to a selected mailing list in the Canora district. The May number of this pamphlet bears the inscription: "The May Store News, D. Hall Sutherland, Canora, Saskatchewan —where quality is high and prices low." The pamphlet is illustrated throughout with hardware cuts, and on pages two and three of each issue are store talks that are exceptionally well done, with a power to create good will and draw trade.

Here is one of these store talks:

"Our motto, small profits and quick returns. Our whole business is operated on that policy—we believe it is much more satisfactory to have a large circle of satisfied customers who are putting most of their business through us than it is to have few customers who are paying big prices for their needs. Some stores we know believe that the only way to carry on is to get the utmost profit out of every sale.

"Not here, though.



"Every effort is devoted to one end, and it is pleasing our customers.

"Even in buying we have this in view, for we are dealing with a wholesale house that is operating on a new system and so reducing the expense of doing business. Thus we pay less than most hardware stores pay for goods and are able to sell for a smaller price. This is good business and you get the benefit in every way. It will pay then to let us figure on your orders. If we cannot meet the price you could get elsewhere, well and good, but so confident are we that our prices are absolutely right, and the quality of all the goods advertised is as good as the best, and a little bit better than most, that we know in advance we shall get your business.

"Come in and let us talk it over."

BRITISH AMERICA PAINT CO.

VICTORIA VANCOUVER CALGARY EDMONTON REGINA

paint to women and with what ole Pap Williams, the painter, puts me wise to I'll soon be the boss's travelin' paint adviser, as well as his truck driver."

"If you ever go into the paint business, Jimmy, me boy, there's one thing that ye can count on for certain: You can give the women a vote and you can put 'em into Parliament, and can make them the tail that wags the dog in general, but they'll just stand for neglect and shabbiness about their homes for just so long and no longer."

"If the old man's purse ain't long enough to root things out when they're 'bout done for and buy new ones, they'll shift about somehow till they gets things fixed up so's they'll be neat and usable."

"And when a woman gets them notions in her head she sure can use a paint brush."

Starting Something

"When you get a woman noseying around the house with her apron and dust cap on and a pot of paint in her hands, you can lay to it that there's goin' to be somethin' doin' in fussin' up the things that's beginnin' to show wear and tear."

"An' what she won't tackle when she's feelin' that way isn't listed yet."

"The paint fellow that plays to them notions right is the fellow that can count on paint business the whole year round."

"There ain't no off seasons for things wearin' out and there ain't no off seasons for women seein' 'em that way and takin' the notion to fix 'em up."

"Spring, summer, fall, before Christmas and after I've rustled 'em to the back door all smeared up with paint when I've been deliverin' goods."

"Most average women ain't got the choice of runnin' away for their health and leavin' someone else to fix up the knick knacks about the house. They've got a steady, all-year-round job of livin' in their homes and keeping 'em up to scratch. That's where the little cans of paints and varnishes and enamels count, and judgin' by the number I truck around it must amount to some business."

"Judging' by deliveries, a fellow can't count much on sellin' the big sizes 'cept in the spring and fall, but seein' as what I sees every day through the back door he can figger on a sight bigger business with the little fellers if he'd set out to follow women's ideas of things."

"An' don't ever run away with the idea that women just want to slap on paint for the sake of slappin' it on. Most of 'em never counted on slingin' the brush the day the old man walked 'em up to the altar. But when they find they've got to come to it, they're all fired willin' to learn. Just as I've been sayin', there's limits to their domestic science that makes 'em look up a pot of paint to keep things passable."

"'Taint my idea neither that the boss should take such women's money without passin' out some advice 'bout how to use it."

"A feller can get his store good and friendly with women folks when they tumble that he's givin' somethin' that'll help 'em out of their troubles. Paint's mighty helpful to women in keepin' things slicked up."

"When women set their teeth and make up their minds to paint, paintin' they're goin' to do and nothin' will stop them, but the trouble is the boss don't seem to savee them notions and lots o' women don't just savee exactly what's the right stuff to use. They're willin' enough—and when they've got those willin' notions, they ain't nothin' irresistable or unmovin' that's goin' to stop 'em."

"It's the steerin' of them right that gets 'em into that satisfactory comeback notion of keepin' up their spendin' their money at the same store."

"The boss don't think I got any notions about runnin' anything 'cept this old rattler. But runnin' it I got some notions of runnin' a paint business into my block, an' some day I'll be puttin' a steerin' gear onto them and go to it. They ain't boiled shirt ideas either; they've been rapped into my little, old bean via the back-door route of women's gab."

"Yes sir, Jimmy, old kid, I'll tell the world some day you're goin' to have a business o' your own, or be boss of the boss's shop, and then you can set your carbuetor to shoot them ideas so as you can put a little more pep into the little, old game of gatherin' the coin."

Are Big Buyers

"And you can lay to it that I ain't goin' to overlook the women, whether it's sellin' paint, door knobs, or fly swatters."

Let it be said that this is only one of Jimmy's soliloquies out of many, dwelling on the business lessons learned through delivering goods. Neither his eyes or mind were asleep in observing the shortcomings of his store and the opportunities that might be developed. The particular conversation given happened to dwell particularly on the possibilities of more paint business with women.

Jimmy was gifted with an ambition that could not be denied. Though, as yet only a truck driver, he made use of every available opportunity and stored up many observations that afterwards became useful in his brilliant business career.

Briefly, we will follow that career by stating that an opportunity presented itself whereby he was permitted to enter the store. To the credit of the boss whom he criticized so freely, he quickly recognized the latent talent and ambition of the boy and it was not long before he was placed in charge of a department; and it so happened to be the paint department.

To-day Jimmy is headed straight for a partnership and while we have no claims in the power of prophecy, it is safe betting that Jimmy's business career will go much beyond even that.

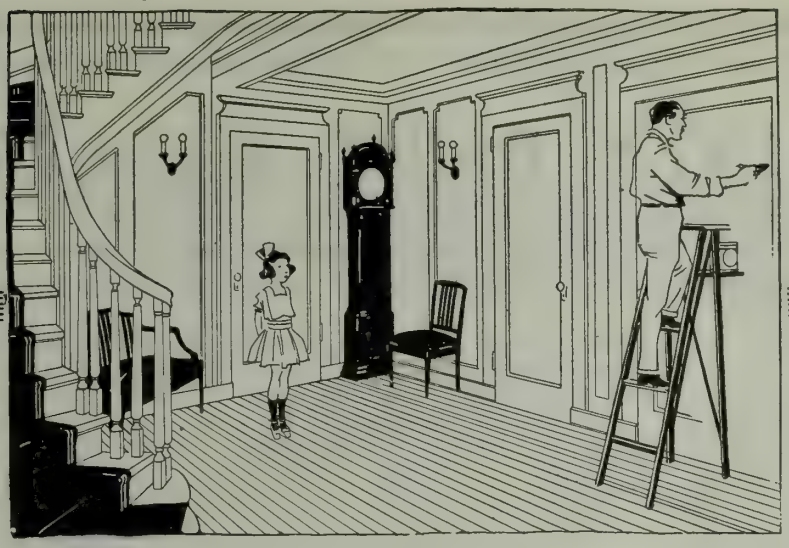
Jimmy, however, has maintained throughout that many of the fundamentals underlying his aggressive business ideas and methods were gained by the close observation of women folks and their attitude towards goods bought and delivered by him at the back door.

IMPERIAL VARNISH AND COLOR IN MONTREAL

Paint and Varnish Ltd., Montreal, regarding the incorporation, of which HARDWARE AND METAL made announcement last week, are assuming the agency for Eastern Canada of the Imperial Varnish and Color Co., Ltd., Toronto.

Harry Hart, who has been Eastern representative for the Imperial Varnish and Color Company, Ltd., will, it is understood, continue as manager of Paint and Varnish Limited. Under the capitalization of $100,000, the new company expresses itself as looking forward to an increase of business in this territory.

MAY STANDARDIZE PAINT CANS



President Cornish, of the National Paint, Oil and Varnish Association, has appointed a special committee to report on the question of standardization of cans. It is stated that standardization would assist materially in securing for the paint manufacturers better service and lower cost of packages if the purchasing power of the paint trade were to concentrate on as few styles and sizes as possible—particularly cans.

PAINT CHANGES IN BRIEF

Regular colors and white advance	25c per gallon
Marine paints (except "dory") advance	25c " "
Inside and outside floor paints advance	25c " "
Porch floor paint advances	25c " "
Ground color paint advances	25c " "
Graphite paints advance	25c " "
Galvanized iron paint advances	25c " "

(Usual differentials for sizes other than gallons)

Also pure linseed oil putty (differential over regular prices advanced 50c per 100 lbs.).

When Father Varnishes

Unskilled varnishers want Finishes that brush on easily and cover well. Berry Brothers' Varnishes, Enamels and Stains not only work smoothly, but produce a finish that satisfies completely both in appearance and wear. These features appeal to the amateur and professional painter alike. This is what makes the sales value of Berry Brothers' label such a good varnish selling asset. It is recognized by all classes of buyers as a guarantee of quality and dependability.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, June 28.—The event of the week in paint markets is that of an increase of 25c per gallon for prepared paints containing linseed oil. This is in accordance with the tendencies forecast for some time and particularly last week in HARDWARE AND METAL. Advancing flax markets made for high and still higher oil; turpentine was high and very scarce and labor costs continued so high that the change was considered necessary. Full list of the changes with comment is to be found elsewhere in this issue.

The linseed oil situation is, if anything, less promising than it was a week ago, for there has been a continued scarcity of seed and quotations are decidedly nominal with some not offering any supplies. The same condition applies to turpentine and this commodity is very scarce indeed.

White lead is not likely to be reduced, and white lead in oil is in a decidedly strong position. Pure linseed oil putty is up 50c per 100 lbs., the differential over ordinary grade now being $2.50. Shellacs are extremely scarce and advances are again probable for the immediate future.

Price Withdrawals On Linseed Oil

Montreal.

LINSEED OIL.—So scarce has oil become that several of the jobbers have decided to make no offering and have, in consequence, withdrawn quotations. There is much difficulty in securing supplies and in any case the one to four barrel quantities are all that most jobbers will entertain. The nominal basis of $2.25 to $2.35 still holds, but prices are really not guaranteed from day to day.

Raw—	Imp. Gal.
1 to 4 barrels	$2 35
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$2 37½
5 to 9 barrels	....
10 to 25 barrels	....

Scarcer Still Is Turpentine

Montreal.

TURPENTINE.—With prices higher than ever, and the likelihood of relief undefined, jobbers are, in most instances, withdrawing quotations on turpentine altogether and have little prospect of much relief. It is a question these days, some of them state, of securing such supplies as they require for manufacturing needs. Small lots at high prices are really all that the trade can hope for at the moment, and on a nominal price basis only.

Turpentine—	Imp. Gal.
1 to 4 barrels	....
Small lots	....

(Packages extra.)

Fifty-cent Advance For Pure Putty

Montreal.

PUTTY.—An advance of fifty cents in the differential for pure putty has been made this week and the increase over ordinary prices is $2.50 instead of $2. This was necessary owing to the heavy increases in the price of linseed oil. Ordinary putty is unchanged.

Per 100 lbs. in following quantities.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ¼ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60

Firm White Lead in Oil; Will be Held

Montreal.

WHITE LEAD IN OIL.—That the price of lead will not decline is assured through the action of the United States lead corroders, and who, as already announced in HARDWARE AND METAL, have continued their terms and basis for several months. There is a steady and firm undertone with seasonable movement and the basis is as follows: Five ton lots per 100 lbs., $15.50; ton lots, $16; and smaller quantities, $16.35. There is no assurance that lead in oil will not be advanced; it depends altogether upon conditions and upon the trend of linseed oil in particular.

Prepared Paints Make 25c Advance

Montreal

PREPARED PAINTS—It was pointed out last week in HARDWARE AND METAL that an advance might come in paint, "and they may come even before the week-end." Twenty-five cents per gallon has been added to previous prices and the increases are applicable to first and second quality oil paints, marine paints excepting dory, inside and outside floor paints and porch paints, ground color paints and graphite paint. Flat wall paints are unchanged.

These changes were altogether expected and have come as a result of the increases for linseed oil and turpentine. Full attention is drawn to the circumstances in a special article elsewhere in this issue.

TORONTO

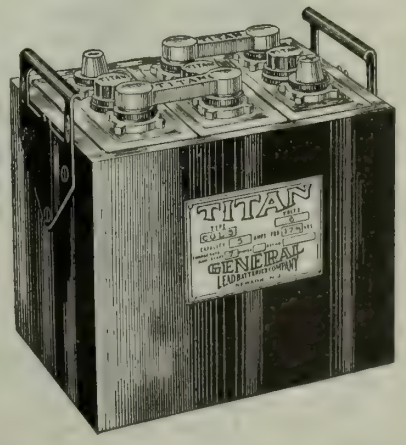
TORONTO, June 26.—Crushers who have been predicting $2.50 linseed oil saw their prophecy realized today. Not only this, but the market is still advancing and is expected to reach $2.55 at any time. A sensational advance of 17 cents yesterday in flaxseed is behind the latest jump, and is backed by the condition of the United States markets, where stocks are low by the heavy buying from overseas. Turpentine is reacting, and unless European buyers come into the field again prices are likely to move steadily to lower levels. The rosin market continues firm.

Linseed Oil Takes Another Big Jump

Toronto.

LINSEED OIL.—There is no telling just where linseed oil prices are going to. Those who said it was going to $2.50 have seen it reach that point and pass it. There is no relief in sight, crushers say, until the new crop comes in, and even then, with big demands to be met from overseas, it is questionable if the market will react greatly. Overseas buyers continue to place large orders for Argentine seed, and many of the shippers are still passing up American customers and paying forfeits and sending their supplies to Europe. With Russia a non-producer and England and other buyers having to depend upon Argentine seed, there is likely to be a continued brisk demand. In the meantime American firms are badly in need of supplies and are not getting them. A factor that may help the general situation is that according to reports there is at least a ten per cent. increase in the acreage sown at home, and with the splendid weather conditions that have prevailed, a large increase in the yield is likely. Quotations are as follows:

Linseed Oil—	Raw
1 to 2 barrels, gal.	$2 47	$2 50
3 to 5 barrels, gal.	2 46	2 49
10 barrels and over	2 44	2 47



The Sign of "A Better Battery"

IF THERE IS *ONE* THING FOR THE CAR—

that you cannot afford to have anything but the best, it is a storage battery. You have heard it said—that the battery in your car is never wrong—that it "laid down" because you "abused" or "neglected" it. You, as a mechanic, will know differently. It is not always the user's fault. Not all batteries are built for the unusual work—the TITAN is.

The TITAN is built to produce the limit of endurance that is humanly possible in a storage battery. The TITAN batteries are not made for ordinary work, but for gruelling, exacting, trying work, that would exhaust the stamina of the average battery in no time. It costs no more than others, and outlives them. Investigate!

Any of our Branch Houses can supply you. Get Battery Wise To-day.

Turpentine Easier; Rosins Holding Firm

Toronto.

TURPENTINE.—Owing to a cessation at Southern ports of shipments to overseas points, prices at primary points have eased during the week and there is every indication that they will go to still lower levels. The fact that many of those who held shipping space are releasing it indicates that the overseas demands, at least the most pressing, have been met, and, as this was the big factor in the advances made recently, the market is expected to decline. Nothing in the nature of a slump is looked for, however, as there is a strong home demand, and as soon as prices are stabilized steady buying is expected. Reports indicate that this year's crop will not be materially larger than that of last season. Rosins are holding fairly firm, but the market has assumed a waiting attitude and the tendency will probably be to slightly lower prices. Quotations are as follows:

Turpentine—	Imp. Gal.
1 barrel (barrel included)	$1 65
2 to 5 barrels (barrel included)	1 64
5 gallon lots	1 75

Prices of Oil Paints Are Advanced 25 Cents

Toronto.

MIXED PAINTS.—The advance predicted in last week's issue of HARDWARE AND METAL for all oil paints is now in effect, and quotations are on a basis of 25 cents per gallon higher. Only the oil paints are affected, and the increase was necessitated by unprecedented prices for linseed oil and turpentine.

Five-cent Advance In White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Owing to a change having been made in the freight rates between Toronto and Montreal, prices of white lead in oil have been advanced 5 cents. There is a steady demand for this product, and the market is expected to continue very firm. Quotations are as follows: 5 ton lots, $15.85 per 100 pounds; 1 ton lots I16.35, and in smaller quantities $16.70.

Glass Prices Rising; Putty Has Advanced

Toronto.

GLASS, PUTTY.—There is every indication that an advance in window glass prices are coming, although when it will go into effect is not yet known. The advances made by American manufacturers in prices of plate glass will not, it is stated, be put into effect in Canada until the present stocks are exhausted. Business in general is quiet and is showing the effects of labor troubles. Toronto prices of putty have been advanced 5 cents following a change in the freight rates between Montreal and Toronto. With linseed oil advancing steadily it is not unlikely that further advances in putty prices will come. Quotations at present are:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 60
Do., 25 lb. iron	6 45	6 70	6 85
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 50

Pure putty advance $2.50 per 100 lbs. over above.

Oil Paints Make 25-Cent Advance

Canadian Paint, Oil and Varnish Makers Advance Prices in Accordance With the Increases for Oil and Turpentine—Varnishes Held, But Shellacs Up—Marine Porch Floor Graphite Paints Up

ADVANCES have been made in various prepared paints, the basic elements of which, in part at least, are linseed oil and turpentine. Steadily, and almost methodically, linseed oil has been advancing consistently from week to week, until it reached a point at which the paint manufacturers felt they must have some advance to cover the increased cost to them of the manufactured product. And, being unable to buy supplies of flax, even in cases where they crushed their own oil, only on a constantly rising market, and an increasingly bare market at that, they concluded it necessary last week to put an advance into effect forthwith. The new prices are effective as from June 20. Regular prepared paints, marine paints, floor paints, porch floor, ground color and graphite paints are all increased in price 25 cents per gallon, the usual differentials for other sized packages applying.

HARDWARE AND METAL has consistently pointed out to its readers the strong tendencies that were likely to obtain for linseed oil. A world market has been clamoring for available oil for a long while. Even before the Canadian active season arrived the crushers were afforded outside markets for their supplies, and heavy shipments were made from time to time to United States and other markets.

Then, during the present season, oil arrived from England and found its way into the Canadian paint trade, but this activity was temporary. Argentine market influence had much to do with determining the Canadian price basis. Much seed that might have come to Eastern Canada found its way to United States mills.

Turpentine, the other commodity contributing toward making the new prices necessary, has not only been very scarce for months, but has been advancing for several weeks, and has reached a price, in some instances, of nearly $1.75 per gallon. Delivery of this has been most spasmodic, and it is questionable if there will be much improvement. The paint manufacturer has been unable to meet the demand sometimes, and in addition to this fact, he has been faced with the constant necessity of providing himself with requisite supplies for his own manufacturing requirements.

The remaining feature of consequence at the moment is the higher overhead production costs brought about through high-priced labor. With this last factor, a strong three-fold condition has been created which has at last made for an increase of price, and which has been consistently forecast in the columns of HARDWARE AND METAL for the past two or three weeks.

Another Factor

Another factor of considerable importance is that of the position held by white lead. As already referred to in special editorial market articles in the columns of HARDWARE AND METAL, the producers have given notice of the continuance of the same basis as was to obtain for the first half of 1919. This means that there will be no reduction in lead prices or in terms. Consequently, material that it was hoped would be purchasable on a fairer price basis has held its position firmly. When this lead is ground with the present high-priced oil, it is patent that the price to the manufacturer putting the product into his oil paints is considerably higher.

Will Hold Firmly

"Prices are based on factory costs," said a large manufacturer to HARDWARE AND METAL. "When the last changes were made on paint, linseed oil, at around $2.10 per gallon was that on which the price of paint was based, and this position has changed entirely. It was hoped, when the war stopped, that prices for raw material would go down. There has been so much export that prices have held, and there has been nothing to do but to make this increase. There is no likelihood of any drop coming from the prices just put into effect."

This expresses, briefly, what others have stated as their opinion. The season of high-priced paint is here, and it does not give promise of changing. With activity reported from all sections of the country the dealer will continue to purchase his regular requirements promptly.

Aside from paint, the only staple change made is that of an increase of 50c per 100 pounds for pure linseed oil putty, making the new differential $2.50.

Dougall Da-Cote Motor Car Enamel is a year 'round seller. That's why it's such a good line to handle. No fear of it staying on your shelves. It sells itself and incidentally brings to your store a lot of new business that you wouldn't otherwise get.

DOUGALL Da-Cote

Is made of the finest Dougall Varnish and finest pigments, ground into an enamel cream which flows on so smooth that no brush marks show. Da-Cote dries overnight.

We'd like every Dealer to have one of our new Da-Cote Window trims. The quantity is limited, however, so first come first served. Better sit down and write to-day. They are sent free on request.

The Dougall Varnish Co., Limited

MONTREAL

Associated with Murphy Varnish Co., U.S.A.

MEAKINS BRUSHES

CARTER'S

Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Paints, Oils, Varnishes, Glass, Etc.

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, are a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

HERE is a popular high-grade all-cast type furnace in which you will be able to interest your customers without difficulty. You can assure them that a Williamson Pipeless Furnace will give all we say it does and eliminate the inconveniences so much to be feared by the careful purchaser.

The Williamson Pipeless Furnace

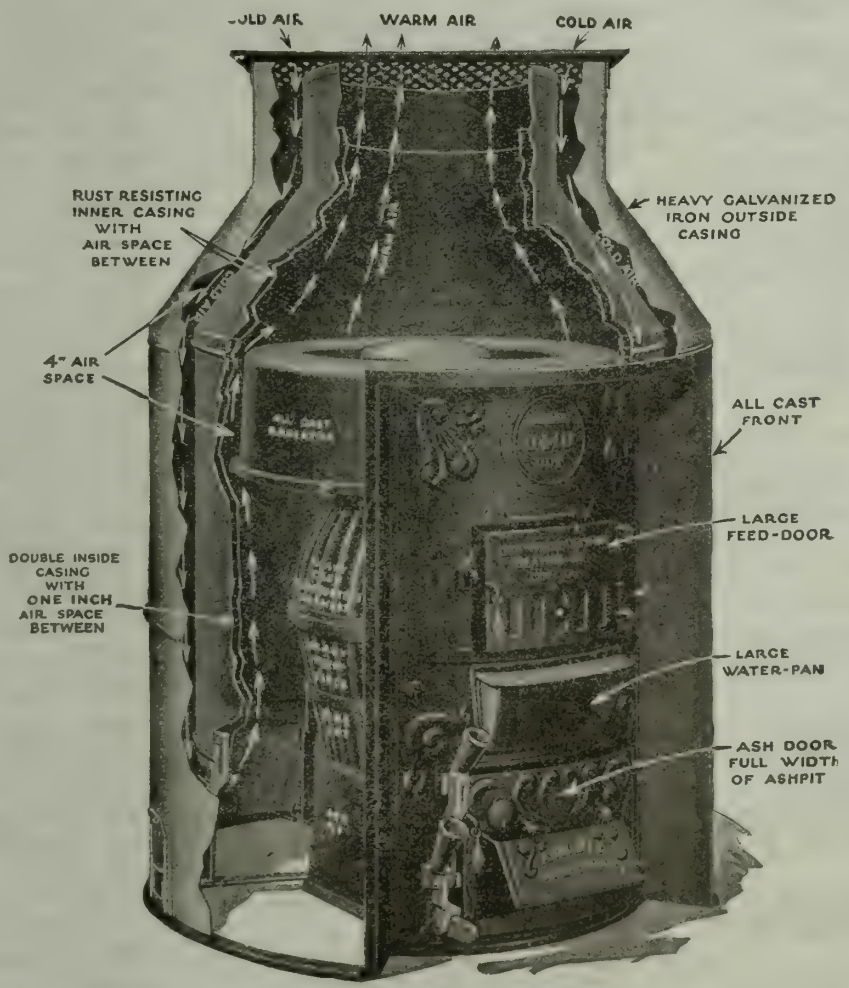
has been devised to meet the demand that the popularity of this type of furnace has created and developed throughout the country.

Gives

Clean, even, adequate heat.

Healthful, properly humidified air.

Efficiency and economy.



The fire in the cellar and warm air in the rooms above.

A cellar that is just right in space and temperature.

A clean, roomy house.

A safe heating plant, all heated parts surrounded by a jacket of cold air.

A guaranteed product, a sound investment.

Write to-day for complete information and prices.

Every Williamson Pipeless Furnace sold means a satisfied customer.

Eliminates

The kind of heat that on a cold day freezes one side of the house and roasts the other.

High Temperature, dry air — the best conductor of sickness.

Big fuel bills and cold homes.

The fire in the house and the heat out the chimney.

A cellar crowded with pipes and a cellar either freezing or too hot.

Space-taking stoves and grates with soot, ashes and coal dust all over.

The constant menace to a home and children from fire.

The worry and chance of a losing proposition.

Letting You Into A Secret

THEY were talking about things in general — Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakening up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly ready by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap-book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

THE MACLEAN PUBLISHING CO., LTD.,
Dept. H.M., 143-153 University Ave., Toronto.

Send me THE FINANCIAL POST for

one year at Three Dollars
four months at One dollar

I will remit on receipt of bill in the usual way.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TENTS — CANOES — PADDLES — PACK SACKS — CUSHIONS

These lines find ready sale through the hardware trade. Your stock need not be large—just a few standard size tents—as we carry a large, well assorted stock for prompt shipment. Canoes and paddles of all kinds can be supplied, but should be ordered as far ahead as possible to ensure delivery when required. Various kinds of canoe cushions as well as launch cushions made to order. Can be supplied on short notice. Pack Sacks of every kind and style. Send for catalogue.

MARBLE'S
Summer Sales Getters

All the world-famous sportsmen use and publicly recommend Marble's Knives, Axes and other specialties. Our national advertising is another year-round sales factor that increases the steadily growing demand. If you aren't selling Marble's Specialties write for our Catalog and Dealer's Proposition at once.

MARBLE'S HUNTING KNIVES — the world's best sellers in knives— a dozen different kinds for amateurs and experts. "Woodcraft" knife, shown in illustration, retails at $1.65. Other styles up to $3.85.

MARBLE'S EZY-QUICK REPAIRERS
They mend instantly and permanently, punctures in boats, boots, shoes— anything of rubber, leather and canvas. Positively leak-proof. 3 SIZES AT 10c 15c, 25c. Ask about self-selling display card of EZY-QUICK Repairers.

MARBLE'S SAFETY AXES—They sell to every hunter, camper and fisherman. No. 2 Axe, as illustrated, 11 inches long, weighs 20 oz. Steel handle. Lead-lined guard. Solid steel blade 2 3-8 x 4 inches. List price, $2.75. Other styles $1.65 to $4.40

TRADE SUPPLIED BY JOBBERS. LIBERAL DISCOUNTS TO DEALERS.

Gladstone - Mich.

Unbelievers are Converted!

When we state the facts about WINDSOR SOLVENT STAIN, people often appear skeptical. They think we are just a little "touched by the heat." The working of our SOLVENT STAINS seems to be miraculous or impossible.

THE ACTUAL **SEEING** BRINGS THE **BELIEVING.** **YOU** CAN CAUSE A SENSATION in your town by a very little demonstrating of these items!

They penetrate the wood, go through old varnishes and leave the surface as before —turning OAK to MAHOGANY, or WALNUT, or GREEN or WEATHERED, NINE LOVELY SHADES.

Get in touch with us right away.

Let **US** show **YOU.** The rest is easy. This is only one of our many lines.

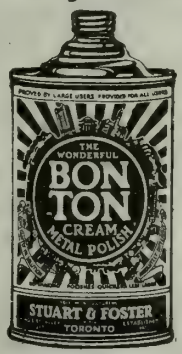
PEERLESS PERFECTION POULTRY FENCING



The first cost of a good fence is but little more than a cheap or poor one—no more work and lots more satisfaction. **A REAL FENCE—NOT NETTING**

Strongly made and closely spaced—making it a complete barrier against large animals as well as small poultry. Top and bottom wires No. 9—intermediates No. 13 wire—made by the Open Hearth process which time and other tests have proven to be the best. Ask about our farm and ornamental fencing. Write today for catalog. Do it now. It is sent free on request.

C-P Paris Green

Wanted on Every Side

THE abnormal heat, the increasing acreage in potatoes, etc., the high value of C-P Paris Green, and the knowledge that there is none better, account for the tremendous demand this season. It will soon clear dealers who haven't re-ordered out of stock. Look over *your* stock.

Have you re-ordered yet?

Meet the Enormous Demand

C-P Paris Green is better than the standard required by the Dominion Government. It is absolutely safe, being prepared with such scientific skill that the *free arsenic* is infinitesimal, and *cannot harm* the plants. This makes it economical and extraordinarily effective. Stays well in suspension and clings to the leaves in spite of rain.

The farmers in your district will require more of it—send your repeat order now—and don't let sales go elsewhere.

THE CANADA PAINT CO.
LIMITED

Paint, Varnish and Dry Color Makers,
Linseed Oil Crushers

Makers of the Famous "Elephant Brand" White Lead

572 William St., Montreal
112 Sutherland Ave., Winnipeg

Toronto Calgary Halifax
Oxide Mines, Red Mill, Que.

The Farmers Are Needing a Great Deal More Paris Green This Year.

THIS warm June has brought out the bugs in armies that have to be destroyed at once, with *more* and still *more* Paris Green.

You will need *extra* stock to meet the increased demand.

Many dealers have already sent in their repeat orders. The call on every hand is for Berger's. Your customers will go where they can get Berger's, because Berger's "kills the bugs."

It contains a minimum of free arsenic, yet has greater strength than the Government standard, so that Berger's kills effectively without danger of injuring the foliage.

It does not wash off easily, is light in gravity and stays well in suspension. Can be used dry or in solution.

BERGER'S PARIS GREEN

the S-W Product

—is used the world over. Put up in ½, 1 and 2-lb. tins and papers—in 25, 50 and 100-lb. steel drums—in arsenic kegs and petroleum barrels.

Wire your repeat order to-day.

A Right Quality Product for Every Purpose

INVITATION
to all
SHERWIN-WILLIAMS
Agents and Dealers

Are your opinions worth 5 minutes of your time ?

We believe they are

Every man attaches some value to his opinions. *You* value yours ---and that is why *we* value them

THEY MEAN---

1. Useful ideas which can be applied for our mutual benefit.
2. That your good-will is not a mere passive interest—but rather, a wide-awake desire to see S-W Products more widely used than ever.

Possibly you are one who overlooked the invitation sent out in S-W-P last week, to send us your ideas and opinions.

Before it slips your mind, hunt the form up and mail it to-day, filled out. If you did not receive one let us know by post card.

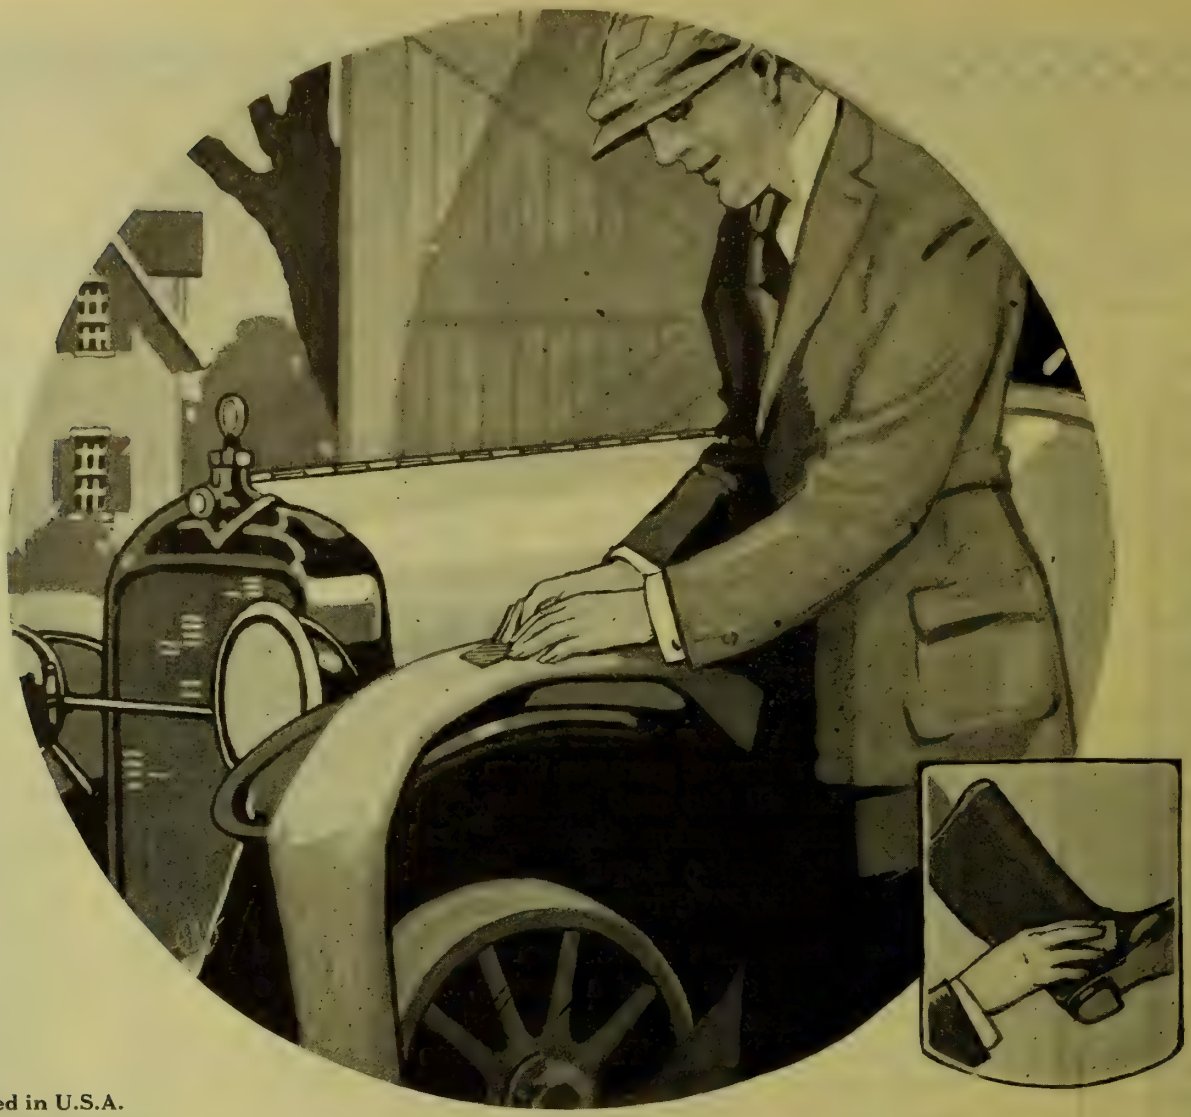
DUNLOP TIRES —EVERYWHERE

¶ Dunlop Traction Tread can be bought in a greater number of garages than any other tire. Same with all the rest of the "Two Hands" Tire family: Dunlop Cord — "Traction" and "Ribbed"; Dunlop Regular—"Traction," "Special," "Ribbed," "Clipper," "Plain."

¶ Any place that is good enough for you to drop into in search of a casing, tube or some gasoline, oil or free air, is a good enough place for us to sell Dunlop Tires. In these days when tire service is priceless—it is something to know that Dunlop Distribution is of the most far-reaching character—the most successful "Tire-When-It's-Wanted" co-operation ever achieved in Canada.

Dunlop Tire & Rubber Goods Co., Limited



Head Office and Factories: TORONTO

Branches in the Leading Cities.

Tires for all purposes. Mechanical Rubber Products and General Rubber Specialties.

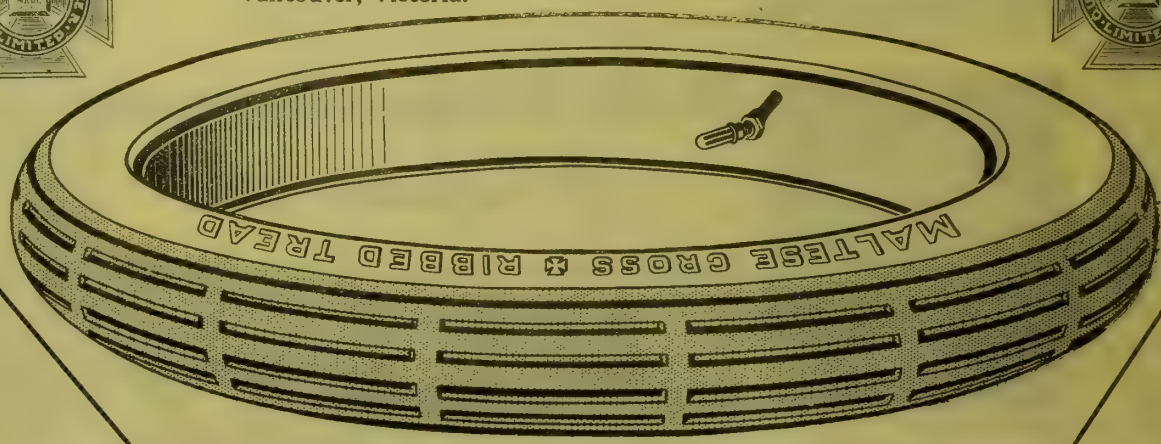
FORERUNNERS of SUCCESS



Putting in a stock of Maltese Cross Tires is the forecast of success. Just as the red sunset promises a fine day, a stock of Maltese Cross Tires promises big business. Each Maltese Cross Tire you sell is a salesman working up repeat orders for you. Each sale is a forerunner of dozens to follow. Good tires, like Maltese Cross Tires, make the satisfied users real, live, speak-right-out advertisers for you, Mr. Dealer, if you are lucky enough to handle our line. There's money in selling Tires, but the big profit comes from the big business that follows the selling of **"THE TIRES THAT GIVE SATISFACTION."**

Law Against Glaring Headlights Enforced

Prices Per Pair
F.O.B. TORONTO

8 in. to 8⅝	$4.00
8¾ in. to 9⅜ in. . .	4.75
9½ to 11¼ in. . . .	6.20

Legalite Jr. for Fords

8½ in., per pair, $3.00

Throughout various Provinces in Canada and States in the U.S.A., the laws in force against the glaring headlight nuisance on automobiles are being vigorously enforced.

ONTARIO NEXT

It has been announced on good authority that an Order-in-Council will shortly be promulgated (perhaps before this is published) making it necessary for every automobile to be equipped with a non-glare device.

LEGALITE LENSES ARE LEGAL EVERYWHERE

Legalite Lenses comply with all Provincial and State laws, and are recognized as the best device invented to eliminate the glare of blinding headlights.

A PHENOMENAL OPPORTUNITY FOR DEALERS.

DEALERS! The announcement of the Government's intention to vigorously enforce the anti-glare law will result in an avalanche of orders for Legalite Lenses. Be prepared to profit by this. **Order** immediately as many motorists will purchase lenses in anticipation of the enforcement of the law. In your territory only a very small percentage of the cars are equipped with anti-glare devices. All that are not, yes, and many that are, are sure prospects for Legalite Lenses because of their superiorities.

ADAMSON

THE COMPLETE LINE OF VULCANIZERS

Money Makers for the Dealer

MODEL "E" $1.50
5-Minute Vulcanizer
Uses Adamson Drv Fuel or gasoline. Repairs tube punctures permanently in 5 minutes.

MODEL "T" $2.50
For ordinary repairs on inner tubes.

MODEL "U" $3.50
Repairs tubes and cases. Mer ds tread cuts and small blow-outs.

Write for Adamson store displays and dealer helps

DEALERS:

There's an Adamson for every kind of tube and casing repair that a motorist can make. You needn't miss a single sale when you stock the Adamson line.

The high price of tires and tubes and the nation-wide demand for Conservation will practically double the number of Adamson users—now over a million.

To show Adamsons is to sell them. Every motorist knows they are easiest to use, quick and sure in results, and make the strongest possible repair.

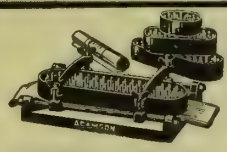
Adamsons cost least to buy and operate; any model will use common gasoline—always dependable and easy to get.

STOP THAT LEAK

Tread cuts and surface injuries admit moisture and sand into the fabric to rot and weaken it, causing blow-outs and short mileage.

—Sell Adamsons to repair such injuries in a few minutes time, while the tire remains on the wheel.

Practically every motorist wants an outfit to vulcanize his own tube punctures and blow-outs.—Sell him the dependable Adamson to make quick and lasting repairs—at home or on the road—without the use of cement.



For quick sales and no dead stock carry Adamson Vulcanizers and Repair Gum.

Sold by all Jobbers

Covered Kettle—One of the many Viko products

The Air Test Under Water

One dissatisfied customer means one customer less for the dealer or garage man.

Radiators that are absolutely water-tight will hold and draw customers.

You can prove to them that McKinnon Radiators are water-tight.

When they cannot find the puncture in their tire they put it under water and watch for bubbles.

That is the way every McKinnon Radiator is tested before it leaves the factory.

Heavy air pressure under water is the test we apply to McKinnon Radiators.

There is absolutely no possibility of a leak.

McKinnon Radiators
are
"Really Cellular"

They are made to meet emergencies.

The unforeseen accident, the punctured radiator, need not leave you stranded.

The remaining cells are as good as ever, just plug up the holes with wooden plugs or any adhesive substance, fill up the radiator and drive on.

Your garage man will replace the broken cells with new ones, and the radiator is as good as new.

All dealers should carry McKinnon Radiators.

They are proof against damage through vibration. They are made to stand hard usage.
